The Farmers Home Administration ("FmHA") of the Department of Agriculture has two programs that might benefit firms producing LCF. Some companies may be able to participate in a program of loan guarantees to businesses located in areas other than cities of over 50,000 population. As with EDA business loans, however, these guarantees are not available to firms in industries found to have long term over-capacity. FmHA also can make grants and loans to public bodies, such as local development organizations and governments, in areas other than cities of over 10,000 population. These funds can be used for public works projects, such as utility extensions

and access roads, that would benefit industry.

Additional information about the adjustment assistance program and copies of the report, Prospects for Adjustment Assistance for firms in the Low-Carbon Ferrochromium Industry, are available from the Office of Public Affairs, Economic Development Administration, Room 7019, U.S. Department of Commerce, Washington, D.C. 20230, telephone 202–377–5112.

CHARLES L. SMITH,
Acting Director, Trade Act Certification Division, Office of Planning and Program Support.

Maritime Administration

[Docket No. S-570]

EQUITY CARRIERS, INC.

Application

Notice is hereby given that an application dated August 9, 1977, has been filed under the Merchant Marine Act, 1936, as amended (the Act), for operating-differential subsidy with respect to the operation of five dry bulk vessels for service in the U.S. foreign trade. The proposed trade is from U.S. ports to the Far East, and worldwide service.

Inasmuch as the applicant and affiliated or associated firms own, operate and charter ships in the domestic intercoastal, intracoastal or coastwise service, written permission of the Maritime Administration under section 805(a) of the Act will be required if its application for operating-differential subsidy is to be granted.

Falcon Carriers, Inc., an affiliated or associated firm of Equity Carriers, Inc., charters four vessels to the Military Sealift Command. The vessels are the *Susquehanna, Naches, Columbia* and *Hudson*. Terms of these charters allow the charterer to employ these vessels in the coastwise or intracoastal or intercoastal trade, or in the Great Lakes, or on bays, sounds, rivers, harbors or inland lakes of the United States or in foreign trade not prohibted to U.S.-flag vessels, or in such other trade or trades as the Secretary may approve.

Any person, firm, or corporation having any interest (within the meaning of section 805(a)) in such application and desiring to be heard on issues pertinent to section 805(a) and desiring to submit comments or views concerning the application must, by close of business on September 12, 1977 file same with the Secretary, Maritime Administration, in writing, in triplicate, together with petition for leave to intervene which shall state clearly and concisely the grounds of interest, and the alleged facts relied on for relief.

If no petitions for leave to intervene are received within the specified time, or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing will be held, the purpose of which will be to receive evidence under section 805(a) relative to whether the proposed operation (a) could result in unfair competition to any person, firm or corporation operating exclusively in the coastwise or intercoastal service, or (b) would be prejudicial to the objects and policy of the Act relative to domestic trade operations.

(Catalog of Federal Domestic Assistance Program No. 11.504 Operating Differential Subsidies (ODS).)

By Order of the Assistant Secretary for Maritime Affairs/Maritime Subsidy Board

Dated: August 22, 1977.

JAMES S. DAWSON Jr.,
Secretary.

[FR Doc.77-24572 Filed 8-24-77;8:45 am]

[Docket No. S-569]

STATES STEAMSHIP CO.

Application

Notice is hereby given that States Steamship Company has applied to amend its present Operating-Differential Subsidy Agreement, Contract No. FMB–62, to modify its Trade Route No. 29 Freight Services to allow the loading and discharging of cargo carried in containers moving under bills of lading in which Singapore is named as either the port of origin or the port of destination.

Any person, firm, or corporation having any interest in such application and desiring a hearing on issues pertinent to section 605(c) of the Merchant Marine Act of 1936, as amended (46 U.S.C. 1175), should, by the close of business on September 12, 1977, notify the Secretary, Maritime Subsidy Board in writing, in triplicate, and file petition for leave to intervene in accordance with the Rules of Practice and Procedure of the Maritime Subsidy Board.

In the event a section 605(c) hearing is ordered to be held, the purpose thereof will be to receive evidence relevant to (1) whether the application is one with respect to a vessel to be operated in an essential service served by citizens of the United States, which would be in addition to the existing service, or services, and if so, whether the service already provided by vessels of United States registry in such essential service is inadequate, and (2) whether in the accomplishment of the purposes and policy of the Act additional vessels should be operated thereon.

If no request for hearing and petitions for leave to intervene is received within the specified time, or if the Maritime Subsidy Board determines that petitions for leave to intervene filed within the specified time do not demonstrate sufficient interest to warrant a hearing, the Maritime Subsidy Board will take such action as may be deemed appropriate.

(Catalog of Federal Domestic Assistant Program No. 11.504 Operating Differential Subsidies (ODS).)

By Order of the Maritime Subsidy Board.

Dated: August 22, 1977.

JAMES S. DAWSON, Jr.,
Secretary.

National Oceanic and Atmospheric Administration

FISHERY MARKET NEWS REPORTS

Rates for Changing From a Weekly to a Full Service Subscription

Subscriptions for Fishery Market News Reports published by the National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), of the U.S. Department of Commerce are accepted for two types of service—full service and weekly summary (FR, Vol. 40, No. 69, April 9, 1975). The full service information is mailed on Monday, Wednesday, and Friday at $35 per year. The weekly summary, including the Friday report, is mailed on Friday at $15 per year. Reports are issued from five cities—Boston, New York, New Orleans, Terminal Island, and Seattle. Rates for changing from a weekly to a full service subscription during a subscription year are listed below:

1st month	$20
2nd month	19
3rd month	17
4th month	15
5th month	14
6th month and after	12

No changes will be made from a full service report to a weekly summary.

Make check (drawn on a U.S. Bank) payable to:

U.S. Department of Commerce-NOAA

Mail check or money order to:

U.S. Department of Commerce-NOAA, National Marine Fisheries Service.

Direct to address of office that issues the report—see below:

(Blue Sheet), Room 10, Commonwealth Pier, Boston, Mass. 02210.
(Green Sheet), 201 Varick Street—Room 951, New York, N.Y. 10014
(Goldenrod Sheet), 546 Carondelet Street—Room 412, New Orleans, La. 70130.
(Yellow Sheet), 300 South Ferry Street, P.O. Box 3266, Terminal Island, Calif. 90731.
(Pink Sheet), 1700 Westlake Avenue, North—Room 732, Seattle, Wash. 98109.

Dated: August 18, 1977.

WINFRED H. MEIBOHM,
Associate Director.

Office of the Secretary

COASTAL ZONE MANAGEMENT ADVISORY COMMITTEE

Renewal

In accordance with the provisions of the Federal Advisory Committee Act, 5

U.S.C. App. I and Office of Management and Budget Circular A–63 of March 1974, the Secretary of Commerce has determined that the renewal of the Coastal Zone Management Advisory Committee is in the public interest in connection with the performance of duties imposed on the Department by law.

The Committee was first established in August 1973, was rechartered on August 15, 1975, and it was to terminate on August 15, 1977. Its original purpose was to advise, consult with, and make recommendations to the Secretary on matters of policy concerning the coastal zone, as provided in the Coastal Zone Management Act of 1972.

The Committee's advice has been useful to the Office of Coastal Zone Management in formulating policy, deciding program goals, and as a sounding board for new initiatives. A number of recommendations made in the form of resolutions to the Secretary of Commerce have been applied by the Office of Coastal Zone Management to its program formulation, particularly in the drafting of regulations. The Committee has been effective in monitoring legislative amendments which might affect the CZM Program; several of its recommendations have been forwarded to appropriate Congressional Committees by the Secretary of Commerce. A Task Force on State Assistance was formed to provide technical assistance on public participation to states on a request basis. Comments received from the states maintain the success of this approach. In addition, a Task Force on Estuarine Sanctuaries is currently evaluating the national estuarine sanctuary program's effectiveness and future directions.

The Committee will continue with a balanced representation of 11 members to be obtained through normal attrition procedures from its present complement of 15 members. The Chairman shall be elected from the membership. The Committee will operate in compliance with the provisions of the Federal Advisory Committee Act.

Copies of the Committee's revised charter will be filed with appropriate committees of the Congress and with the Library of Congress.

Inquiries or comments may be addressed to the Committee Liaison Officer, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, Rockville, Md. 20852.

Dated: August 18, 1977.

ELSA A. PORTER,
Assistant Secretary for Administration.

DEPARTMENT OF DEFENSE

Department of the Air Force

USAF SCIENTIFIC ADVISORY BOARD

Meeting

AUGUST 16, 1977.

The USAF Scientific Advisory Board Ad Hoc Committee on M–X C³ will hold a meeting on September 12–14, 1977, in the Pentagon from 8:30 a.m. to 5:00 p.m. both days.

The Committee will conduct classified discussions concerning an in-depth review of the advanced ICBM C³ program.

The meeting concerns matters listed in Section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly, will be closed to the public.

For further information contact the Scientific Advisory Board Secretariat at (202) 697–8845.

FRANKIE S. ESTEP,
Air Force Federal Register Liaison Officer, Directorate of Administration.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 781-2]

STATE-FEDERAL WATER PROGRAMS ADVISORY COMMITTEE

Open Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following committee meeting:

Name: State-Federal Water Programs Advisory Committee.
Date: September 13, 1977.
Place: Environmental Protection Agency, 401 "M" Street, SW., Washington, D.C., Room 2117, Waterside Mall.
Time: 9:00–4:30 p.m. (approximately).

PROPOSED AGENDA

Time, Topic, and Leader
9:00–9:15 a.m., Opening Remarks, Mr. Costle.
9:15–10:00, Remarks, Mr. Jorling.
10:00–12:30, Construction Grants, Update on Legislation, Reallocation of Funds, Streamlining of Construction Grants, Update on 1978 Needs Survey, Mr. Jorling/Mr. Rhett.
12:30–1:30 p.m., Lunch.
1:30–2:00, Water Strategy Development, Mr. Jorling/Mr. Erickson.
2:00–2:30, Pretreatment Strategy, Mr. Jorling/Mr. Davis.
2:30–3:00, Consolidation of Section 106, Program Grants with Other Control Agency Grants, Mr. Jorling/Mr. Erickson.
3:00–3:30, Decentralization, Review of Interim Report on Intergovernmental Operations, Mr. Jorling/Mr. Roush.
3:30–4:00, Safe Drinking Water Act, Mr. Jorling/Mr. Kimm.
4:00–4:30, General Discussion, Members.

These meetings are open to the public. Any member of the public may file a written statement with the Committee before, during or after the meeting. All communication regarding these meetings should be addressed to: Taylor Adams, Office of Water and Hazardous Materials (WH–556), Environmental Protection Agency, 401 "M" Street, SW., Washington, D.C. 20460. Anyone wishing to have their name placed on the mailing list for any Committee reports, meeting announcements, and minutes of all meetings should contact Taylor Adams, either in writing or by telephone 202–755–0405.

Dated: August 18, 1977.

THOMAS C. JORLING,
Assistant Administrator for Water and Hazardous Materials.

[FR Doc.77-24506 Filed 8-24-77;8:45 am]

MOTOR VEHICLE EXHAUST SULFURIC ACID MEASUREMENT PROCEDURES

Availability

AGENCY: Environmental Protection Agency.

ACTION: Notice of Availability.

SUMMARY: The Environmental Protection Agency is making available, upon request, copies of the document entitled "Recommended Practice for Measurement of Exhaust Sulfuric Acid Emissions from Light-duty Vehicles and Trucks." The procedures were developed by the Agency as part of its investigation into the nature of sulfuric acid emissions from passenger cars. The recommended measurement procedure is being made available as a guide for parties interested in conducting tests to measure light-duty vehicle sulfuric acid emissions.

FOR FURTHER INFORMATION CONTACT:

Robert Smith, Regulatory Management Staff, Office of Mobile Source Air Pollution Control (AW–455), U.S. Environmental Protection Agency, Washington, D.C. 20460 (202–755–0596).

SUPPLEMENTARY INFORMATION: The need for developing a procedure for measuring sulfuric acid emissions from light-duty vehicles and trucks became apparent two years ago, when, with the advent of catalyst emission control systems, preliminary data indicated that vehicles equipped with these systems emitted greater quantities of sulfates—primarily small droplets or particles of sulfuric acid and other sulfur compounds—than did vehicles not so equipped. In early 1975, efforts to develop sulfuric acid emission test procedures for light-duty vehicles and trucks were begun as the first step in accurately characterizing sulfuric acid emissions. Developing the test procedure consisted of creating a dynamometer driving cycle which was representative of in-use vehicle operating conditions that caused typical sulfate emissions to occur, and then to assemble the test equipment that would be required to measure these emissions accurately. The result of this development work is the procedure described in the "Recommended Practices • • •" document.

Although the EPA has concluded that, at the present time, sulfuric acid emissions from light-duty vehicles or trucks do not represent a public health threat, the Agency and other organizations remain interested in further study of the levels of sulfuric acid emissions from vehicles equipped with existing emission control systems or systems currently under development. So that data relating to sulfuric acid emissions may continue to be gathered, EPA will provide copies of the complete measurement procedure to interested parties.

Because the sulfuric acid measurement procedure overlaps in many areas the gaseous (hydrocarbons, carbon monoxide, and oxides of nitrogen) emission test procedures described in Subpart B, Part 86 of Title 40 of the Code of Federal Regulations, this "Recommended Practice • • •" is structured in the same for-

mat as Part 86 of Title 40 in order to be as unambiguous as possible. This procedure specifies performance criteria for the constant volume sampler, compatible dilution tunnel and analytical system. Regarding the sampling procedure, individual test facilities should choose the size dilution tunnel most compatible with their test cell configuration. The basic requirements are that the tunnel and sampler provide a well mixed sample, sample isokinetically, and lose less than 4 percent of the sulfuric acid collected. The analytical method described in the recommended practice is the barium chloranilate system. However, titration with photometric end point determination is an acceptable alternative method.

EPA is continuing to explore the automotive sulfates question and will continue to reassess the need to take action to reduce sulfuric acid emissions so as to avoid any real danger to public health from such emissions.

Dated: August 22, 1977.

EDWARD F. TUERK,
Acting for Assistant Administrator for Air and Waste Management.

[FR Doc.77-24738 Filed 8-24-77;8:45 am]

[FRL 781-5]

NATIONAL AIR POLLUTION CONTROL TECHNIQUES ADVISORY COMMITTEE

Open Meeting

Under Public Law 92-463, notice is hereby given that a meeting of the National Air Pollution Control Techniques Advisory Committee will be held at 9 a.m. on September 27 and 28, 1977, at the Olde Colony Motor Lodge and Conference Center, North Washington and First Streets, Alexandria, Virginia 22313. The commercial telephone number (703) 548-6300.

The purpose of the meeting will be to discuss two new source performance standards to be proposed under Section 111 of the Clean Air Act—lead battery manufacturing plants and surface coating (automobile and light truck assembly plants). The agenda will also include a review of a control techniques document for volatile organic compounds as required by Section 108 of the Clean Air Act and a status report for the Committee on the data base to review the new source performance standards for power plants.

All meetings are open to the public. Anyone wishing to make a presentation should contact Mr. Don R. Goodwin, Director, Emission Standards and Engineering Division, Environmental Protection Agency, Research Triangle Park, North Carolina 27711, by September 21, 1977. The area code and telephone number are (919) 541-5271.

Dated: August 19, 1977.

EDWARD F. TUERK,
Acting Assistant Administrator for Air and Waste Management.

FEDERAL ENERGY ADMINISTRATION

ALASKA ENERGY CONSERVATION PLAN

Negative Determination of Environmental Impact

Pursuant to 10 CFR 208.4, the Federal Energy Administration hereby gives notice that it has performed an analysis and review of the environmental impacts associated with the provision of Federal financial assistance for the implementation, by the State of Alaska, of its State Energy Conservation Plan. Federal funding is authorized by Part C of Title III of the Energy Policy and Conservation Act, 42 U.S.C. 6321, et seq.

Based upon assessment of environmental impacts that are expected to result from implementation of this plan, the FEA has determined that Federal financial assistance will not be a "major Federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C). Therefore, pursuant to 10 CFR 208.4(c), the Federal Energy Administration has determined that an environmental impact statement is not required for this plan.

Single copies of the environmental assessment of the State Plan for Alaska are available upon request from the FEA National Energy Information Center, Room 1406, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Copies of the environmental assessment will also be available for public review in the Federal Energy Administration Information Access Reading Room, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Copies of the State Plan are available for public review in the Office of State Energy Conservation Programs, Room 6437, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Interested persons are invited to submit data, views, or arguments with respect to the environmental assessment to Executive Communications, Box OX, Room 3317, Federal Energy Administration, Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on documents submitted to FEA Executive Communications with the designation, "Environmental Assessment—Alaska Energy Conservation Plan." Fifteen copies should be submitted. All comments should be received by FEA by 4:30 p.m. e.d.s.t., August 31, 1977, in order to receive full consideration.

Any information or data considered by the person submitting it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., August 19, 1977.

PAUL L. BLOOM,
Deputy General Counsel, Federal Energy Administration.

[FR Doc.77-24581 Filed 8-24-77;8:45 am]

OHIO ENERGY CONSERVATION PLAN

Negative Determination of Environmental Impact

Pursuant to 10 CFR 208.4, the Federal Energy Administration hereby gives notice that it has performed an analysis and review of the environmental impacts associated with the provision of Federal financial assistance for the implementation, by the State of Ohio, of its State Energy Conservation Plan. Federal funding is authorized by Part C of Title III of the Energy Policy and Conservation Act, 42 U.S.C. 6321, et seq.

Based upon assessment of environmental impacts that are expected to result from implementation of this plan, the FEA has determined that Federal financial assistance will not be a "major Federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C). Therefore, pursuant to 10 CFR 208.4(c), the Federal Energy Administration has determined that an environmental impact statement is not required for this plan.

Single copies of the environmental assessment of the State Plan for Ohio are available upon request from the FEA National Energy Information Center, Room 1406, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Copies of the environmental assessment will also be available for public review in the Federal Energy Administration Information Access Reading Room, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Copies of the State Plan are available for public review in the Office of State Energy Conservation Programs, Room 6437, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Interested persons are invited to submit data, views, or arguments with respect to the environmental assessment to Executive Communications, Box OV, Room 3317, Federal Energy Administration, Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on documents submitted to FEA Executive Communications with the designation, "Environmental Assessment—Ohio Energy Conservation Plan." Fifteen copies should be submitted. All comments should be received by FEA by 4:30 p.m. e.d.s.t., August 31, 1977, in order to receive full consideration.

Any information or data considered by the person submitting it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., August 19, 1977.

PAUL L. BLOOM,
Deputy General Counsel, Federal Energy Administration.

TEXAS, ET AL.

Energy Conservation Plans; Negative Determination of Environmental Impact

Pursuant to 10 CFR 208.4, the Federal Energy Administration hereby gives notice that it has performed an analysis and review of the environmental impacts associated with the provision of Federal financial assistance for the implementation, by the States of Texas, Indiana, Tennessee, Illinois, Wisconsin, and Connecticut, of their State Energy Conservation Plans. Federal funding is authorized by Part C of Title III of the Energy Policy and Conservation Act, 42 U.S.C. 6321, et seq.

Based upon assessment of environmental impacts that are expected to result from implementation of these plans, the FEA has determined that Federal financial assistance will not be a "major Federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C). Therefore, pursuant to 10 CFR 208.4(c), the Federal Energy Administration has determined that an environmental impact statement is not required for any of these plans.

Single copies of the environmental assessments of the State Plans for Texas, Indiana, Tennessee, Illinois, Wisconsin, and Connecticut are available upon request from the FEA National Energy Information Center, Room 1406, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Copies of the environmental assessments will also be available for public review in the Federal Energy Administration Information Access Reading Room, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Copies of the State Plans are available for public review in the Office of State Energy Conservation Programs, Room 6437, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Interested persons are invited to submit data, views, or arguments with respect to the environmental assessments to Executive Communications, Box OW, Room 3317, Federal Energy Administration, Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on documents submitted to FEA Executive Communications with the designation. "Environmental Assessment—(Name of State) Energy Conservation Plan." Fifteen copies should be submitted. All comments should be received by FEA by 4:30 p.m. e.d.s.t., August 31, 1977, in order to receive full consideration.

Any information or data considered by the person submitting it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., August 19, 1977.

GASOLINE MARKETING ADVISORY COMMITTEE SUBCOMMITTEE

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given that an ad hoc subcommittee of the Gasoline Marketing Advisory Committee will meet Friday, September 9, 1977, at 1:30 p.m. in Room 2105, 2000 M Street NW., Washington, D.C.

The objective of the subcommittee is to make recommendations to the parent Committee with respect to matters concerning FEA plans and programs which are related to the responsibilities of the parent Committee.

The purpose of the subcommittee meeting is to discuss and make recommendations concerning gasoline marketing data.

The meeting is open to the public. The Chairman of the subcommittee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the subcommittee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Georgia Hildreth, Acting Director, Advisory Committee Management (202) 566-9996, at least 5 days prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Further information concerning this meeting may be obtained from the Advisory Committee Management Office.

The transcript of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 2107, FEA, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Any person may purchase a copy of the transcript from the reporter.

Issued at Washington, D.C., on August 23, 1977.

ERIC J. FYGI,
Acting General Counsel.

[FR Doc.77-24850 Filed 8-24-77;8:45 am]

FEDERAL MARITIME COMMISSION

[Docket No. 77-44]

ATLANTIC AND GULF/INDONESIA CONFERENCE, ET AL.

Order of Investigation and Hearing

In the matter of Atlantic and Gulf/Indonesia Conference, Atlantic and Gulf/Singapore, Malaya and Thailand Conference, Pacific-Straits Conference, and Pacific/Indonesian Conference: Application for approval of Interconference Agreement Nos. 10175, 10176; and for approval of Conference Amednments Nos. 8080-14, 6060-17, 8240-11, and 5680-18.

The carriers members of the Atlantic and Gulf Indonesia Conference, pursuant to Agreement No. 8080, fix the rates for, and the rules and regulations governing, the transportation of cargo from the United States Atlantic and Gulf Coast ports to ports in Indonesia and Portuguese Timor. The carriers members of the Atlantic and Gulf-Singapore, Malaya and Thailand Conference, pursuant to Agreement No. 8240, fix the rates for, and the rules and regulations governing, the transportation of cargo from the United States Atlantic and Gulf Coast ports to ports in Singapore, Malaya, Thailand, Labuan, and Brunei.

The carriers members of the Pacific-Straits Conference, pursuant to Agreement No. 5680, fix the rates for, and the rules and regulations governing, the transportation of cargo from ports on the United States Pacific Coast, and points within the United States via those ports, to ports and points in Malaysia, Singapore, and Brunei. That conference has published an intermodal tariff, which became effective on November 1, 1976. The carriers members of the Pacific/Indonesian Conference, pursuant to Agreement No. 6060, fix the rates for, and the rules and regulations governing, the transportation of cargo from United States Pacific Coast ports to ports in Indonesia. In addition to a tariff quoting local rates, that conference also publishes a tariff quoting overland rates. An amendment to Agreement No. 6060, which would extend the scope of the agreement to include intermodal traffic, Agreement No. 6060-18, is pending the approval of the Commission. Accordingly, any and all intermodal traffic carried by the carriers members of that conference, is transported pursuant to the independently filed intermodal tariffs of each member line.

Agreement No. 10175, between the Atlantic and Gulf-Indonesia Conference and the Pacific/Indonesian Conference, and Agreement No. 10176, between the Atlantic and Gulf-Singapore, Malaya and Thailand Conference and the Pacific-Straits Conference (collectively, "Proponents"), have been filed with the Commission for approval under section 15 of the Shipping Act, 1916. By those Agreements the carriers members of one conference would, with the carriers members of the conference serving the opposite coast of the U.S., meet, discuss, and agree upon the rates, rules, and regulations to be assessed for and governing the transportation of cargo from ports and points in the United States to all destinations within the scope of either of the two conferences party to the respective Agreements.

Additionally, the carrier members of the four conferences have filed for the approval of the Commission, amendments to their respective conference agreements, numbered 8080–14, 6060–17, 8240–11, and 5680–18. Agreement Nos. 8080–14 and 8240–11 are identical, and provide:

Subject to all applicable provisions of law and of this Agreement, the Conference or the members as a group may enter into arrangements or agreements with carriers, other conferences of carriers, or other persons.

Agreement Nos. 5680–18 and 6060–17 are also virtually identical, and provide:

The Conference may, by the same voting percentage as is required for amendment to this Agreement, enter into as a single party to [Malaysian/Straits discussion Agreement FMC #10176 (in Agreement No. 5680–18), Indonesian discussion Agreement FMC #10175 (in Agreement No. 606–17)] and amendments thereto for the purpose of discussing and/or agreeing upon matters of mutual interest within the scope of the respective Agreements.

Any carrier becoming a Member of this Conference shall thereby automatically become a party to, and any carrier ceasing to hold Conference membership shall thereby automatically cease to be a party to such Agreement.

In support of the Agreements, the parties thereto maintain that the Agreements do not expand the price fixing activities of the signatory conferences, and that the only concerted conduct contemplated is the exchange of information. They maintain that it is necessary, "• • • in today's world of advanced transportation technology • • •", for conferences to have discussion agreements, as shippers are no longer "• • • locked into a single transportation route." Detrimental effects of shipper "whipsawing" have been generally alleged.

Following notice of the filing of the Agreements in the FEDERAL REGISTER no protest or request for hearings in regard to the Agreements was received. However, Outboard Marine Corporation, a shipper in the trades covered by the Agreements, filed a comment thereto which pointed out that the Agreements have anticompetitive results, and should not be approved without a showing of the public benefit which would flow from the Agreements.

While the format of Agreement Nos. 10175 and 10176 resemble other pure "discussion" agreements approved by the Commission, the fourth and fifth whereas clauses of each Agreement, which clearly set forth the intent of the parties, represent a significant variance. The activity contemplated is to meet, discuss, and agree upon rates and tariff regulations, which from time to time may be uniform. As such, the Agreements are price fixing arrangements, and are, per se, illegal under section 1 of the Sherman Act, 15 U.S.C. 1. *U.S.* v. *Trenton Potteries Co.*, 273 U.S. 392 (1927).

Where an agreement is per se violative of section 1 of the Sherman Act, the agreement is prima facie contrary to the public interest The Commission is required to disapprove, cancel, or modify such an agreement unless it has other evidence before it demonstrating a need for the agreement, which need outweighs the anticompetitive effect of the agreement.

In accordance with that requirement, and in order to make the determinations to which this investigation is directed, the investigation instituted by this Order shall inquire into, among other things, the identity of the commodities [1] carried by the members of the respective Conferences, in the past, in the present, and anticipated; the quantity of those commodities carried by each member line of the respective Conferences, in the past, in the present, and anticipated; the rate history of those commodities; [2] the reasons for any changes heretofore made in the rates for those commodities; for each Conference, the identity of shippers who have requested changes in the rates for those commodities; the reasons given by each of those shippers for the requested rate change; the action taken by each Conference in response to each of those requests; the identity of, volume of, and rate history of, each commodity moved pursuant to an overland tariff of the Conference, for each member thereof; the identity of each carrier offering an intermodal service between points within the scope of each of the respective Conferences; the identity of, volume of, and rate history of, each commodity carried by each carrier pursuant to those intermodal services; the identity of, volume of, and rate history of, each commodity carried by each non-conference carrier providing service in the trades within the scope of each of the respective Conferences; the identity of, level of service of, and rates quoted by, all non-liner carriers offering service in the trades within the scope of each of the respective Conferences; the connection, if any, between carriers, members of any of the respective Conferences, and the non-liner operators identified; and, the identity of, type of, cubic capacity of, and container capacity of each vessel employed by any carrier, liner or non-liner, offering service in the trades within the scope of each of the respective Conferences, in the past, in the present, and anticipated. The inquiry shall extend sufficiently far into the past to permit the observation of trends. Five years appears to be a minimum period.

The specific items of inquiry identified above are not intended to limit the scope of the investigation instituted herein. Rather, they are merely the minimum level of inquiry required by the Commission.

Therefore, it is ordered, that, pursuant to sections 15 and 22 of the Shipping Act, 1916, an investigation is hereby instituted in order to determine whether Agreement Nos. 10175, 10176, each as filed on December 26, 1976, 8080–14, 6060–17, 8240–11, and 5680–18, are unjustly discriminatory or unfair as between carriers, shippers, importers, exporters, or ports, or between exporters from the United States and their foreign competitors, operate to the detriment of the commerce of the United States, are contrary to the public interest, or are in violation of the Shipping Act; and to determine whether those Agreements are (1) required by a serious transportation need, or (2) necessary to secure important public benefits, or (3) necessary to remedy conditions, (a) which the Shipping Act was enacted to eliminate, and (b) which exist, or, with a high degree of probability, immediately will exist in the area to be affected by the Agreements; and to determine whether those Agreements should be approved, modified, or disapproved.

It is further ordered, that the Atlantic and Gulf Indonesia Conference, the Pacific/Indonesia Conference, the Atlantic and Gulf-Singapore, Malaya and Thailand Conference, the Pacific-Straits Conference, and the members of each, as listed in the Appendix hereto, are hereby named Proponents in this proceeding;

It is further ordered, that, in the event any modifications of those Agreements are filed with the Commission, such modificaitons shall be subject to this investigation and its purposes;

It is further ordered, that this proceeding be referred to the Commission's Office of Administrative Law Judges for public hearing, and that the hearing be held at a date and place to be determined by the presiding Administrative Law Judge, but not later than February 19, 1978: *Provided, however,* that this investigation shall include oral testimony and cross-examination, in the discretion of the Presiding Officer, only upon a proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents, or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record;

It is further ordered, that a copy of this Order be served upon Proponents and the Commission's Bureau of Hearing Counsel, and that a copy be published in the FEDERAL REGISTER.

It is further ordered, that all persons (including individuals, corporations, associations, firms, partnerships, and public bodies) desiring to intervene in this proceeding shall comply with Rule 72 of the Commission's Rules of Practice and Procedure, 46 CFR 502.72;

It is further ordered, that all future notices issued by or on behalf of the Commission in this proceeding, including notice of time and place of hearing or prehearing conference, shall be mailed directly to all parties of record.

By the Commission.

JOSEPH C. POLKING,
Acting Secretary.

[1] By commodities, the Commission means both the commonly understood grouping of goods sold by merchants, and the tariff items in the tariffs of each carrier, as subdivided by any method of classification, including, but not limited to, value, weight, measurement, or any other method used by the carrier to determine different rates. This meaning of commodities applies wherever the word is used herein.

[2] Wherever a rate history is called for herein, the Commission does not necessarily require the history of all commodities. Rather, the Commission wants a rate history of those commodities which are significant, either because of the quantity of the commodity carried by a carrier, or because the commodity, while not carried in great quantity, is important to a line of commerce. At a minimum, the rate histories shall cover the commodities which comprised 80 percent of the tonnage carried by the carrier under examination in each calendar year, and, separately, the commodities which produced 80 percent of the revenue of the carrier under examination in each calendar year.

LYKES BROS. STEAMSHIP CO., INC. AND STRACHAN SHIPPING CO.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for review and approval, if required, pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 4 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before September 14, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commmerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement filed by:

R. J. Finnan, Pricing, Lykes Bros. Steamship Co., Inc., Lykes Center, 300 Poydras Street, New Orleans, Louisiana 70130.

Agreement No. T–3503, between Lykes Bros. Steamship Co., Inc., (Lykes) and Strachan Shipping Company (Strachan), provides for the performance of stevedoring services by Strachan at Savannah and Brunswick, Georgia. As compensation, Lykes agrees to pay such rates mutually agreed to by the parties from time-to-time. The term of the agreement is for one year, automatically renewed on a year-to-year basis, and may be terminated upon 30 days' written notice by either party.

By Order of the Federal Maritime Commission.

Dated: August 22, 1977.

JOSEPH C. POLKING,
Acting Secretary.

If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreements (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreements filed by:

H. H. Wittren, Manager, Waterfront Real Estate, Port of Seattle, P.O. Box 1209, Seattle, Washington 98111.

Agreements Nos. T-2640-8 and T-2640-9, between the Port of Seattle (Port) and American President Lines, Ltd. (APL), modify the parties' basic agreement providing for the five-year lease to APL of Terminal 25, Seattle, Washington.

The purpose of Agreement No. T-2640-8 is to provide for APL's design and construction of a Container Maintenance and Repair Building located on Parcel C of Terminal 25. Upon completion, the Port shall reimburse APL's out-of-pocket construction costs, not to exceed $80,000, and thereafter APL shall amortize said reimbursement over a 20-year period by means of equal monthly payments to the Port, including interest on the declining balances at the rate of 10 percent per annum.

The purpose of Agreement No. T-2640-9 is to increase the total monthly rental for land, cranes and other improvements from $109,046.52 to $114,316.03.

By Order of the Federal Maritime Commission.

Dated: August 22, 1977.

JOSEPH C. POLKING,
Acting Secretary.

FEDERAL POWER COMMISSION

[Docket No. RP77-119]

CARNEGIE NATURAL GAS CO.

Proposed Changes in FPC Gas Tariff

AUGUST 16, 1977.

Take notice that Carnegie Natural Gas Company, on July 29, 1977, tendered for filing proposed changes in its FPC Gas Tariff, Original Volume No. 2. Applicant indicates that it proposes to charge 31.253¢ per Mcf for gathering and compression service, under the First Revised Sheet, Rate Schedule X-5. The proposed effective date is September 1, 1977.

The proposed charge of 31.253¢ per Mcf is for gathering and compression of gas produced by others in the Mingo-Logan field, Mingo and Logan Counties, West Virginia. The charge will enable Carnegie to cover its cost in providing this service, and will obviate the need for other producers from this field to construct duplicate facilities.

Copies of the filing were served upon the company's jurisdictional customer, Consolidated Gas Supply Corporation.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 26, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make any protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24528 Filed 8-24-77;8:45 am]

[Docket No. RP77-118]

CARNEGIE NATURAL GAS CO.

Initial FPC Gas Tariff

AUGUST 16, 1977.

Take notice that Carnegie Natural Gas Company (Carnegie), on July 29, 1977, tendered for filing an Original Sheet No. 70, Volume No. 2. Carnegie requests a waiver of § 4(c) of the Natural Gas Act and the Commission's Rules and Regulations to permit the proposed tariff sheet to become effective January 1, 1975, in accordance with the provisions of § 4 of the Natural Gas Act.

The proposed tariff sheet sets forth rates under Rate Schedule X-5 of 7.5¢ per Mcf for gathering and compression of gas produced by others in the Mingo-Logan field, Mingo and Logan Counties, West Virginia. The charge will enable Carnegie to cover its cost in providing this service, and will obviate the need for other producers from this field to construct duplicate facilities.

Concurrently with this filing, Carnegie has petitioned for a declaratory order disclaiming Commission jurisdiction over gathering and compression service in the Mingo-Logan field and, in the event the Commission finds that it has jurisdiction, issuance of a certificate of public convenience and necessity authorizing such services. The original X-5 rate schedule is being filed, therefore, because of the possibility of the Commission asserting jurisdiction.

Copies of the filing were served upon the company's jurisdictional customer, Consolidated Gas Supply Corporation.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 26, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make any protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24529 Filed 8-24-77;8:45 am]

[Docket No. RP77-116]

CARNEGIE NATURAL GAS CO.

Proposed Changes in FPC Gas Tariff

AUGUST 16, 1977.

Take notice that Carnegie Natural Gas Company (Carnegie), on July 29, 1977, tendered for filing Second Revised Sheet No. 15, Volume No. 1. Carnegie requests a waiver of Section 4'd) of the Natural Gas Act and the Commission's Rules and Regulations to permit the proposed tariff sheet to become effective January 16, 1974, subject to refund, in accordance with the provisions of Section 4 of the Natural Gas Act.

The proposed tariff sheet sets forth increased rates under Rate Schedule S-6. Rate Schedule S-6 provides for a 4¢ increase for each Mcf of gas produced or purchased for resale by Carnegie from the Mingo-Logan field, Mingo-Logan Counties, West Virginia, and separately states that 7.5¢ of the 37.5¢ rate would be for gathering and compression charges.

On January 16, 1974, Consolidated Gas Supply Corporation, the only customer purchasing gas under the tariff involved in this filing, unilaterally increased its payment for that gas from 33.5¢ to 37.5¢ per Mcf. Carnegie states that this filing is intended to rectify the misapprehension which has occurred by its accepting the increased payments since that date.

Copies of the filing were served upon the company's jurisdictional customer, Consolidated Gas Supply Corporation.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commssion, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 24, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make any protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file wth the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24530 Filed 8-24-77;8:45 am]

[Docket No. ER77-551]

CAROLINA POWER & LIGHT CO.

Filing of an Amendment to Existing Service Agreement and Cancellation of an Existing Service Agreement

AUGUST 17, 1977.

Take notice that Carolina Power & Light Company, on August 3, 1977 tendered for filing an Amendment dated June 30, 1977, between the City of Fayetteville (the City) and Carolina Power & Light Company (the Company) to the Service Agreement dated October 27, 1972, which is on file with the Commission as Carolina Power & Light Company's Rate Schedule FPC No. 102. The Company also filed a notice of cancellation of the Service Agreement dated December 1, 1966, between the City of Fayetteville and Carolina Power & Light Company which is on file with the Commission as Carolina Power & Light Company's Rate Schedule FPC No. 93.

The Company indicates that the Amendment dated June 30, 1977, provides for totalized metering of the two points of delivery to the City, the supplying of partial requirements service, the providing of backstand service by the Company for the City's generation, and the purchase of capacity from the City by the Company when such capacity is available. The Company further indicates that partial requirements service will be rendered under the Company's filed resale service schedule as amended by the Agreement.

The Company states that the Amendment between the parties dated June 30, 1977, ellminates the Service Agreement between the City and the Company dated December 1, 1966, which is on file with the Commission as Carolina Power & Light Company's Rate Schedule FPC No. 93.

It is proposed by the Company that the Amendment dated June 30, 1977, and the cancellation of FPC No. 93 be effective as of June 20, 1977, and waiver of the Commission's notice requirements is therefore requested.

According to the Company a copy of the filing was sent by Carolina Power & Light Company to the Public Works Commission of the City.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 31, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to be-

V42N165 AUG 25 77 UM

come a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

COLUMBIA GAS TRANSMISSION CORP.

Proposed Changes in FPC Gas Tariff

AUGUST 16, 1977.

Take notice that Columbia Gas Transmission Corporation (Columbia) on July 29, 1977, tendered for filing proposed changes in its FPC Gas Tariff, Original Volume No. 1, as follows:

Thirty-seventh Revised Sheet No. 16.
Eighteenth Revised Sheet No. 64A.

These proposed changes to be effective September 1, 1977, reflect the following rate adjustments:

(1) A PGA rate adjustment, pursuant to Section 20.4(d) of the General Terms and Conditions of Columbia's FPC Gas Tariff, Original Volume No. 1, to recover increased cost of gas purchases of $65,265,540, annually.

(2) A Commodity Surcharge, pursuant to Section 20.2 of the General Terms and Conditions of Columbia's FPC Gas Tariff, Original Volume No. 1, to recover $100,698,736 of deferred Purchased Gas cost over the six month period September 1, 1977 through February 28, 1978. Such surcharge includes the effect of (1) Supplier Refunds received, (2) a refund pursuant to the settlement of Columbia's Appalachian Pipeline production issue at FPC Docket No. RP74-82, and (3) Emergency Purchases and associated costs.

Copies of the filing were served upon the Company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, Union Center Plaza Building, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before August 24, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-494]

DELMARVA POWER & LIGHT CO.

Compliance Filing

AUGUST 17, 1977.

Take notice that Delmarva Power & Light Company, Delmarva Power & Light Company of Maryland and Delmarva Power & Light Company of Virginia (Delmarva) on July 28, 1977 tendered for filing proposed changes in FPC Electric Tariff Nos. 6 and 7 of Delmarva Power & Light Company, FPC Electric Tariff Nos. 6 and 7 of Delmarva Power & Light Company of Maryland, and FPC Electric Tariff No. 3 of Delmarva Power & Light Company of Virginia, all in compliance with the Order approving settlement herein, issued July 1, 1977. Delmarva indicates that the proposed changes conform such Rates Schedules to the rates approved by the Commission in its Order issued July 1, 1977.

According to Delmarva copies of this filing were served upon all Delmarva's various jurisdictional customers and on the appropriate Commissions of Delaware, Maryland and Virginia. Delmarva requests waiver of the Commission's notice requirements in order that these compliance filings may be accepted for filing at the earliest possible date.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 824 North Capitol Street, NE, Washington, DC, 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 31, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. RP72-155, and RP76-59
(PGA No. 77-2b)]

EL PASO NATURAL GAS CO.

Tariff Sheets Retender

AUGUST 16, 1977.

Take notice that on July 27, 1977, El Paso Natural Gas Company ("El Paso") filed, purusant to Part 154 of the Commission's Reglations Under the Natural Gas Act, the following revised tariff sheets, to become effective April 1, 1977.

Tariff volume No.	*Tariff sheet No.*
PGAC:	
Original volume No. 1.	First Substitute Nineteenth Revised Sheet No. 3-B.
Third Revised Volume No. 2.	First Substitute Ninth Revised Sheet No. 1-D.
Original Volume No. 2A.	First Substitute Eleventh Revised Sheet No. 1-C.
PGAG—CHPG:	
Original Volume No. 2A.	Seventh Revised Sheet No. 1-D.

El Paso states that by order issued March 31, 1977, the Commission, inter alia, accepted for filing and suspended for one (1) day the PGAC tariff sheets filed by El Paso February 25, 1977,[1] and permitted such sheets to become effective April 2, 1977, subject to refund. El Paso states that ordering paragraph (B) of the Commission's said order of March 3, 1977, permitted El Paso to file a revised PGAC increase to be effective April 1, 1977, which excludes the amounts for gas purchases paid to reversionary interest holders[2] in excess of similar amounts paid to prior owners for gas purchases.

El Paso states that on April 15, 1977, it tendered for filing certain substitute revised tariff sheets[3] to implement both its PGAC increase and its PGCA-CHPG increase on April 1, 1977 .The revised net increases proposed by said April 15, 1977, filing, were determined by El Paso by reducing the rates applicable to the reversionary interest holders to the rates established by the Commission's Opinion No. 699-H.

El Paso further states that by letter order issued July 15, 1977, at Docket Nos. RP72-155 and RP76-59 (PGA No. 77-2a), the Commission rejected certain of the tariff sheets filed by El Paso on April 15, 1977,[4] inasmuch as the rates reflected thereon did not eliminate all costs applicable to the reversionary interest holders in excess of the amounts paid to prior owners for such purchases. The subject letter order provides that the rejection is without prejudice to El Paso's right to refile rates properly adjusted to reflect the appropriate rates authorized to the prior owners of such gas. Accordingly, to implement both its PGAC increase and its PGAC-CHPG on April 1, 1977, adjusted as directed by the Commission letter order issued July 15, 1977, El Paso retenders herewith for filing and acceptance the above identified tariff sheets.

[1] First Substitute Nineteenth Revised Sheet No. 3-B to Original Volume No. 1; First Substitute Ninth Revised Sheet No. 1D to Third Revised Volume No. 2; First Substitute Eleventh Revised Sheet No. 1-C and Seventh Revised Sheet No. 1-D to Original Volume No. 2A.

[2] Such reversionary interest holders are the subject of the Commission's Opinion No. 737, as amended, issued July 11, 1975, at Docket No. CP75-209 and CP75-594.

[3] First Substitute Nineteenth Revised Sheet No. 3-B, Original Volume No. 1 tariff; First Substitute Ninth Revised Sheet No. 1-D, Third Revised Volume No. 2 tariff; and First Substitute Eleventh Revised Sheet No. 1-C and Seventh Revised Sheet No. 1-D, Original Volume No. 2A tariff.

[4] The rejected tariff sheets are identified in note 3, *supra*. The Commission took no action in the July 15, 1977, order respecting the other tariff sheets tendered by El Paso as part of its April 15, 1977, tender, as more fully discussed herein.

El Paso states that the above described retendered PGAC tariff sheets provide for a total PGAC current adjustment of 10.13¢ per Mcf, effective as of April 1, 1977, and is comprised of adjusted annualized purchased gas cost increases equating to 4.81¢ per Mcf, plus 5.32¢ per Mcf representing the adjusted unrecovered purchased gas cost balance in Account 191 as of December 31, 1976. El Paso further states that the adjustment proposed by the tendered substitute tariff sheets is an increase of 6.13¢ per Mcf in El Paso's then currently effective rate and is 1.69¢ per Mcf below the PGAC net adjustment in rates of 7.82¢ per Mcf, filed by El Paso on February 25, 1977, and suspended for one (1) day until April 2, 1977, by the Commission order of March 31, 1977.

El Paso further states that the retendered Seventh Revised Sheet No. 1-D provides for a current adjustment of 2.8097¢ per Mcf, effective as of April 1, 1977, applicable to sales subject to the PGAC—Clean High Pressure Gas ("PGAC-CHPG") provision contained in El Paso's FPC Gas Tariff, Original Volume No. 2A. Such current adjustment is comprised of an increase in the weighted average purchased cost of clean, high-pressure gas equating to 1.5704¢ plus 1.2393¢ per Mcf representing the unrecovered purchased gas balance in Account 191 as of December 31, 1976. El Paso further states that, after elimination of the surcharge adjustment of 4.4913¢ per Mcf included in El Paso's rates prior to April 1, 1977, authorized at Docket No. RP72-155 (PGA77-1), the net PGAC-CHPG adjustment proposed by the tendered Seventh Revised Sheet No. 1-D is a net decrease of 1.6816¢ per Mcf.

El Paso's April 15, 1977, tender also included certain substitute tariff sheets[5] containing the PGAC and PGAC-CHPG rates made effective as of April 2, 1977, which tariff sheets reflected the superseding pagination reference required as a result of the submittal of the tariff sheets tendered to be effective on April 1, 1977. Except for the noted change, said tariff sheets were identical to the counterpart tariff sheets tendered by El Paso on February 25, 1977, and made effective on April 2, 1977, by the Commission's March 31, 1977, order. The July 15, 1977, Commission letter order states that no action will be taken on such tariff sheets to be effective April 2, 1977. Since El Paso is retendering substitute tariff sheets to become effective as of April 1, 1977, in conformity with the directives of the Commission in its letter order of July 15, 1977, El Paso has requested that the tariff sheets tendered on April 15, 1977, reflecting the rates authorized to be effective as of April 2, 1977,[6] be accepted for filing and permitted to become effective on April 2, 1977, in order to properly reflect the pagination of subsequent counterpart tariff sheets.

El Paso states that copies of the instant tender have been served upon all parties of record in Docket Nos. RP72-155 and RP76-59 and, otherwise, upon all affected customers and interested state regulatory commissions.

Any person desiring to be heard or to make any protest with reference to said filing should, on or before August 24, 1977, with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.-10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make any protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RI77-117]

ENERGY RESERVES GROUP, INC.

Petition for Special Relief

AUGUST 16, 1977.

Take notice that on June 3, 1977, Energy Reserves Group, Inc., 217 North Water, Wichita, Kansas 67201, filed a petition for special relief in Docket No. RI77-117 pursuant to Section 2.76 of the Commission's General Policy and Interpretations (18 CFR 2.76).

Petitioner seeks authorization to charge 44.7556 cents per Mcf for the sale of gas from the DeWeese Gas Unit No. 1 in consideration for the installation of compression facilities. The gas is being sold to National Gas Pipeline Company of America.

Any person desiring to be heard or to make any protest with reference to said petition should on or before August 31, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24536 Filed 8-24-77;8:45 am]

[Docket Nos. CP75-104, CP75-81 and
CP75-16]

HIGH ISLAND OFFSHORE SYSTEM

Petition To Amend Certificate

AUGUST 16, 1977.

Take notice that on August 10, 1977, High Island Offshore System (HIOS), pursuant to Section 1.7 of the Commission's General Rules of Practice and Procedure, filed a petition to further amend the certificate of public convenience and necessity issued herein on June 4, 1976, as previously amended by the Order on Rehearing issued July 30, 1976, to permit the use of an interim rate during the production build-up period on the HIOS facilities until January 1, 1979.

Petitioner states that such an interim rate is necessary so that shippers, not able to fully utilize the HIOS facilities during this build-up period, are not required to pay demand charges during that period.

As a result of the series of informal conferences, representative of the Bureau of Natural Gas and Office of the General Counsel have agreed that an interim rate to be used during the initial build-up period, comports with the public interest under the terms and conditions which are set forth, in detail, in the aforementioned Petition.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 10 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before August 24, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[5] Such redesignated tariff sheets submitted by El Paso on April 15, 1977, are as follows:

Tariff Volume No.	*Tariff Sheet No.*
Original Volume No. 1---	Second Substitute Nineteenth Revised Sheet No. 3-B.
Third Revised Volume No. 2.	Second Substitute Ninth Revised Sheet No. 1-D.
Original Volume No. 2A--	Second Substitute Eleventh Revised Sheet No. 1-C.
Original Volume No. 2A--	Eighth Revised Sheet No. 1-D.

[6] See note 5, supra.

[Docket No. ER77-90]

HOLYOKE WATER POWER CO., AND THE HOLYOKE POWER & ELECTRIC CO.

Proposed Settlement Agreement

AUGUST 15, 1977.

Take notice that Holyoke Water Power Company and Holyoke Power & Electric Company (hereinafter collectively referred to as Holyoke) on August 3, 1977, tendered for filing a Settlement Agreement. Holyoke indicates that Holyoke, the City of Chicopee, Massachusetts and the Town of South Hadley, Massachusetts have conducted settlement conferences with the Commission Staff which have resulted in the Settlement Agreement, dated as of July 21, 1977. Holyoke further indicates that the rate changes set forth in the Settlement Agreement are proposed to become effective as of August 1, 1977.

Holyoke states that the mutual agreements and understandings which the parties have agreed to in the Settlement Agreement are appropriate and acceptable for settlement of the proceedings in the above-noted docket, and respectfully requests that the Commission permit the rates set forth in the Settlement Agreement to become effective as of August 1, 1977.

Comments will be considered by the Commission in determining the outcome of the proceeding. Comments may be sent to the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, on or before August 31, 1977.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-528]

NORTHERN STATES POWER CO. (MINNESOTA)

Extension of Time for Filing Petitions to Intervene

AUGUST 18, 1977.

On August 16, 1977, Minnesota Municipal Utilities Association (MMUA) filed a request to extend the date set by Commission Notice issued August 8, 1977, for filing protests and petitions to intervene in the above designated proceeding. The motion states that MMUA has contacted a majority of Northern States' transmission service customers, all of whom have asked MMUA to request an extension of time on their behalf.

Upon consideration, notice is hereby given that the date for filing protests and petitions to intervene in the above proceeding is extended to and including September 16, 1977.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24522 Filed 8-24-77;8:45 am]

[Project No. 2082]

PACIFIC POWER & LIGHT CO.

Application for Amendment of License

AUGUST 17, 1977.

Public notice is hereby given that an application was filed on April 6, 1977, under the Federal Power Act, 16 U.S.C. §§ 791 et seq., by Pacific Power & Light Company (Applicant) (Correspondence to: Mr. G. Eldon Drewman, Executive Vice President, Pacific Power & Light Company, 920 SW. Sixth Avenue, Portland, Oregon 97204) for an amendment of the license for its Klamath River Project, FPC No. 2082. The project is located on the Klamath River in Jackson and Klamath Counties, Oregon, and Siskiyou County, California.

Applicant requests that the license for Project No. 2082 be amended to remove from the project the segment of the 69-KV transmission line that extends from the project's Fall Creek development to Griffin Creek substation. Applicant proposes to dismantle a portion of the transmission line, to convert another portion to distribution service, and to convert a third portion to 115-KV. Specifically, Applicant proposes:

(1) To dismantle the Fall Creek-Soda Mountain Substation portion of the line in 1977:

(2) To convert the Soda Mountain Substation to Line 19-2 (the intersection is near Ashland) portion of the line to distribution service at 7.2/12.5-KV in 1977; and

(3) To convert the Line 19-2 intersection to Ashland City Substation portion of the line to 115-KV in 1977, and the remainder of the line to Griffin Creek Substation to 115-KV in 1984.

The only transmission line that would remain licensed under the proposed amendment extends from the Fall Creek hydroelectric development to the Copco No. 1 hydroelectric development. Power from the Fall Creek development would be transmitted over this line to the Copco No. 1 substation and thence into Applicant's Siskiyou area system. Applicant states that the changes are necessary to improve its service in the Medford-Ashland area.

The application is on file with the Commission and is available for public inspection.

Any person desiring to be heard or to make any protest with respect to said application should on or before October 5, 1977, file with the Federal Power Commission, 825 North Capitol Street, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR § 1.8 or § 1.10. All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any hearing in the proceeding must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24526 Filed 8-24-77;8:45 am]

[Docket Nos. G-2619, et al]

PHILLIPS PETROLEUM COMPANY, ET AL.

Applications for Certificates, Abandonment of Service and Petitions to Amend Certificates [1]

AUGUST 16, 1977.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to Section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before August 30, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicants to appear or to be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. FR77-548]

SOUTHERN CALIFORNIA EDISON CO.

Filing of Initial Rate Schedule

AUGUST 17, 1977.

Take notice that on August 10, 1977, Southern California Edison (Edison) tendered for filing a Transmission Service Agreement with Pacific Gas and Electric Company (Pacific) providing for the transmission by Edison on an interruptible basis of power purchased by Pacific from the Department of Water and Power of the City of Los Angeles, also on an interruptible basis. Edison indicates that it will charge Pacific for transmission, dispatching, scheduling services, and for losses in delivery of such energy between Sylmar and Midway Substations.

Edison states that Pacific requests that service be initiated as soon as possible under this Agreement to assist during the present drought situation in northern California, and for that reason, Edison requests that the notice provisions of the Commission's regulations be waived and the filing be permitted to become effective at the time of acceptance for filing, but in no event later than 30 days thereafter.

According to Edison copies of this filing were served upon Pacific and the Public Utilities Commission of the State of California.

Any person desiring to be heard or to protest this application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washingon, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 31, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24525 Filed 8-24-77;8:45 am]

[Docket No. ER77-547]

SOUTHERN CALIFORNIA EDISON CO.

Filing of Initial Rate Schedule

AUGUST 16, 1977.

Take notice that on August 10, 1977, Southern California Edison Company (Edison) tendered for filing a letter agreement between Edison acting in party with other California utilities (Utilities) and Bonneville Power Administration (Bonneville). Edison indicates that this agreement provides for Utilities to store energy generated by Bonneville during periods of excess water release at dams on the Columbia River for purposes of mitigating the adverse effects of recent drought conditions of fish migration. Edison further indicates that Utilities will return such energy through February 28, 1978. Edison states that Bonneville will pay a storage charge of 1 mill per kilowatthour.

According to Edison copies of this filing were served upon Utilities, Bonneville, and the Public Utilities Commission of the State of California.

Any person desiring to be heard or to protest this application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C., 20426, in accordance with § 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 31, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-549]

TAMPA ELECTRIC CO.

Filing

AUGUST 17, 1977.

Take notice that on August 10, 1977, Tampa Electric Company (Tampa) tendered for filing a Contract For Interchange Service between Florida Power Corporation and Tampa. Tampa states that the Contract replaces Tampa's FPC Rate Schedule No. 1, as supplemented, and provides for the following services: emergency interchange energy, scheduled interchange energy, and economy interchange energy.

Tampa requests waiver of the Commission's notice requirements to allow an effective date of August 14, 1977.

According to Tampa copies of the filing were served upon Florida Power Corporation and the Florida Public Service Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 31, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24520 Filed 8-24-71;8:45 am]

[Docket No. ER77-550]

TAMPA ELECTRIC CO.

Filing

AUGUST 17, 1977.

Take notice that on August 10, 1977, Tampa Electric Company (Tampa) tendered for filing a Contract For Interchange Service between Florida Power & Light Company and Tampa Electric Company. Tampa states that the Contract replaces Tampa's FPC Rate Schedule No. 4 and provides for the following services: emergency interchange energy, scheduled interchange energy, and economy interchange energy.

Tampa requests an effective date of August 14, 1977, and therefore requests waiver of the Commission's notice requirements.

Tampa further states that copies of the filing were served upon Florida Power & Light Company and the Florida Public Service Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8,

1.10). All such petitions or protests should be filed on or before August 31, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. CP77-100, et al.]

TENNECO ATLANTIC PIPELINE CO., ET AL.

Inquiry as to Suitability of Alternative LNG Sites in Rhode Island and Maine

AUGUST 17, 1977.

On December 20, 1977, Tenneco Atlantic Pipeline Company, et al. (TAPCO) filed applications in Docket Nos. CP77-100, CP77-101, CP77-102, and CP77-103 pursuant to Sections 7 and 3 of the Natural Gas Act to import natural gas into the United States from Algeria by way of Canada and to construct and operate various natural gas pipeline facilities in order to deliver this gas for the benefit of Tennessee Gas Pipeline Company's existing customers, all as more fully set forth in the applications. Take notice that as a result of a preliminary analysis by the Commission Staff pursuant to the Commission's responsibilities under the Natural Gas Act and Natural Environmental Policy Act of 1969, two alternatives to the TAPCO proposal are now seriously being considered and requisite findings will be made on these alternatives.

The Commission Staff in its Draft Environmental Impact Statement (DEIS) has suggested that the placement of liquefied natural gas (LNG) terminals at Sears Island, Maine and Prudence Island, Rhode Island may be viable alternatives to the proposed TAPCO project which involves the construction and operation of an LNG terminal near St. John, New Brunswick, and a pipeline from such terminal terminating near Milford, Pennsylvania. Staff has indicated that additional studies on cost and engineering aspects of these alternatives are now in progress and will be released about September 12, 1977. These alternatives are more completely described in Staff's DEIS and an "Alternative Site Study Northeast Coast Liquefied Natural Gas Conversion Facility" report prepared by Resource Planning Associates in conjunction with the Commission Staff which is filed as an exhibit in this proceeding.[1]

Any party or interested person who wishes to be heard with regard to such alternatives should file either prepared testimony on or before September 20, 1977, or file a statement of position prior to September 30, 1977. Any interested party who wishes to file testimony or a statement of position should also file with the Commission a petition to intervene or notice of intervention if they have not already done so. This notice is issued pursuant to a suggestion made by the Presiding Administrative Law Judge designated for this proceeding.[2]

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24521 Filed 8-24-77;8:45 am]

[Docket No. CP77-561]

TENNECO INTERAMERICA INC., ET AL.

Application

AUGUST 17, 1977.

Take notice that on August 11, 1977, Tenneco InterAmerica Inc. (Tenneco InterAmerica), P.O. Box 2511, Houston, Texas 77001, Texas Eastern Transmission Corporation (Texas Eastern), P.O. Box 2521, Houston, Texas 77001, El Paso Natural Gas Company (El Paso), P.O. Box 1492, El Paso, Texas 79978, Southern Natural Gas Company (Southern), P.O. Box 2563, Birmingham, Alabama 35202, Florida Gas Transmission Company (Florida), P.O. Box 44, Winter Park, Florida 32790, and Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77001, filed in Docket No. CP77-561 an application pursuant to Section 3 of the Natural Gas Act for authorization to import natural gas into the United States from the Republic of Mexico, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants propose to import up to a daily quantity of 2,000,000 Mcf of natural gas at the international boundary between Mexico and the United States near Reynosa, Tamaulipas. It is stated that Applicants anticipate that such importation would commence at the estimated initial rate of approximately 50,000 Mcf per day commencing late in 1977 and increase to 2,000,000 Mcf per day as necessary additional pipeline facilities in Mexico and the United States are installed and production of gas in Mexico is increased.

The gas to be imported would be purchased by Applicants from Petroleos Mexicanos, a decentralized institution of the Republic of Mexico (Pemex), it is stated. Applicants further state that a memorandum of intentions has been entered into outlining the terms and conditions applicable to the purchase of such volumes and that Applicants and Pemex are currently preparing definitive gas purchase contracts to be filed as a supplement to the instant application.

The application indicates that Pemex would build and operate a 48-inch diameter gas transmission pipeline extending approximately 850 miles from Pemex's treating facilities in the Reforma area in the states of Chiapas and Tabasco to the international boundary. It is further indicated that the respective purchase entitlements of Applicants to the total daily volumes of gas which Pemex would sell and deliver at the international boundary and for which import authority is herein requested are as follows:

Tenneco InterAmerica—37.5 percent.
Texas Eastern—27.5 percent.
El Paso—15.0 percent.
Southern and Florida—10.0 percent.
Transco—10.0 percent.

Applicants state that pursuant to the provisions of the memorandum of intentions, the purchase contracts between Applicants and Pemex would, among other things, provide for an initial term of six years plus another additional six-year term provided Applicants meet the best tender Pemex may have at the end of the initial term and for an initial price, F.O.B. Reynosa, payable in U.S. dollars calculated to equal the total heating value price of No. 2 fuel oil in New York harbor, using the average of the high prices prevailing during the preceding quarter and using 140,000 Btu's per gallon as the heating value of No. 2 fuel oil. It is asserted that if by the end of any quarter the price index no longer reflects accurately the real commercial value of energy delivered, a new price index would be chosen by mutual agreement.

It is indicated that the gas to be purchased and imported would be supplied by Pemex's existing gas pipeline system and by its proposed natural gas trunk line from Reforma to Reynosa and would be produced by Pemex primarily from many fields in the Reforma area in Chiapas and Tabasco. Applicants assert that DeGolyer and McNaughton's current estimate of the remaining natural gas proved and probable reserves in such area is 9.661 trillion cubic feet with a potential reserves of an additional 20.648 trillion cubic feet.

Applicants state that the subject proposal is an integral part of a comprehensive project whereby large daily volumes of gas produced in Mexico by Pemex would be made available to the United States. Further, it is stated that each of the pipeline systems to be served by the subject project has experienced high levels of curtailment in recent years and that the large daily volumes of gas proposed to be imported constitute a most significant gas supply attachment for each such pipeline system at an alternate fuel related price level.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 8, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to

TEXAS OIL & GAS CORP.

(Operator), et al.

Amended Petition for Special Relief

AUGUST 16, 1977.

Take notice that on August 4, 1977, Texas Oil & Gas Corporation (Operator), et al. (TXO) submitted an amendment to its April 4, 1977 petition for special relief filed pursuant to Section 2.76 of the Commission's General Policy and Interpretations in the above-captioned docket. By this amendment TXO seeks a total rate of 77 cents per Mcf. at 14.65 psia for its sale of natural gas to Michigan Wisconsin Pipeline Company from a well located in Beaver County, Oklahoma. TXO had previously sought a rate of 78.125 cents per Mcf.

Any person desiring to be heard or to make any protest with reference to said petition should on or before August 31, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. RM74-19]

INEXCO OIL CO.

Petition for Rulemaking to Permit Collection by Independent Producers of a Surcharge For Use In Exploration for Natural Gas

AGENCY: Federal Power Commission.

ACTION: Order Denying Petition For Initiation of Rulemaking Proceeding.

SUMMARY: Inexco Oil Company filed a petition for initiation of a rulemaking proceeding for the purpose of investigating a proposal which would permit collection of a surcharge on gas transported in interstate commerce. The surcharge would be collected from the ultimate gas consumer, held by the Commission in a trust fund, and distributed annually to exploration and development companies which have discovered gas reserves dedicated to interstate commerce. The Commission is denying the petition. A primary effect of this denial is to eliminate shifting, from producers to consumer, the financial risk in gas exploration and development.

EFFECTIVE DATE: August 17, 1977.

FOR FURTHER INFORMATION CONTACT:

Norman Pedersen, Office of General Counsel, 202-275-4318.

ORDER DENYING PETITION FOR INITIATION OF RULEMAKING PROCEEDING

AUGUST 17, 1977.

On March 13, 1974, Inexco Oil Company (Inexco) filed a petition requesting that the Commission initiate a rulemaking proceeding for the purpose of investigating the surcharge proposal presented by Inexco in its brief filed on November 7, 1973 in "Transcontinental Gas Pipe Line Corporation," Docket No. RP73-69. For the reasons stated hereinafter, the Commission shall deny Inexco's petition.

Inexco proposed that the Commission establish a trust fund to hold the proceeds from a 3 cents per Mcf surcharge on each Mcf of gas transported in interstate commerce. According to Inexco, the surcharge would be collected from the ultimate consumer of the gas. Amounts accumulated in the trust fund would be distributed on a yearly basis to the exploration and development companies which had discovered gas reserves dedicated to interstate commerce.

Inexco proposes that in order to share in the surcharge proceeds each producing company would be required to demonstrate the quantity of gas it had sold in interstate commerce during a given period of time. A company would receive 3 cents per Mcf for each Mcf of gas sold by it in interstate commerce provided that the company committed such proceeds to increased domestic gas exploration. A participating company would be required to document the amount expended on exploration over the previous five years, and to spend its share of the trust fund proceeds over and above the annual average of the amount expended by it on exploration, or incur a 100% tax on all of the trust fund proceeds received by it.

In support of its proposal Inexco alleges in its petition that the surcharge plan would result in a major increase in domestic gas exploration; would reward those companies which historically have searched for, found and subsequently dedicated gas to the interstate market; and would provide reserves needed to alleviate the energy shortage.

Public notice of Inexco's petition was issued on April 12, 1974, with comments, petitions to intervene or protests due on or before June 8, 1974. The parties listed in Appendix A filed petitions to intervene. The Commission finds that good cause exists to grant intervention to each party listed.

The parties listed in Appendix B commented on Inexco's proposal. All such parties commented adversely. Among the most frequently expressed objections to the surcharge plan were the following: (1) The Commission has no authority to levy a surcharge on ultimate customers; (2) while the 3% surcharge would be uniformly applied to the rates charged to all consumers, there is no assurance that the ultimate consumer who pays the surcharge will receive his proportionate share of gas supplies as a result of his surcharge payments; (3) if a producer must demonstrate five years prior experience to benefit from surcharge proceeds, the surcharge proposal would restrict the entry of new producers into the field contrary to antitrust policy; (4) the surcharge plan presents administrative problems of how to collect the surcharge proceeds, how to distribute the proceeds without protracted adjudication of competing producer claims and how to monitor producer spending of the proceeds; (5) the proposal could foster wasteful expenditures of capital by a participating company because of the possibility of that company incurring a 100% tax on all of the trust fund proceeds received by it if it failed to spend its share of the trust fund proceeds over and above the annual average of the amount expended by it on exploration during the previous five years.

Additionally, twelve of the twenty-two parties commenting on Inexco's proposal stated that if the Commission were to increase the rate for gas sold in interstate commerce in the then-pending nationwide rate proceeding in Docket No. R-389-B, a surcharge would not be necessary. Inexco itself stated in the brief it filed on November 7, 1973 in Docket No. RP73-69 that its proposed surcharge was a "short-term alternative to increased overall prices." (Inexco Brief, p. 7)

After Inexco filed its petition and the last of the comments were filed in response thereto, the Commission issued

Opinion Nos. 699[1] and 699-H[2] in Docket No. R-389-B, establishing national rates for sales of natural gas in interstate commerce. The rates established in Docket No. R-389-B were subsequently revised substantially upward in Docket No. RM75-14.[3] Thus, the Commission has taken the action to which Inexco's surcharge proposal was a "short-run alternative." The rate for interstate sales of natural gas has been raised, thereby providing capital and incentive for increased exploration and development of new gas supplies and, accordingly, obviating the need for Inexco's proposed surcharge. The Commission concludes, therefore, that Inexco's petition should be denied as having become moot as a result of actions taken subsequently to the filing of it.

Since Inexco filed its petition the Commission has, additionally, issued Opinion Nos. 721[4] and 721-A[5] in "Transcontinental Gas Pipe Line Corporation," Docket No. RP73-69. In that proceeding Transcontinental Gas Pipe Line Corporation (Transco) had proposed a 3 cents per Mcf surcharge on all its firm sales for a five year period. The proceeds of the surcharge were to be transferred to a nonprofit corporation to be used for exploration and development to augment Transco's general system gas supply. In Opinion Nos. 721 and 721-A the Commission rejected the Transco surcharge proposal finding that while it had approved programs whereby pipeline customers pay carrying charges on amounts invested in finding additional gas supplies, it could not condone the shifting of financial risk from the producer to the consumer as would occur if the customers were required to supply the initial investment capital itself.[6] Under Inexco's surcharge proposal, the consumer would be supplying initial investment capital. Thus, there would be a shifting of risk from producer to consumer. Inexco's proposal, therefore, suffers from the same defect as did Transco's. This is another factor compelling Commission denial of Inexco's petition.

Associated Gas Distributors (AGD) filed a motion on June 10, 1974, requesting that the matter of Inexco's petition be consolidated with the national rate proceeding then pending in Docket No. R-389-B. In light of the subsequent completion of the rulemaking in Docket No. R-389-B and our denial of Inexco's petition herein, AGD's motion shall be denied as moot.

The Commission finds: (1) Good cause exists to deny Inexco's March 13, 1974 petition for initiation of a rulemaking proceeding.

(2) Good cause exists to grant intervention to each party listed in Appendix A of this order.

(3) Good cause exists to deny AGD's June 10, 1974 motion for consolidation.

The Commission orders: (A) Inexco's petition of March 13, 1974, for initiation of a rulemaking proceeding is denied.

(B) The petitions to intervene listed in Appendix A are hereby granted subject to the rules and regulations of the Commission; *Provided, however,* That participation of such intervenors shall be limited to matters affecting asserted rights and interests as specifically set forth in each petition to intervene; *And provided, further,* That the admission of such intervenors shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(C) AGD's June 10, 1974, motion for consolidation is hereby denied.

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Care Financing Administration

PROFESSIONAL STANDARDS REVIEW ORGANIZATION

Physicians Regarding Intention to Enter Into Agreement Designating Conditional Professional Standards Review Organization for Redesignated Area VI of Ohio

Notice is hereby given, in accordance with Section 1152(f) of the Social Security Act (42 U.S.C. 1320c-1(f)) and 42 CFR 101.104, that the Secretary of the Department of Health, Education, and Welfare proposes to enter into an agreement with the Region Six Peer Review Organization for redesignated PSRO Area VI of the State of Ohio which includes the counties of Summit and Portage as provided in the amendment to § 101.39 of Title 42, Code of Federal Regulations (CFR) published on August 25, 1977, in the FEDERAL REGISTER. This agreement will be subject to satisfactory completion of the contract negotiation process and completion of required changes in the organization structure and formal plan.

The Secretary has determined that the Region Six Peer Review Organization is qualified to assume the duties and responsibilities of a Professional Standards Review Organization as specified in Title XI, Part B of the Social Security Act. The aforementioned organization is incorporated, according to the laws of the State of Ohio as a nonprofit professional organization whose membership is voluntary and comprises at least 25 per centum of the licensed doctors of

medicine or osteopathy engaged in active practice in PSRO Area VI of the State of Ohio.

As stipulated in its articles of Incorporation, the principal officers of the Region Six Peer Review Organization are:

NAME AND OFFICE HELD

1. Robert R. Clark, M.D., President.
2. Robert C. Barns, M.D., Vice President.
3. Carl J. Nader, M.D., Secretary.
4. Earl C. Herschberger, M.D., Treasurer.

The official address of the corporation is Region Six Peer Review Organization, 430 Grant Street, Akron, Ohio 44311.

Any licensed doctor of medicine or osteopathy engaged in active practice in PSRO Area VI of the State of Ohio who objects to the Secretary entering into an agreement with the Region Six Peer Review Organization on the grounds that this organization is not representative of the doctors in such area may, on or before thirty days after the date this Notice appears in the FEDERAL REGISTER, mail such objection in writing to the Secretary of the Department of Health, Education, and Welfare, P.O. Box 1588, FDR Station, New York, New York 10022. All such objections must include the physician's address, the location(s) of his office(s), his signature, and a certification that such physician is engaged in the active practice of medicine or osteopathy (i.e., direct patient care and related clinical activities, administrative duties in a medical facility or other health related institutions, and/or medical or osteopathic teaching or research activity).

Pursuant to 42 CFR 101.103, the Secretary has determined that 932 doctors of medicine and/or osteopathy are engaged in active practice in PSRO Area VI of the State of Ohio. In the event that more than 10 percentum of the doctors express objections as described in the preceding chapter, the Secretary will, in accordance with 42 CFR 101.106, conduct a poll of all such doctors of medicine or osteopathy in such area to determine whether the Region Six Peer Review Organization is representative of such doctors in the area; provided that pursuant to Section 108(b) of Public Law 94-182, the provisions of Section 1152(f) [42 USC 1320c-1(f)], relating to notification and polling, as described above, shall not apply where: (1) the membership association or organization representing the largest number of doctors of medicine in such area, or in the State, in which such area is located if different, has adopted by resolution or other official procedures a formal policy position of opposition to or noncooperation with the established program of professional standards review; or (2) the organization proposed to be designated by the Secretary under Section 1152 of such Act has been negatively voted upon in accordance with the provisions of subsection (f)(2) thereof.

Dated: August 23, 1977.

ROBERT A. DERZON,
Administrator, Health Care Financing Administration.

Office of Education

NATIONAL ADVISORY COUNCIL ON EXTENSION AND CONTINUING EDUCATION

Meeting

AGENCY: National Advisory Council on Extension and Continuing Education.

ACTION: Notice.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Advisory Council on Extension and Continuing Education. It also describes the functions of the Council. Notice of this meeting is required under the Federal Advisory Committee Act (5 U.S.C. Appendix 1, 10 (a)(2)). This document is intended to notify the general public of their opportunity to attend.

DATE: Meeting: September 14-16, 1977.

ADDRESS: The Watergate Hotel, 2650 Virginia Avenue NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

James A. Turman, Executive Director, National Advisory Council on Extension and Continuing Education, 425 Thirteenth Street NW., Suite 529, Washington, D.C. 20004.

The National Advisory Council on Extension and Continuing Education is authorized under Pub. L. 89-329. The Council is required to report annually to the President, the Congress, the Secretary of HEW, and the Commissioner of Education in the preparation of general regulations and with respect to policy matters arising in the administration of Part A of Title I (HEA) including policies and procedures governing the approval of State plans under section 105; and to advise the Assistant Secretary of HEW on Part B (Lifelong Learning activities) of the title. The Council is required to review the administration and effectiveness of all federally supported extension and continuing education programs.

The meeting of the Council will be open to the public beginning on September 14, 1977 at 1:30 p.m. until 5 p.m.; on September 15, from 9 a.m. until 5 p.m.; and on September 16, from 9 a.m. ending at 12 noon.

The agenda for the meeting will include the following items:

(1) Review of Federal education policies and their relevance to postsecondary continuing education.

(2) Approval of the Council's FY 1978 budget.

(3) Determination of program priorities and activities for FY 1978.

(4) Review of the Council's draft Compendium of Federal Programs of Continuing Education and Lifelong Learning.

(5) Meeting of the Title I Committee to discuss the Council's oversight responsibilities for the University Community Service Program (title I, HEA) of the U.S. Office of Education, and to review a study proposal outlining the Committee's work plan for the coming year.

(6) Meeting of the Continuing Education Policy Committee to review and modify its proposal to undertake a study of continuing education and lifelong learning opportunities in the United States.

(7) Other administrative matters and related business.

All records of Council proceedings are available for public inspection at the Council's staff office, located in Suite 529, 425 Thirteenth Street NW., Washington, D.C.

Dated: August 17, 1977.

JAMES A. TURMAN,
Executive Director.

BOARD OF ADVISORS TO THE FUND FOR THE IMPROVEMENT OF POSTSECONDARY EDUCATION

Meeting

Notice is hereby given, pursuant to section 10(a)(2) of the Federal Advisory Committee Act (P.L. 92-463), that the next meeting of the Board of Advisors to the Fund for the Improvement of Postsecondary Education will be held on September 25, 1977 at 5:00 p.m. through September 26, 1977 at 5:00 p.m. at the Mayflower Hotel, 1127 Connecticut Avenue, N.W., Washington, D.C.

The Board of Advisors to the Fund was established to recommend to the Director of the Fund and the Assistant Secretary for Education priorities for funding and the approval or disapproval of grants and contracts of a given kind or over a designated amount under section 404 of the General Education Provisions Act.

The meeting will be open to the public. It will be for the sole purpose of reviewing recommending possible program directions for fiscal year 1977-78.

A summary of the proceedings of the meeting and a roster of members may be obtained from the Fund for the Improvement of Postsecondary Education, 400 Maryland Avenue SW., Room 3123, Washington, D.C. 20202, telephone 202-245-8091.

Signed at Washington, D.C. on August 19, 1977.

CHARLES I. BUNTING,
Acting Director, Fund for the Improvement of Postsecondary Education.

FOLLOW THROUGH PROGRAM

Closing Date for Receipt of Applications (By Invitation Only) for Additional FY 1977 Funds

Correction

In the issue for Friday, August 19, 1977 at page 41926 there appeared a correction for FR Doc. 77-23524 which was published at page 41326 in the issue of Tuesday, August 16, 1977. In the second paragraph of the correction, the date to be corrected was referred to as being in the third line of the *first* full paragraph in column two, page 41326. The date to be corrected actually appears in the third line of the *third* full paragraph. The correction, therefore, is to

the last date by which applications may *be postmarked* (September 7, 1977). The closing date for the *receipt* of applications remains September 12, 1977.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Disaster Assistance Administration

[Docket No. NFD-532]

Interagency Drought Emergency Coordinating Committee

Designation of Additional Emergency Drought Impact Areas

AGENCY: Federal Disaster Assistance Administration.

ACTION: Notice.

SUMMARY: This is a Notice of additional designation of Emergency Drought Impact Areas by the Interagency Drought Emergency Coordinating Committee of 1977.

DATED: August 8, 1977.

FOR FURTHER INFORMATION CONTACT:

Jack W. McGraw, Director, Preparedness Office, Federal Disaster Assistance Administraton, Department of Housing and Urban Development, Washington, D.C. 20410, 202-634-7845.

Acting upon the request of the respective Governors, the Interagency Drought Emergency Coordinating Committee designated the following as Emergency Drought Impact Areas:

Virginia—1 Additional Independent City
Manassas Park

Manassas Park

Alabama—4 Additional Counties

Calhoun	DeKalb
Cleburne	Marshall

Indiana—1 Additional County

Miami

Vermont—1 County

Addison

The designation of an Emergency Drought Impact Area does not confer entitlement to drought assistance. Individuals and communities must meet the separate eligibility requirements established by each agency before assistance may be provided.

Under the authority granted to the Administrator as Secretary to the Committee by the Memorandum of Agreement (42 FR 21855, April 29, 1977), I have provided this designation for the public record.

THOMAS P. DUNNE,
Administrator, Federal Disaster Assistance Administration.

Sec. 20, $E\frac{1}{2}SE\frac{1}{4}$;
Sec. 21, $SW\frac{1}{4}$ and $W\frac{1}{2}SE\frac{1}{4}$;
Sec. 28, $W\frac{1}{2}E\frac{1}{2}$ and $W\frac{1}{2}$;
Sec. 29, $E\frac{1}{2}E\frac{1}{2}$;
Sec. 32, $E\frac{1}{2}E\frac{1}{2}$;
Sec. 33, $W\frac{1}{2}E\frac{1}{2}$, $NW\frac{1}{4}$ and $S\frac{1}{2}SW\frac{1}{4}$.

T. 1 S., R. 30 E.,
Secs. 2, 3 and 4;
Sec. 6, lots 1 and 2;
Sec. 9, $N\frac{1}{2}$ and $N\frac{1}{2}S\frac{1}{2}$;
Sec. 10, $N\frac{1}{2}$ and $N\frac{1}{2}S\frac{1}{2}$;
Sec. 11, $N\frac{1}{2}$ and $N\frac{1}{2}S\frac{1}{2}$.

The area described aggregates 6,713.90 acres in Roosevelt County, New Mexico.

The applicant desires the lands as a bombing range for the purpose of training Air Force personnel of the Tactical Air Command stationed at Cannon Air Force Base, New Mexico.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on July 1, 1975, page 27675, FR Doc. 75-17121.

Pursuant to Sec. 204(h) of the Federal Land Policy and Management Act of 1976, (90 Stat. 2754), notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing to the State Director, Bureau of Land Management, Department of the Interior, P.O. Box 1449, Santa Fe, New Mexico 87501, on or before September 26, 1977. If a public hearing is scheduled, a notice will be published in the FEDERAL REGISTER giving the time and place of such hearing. All pre-

vious comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the publication.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 26, 1977.

The above-described lands are temporarily segregated from all forms of appropriation, including the general mining and the mineral leasing laws, except that grazing leases or permits may be issued for lands in the safety area. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with Section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 28, 1991, unless sooner terminated by action by the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the undersigned, Bureau of Land Management, Department of the Interior, P.O. Box 1449, Santa Fe, New Mexico 37501.

FRED E. PADILLA,
Chief, Branch of Lands and Minerals Operations.

[FR Doc 77 24591 Filed 8-24 77,8:45 am]

NEW MEXICO

Application

AUGUST 17, 1977.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), BCO, Inc. has applied for one 3-inch natural gas pipeline right-of-way across the following lands:

New Mexico Principal Meridian, New Mexico
T. 22 N., R. 7 W.,
Sec. 6, lots 3 and 4.
T. 22 N., R. 8 W.,
Sec. 1, lots 1, 2, 3, and 4;
Sec. 2, lot 1.
T. 23 N., R. 7 W.,
Sec. 22, E½SE¼;
Sec. 25, SW¼NW¼;
Sec. 26, S½N½ and NW¼NW¼;
Sec. 27, E½E½;
Sec. 31, SE¼SW¼ and S½SE¼;
Sec. 33, E½SW¼, SW¼SW¼, and N½SE¼;
Sec. 34, N½NE¼, SW¼NE¼, SE¼NW¼, and N½SW¼.

This pipeline will convey natural gas across 7.026 miles of public lands in Sandoval and San Juan Counties, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, New Mexico 87107.

FRED E. PADILLA,
Chief, Branch of Lands and Minerals Operations.

Geological Survey

PROPOSED NATIONAL ORDERS FOR THE OUTER CONTINENTAL SHELF GOVERNING OIL AND GAS LEASE OPERATIONS

Notice is hereby given that, pursuant to revisions of 30 CFR 250.2(j), 250.3, 250.11, and 250.12, National Orders for the Outer Continental Shelf (OCS) governing oil and gas lease operations are proposed as set forth below. The proposed revisions to these regulations and proposed National OCS Order Nos. 1, 3, and 4 were published in the FEDERAL REGISTER on June 29, 1977.

This publication also announced that National OCS Order Nos. 2 and 5 through 15 were under development and would be published at a later date. Proposed National Order Nos. 2, 5, 7, 8, and 12 are set forth below. Proposed National OCS Order Nos. 6, 9, 10, 11, 13, 14, and 15 remain under development and will be published at a later date. The existing Orders will remain in effect until such time as all of the proposed National Orders are published in final form in the FEDERAL REGISTER.

The Orders reflect an evaluation and the adoption of appropriate suggestions received in response to FEDERAL REGISTER solicitations for comments on proposed revisions to existing Area orders.

This Notice includes a table of contents for the Orders previously published and the titles of the remaining Orders to be developed.

Interested persons may submit written comments and suggestions on the proposed National OCS Orders to the Acting Chief, Conservation Division, U.S. Geological Survey, Mail Stop 600, National Center, 12201 Sunrise Valley Drive, Reston, Va. 22092, on or before October 25, 1977.

For further information, contact Mr. Richard B. Krahl, Chief of the Branch of Marine Oil and Gas Operations, Conservation Division, U.S. Geological Survey, Mail Stop 620, Reston, Va. 22092 (703–860–7531). The primary author of this document is Lloyd M. Tracey, OCS Orders and Standards Section, Branch of Marine Oil and Gas Operations, Conservation Division, U.S. Geological Survey (703–860–7835).

The Geological Survey has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and Office of Management and Budget Circular A–107.

W. A. RADLINSKI,
Acting Director.

First Edition (Month, Year)

NATIONAL ORDERS FOR THE OUTER CONTINENTAL SHELF GOVERNING OIL AND GAS LEASE OPERATIONS

U.S. DEPARTMENT OF THE INTERIOR—GEOLOGICAL SURVEY, CONSERVATION DIVISION, RESTON, VA.

FOREWORD

NATIONAL OUTER CONTINENTAL SHELF ORDERS

National Orders governing oil and gas lease operations for the Outer Continental Shelf (OCS) are hereby issued pursuant to the authority prescribed in 30 CFR 250.2(j), 30 CFR 250.3, 250.11, and 250.12(a).

The Federal Regulations authorizing each individual Order are cited in the preamble thereof.

The National OCS Orders were developed when it became apparent that the existing Orders for each of the OCS Areas contained a majority of requirements which were common to all Areas and that only a minority of the requirements arose from environmental, geological, geophysical, or geographical differences between the various Areas. Those requirements which are common to all Areas of the OCS have been compiled in the National OCS Orders. Those requirements which arise from environmental, geological, geophysical, or geographical differences have been compiled in appropriate Appendices to the National OCS Orders. Reference is made to these Appendices when there is a need for a variance in the requirements for a particular OCS Area.

The operator is responsible for compliance with the requirements of the National OCS Orders as well as those requirements in the Appendices which pertain to a particular OCS Area. In order to simplify the operator's conformance with the National OCS Orders and the Appendices, these items are cross-referenced.

When the Orders refer to approvals or determinations by the "Supervisor," these references mean the appropriate Area Oil and Gas Supervisor. In those instances where approvals or determinations are to be made by the District Supervisor, the Orders so state.

CONTENTS

National OCS Order No. 1
Identification of Wells, Platforms, Structures, and Subsea Objects (Proposed Order published FEDERAL REGISTER June 29, 1977).
National OCS Order No. 2
Drilling Procedures.
1. Drilling Platforms and Mobile Drilling Units
1.1 General Requirements for Fixed and Mobile Drilling Units
1.1.1 Fitness of Drilling Unit
1.1.2 Predrilling Inspection
1.1.3 Well Site Surveys
1.1.4 Drawings, Specifications, Performance Data
1.1.5 Oceanographic, Meteorologic, Performance Data
1.1.6 Subfreezing Operations
1.2 Mobile Drilling Units
1.3 Fixed Drilling Platforms
2. Well Casing and Cementing
2.1 Drive or Structural Casing
2.2 Conductor and Surface Casing Cementing Requirements
2.2.1 Conductor Casing
2.2.2 Surface Casing
2.2.3 Conductor and Surface Casing Setting Depths
2.3 Intermediate Casing
2.4 Production Casing
2.5 Pressure-Testing of Casing

3. Directional Surveys
4. Blowout Preventer (BOP) Equipment Requirements
4.1 General Requirements
4.1.1 BOP Equipment
4.1.2 Auxiliary Equipment
4.1.3 Subfreezing Operations
4.2 Subsea BOP Requirements
4.3 Surface BOP Requirements
4.4 Drive Pipe or Structural Casing BOP Requirements
4.4.1 Surface BOP
4.4.2 Surface BOP
4.4.3 Floating Drilling Operations
4.5 Conductor Casing
4.6 Surface and, or Intermediate Casing
4.7 Testing
4.7.1 BOP Controls
4.7.2 Pressure Tests
4.7.3 Actuation
4.8 Inspection and Maintenance
4.9 Drills
5. Mud Program
5.1 Mud Control
5.2 Mud Test Equipment
5.3 Mud Quantities
6. Supervision, Surveillance, and Training
6.1 Supervision
6.2 Surveillance
6.3 Training
7. Hydrogen Sulfide
8. Critical Operations and Curtailment Plans
National OCS Order No. 3
Plugging and Abandonment of Wells (Proposed Order published in FEDERAL REGISTER on June 29, 1977).
National OCS Order No. 4
Suspensions and Determination of Well Producibility (Proposed Order published in FEDERAL REGISTER on June 29, 1977).
National OCS Order No. 5
Subsurface Safety Devices and Surface Safety Systems.
1. Technological Improvement
2. Subsurface Safety Devices
2.1 Installation
2.2 Design, Testing, and Inspection
2.3 Surface-Controlled Subsurface Safety Devices
2.3.1 Quality Assurance and Performance
2.3.2 Installation and Testing
2.4 Subsurface-Controlled Subsurface Safety Devices
2.5 Shut-in Wells
2.6 Injection Wells
2.7 Tubing Plugs
2.8 Temporary Removal for Routine Operations
2.9 Additional Protective Equipment
2.10 Departures
2.11 Emergency Action
2.12 Records
2.12.1 Field Records
2.12.2 Other Records
2.13 Reports
3. Design, Installation, Operation, and testing of Surface Production Facilities Safety Systems
3.1 New Platforms
3.2 Existing Platforms
3.3 Approval of Alternate Methods of Safety System Design
3.4 Submittal of Safety System Design and Installation Features
4. Additional Safety and Pollution-Control Requirements
4.1 Design and Installation
4.1.1 Pressure Vessels
4.1.2 Flowlines
4.1.3 Remote Shut-In Systems
4.1.4 Engine Exhausts
4.1.5 Glycol Dehydration Units
4.1.6 Gas Compressors
4.1.7 Curbs, Gutters, and Drains
4.1.8 Firefighting Systems
4.1.9 Fire and Gas Detection Systems
4.1.10 Electrical Equipment
4.1.11 Erosion
4.2 General Platform Operations
4.3 Simultaneous Platform Operations
4.4 Welding Practices and Procedures
4.5 Safety Device Testing
4.6 Safety Device Training
5. Crane Operations
6. Employee Orientation and Motivation Programs for Personnel Working Offshore
7. Requirements for Drilling Rigs
7.1 Fixed Structures
7.2 Mobile Drilling Units
National OCS Order No. 6
Well Completions and Workover Operations (Under Development).
National OCS Order No. 7
Pollution Control and Waste Disposal.
1. Pollution Prevention
1.1 Liquid Disposal
1.1.1 Oil-Cut Drilling Mud
1.1.2 Drilling Mud Components
1.1.3 Hydrocarbon Handling Equipment
1.1.4 Curbs, Gutters, and Drains
1.1.5 Fixed Structure Discharges
1.1.6 Mobile Drilling Unit Discharger
1.2 Solid Material Disposal
1.2.1 Well Solids
1.2.2 Containers
1.2.3 Equipment
2. Personnel, Inspections, and Reports
2.1 Personnel
2.2 Pollution Inspections
2.2.1 Manned Facilities
2.2.2 Unattended Facilities
2.3 Pollution Reports
2.3.1 Spills
2.3.2 Observed Malfunctions
3. Pollution-Control Equipment and Oil Spill Contingency Plan
3.1 Equipment
3.2 Oil Spill Contingency Plan
4. Drills and Training
5. Spill Control and Removal
6. Contingency Plan Review
National OCS Order No. 8
Platforms and Structures.
1. General Platform Design
2. Fatigue Considerations
2.1 Steel Structures
2.2 Concrete Structures
3. Application
3.1 General Information
3.1.1 Identification Data
3.1.2 Location Data
3.1.3 Intended Uses
3.1.4 Personnel Facilities
3.1.5 Platform or Structure Details
3.1.6 Corrosion Protection
3.2 Environmental Information
3.2.1 Environmental Data
3.2.2 Acoustic Profiling
3.2.3 Loading
3.3 Foundation
3.3.1 Seabed Testing
3.3.2 Foundation Loads
3.3.3 Soil Stability Analysis
3.4 Installation
3.5 Specific Supporting Design Information Submittal
3.5.1 Critical Design Loading
3.5.2 Steel Structures Data
3.5.3 Concrete Structures Data
3.5.4 Nondestructure Testing
4. Certification
4.1 Certification of Plans
4.2 Certification by Operator
National OCS Order No. 9
Oil and Gas Pipelines (Under Development).
National OCS Order No. 10
(This Title and Content Reserved) (Under Development).
National OCS Order No. 11
Oil and Gas Production Rates, Prevention of Waste, and Protection of Correlative Rights.
OCS Order No. 12
Public Inspection of Records.
1. Filing of Reports
2. Availability of Records
2.1 Form 9–152—Monthly Report of Operations
2.2 Form 9–330—Well Completion or Recompletion Report and Log
2.2.1 Prior to Commencement
2.2.2 After Commencement of Production
2.2.3 5 Years Elapsed Time
2.3 Form 9–331—Sundry Notices and Report on Wells
2.3.1 "Request for Approval to"
2.3.2 "Subsequent Report of"
2.4 Form 9–331C—Application for Permit to Drill, Deepen, or Plug Back
2.5 Form 9–1869—Quarterly Oil Well Test Report
2.6 Form 9–1870—Semiannual Gas Well Test Report
2.7 Multipoint Back Pressure Test Report
2.8 Sales of Lease Production
2.9 Availability of Inspection Records
2.10 Availability of Data and Information Submitted by Lessees as a Requirement of OCS Orders and Notices
3. Information Exempt from Public Inspection
National OCS Order No. 13
Production Measurement and Commingling (Under Development).
National OCS Order No. 14
Approval of Suspensions of Production (Under Development).
National OCS Order No. 15
Submittal of Information Concerning Development Plans to Coastal States (Under Development).

UNITED STATES DEPARTMENT OF THE INTERIOR
GEOLOGICAL SURVEY, CONSERVATION DIVISION

NATIONAL ORDER, OCS ORDER NO. 2
EFFECTIVE _____

Drilling Procedures

This Order is established pursuant to the authority prescribed in 30 CFR 250.11. All exploratory and development wells drilled for oil and gas shall be drilled in accordance with 30 CFR 250.34, 250.41, 250.91, and the provisions of this Order which shall continue in effect until field drilling rules are issued. When sufficient geologic and engineering information is obtained through exploratory drilling, operators may make application or the Supervisor may require an application for the establishment of field drilling rules. After field drilling rules have been established by the Supervisor, development wells shall be drilled in accordance with such rules.

All wells drilled under the provisions of this Order shall have been included in an exploratory or development plan for the lease as required under 30 CFR 250.34. All applications for approval under the provisions of this Order shall be submitted to the appropriate District Supervisor. Each Application

AUG 25 1977
UM

for Permit to Drill (Form 9-331C) shall include all information required under 30 CFR 250.91, and shall include a notation of any proposed departures from the requirements of this Order. All departures from the requirements specified in this Order shall be subject to approval pursuant to 30 CFR 250.12(b).

1. *Drilling Platforms and Mobile Drilling Units.*

1.1 *General Requirements for Fixed and Mobile Drilling Units.* The requirements applicable to fixed and mobile drilling units are contained in paragraphs 1.1.1 through 1.1.6.

1.1.1 *Fitness of Drilling Unit.* All drilling platforms and mobile drilling units shall be capable of withstanding the oceanographic and meteorological conditions for the proposed area of operations. The operator shall furnish evidence of the fitness of the drilling platform or mobile drilling unit to perform the planned drilling operation.

1.1.2 *Pre-Drilling Inspection.* Prior to commencing operations in an OCS area, all drilling platforms and mobile drilling units shall be given a complete inspection by the U.S. Geological Survey to insure compliance with OCS Orders and regulations.

1.1.3 *Well Site Surveys.* Operators or lessees shall conduct a shallow geological hazards survey, and other surveys as required by the Supervisor, and furnish the District Supervisor with the results of the survey(s) of the proposed well site, prior to the approval of drilling operations.

1.1.4 *Drawings, Specifications, Performance Data.* Drawings, specifications, and performance data of all drilling equipment, drilling safety systems, and pollution prevention equipment associated with the drilling operation, and a schematic of the mobile drilling unit, shall be submitted to the District Supervisor.

1.1.5 *Oceanographic, Meterological, Performance Data.* Refer to Appendix III, IV, V, and VI for additional requirements for the Gulf of Alaska, Mid-Atlantic, and South Atlantic, respectively.

1.1.6 *Subfreezing Operations.* Refer to Appendix III, IV, and V for additional requirements for the Gulf of Alaska, Mid-Atlantic, and North Atlantic, respectively.

1.2 *Mobile Drilling Units.* Applications for drilling from mobile drilling units shall include the following:

(a) Maximum environmental design criteria, operational criteria, and a critical operations plan as described in Paragraph 3 of this Order.

(b) Anticipated maximum wave height, wind, and current values expected to be encountered based on an average recurrence interval of 100 years.

(c) Current American Bureau of Shipping Classification or U.S. Coast Guard Certification of Fitness with operational limitations.

Unless required by the Supervisor, after a mobile drilling unit has been approved for use in an area, the information detailed in 1.1.4. above need not be resubmitted unless there are changes in equipment or performance data.

1.3 *Fixed Drilling Platforms.* Applications for placement of fixed drilling platforms or structures shall be submitted in accordance with OCS Order No. 8.

2. *Well Casing and Cementing.* All wells shall be cased and cemented in accordance with the requirements of 30 CFR 250.41(a)(1), and the Application for Permit to Drill shall include the casing design safety factors for collapse, tension, and burst. In cases where cement has filled the annular space back to the ocean floor, the cement may be washed out or displaced to a depth not exceeding 12 meters (39 feet) below the ocean floor to facilitate casing removal upon well abandonment. For the purpose of this Order, the several casing strings in order of normal installation are drive or structural, conductor, surface, intermediate, and production casing.

For the surface, intermediate, and production casing strings, if there are indications of improper cementing such as lost returns, cement channeling, or mechanical failure of equipment, the operator shall recement or make the necessary repairs and run a temperature or cement bond log to verify that the casing has been adequately cemented.

The design criteria for all wells shall consider all pertinent factors for well control, including formation fracture gradients and pressures and casing setting depths. The operator shall utilize appropriate drilling technology and state-of-the-art methods, such as drilling rate evaluation, shale density analysis, or other appropriate methods in order to enhance the evaluation of conditions of abnormal pressure, and to minimize the potential for the well to develop a flow or kick.

All casing, except drive pipe or structural casing, shall be new pipe which meets American Petroleum Institute (API) quality standards, or reconditioned used pipe that has been tested to insure that it will meet API quality standards for new pipe.

2.1 *Drive or Structural Casing.* This casing shall be set by drilling, driving, or jetting to a minimum depth of 30 meters (98 feet) below the ocean floor or to such greater depth, approved by the District Supervisor, required to support unconsolidated deposits and to provide hole stability for initial drilling operations. If this portion of the hole is drilled, the drilling fluid shall be of a type that is in compliance with the liquid disposal requirements of OCS Order No. 7, and a quantity of cement sufficient to fill the annular space back to the ocean floor shall be used.

2.2 *Conductor and Surface Casing Cementing Requirements.* These casing strings shall be cemented as follows:

2.2.1 *Conductor Casing.* This casing shall be cemented with a quantity of cement sufficient to fill the calculated space back to the ocean floor. Cement fill to the ocean floor shall be verified by the observation of cement returns. In the event that observation of cement returns is not feasible or possible, an excess volume of cement shall be used to assure fill to the ocean floor. The excess volume shall be approved by the District Supervisor.

2.2.2 *Surface Casing.* Refer to Appendix II for conducting requirements for the Pacific Area. This casing shall be cemented with a quantity of cement sufficient to protect all freshwater sands and provide well control until the next string of casing is set, and sufficient to fill the calculated annular space to at least 60 meters (197 feet) inside the conductor casing or as approved by the District Supervisor. After drilling a maximum of 30 meters (98 feet) below the surface casing shoe a pressure test shall be obtained to aid in determining a formation fracture gradient either by testing to formation leak-off or by testing to a predetermined equivalent mud weight. The results of this test and any subsequent tests of the formation shall be recorded on the driller's log and used to determine the depth and maximum mud weight of the intermediate hole.

2.2.3 *Conductor and Surface Casing Setting Depths.* Refer to the appropriate appendix for conductor and surface casing setting depth requirements for each area of the OCS.

2.3 *Intermediate Casing.* One or more strings of intermediate casing shall be set when required by anticipated abnormal pressure, mud weight, sediment, and other well conditions. The proposed setting depth for intermediate casing shall be based on the pressure tests of the exposed formation below the surface casing shoe, or on subsequent pressure tests. After drilling a maximum of 30 meters (98 feet) below the intermediate casing shoe, a pressure test shall be obtained to aid in determining a formation leak-off or by testing to a predetermined equivalent mud weight.

A quantity of cement sufficient to cover and isolate all hydrocarbon zones and to isolate abnormal pressure intervals from normal pressure intervals shall be used. Sufficient cement shall be used to provide annular fill-up to a minimum of 150 meters (492 feet) above the zones to be isolated or 150 meters (492 feet) above the casing shoe in cases where zonal coverage is not required. If a liner is used as an intermediate string, it shall be lapped a minimum of 30 meters (98 feet) into the previous casing string, and the cement shall be tested by a fluid entry or pressure test to determine whether a seal between the liner top and the next larger string has been achieved. The test shall be recorded on the driller's log. When such liner is used as production casing, it shall be extended to the surface and cemented to avoid surface casing being used as production casing.

2.4 *Production Casing.* This string of casing shall be set before completing the well for production. It shall be cemented in a manner necessary to cover or isolate all zones which contain hydrocarbons but, in any case, a calculated volume sufficient to fill the annular space at least 150 meters (492 feet) above the uppermost producible hydrocarbon zone must be used. When a liner is used as production casing, it shall be lapped a minimum of 30 meters (98 feet) into the previous casing string, and the testing of the seal between the liner top and the next larger string shall be conducted as in the case of intermediate liners. The test shall be recorded on the driller's log.

2.5 *Pressure-Testing of Casing.* Prior to drilling the plug after cementing, all casing strings, except the drive or structural casing, shall be pressure-tested as shown in the table below. The test pressure shall not exceed the internal yield pressure of the casing. The surface casing shall be tested with water in the top 30 meters (98 feet) of the casing. If the pressure declines more than 10 percent in 30 minutes or if there is another indication of a leak, the casing shall be recemented, repaired, or an additional casing string run and the casing tested again. The above procedures shall be repeated until a satisfactory test is obtained.

Casing	Minimum Surface Pressure
Conductor	1,400 kilopascals (kPa) (203 psi).
Surface	6,900 kPa (1000 psi).
Intermediate, liner, and production.	10,400 kPa (1508 psi) or 5 kPa/m (0.22 psi/ft.) whichever is greater.

After cementing any of the above strings, drilling shall not be commenced until a time lapse of 8 hours under pressure for the conductor casing string or 12 hours under pressure for all other strings. Cement is considered under pressure if one of more float valves are employed and are shown to be holding the cement in place or when other means of holding pressure is used. All casing pressure tests shall be recorded on the driller's log.

In all cases, sufficient time must elapse to allow the bottom 153 meters (500 feet) of annular cement fill, or total length of annular cement fill, if less, to attain a compressive strength of at least 3,448 kPa (500 psi) before drilling commences. The typical performance data for the particular cement mix used in the well shall be used to determine the time lapse required.

3. *Directional surveys.* Wells are considered vertical if inclination does not exceed three degrees from the vertical. Inclination surveys shall be obtained on all vertical wells at intervals not exceeding 150 meters (492 feet) during the normal course of drilling.

Wells are considered directional if inclination exceeds three degrees from the vertical. Directional surveys giving both inclination and azimuth shall be obtained on all directional wells at intervals not exceeding 150 meters (492 feet) during the normal course of drilling and at intervals not exceeding 30 meters (98 feet) in all angle change portions of the hole. On both vertical and directional wells, directional surveys giving both inclination and azimuth shall be obtained at intervals not exceeding 150 meters (492 feet) prior to, or upon, setting surface or intermediate casing, liners, and at total depth.

Composite directional surveys shall be filed with the District Supervisor. The interval shown will be from the bottom of conductor casing or, in the absence of conductor casing, from the bottom of drive or structural casing to total depth. In calculating all surveys, a correction from true north to Universal Transverse Mercator-Grid north or Lambert Grid north shall be made after making the magnetic-to-true-north correction.

4. *Blowout Preventer (BOP) Equipment Requirements.*

4.1 *General Requirements.* Blowout preventers and related well control equipment shall be installed, used, and tested in a manner necessary to insure well control.

4.1.1 *BOP Equipment.* Blowout preventer equipment shall consist of an annular and the specified number of ram-type preventers. The pipe rams shall be of proper size to fit the drill pipe in use. The working pressure of any blowout preventer shall exceed the maximum anticipated surface pressure to which it may be subjected.

Information submitted with the Application for Permit to Drill shall include the maximum anticipated surface pressure and the criteria used to determine this pressure. All blowout preventer systems shall be equipped with:

(a) A hydraulic actuating system that provides sufficient accumulator capacity to close all BOP equipment units with a 50-percent operating fluid reserve at 8,300 kPa (1,204 psi). An accumulator backup system, driven by a source of power independent from the primary system, shall be provided with sufficient capacity to close all blowout preventers and hold them closed. Locking devices shall be provided on the ram-type preventers. The method of BOP actuation, such as hydraulic, acoustic or other methods, shall be described and included in the Application for Permit to Drill.

(b) At least one operable remote blowout-preventer-control station, in addition to the one on the drilling floor.

(c) A drilling spool with side outlets, if side outlets are not provided in the BOP body, to provide for a kill line and choke line.

(d) A kill line with a master valve located adjacent to the BOP. This value shall not be used for normal opening or closing on flowing fluids. The kill line shall have at least one control valve in addition to the master valve.

(e) A choke manifold equipped in accordance with American Petroleum Institute Recommended Practice entitled "Blowout Prevention Equipment Systems," API RP 53, First Edition, February 1976, Sections 3A and 3B, or subsequent revisions thereto approved by the Supervisor.

(f) A fill-up line.

(g) Valves, pipes, and fittings upstream of and including the choke manifold that can be exposed to pressure from the wellbore, with a pressure rating at least equal to that of the blowout preventer quipment.

4.1.2. *Auxiliary Equipment.* The following auxiliary equipment shall also be provided:

(a) A top kelly cock shall be installed below the swivel, and an essentially full-opening kelly cock of such design that it can be run through blowout preventers shall be installed at the bottom of the kelly.

(b) An inside blowout preventer and an essentially full-opening drill string safety valve in the open position shall be maintained on the rig floor at all times while drilling operations are being conducted. Such valves shall be maintained on the rig floor to fit all connections that are in the drill string.

(c) A safety valve shall be available on the rig floor assembled with the proper connection to fit the casing string that is being run in the hole at the time.

4.1.3 *Subfreezing Operations.* Refer to Appendix III, IV, and V for special requirements pertaining to low temperature conditions encountered in the Gulf of Alaska, Mid-Atlantic, and North Atlantic, respectively.

4.2 *Subsea BOP Requirements.* The minimum requirements for drilling below the casing strings for subsea blowout preventer stacks are tabulated below:

SUBSEA BOP STACKS

Drive pipe	1—Annular or pressure rotating pack-off head.[1]
Conductor	1—Annular and diverter.[2]
Surface	1—Annular. 2—Pipe rams. 1—Blind shear ram.
Intermediate	1—Annular. 2—Pipe rams.[3] 1—Blind shear ram.

[1] To be installed on top of the marine riser.
[2] The diverter system shall provide as a minimum, two 15-centimeter (6-inch) internal diameter lines and full-opening valves.
[3] When a tapered drill string is in use, the BOP stack shall be additionally equipped with a minimum of one set of pipe rams to fit the smaller size(s) drill pipe.

NOTE.—The working pressure of all blowout preventers shall exceed the maximum anticipated surface pressure to which they may be subjected.

Subsea blowout preventer stacks shall be equipped with blind-shear rams. A subsea accumulator system is required to provide fast closure of the preventers and for cycling all critical functions in case of loss of connection to the surface. A fail-safe design shall be incorporated into the blowout preventer system and shall include dual pod control systems and fail-safe valving on critical lines and outlets. Prior to the removal of the marine riser for installing casing, the riser shall be displaced with sea water. The operator shall insure that sufficient hydrostatic head exists within the well bore to compensate for the reduction in head and maintain a safe well condition. If repair or replacement of the blow-out preventer stack is necessary after installation, this work will be accomplished after casing has been cemented prior to drilling out the shoe or by setting a cement or bridge plug to insure safe well conditions.

4.3 *Surface BOP Requirements.* The minimum requirements for drilling below the casing strings for conventional surface blowout-preventer stacks are tabulated below:

Minimum BOP Requirements

	Surface BOP stacks
Drive pipe	1—Annular or pressure rotating pack-off head. Diverter.[1]
Conductor casing	1—Annular and diverter.[1]
Surface casing	1—Annular. 2—Pipe rams. 1—Blind ram.
Intermediate casing	1—Annular. 2—Pipe rams.[2] 1—Blind ram.

[1] The diverter system shall provide, as a minimum, two 15-centimeter (6-inch) internal diameter lines and full-opening valves.
[2] When a tapered drill string is in use, the BOP stack shall be additionally equipped with a minimum of one set of pipe rams to fit the smaller size(s) drill pipe.

NOTE.—The working pressure of all blowout preventers shall exceed the maximum anticipated surface pressure to which they may be subjected.

4.4 *Drive Pipe or Structural Casing BOP Requirements.*

4.4.1 *Surface BOP.* Before drilling below this string, at least one remote-controlled, annular-type blowout preventer or pressure-rotating, pack-off-type head and related equipment shall be installed for circulating the drilling fluid to the drilling structure or vessel.

4.4.2 *Subsea BOP.* When the blowout-preventer system is on the ocean floor, the choke and kill lines or equivalent vent lines, equipped with necessary connections and valves, can be used for diversion, if approved by the Supervisor, or an annular preventer or pressure rotating, pack-off-type head, equipped with suitable diversion lines shall be installed on top of the marine riser. The diverter system shall be equipped with automatic, remote-controlled valves which open, prior to shutting in the well, venting in different directions to permit downwind diversion shall be provided. A schematic diagram and operational procedure for the diverter system shall be submitted with the Application for Permit to Drill (Form 9-331C) to the District Supervisor for approval.

4.4.3 *Floating Drilling Operations.* In drilling operations where a floating or semi-submersible type of drilling vessel is used and formation competency at the structural casing setting depth is not adequate to permit circulation of drilling fluids to the vessel while drilling conductor hole, a program which provides for safety in these operations shall be described and submitted to the District Supervisor for approval. This program shall include all known pertinent and relevant information, including seismic and geologic data, water depth, drilling-fluid hydrostatic pressure, schematic diagram from rotary table to proposed conductor casing seat, and contingency plan for moving off location. In all areas where shallow hazards or hydrocarbons are unknown, seismic data shall be obtained, and a small-diameter initial pilot hole from the bottom of drive or structural casing to proposed conductor casing seat shall be drilled to aid in determining the presence or absence of these hazards. All seismic data relating to shallow hazards shall be made available to the Supervisor, and an analysis of the geologic hazards shall be furnished with the Application for Permit to Drill.

4.5 *Conductor Casing.* Before drilling below this string, at least one remote-con-

AUG 25 1977 UM

trolled, annular-type blowout preventer, a diverter system as described in paragraph 4.4 above, and equipment for circulating the drilling fluid to the drilling structure or vessel shall be installed.

4.6 *Surface and/or Intermediate Casing.* Before drilling below this string, the blowout preventer equipment shall include a minimum of:

(a) Four remote-controlled, hydraulically operated blowout preventers with a working pressure which exceeds the maximum anticipated surface pressure, including at least two equipped with pipe rams, one with blind rams, and one annular type. (Subsea blowout-preventer stacks used with floating drilling vessels shall be equipped with one set of blind-shear rams.)

(b) In addition to the above, when a tapered string is used for drilling intermediate casing hole, the B.O.P. stack shall be additionally equipped with a minimum of one set of pipe rams to fit the smaller size(s) drill pipe.

(c) A drilling spool with side outlets, if side outlets are not provided in the blowout preventer body.

(d) A choke line and manifold

(e) A kill line separate from the choke line.

(f) A fill-up line.

4.7 *Testing.*

4.7.1 *BOP Controls.* A minimum of one operable remote blowout preventer control station shall be provided, in addition to the primary blowout preventer control station on the drilling floor. Accumulators or accumulators and pumps shall maintain a pressure capacity reserve at all times to provide for repeated operation of hydraulic blowout preventers.

4.7.2 *Pressure Tests.* Ram-type blowout preventers and related control equipment shall be tested at the rated working pressure of the B.O.P. stack assembly, or at 70 percent of the minimum internal yield pressure of the casing, whichever is the lesser. Annular-type preventers shall be tested at 70 percent of the applicable above pressure test requirements. All preventers shall be tested:

(a) When installed.

(b) Before drilling out after each string of casing has been set.

(c) Not less than once each week, alternating between control stations.

(d) Following repairs that require disconnecting a pressure seal in the assembly.

4.7.3 *Actuation.* While drill pipe is in use, the following actuation procedures shall be performed, as a minimum, to determine proper functioning of the blowout preventers and control stations:

(a) Pipe Rams—Actuated daily.

(b) Blind/Shear Rams—Actuated while drill pipe is out of the hole, once each trip, but not more than once each day.

(c) Tapered Drill String Pipe Rams—The smaller size pipe rams shall be actuated on the appropriate drill pipe size once each trip.

(d) Annular-Type Preventer—Actuated on the drill pipe, in conjunction with the pressure test, once each week.

(e) Control Stations—Actuated while drill pipe is out of the hole, once each trip, but not more than once each day.

4.8 *Inspection and Maintenance.* All blowout-prevention systems and marine risers and associated equipment shall be inspected and maintained in accordance with the manufacturer's recommended procedures. The blowout preventers and marine risers shall be visually inspected during each trip and in no event less than once each day. Inspection of subsea installations may be accomplished by the use of television equipment.

4.9 *Drills.* All drilling personnel shall be indoctrinated in blowout-preventer procedures and be familiar with the blowout-preventer equipment before starting work on the well. A blowout-preventer drill shall be conducted weekly for each drilling crew to insure that all equipment is operational and that crews are trained properly to carry out emergency duties. These drills shall be performed during various drilling operations, such as drilling, running and pulling the drill string, and when out of the hole. All blowout-preventer tests and crew drills shall be recorded on the driller's log. The operator shall furnish current schedules of drills to the District Supervisor so that a Geological Survey representative may witness any drill. Such a drill may be required by a Geological Survey representative at any time during the drilling operation. The drill shall include, as a minimum:

(a) Sounding of a warning signal, sometimes actuated by pit-level indicator or other automatic device.

(b) Withdrawing the kelly.

(c) Stopping the pump.

(d) Observing flow of mud from well.

(e) Actuation of the blowout preventers.

(In order to prevent damage to the rams, complete closure of the rams on drill pipe is not required on floating drilling vessels.)

5. *Mud Program.* The characteristics, use, and testing of drilling mud and the conduct of related drilling procedures shall be such as are necessary to prevent the blowout of any well. Quantities of mud materials sufficient to insure well control shall be maintained readily accessible for use at all times.

5.1 *Mud Control.* Before starting out of the hole with drill pipe, the mud shall be properly conditioned. Proper conditioning requires either circulation with the drill pipe just off bottom to the extent that the annular volume is displaced, or proper documentation in the driller's log prior to pulling the drill pipe as follows:

(a) There was no indication of influx of formation fluids prior to starting to pull the drill pipe from the hole.

(b) The weight of the returning mud is not less than the weight of the mud entering the hole.

(c) Other mud properties recorded on the daily drilling log are within the specified ranges at the stage of drilling the hole to perform their required functions. In those cases when the hole is circulated, the driller's log shall be so noted.

When coming out of the hole with the drill pipe, the annulus shall be filled with mud before the mud level drops 30 meters (98 feet). A mechanical device for measuring the amount of mud required to fill the hole shall be utilized, and any time there is an indication of swabbing or influx of formation fluids, the necessary safety devices and action shall be employed to control the well. The mud shall not be circulated and conditioned, except on or near bottom, unless well conditions prevent running the drill pipe back to the bottom. The mud in the hole shall be circulated or reverse-circulated prior to pulling drill-stem test tools from the hole.

The hole shall be filled by accurately measured volumes of mud. The number of stands of drill pipe and drill collars that may be pulled between the times of filling the hole shall be calculated and posted. The number of barrels and pump strokes required to fill the hole for this designated number of stands of drill pipe and drill collars shall be posted. For each casing string, the maximum pressure which may be applied to the blowout preventer, before controlling excess pressure by bleeding through the choke, shall be posted near the driller. Drill pipe pressure shall be monitored during the bleeding procedure for well control.

An operable degasser shall be installed in the mud system prior to commencement of drilling operations. It shall be maintained for use throughout the drilling and completion of the well.

5.2 *Mud Test Equipment.* Mud test equipment shall be maintained on the drilling rig at all times, and mud tests shall be performed once each tour, or more frequently, as conditions warrant. Such tests shall be conducted in accordance with procedures outlined in API RP 13B, "Recommended Practice for Standard Procedure for Testing Drilling Fluids," Sixth Edition, April 1976, or subsequent revisions as approved by the Supervisor, and the results recorded and maintained at the drill site. The following mud-system monitoring equipment shall be installed (with derrick floor indicators) and used at the point in the drilling operation when mud returns are established and throughout subsequent drilling operations:

(a) Recording mud pit level indicator to determine mud pit volume gains and losses. This indicator shall include a visual and audio warning device.

(b) Mud volume measuring device for accurately determining mud volumes required to fill the hole on trips.

(c) Mud return indicator to determine that returns essentially equal the pump discharge rate.

(d) Gas-detecting equipment to monitor the drilling mud returns.

5.3 *Mud Quantities.* The operator shall include, with his Application for Permit to Drill, a tabulation of well depth versus minimum quantities of mud material, including weighting material to be maintained at the drill site for emergency use. Taking into account the availability of the mud capacity storage of the drilling vessel, the minimum quantities of mud material required shall be based on the following:

(a) Twice the volume of the calculated capacity of the active downhole and surface mud system.

(b) The weighting material shall be based on the amount required to overcome the highest anticipated formation pressure.

When the mud quantity required exceeds the storage capacity of the vessel, the operator must demonstrate that the mud inventories on hand are sufficient to maintain well control until additional quantities can be delivered to the well site.

Daily inventories of mud materials, including barite, shall be recorded to provide a basis for comparison with the tabulation of well depth versus minimum quantities of mud material. Drilling operations shall be suspended in the absence of minimum quantities of mud material specified in the table.

6. *Supervision, Surveillance, and Training.*

6.1 *Supervision.* A representative of the operator shall provide on-site supervision of drilling operations on a 24-hour basis.

6.2 *Surveillance.* From the time drilling operations are initiated and until the well is completed or abandoned, a member of the drilling crew or the toolpusher shall maintain rig floor surveillance continuously, unless the well is secured with blowout preventers or cement plugs.

6.3 *Training.* Company and drilling contractor supervisory personnel including drillers shall be trained in and qualified for present-day well control. Records of such training and qualification shall be maintained at the drill site. Training shall include but is not limited to:

(a) Abnormal pressure detection methods.

(b) Well-control methods and procedures.

Such training shall be given in addition to the required weekly blowout prevention drills. Written verification of compliance with these provisions shall be filed with the Supervisor. Such training shall be in accordance with U.S. Geological Survey Outer Continental Shelf Standard No. T-1 (GSS–OCS–T-1), First Edition, ---------- 1977, entitled "Training and Qualification of Personnel in Well Control Equipment and Techniques for Drilling on Offshore Locations," and subsequent revisions thereto. Compliance shall be considered a prerequisite to approval of any drilling operation.

7. *Hydrogen Sulfide.* When drilling operations are undertaken to penetrate reservoirs known or expected to contain hydrogen sulfide (H_2S), the preventive measures and operating practices set forth in U.S. Geological Survey Outer Continental Shelf Standard No. 1 (GSS–OCS–1), "Safety Requirements for Drilling Operations in a Hydrogen Sulfide Environment," February 1976, shall be followed. In exploratory or development wells where H_2S is discovered unexpectedly, the drilling operations shall be suspended until the operating practices required by GSS–OCS–1 can be implemented.

8. *Critical Operations and Curtailment Plans.* Certain operations performed in drilling are more critical than others with respect to well control, fire, explosion, oil spills, and other discharge or emissions. These operations may occur during drilling, running casing, logging, drill-stem testing, well completion, or wireline operations. Each operator shall file with the Supervisor for approval a Critical Operations and Curtailment Plan for the lease which shall contain:

(a) A list or description of the critical drilling operations that are, or are likely to be, conducted on the lease. Such list or description shall specify the operations to be ceased, limited, or not to be commenced under given circumstances or conditions. The list shall include operations such as:

(1) Drilling in close proximity to another producing well.

(2) Drill-stem testing.

(3) Running and cementing casing.

(4) Cutting and recovering casing.

(5) Logging or wireline operations.

(6) Well-completion operations.

(7) Moving the drilling vessel off location in an emergency; repositioning the vessel on location; and reestablishing entry into the well.

(b) A list or description of circumstances or conditions under which such critical operations shall be curtailed. This list or description shall be developed from all the factors and conditions relating to the conduct of operations on the lease, and shall consider but not necessarily be limited to the following:

(1) Whether the drilling operations are to be conducted from mobile or fixed platforms.

(2) The availability and capability of containment and cleanup equipment.

(3) Abnormal or unusual characteristics expected to be encountered during drilling operations.

(4) Spill control system response time.

(5) Known or anticipated meteorological or oceanographical conditions.

(6) Availability of personnel and equipment for the particular operation to be conducted.

(7) Other factors peculiar to the particular lease under consideration.

(c) When any such circumstance or condition listed or described in the plan occurs or other operational limits are encountered, the operator shall notify the Supervisor and shall curtail the critical operations as set forth under 8.a. above.

(d) Any deviations in the plan shall require prior approval by the Supervisor except in case of an emergency in which event the Superivsor shall be notified as soon as possible.

(e) The operator shall review the plan at least annually. Notification of the review and any amendments or modifications to the plan shall be filed with the Supervisor.

Approved:

Acting Chief, Conservation Division

UNITED STATES DEPARTMENT OF THE INTERIOR,
GEOLOGICAL SURVEY, CONSERVATION DIVISION

NATIONAL ORDERS, OCS ORDER NO. 5

Effective ----------

Subsurface Safety Devices and Surface Safety Systems

This Order is established pursuant to the authority prescribed in 30 CFR 250.11, 30 CFR 250.12(a), 30 CFR 250.45, 30 CFR 250.46, and in accordance with 30 CFR 250.41(b). The operator shall be responsible for compliance with the requirements of this Order in the installation and operation of all platforms and structures, and all facilities installed thereon including those facilities not operated or owned by the operator. All applications for approval under the provisions of this Order shall be submitted to the appropriate District Supervisors. All departures from the requirements specified in this Order shall be subject to approval pursuant to 30 CFR 250.12(b).

1. *Technological Improvement.* As technological research, progress, and product improvement result in increased effectiveness of existing safety devices or the development of new devices or systems, such devices or systems may be required or used upon application, justification, and approval. Applications for routine use shall include evidence that the device or system has been field-tested at least once each month for a minimum of 6 consecutive months, and that each test indicated proper operation.

2. *Subsurface Safety Devices.*

2.1 *Installation.* All tubing installations open to and capable of producing from hydrocarbon-bearing zones shall be equipped with a subsurface safety device unless, after application and justification, the well is determined to be incapable of flowing. The device is to be installed at a depth of 30 meters (98 feet) or more below the ocean floor. Those installations shall be made within 2 days after stabilized production is established. The well shall not be left unattended while open to production unless a subsurface safety device is installed. Refer to Appendix I for additional requirements for the Gulf of Mexico Area.

2.2 *Design, Testing, and Inspection.* Subsurface safety devices shall be designed, adjusted, installed, and maintained to insure reliable operation. During testing and inspection procedures, the well shall not be left unattended while open to production unless a subsurface safety device has been installed in the well.

2.3 *Surface-Controlled Subsurface Safety Devices.* All tubing installations open to and capable of producing from hydrocarbon-bearing zones shall be equipped with a surface-controlled subsurface safety device, except as specified in subparagraph 2.4. The surface controls may be located on site or remotely. Refer to Appendix III, IV, or V for additional requirements for the Gulf of Alaska, Mid-Atlantic, or North Atlantic, respectively.

2.3.1 *Quality Assurance and Performance.* The operator shall use subsurface safety devices that comply with the minimum standards set forth in American Petroleum Institute (API) Specification 14A, First Edition, October 1973, "Subsurface Safety Valves," as amended by Supplement 2, February 1976, or revision thereto, as approved by the Supervisor, for quality assurance, including design, material, and functional test requirements, and for verification of independent party performance testing and manufacturer functional testing of such valves.

2.3.2 *Installation and Testing.* The operator shall comply with the minimum recommended practices set forth in API Recommended Practice (RP) 14B, First Edition, October 1973, "Design, Installation, and Operation of Subsurface Safety Valve Systems," or revision thereto, as approved by the Supervisor, which contains procedures for design calculations, safe installation, and operating and testing.

Each surface-controlled, or other remote-controlled, subsurface safety device installed in a well shall be tested in place for proper operation when installed, or reinstalled, at least monthly for the next 6 months, and quarterly thereafter. If the device does not operate properly, it shall be promptly removed, repaired, and reinstalled or replaced and tested to insure proper operation.

2.4 *Subsurface-Controlled Subsurface Safety Devices.* Refer to Appendix I for additional requirements for the Gulf of Mexico Area.

2.5 *Shut-in Wells.* A tubing plug shall be installed in lieu of, or in addition to, other subsurface safety devices, if a well has been shut in for a period of 6 months. Such plugs shall be set at a depth of 30 meters (98 feet) or more below the ocean floor. All retrievable plugs installed after the date of this Order shall be of the pump-through type. All wells perforated and completed, but not placed on production, shall be equipped with a subsurface safety device or tubing plug within 2 days after completion. A surface-controlled subsurface safety device of the pump-through type may be used as a pump-through tubing plug for the purpose of this subparagraph, provided the surface control has been rendered inoperative.

2.6 *Injection Wells.* Surface-controlled subsurface safety devices shall be installed in all injection wells unless, after application and justification, it is determined that the well is incapable of flowing.

2.7 *Tubing Plugs.* A shut-in well equipped with a tubing plug shall be inspected for leakage by opening the well to possible flow at intervals not exceeding 6 months. No sustained liquid flow or gas leakage is allowed. In the event leakage is detected, the plug shall be removed, repaired, and reinstalled, or an additional tubing plug may be installed in lieu of removal and repair.

2.8 *Temporary Removal for Routine Operations.* Each wireline- or pumpdown-retrievable subsurface safety device may be removed, without further authorization or notice, for a routine operation which does not require approval of a Sundry Notice and Report on Wells (Form 9–331) for a period not to exceed 15 days. The well shall be clearly identified as being without a subsurface safety device and shall not be left unattended while open to production unless approved by the District Supervisor. The provisions of this paragraph are not applicable to the testing and inspection procedures specified in Paragraph 2.2 above.

2.9 *Additional Protective Equipment.* All tubing installations in which a wireline- or pumpdown-retrievable subsurface safety device is to be installed shall be equipped with a landing nipple, with flow couplings, or other protective equipment, above and below, to provide for setting of the subsurface safety device. All wells in which a subsurface safety device or tubing plug is installed shall have the tubing-casing annulus packed off above the uppermost open casing perforations and at least 30 meters (98 feet) below the measured or calculated top of cement on the production string or the intermediate string. The control system for all surface-controlled subsurface safety devices shall be an integral part of the platform shut-in system.

2.10 *Departures.* All applications for departures shall include a detailed statement of the well conditions, efforts made to overcome any difficulties, and proposed alternate safety measures.

2.11 *Emergency Action.* All tubing installations open to and capable of producing from hydrocarbon-bearing zones and not equipped with a subsurface safety device as permitted by Paragraph 2.7 of this Order

V 4211 65 AUG 25 77 UM

shall be clearly identified as not being so equipped, and a subsurface safety device or tubing plug shall be available at the field location. In the event of an emergency (such as an impending storm), such device or plug shall be promptly installed due consideration being given to personnel safety.

2.12 *Records.* The operator shall maintain the following records for a minimum period of 1 year for each subsurface safety device and tubing plug installed, and these records shall be available to any authorized representative of the Geological Survey.

2.12.1 *Field Records.* Individual well records shall be maintained at or near the field and shall include, as a minimum, the following information:

(a) A record which will give design and other information; i.e., make, model, type, spacers, bean and spring size, pressure, etc.

(b) Verification of assembly by a qualified person in charge of installing the device and installation date.

(c) Verification of setting depth and all operational tests as required in this Order.

(d) Removal date, reason for removal, and reinstallation date.

(e) A record of all modifications of design in the field.

(f) All mechanical failures or malfunctions, including sand cutting, of such devices with notation as to cause or probable cause.

(g) Verification that failure report was submitted.

2.12.2 *Other Records.* The following records, as a minimum, shall be maintained at the operator's office:

(a) Verified design information of subsurface safety devices for the individual well.

(b) Verification of assembly and installation according to design information.

(c) All failure reports.

(d) All laboratory analysis reports of failed or damaged parts.

(e) Quarterly failure-analysis report.

2.13 *Reports.* Well completion reports (Form 9–330) and any subsequent reports of workover (Form 9–331) shall include the type and the depth of the subsurface safety devices and tubing plugs installed.

To establish a failure-reporting and corrective-action program as a basis for reliability and quality control, each operator shall submit a quarterly failure-analysis report to the Supervisor, identifying mechanical failures by lease and well, make and model, cause or probable cause of failure, and action taken to correct the failure. The report shall be submitted within 30 days following the periods ending December 31, March 31, June 30, and September 30 of each year.

3. *Design, Installation, Operation, and Testing of Surface Production Facilities Safety Systems.* All production facilities, including separators, treaters, compressors, headers, and flowlines shall be designed, installed, and maintained in a manner which will facilitate efficient, safe, and pollution-free operation. Refer to Appendix III, IV, or V for additional requirements for the Gulf of Alaska, Mid-Atlantic, or North Atlantic, respectively.

3.1 *New Platforms.* New platform production facilities shall be protected with a basic and ancillary surface safety system designed, analyzed, installed, tested, and maintained in operating condition in accordance with the provisions of API RP 14C, "Analysis, Design, Installation, and Testing of Basic Surface Safety Systems on Offshore Production Platforms," June 1974, as amended November 1975, except Section A9, *Pipelines*, or subsequent revisions as approved by the Supervisor, and the additional requirements of this Order. For this application, the word "should" contained in API 14C shall be read "shall," except for those contained in explanatory statements, paragraphs 3.4(c), page 11 and 4.3(4) (a)–(f). In the event that processing components are to be utilized other than those for which Safety Analysis Checklists (SAC's) are included in API RP 14C, the analysis technique and documentation specified therein shall be utilized to determine the effects and requirements of such components upon the safety system.

3.2 *Existing Platforms.* Existing platforms shall comply with the provisions of API RP 14C, and the additional Safety and Pollution Control requirements of paragraphs 3 and 4 of this Order, by December 31, 1977. The submittal of information relative to design and installation features, as listed below in subparagraph 3.4, is not required until an equipment or structural modification to an existing facility is performed (other than those necessary for proper maintenance of the facility).

3.3 *Approval of Alternate Methods of Safety System Design.* Operators may utilize the alternate methods contained in API RP 14C during Safety Systems Designs; however, the method selected and depicted on the schematic flow diagram and Safety Analysis Function Evaluation (SAFE) Chart is subject to approval by the appropriate District Supervisor.

3.4 *Submittal of Safety System Design and Installation Features.* Prior to installation, the operator shall submit for approval to the appropriate District Supervisor, in duplicate, information relative to design and installation features, as indicated in subparagraphs *a* through *f* below. This information shall also be maintained at the operator's onshore field engineering office.

(a) A flow schematic showing size, capacity, and design working pressure of separators, treaters, storage tanks, compressors, pipeline pumps, and metering devices.

(b) A schematic flow diagram (Reference API RP 14C, Example Figure E1, page 79) and the related Safety Analysis Function Evaluation (SAFE) Chart [Reference API RP 14C, paragraph 4.3(C)]. These shall be developed with consideration of the provisions of API RP 14C and the additional requirements of this Order.

(c) A schematic piping diagram showing the size and design working pressure with reference to welding specification(s) or code(s) used. The recommendations contained in API RP 14E, "Design and Installation of Offshore Production Platform Piping Systems," are acceptable for platform piping systems.

(d) A diagram of the fire-fighting system.

(e) Electrical system information including the following:

(1) Plan view of each platform deck outlining any nonrestricted area, i.e., areas which are unclassified with respect to electrical equipment installations and areas in which potential ignition sources, other than electrical, are to be installed. The area outline should include the following information:

(*a*) Any surrounding production or other hydrocarbon source and a description of deck, overhead, and firewall.

(*b*) Location of generators, control rooms, panel boards, major cabling or conduit routes, and identification of wiring method.

(2) Elementary electrical schematic of any platform safety-shutdown system with functional legend.

(3) Classification of areas for electrical installations in accordance with API RP 500B, "Classification of Areas for Electrical Installation at Drilling Rigs and Production Facilities on Land and on Marine and Mobile Platforms," Second Edition, July 1973, or subsequent revisions approved by the Supervisor.

(f) The design and schematics for the installation and maintenance of all fire, smoke, and gas detection systems shall include the following:

(1) Type, location, and number of detection heads.

(2) Type and kind of alarm, including emergency equipment to be activated.

(3) Method used for detection.

(4) Method and frequency of calibration.

(5) Name of organization to perform system inspection and calibration.

(6) A functional block diagram of the detection system, including the electric power supply.

(7) Other pertinent information.

4. *Additional Safety and Pollution Control Requirements.* The following requirements modify or are in addition to those contained in API RP 14C.

4.1 *Design and Installation.*

4.1.1 *Pressure Vessels.*

(a) Pressure relief valves shall be designed, installed, and maintained in accordance with applicable provisions of Sections I, IV, and VIII of the ASME Boiler and Pressure Vessel Code, July 1, 1974, or subsequent revisions thereto approved by the Supervisor. All relief valves and vents shall be piped in such a way as to minimize the possibility of fluid striking personnel or ignition sources.

(b) Steam generators shall be equipped with low-water-level controls in accordance with applicable provisions of Sections I and IV of the ASME Boiler and Pressure Vessel Code, July 1, 1974.

(c) All relief valves shall conform to the appropriate sizing and relieving requirement of ASME Boiler and Presure Vessel Codes, July 1, 1974, Sections I, IV, and VIII. The high-pressure shut-in sensor shall activate sufficiently below the design working pressure to positively insure operation before the relief valve starts relieving. The low-pressure shut-in sensor shall activate no lower than 15 percent or 35 kilopascals (kPa) (5 psi), whichever is greater, below the lowest pressure in the operating range.

(d) Pressure sensors may be of the automatic or non automatic reset type, but where the automatic reset types are used, a non-automatic reset relay shall be installed. All pressure sensors shall be equipped to permit testing with an external pressure source.

(e) All pressure or fired vessels used in the production of oil or gas, installed after the effective date of this Order, shall conform to the requirements stipulated in the edition of the ASME Boiler and Pressure Vessel Code, Sections I, IV, and VIII, as appropriate, in effect at the time the vessel is installed. Uncoded vessels now in use shall have been hydrostatically tested to a pressure 1.5 times their working pressure.

The test date, test pressure, and working pressure shall be marked on the vessel in a prominent place. A record of the test shall be maintained by the operator.

4.1.2. *Flowlines*

(a) All flowlines from wells shall be equipped with high- and low-pressure shut-in sensors located downstream of the well choke. If there are more than 3 meters (10 feet) of line between the wellhead wing valve and the primary choke, an additional low-pressure shut-in sensor shall be installed in this section. The high-pressure shut-in sensor shall be set no higher than 10 percent above the highest operating pressure of the line; but, in all cases, it shall be set sufficiently below the maximum shut-in pressure to assure actuation of the surface safety valve. The low-pressure shut-in sensor shall be set no lower than 10 percent or 35 kPa (5 psi), whichever is greater, below the lowest operating pressure of the line in which it is installed.

(b) In the event a well flows directly to the pipeline before separation, the flowline and valves from the well located upstream of, and including, the header inlet valve(s), shall be able to withstand the maximum

shut-in pressure of the well, unless: (1) protected by a relief valve connected to either the platform flare scrubber or some other approved location other than into the departing pipeline, or (2) the flowline is equipped with an additional automatic shutdown valve controlled by an independent high-pressure sensor. The platform flare scrubber shall be designed to handle, without liquid hydrocarbon carryover to flare, the maximum anticipated flow of liquid hydrocarbons which may be relieved to the vessel.

4.1.3 *Remote Shut-In Systems.* Remote shut-in controls shall be quick-opening and quick-closing valves, or similar acting devices that are approved by the District Supervisor. Platform shut-in shall be completed within 45 seconds after a platform shut-in control is activated.

4.1.4 *Engine Exhausts.* Engine exhausts shall be equipped to comply with the insulation and personnel protection requirements of OPI RP 14C, Section 4.2c(4). Exhaust piping from diesel engines shall be equipped with spark arrestors.

4.1.5 *Glycol Dehydration Units.* A pressure relief valve shall be installed on the glycol regenerator, or at a location approved by the District Supervisor, which will prevent overpressurization of all glycol dehydration units. The set pressure of this valve shall be determined by the operator and approved by the District Supervisor. The discharge of the relief valve must be vented in a nonhazardous manner.

4.1.6 *Gas Compressors.*

(a) *Existing*—Each compressor installation existing as of the effective date of this Order shall be protected as follows:

(1) A Level Safety High (LSH) and a Pressure Safety Valve (PSV) on each interstage scrubber.

(2) A Pressure Safety High (PSH) and a Pressure Safety Low (PSL) on each interstage scrubber unless protected by a high temperature shutdown control on the compressor cylinders.

(3) A Level Safety Low (LSL) on each interstage scrubber unless fluid dump is through a choke restriction to another pressure vessel.

(4) Compressor installations existing prior to the effective date of this Order, and which are installed in a building, are excluded from the requirements of API RP 14C, A8.3b, Flow Safety Devices (FSV), and Section A8.3d, Shut-Down Devices (SDV), which prescribes that these devices be located outside of the building.

(b) *New*—Each compressor installed after the effective date of this Order shall be protected as follows:

(1) A PSH, PSL, LSH, and Pressure Safety Valve (PSV) on each interstage scrubber.

(2) An LSL on each interstage scrubber unless fluid dump is through a choke restriction to another pressure vessel.

(3) A Temperature Safety High (TSH) on each compressor cylinder or other components as applicable. These compressor units installed in a building shall have the isolation valves located outside the building. Each suction and interstage level safety high shut-in control shall, as a minimum, be designed to shut down the compressor prime mover.

(c) In addition to the provisions of API RP 14C, paragraphs A8.3a and A8.3d, safety high- and low-pressure shut-in sensors and level safety low shut-in controls protecting compressor suction and interstage scrubbers shall be designed to actuate automatic isolation valves located in each compressor suction and fuel gas line, so that the compressor unit and associated vessels can be isolated from all input sources.

As an alternative, level safety low shut-in control(s) installed in such and interstage scrubber(s) may be designed to actuate automatic shutoff valve(s) installed in the scrubber dump line(s).

(d) Compressor installations of 745 kilowatts (1,000 horsepower) or less are excluded from those requirements of API RP 14C, A8.3d, which provide for installation of a blow-down value on the discharge line.

(e) The automatic isolation valves installed in compressor suction and fuel gas piping shall also be actuated by shutdown of the prime mover.

4.1.7 *Curbs, Gutters, and Drains.* Curbs, gutters, and drains shall be installed in all deck areas in a manner necessary to collect all contaminants in a closed sump or a sump pile, unless drip pans or equivalent are placed under equipment and piped to a closed sump or sump pile, which will automatically maintain the oil at a level sufficient to prevent discharge into the ocean. All walking and working surfaces shall be kept free of all liquid accumulations. Sump piles shall not be used as a processing device to treat or skim liquids but shall be used to collect treated produced water, treated sand, liquids from drip pans and deck drains, and as a final trap for hydrocarbon liquids in event of equipment upsets.

4.1.8 *Firefighting Systems.* Refer to Appendix I for the requirements of this subparagraph for the Gulf of Mexico Area.

A firefighting water system of rigid pipe with fire hose stations and a fixed water-spray system in the well bays shall be installed. The system shall be installed in a manner necessary to provide needed protection in all areas where production-handling equipment is located. A standby pump with a separate power source shall be provided for the system. A firefighting system using chemicals may be used in lieu of a water system if determined to provide equivalent fire protection control. A diagram of the firefighting system showing the location of all equipment shall be posted in a prominent place on the platform or structure.

4.1.9 *Fire and Gas Detection System.*

(a) Flame, heat, gas, and smoke sensors shall be used in all enclosed high-hazard areas. A high-hazard area is defined as any enclosed area in which an explosive gas-air mixture is likely to occur. A diagram of the detection systems showing the location of all detection points shall be posted in a prominent place on the platform or structure.

(b) All gas detection systems shall be capable of continuously monitoring for the presence of combustible gas in the areas in which the detection devices are located.

(c) The use of fuel gas odorant, as well as an automatic gas detection and alarm system, is required in enclosed, continuously manned areas of the facility.

4.1.10 *Electrical Equipment.* The following requirements shall be applicable to all electrical equipment and systems installed:

(a) All engines with ignition systems shall be equipped with a low-tension ignition system of a low-fire-hazard type and shall be designed and maintained to minimize release of sufficient electrical energy to cause ignition of an external, combustible mixture.

(b) All electrical generators, motors, and lighting systems shall be installed, protected, and maintained in accordance with the edition of the National Electrical Code and API RP 500B in effect at the time of installation.

(c) Wiring methods which conform to the National Electrical Code, or to IEEE 45, "Recommended Practice for Electric Installations on Shipboard," in effect at the time of installation, are acceptable.

(d) An auxiliary power supply shall be installed to provide emergency power, capable of operating all electrical equipment required to maintain safety of operations, in the event of a failure in the primary electrical power supply.

(e) The controls for electrical equipment shall be interlocked to prevent an improper startup and shutdown sequence.

(f) The elementary electrical schematic of the platform safety shutdown system required by subparagraph 3.4e(1) shall be posted in a prominent place on the platform or structure.

(g) Certification that the mechanical and electrical systems of the facility will be designed and installed under the supervision of appropriate registered professional engineers. Maintenance of these systems shall be by qualified personnel.

4.1.11 *Erosion.* A program of erosion control shall be in effect for wells having a history of sand production. The erosion control program may include sand probes, X-ray, ultrasonic, or other satisfactory monitoring methods. An annual report, by lease, on the results of the program shall be submitted by the first of September to the appropriate District Supervisor.

4.2 *General Platform Operations.*

(a) Any device on wells, vessels, or flowlines temporarily out of service shall be flagged. Safety devices and systems on wells which are capable of producing shall not be bypassed or blocked out of service, unless necessary, during startup maintenance operations and then only with personnel on duty aboard the platform.

(b) When wells are disconnected from producing facilities and blind-flanged or equipped with tubing plug, compliance is not required with the provisions of API RP 14C or this Order, concerning:

(1) Installation of automatic fail-close surface safety valves on wellhead assemblies.

(2) Installation of high- and low-pressure shut-in sensors downstream of the well choke-in flowlines from wells.

(3) Installation of check valves in header individual flowlines.

(c) All open-ended lines connected to producing facilities shall be plugged or blind-flanged, except those lines designed to be open-ended, such as flare or vent lines.

4.3 *Simultaneous Platform Operations.* Prior to conducting activities, simultaneously with production operations, which could increase the possibility of occurrence of undesirable events such as harm to personnel or to the environment, or damage to equipment, an operator's Contingency Plan, for each platform, shall be filed for approval with the appropriate District Supervisor. The plan shall be modified and updated as appropriate. Activities requiring the plan are drilling, workover, wireline, pumpdown, and major construction operations. The plan shall include:

(a) A narrative description of operations.

(b) A plan view of each platform deck indicating critical areas of simultaneous activities.

(c) Procedures for mitigation of potential undesirable events including:

(1) The guidelines the operator will follow to assure coordination and control of simultaneous activities.

(2) Indication as to the person having overall responsibility, as person-in-charge at the site, for safety of platform operations.

(3) An outline of any additional safety measures that are required for simultaneous operations.

(4) Specification of any added or special equipment or procedural conditions imposed when simultaneous activities are in progress.

4.4 *Welding Practices and Procedures.* The following requirements shall apply to all platforms and structures, including mobile drilling and workover structures. These requirements shall apply to fixed structures after the drilling out of the drive or structural casing for the first well drilled on the structure, entry into a well to be tied back

V 42 N 165 AUG 25 77 UM

to the structure, or first flow of combustible fluids to the structure. The period of time during which these requirements are considered applicable to drilling structures is the interval from the drilling out of the drive or structural casing until the blowout-preventer stack and riser are pulled in the final abandonment, suspension, or completion. These requirements shall apply to workover rigs when such rigs are performing remedial work on any wells open to hydrocarbon-bearing zones.

For the purpose of this Order, the term "welding and burning" is defined to include arc or acetylene cutting and arc or acetylene welding.

Each operator shall file, for approval by the appropriate District Supervisor, a Welding and Burning Safe Practices and Procedures Plan. The plan shall be filed within 90 days after the effective date of this Order and shall include company qualification standards or requirements for personnel and the methods by which the operator will assure that only personnel meeting such standards or rquirements are utilized. A copy of this plan shall be available in the field. Any person designated as a welding supervisor shall be thoroughly familiar with this plan.

Prior to welding or burning operations, the operator shall establish approved safe welding areas. Such areas shall be constructed of noncombustible or fire-resistant materials free of combustible or flammable contents and be suitably segregated from adjacent areas. National Fire Protection Association Bulletin No. 51B, "Cutting and Welding Processes," 1971, shall be used as a guide to designate these areas.

All welding which cannot be done in the approved safe welding area shall be performed in compliance with the procedures outlined below:

(a) All offshore welding and burning shall be minimized by onshore fabrication when feasible.

(b) Prior to the commencement of any welding or burning operations on a structure, the operator's designated person-in-charge at the installation shall personally inspect the qualifications of the welder or welders to assure that they are properly qualified in accordance with the approved company qualification standards or requirements for welders. The designated person-in-charge and welders shall personally inspect the area in which the work is to be performed for potential fire and explosion hazards. After it has been determined that it is safe to proceed with the welding or burning operation, the designated person-in-charge shall issue a written authorization for the work.

(c) All welding equipment shall be inspected prior to beginning any welding or burning. Welding machines located on production or process platforms shall be equipped with spark arrestors and drip pans. Welding leads shall be completely insulated and in good condition; oxygen and acetylene bottles secured in a safe place; and hoses leak-free and equipped with proper fittings, gauges, and regulators.

(d) During all welding and burning operations, one or more persons as necessary shall be designated as a Fire Watch. Persons assigned as a Fire Watch shall have no other duties while actual welding or burning operations are in progress.

(e) Prior to any welding or burning, the Fire Watch shall have in his possession fire-fighting equipment in a condition ready to use.

(f) No welding shall be done on containers, tanks, or other vessels which have contained a flammable substance unless the contents of the vessels have been rendered inert and determined to be safe for welding or burning by the designated person-in-charge.

(g) In the event drilling, workover, or wireline operations are in progress on the platform, welding operations in other than approved safe welding areas may be conducted only if the well(s) on which work is being done contain noncombustible fluids, and entry of formation hydrocarbons into the wellbore is precluded by a positive overbalance toward the formation. Also, all other provisions of this section shall be applicable.

(h) All other producible wells shall be shut in at the surface safety valves while welding or burning in the wellhead or production area.

4.5 *Safety Device Testing.* The safety system devices required by this Order shall be tested by the operator at the interval specified below or more frequently if operating conditions warrant. Records shall be maintained at the field office for a period of 1 year, showing the present status and history of each device, including dates and details of inspection, testing, repairing adjustment, and reinstallation. Such records shall be available to any authorized representative of the Geological Survey. Records shall be analyzed, equipment or system problem areas identified, and action taken to preclude recurrence of these problems.

Testing and reporting shall be accomplished in accordance with API RP 14C, Appendix D, and the following:

(a) All pressure relief valves shall be tested for operation semiannually. Pressure relief valves shall be either bench-tested or equipped to permit testing with an external pressure source.

(b) All pressure sensors shall be tested at least once each calendar month, but at no time shall more than 6 weeks elapse between tests.

(c) All automatic wellhead safety devices and check valves on all flowlines shall be checked for operation weekly and holding pressure once each calendar month, but at no time shall more than 6 weeks elapse between tests. If any wellhead safety valve indictates leakage, it shall be repaired or replaced.

(d) All liquid-level shut-in controls shall be tested at least once within each calendar month, but at no time shall more than 6 weeks elapse between tests. These tests shall be conducted by raising or lowering the liquid level across the level-control detector.

(e) All automatic inlet shut-off valves actuated by a sensor on a vessel or a compressor shall be tested for operation at least once within each calendar month, but at no time shall more than 6 weeks elapse between tests.

(f) All automatic shut-off valves located in liquid discharge lines and actuated by vessel low-level sensors shall be tested for operation once within each calendar month, but at no time shall more than 6 weeks elapse between tests.

(g) The high-temperature shut-down controls installed in all compressors which are protected against abnormal pressures solely by such temperature safety devices shall be tested semiannually and repaired or replaced as necessary.

(h) All pumps for fire-fighting water systems shall be inspected and test-operated weekly.

(i) The Automatic Smoke, Fire and Gas Detection System shall be tested for operation and recalibrated semi-annually.

(j) A complete testing and inspection of the integrated safety system shall be witnessed by Geological Survey representatives at the time production is commenced. Thereafter, the operator shall arrange for a test every 6 months. The test shall be conducted when it can be witnessed by Geological Survey representatives.

4.6 *Safety Device Training.* Not later than October 1, 1978, the operator shall ensure that all personnel engaged in installing, inspecting, testing, and routinely maintaining these safety devices will have been qualified under a program as recommended by API RP T–2, "Qualification Programs for Offshore Production Personnel Who Work With Anti-Pollution Safety Devices," September 1974, amended October 1975, or subsequent revisions approved by the Supervisor.

Documented evidence of qualification of individuals performing these functions shall be maintained at the field headquarters and shall be available to any authorized representative of the Geological Survey.

Manufacturers' representatives may work on component equipment supplied by their company, provided they are directly supervised by a qualified person, capable of evaluating the impact of the work on the total system. On-the-job trainees working with safety devices shall be directly supervised by a qualified person.

The operators shall submit for approval of the appropriate District Supervisor a description of the training to be conducted and the methods the operator will utilize to ensure that only persons qualified as above perform these functions. The description shall include:

(a) The operator's organizational element responsible for training and coordinating with the Geological Survey in training program matters.

(b) Categories of personnel to be qualified.

(c) Training organizations and courses to be utilized.

(d) Method for ensuring qualification of third-party personnel, if utilized.

(e) Method for determining when additional training or requalification is required and for obtaining same.

(f) Method of monitoring operations to ensure that only qualified personnel perform functions.

(g) Method of maintaining documented evidence of qualification at work site.

5. *Crane Operations.* Cranes shall be operated and maintained in a manner necessary to ensure the safety of facility operations in accordance with the provisions or API RP 2D, "Operation and Maintenance of Offshore Cranes," October 1972, or other revisions approved by the Supervisor.

Records of inspection, testing, and maintenance shall be kept in the field office for a period of 1 year.

API Specification 2C, "Specification for Offshore Cranes," shall be used as a guideline for the selection of cranes to be used offshore.

6. *Employee Orientation and Motivation Programs for Personnel Working Offshore.* The operator shall make a planned, continuing effort to eliminate accidents due to human error. This effort shall include the training of personnel in operational aspects of their functions and a program to instill in each individual working offshore a conscious desire to achieve safe and pollution-free operations. Minimum training of personnel going offshore for the first time shall include an orientation in accordance with API RP T–1, "Orientation Program for Personnel Going Offshore the First Time," January 1974, or equivalent. API Bulletin T–5, "Employee Motivation Programs for Safety and Prevention of Pollution in Offshore Operations," September 1974, shall be used as a guide in developing employee safety and pollution-prevention motivation programs. The applicability of any future revisions of the above API documents shall require approval by the Supervisor.

7. *Requirements for Drilling Rigs.*

7.1 *Fixed Structures.* The following requirements are applicable to drilling rigs for fixed structures:

(a) Subparagraph 4.1.7 *Curbs, Gutters, and Drains.*

(b) Subparagraph 4.1.10 *Electrical Equipment.*

(c) Subparagraph 4.4 *Welding Practices and Procedures.*

(d) Paragraph 5. *Crane Operations.*

(e) Paragraph 6. *Employee Orientation and Motivation Programs for Personnel Working Offshore.*

7.2 *Mobile Drilling Units.* The following requirements are applicable to drilling rigs on mobile drilling units:

(a) Subparagraph 4.4 *Welting Practices and Procedures.*

(b) Paragraph 6. *Employee Orientation and Motivation Programs for Personnel Working Offshore.*

Approved:

Acting Chief, Conservation Division

UNITED STATES DEPARTMENT OF THE INTERIOR.
GEOLOGICAL SURVEY, CONSERVATION DIVISION

NATIONAL ORDER, OCS ORDER NO. 7

EFFECTIVE----------

Pollution Control and Waste Disposal

This Order is established pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.43. The operator shall comply with the following requirements. All departures from the requirements specified in this Order shall be subject to approval pursuant to 30 CFR 250.12(b).

1. *Pollution Prevention.* In the conduct of all oil and gas operations, the operator shall prevent pollution of the ocean. Furthermore, the disposal of waste materials into the ocean shall not create conditions which will adversely affect the public health, life or property, aquatic life or wildlife, recreation, navigation, commercial fishing, or other uses of the ocean.

1.1. *Liquid Disposal.*

1.1.1. *Oil-Cut Drilling Mud.* Drilling mud containing free oil shall not be disposed of into the ocean.

1.1.2 *Drilling Mud Components.* The operator shall submit, as a part of the Application for Permit to Drill (Form 9–331C), a detailed list of drilling mud components, including the common chemical or chemical trade name of each component, a list of the drilling mud additives anticipated for use in meeting special drilling requirements, and the proposed method of drilling mud disposal. Disposal of drilling mud shall be by methods which will minimize the adverse effects to marine life. Approval of drilling mud disposal into the ocean must be obtained from the District Supervisor. Each request will be site specific and decided on a case-by-case basis.

1.1.3 *Hydrocarbon Handling Equipment.* All production facilities, such as separators, tanks, treaters, and other hydrocarbon handling equipment shall be designed and operated in a manner necessary to prevent pollution. Maintenance or repairs as are necessary to prevent pollution of the ocean shall be undertaken immediately.

1.1.4 *Curbs, Gutters, and Drains.* Curbs, gutters, and drains on platforms, structures, and mobile drilling units shall be installed and maintained in accordance with the provisions of OCS Order No. 5.

1.1.5 *Fixed Structure Discharges.* Discharges from fixed structures, including sanitary waste, produced water, and deck drainage, are subject to the Environmental Protection Agency's permitting procedures pursuant to the Federal Water Pollution Control Act, as amended.

1.1.6 *Mobile Drilling Unit Discharges.* Marine sanitation devices for mobile drilling units shall meet Coast Guard Type I specifications.

1.2 *Solid Material Disposal.*

1.2.1 *Well Solids.* Drill cuttings, sand, and other well solids containing oil shall not be disposed of into the ocean unless all of the free oil has been removed.

1.2.2 *Containers.* Containers and other similar solid waste materials shall not be disposed of into the ocean.

1.2.3 *Equipment.* Disposal of equipment into the ocean is prohibited except under emergency conditions. The location and description of any equipment so discharged shall be reported to the District Supervisor.

2. *Personnel, Inspections and Reports.*

2.1 *Personnel.* The operator's personnel shall be thoroughly instructed in the techniques of equipment maintenance and operation for the prevention of pollution. Nonoperator personnel shall be informed in writing, prior to executing contracts, of the operator's obligations to prevent pollution.

2.2 *Pollution Inspections.*

2.2.1 *Manned Facilities.* Manned drilling and production facilities shall be inspected daily to determine if pollution is occurring. Such maintenance or repairs as are necessary to prevent pollution of ocean waters shall be immediately undertaken and performed.

2.2.2 *Unattended Facilities.* Unattended facilities, including those equipped with remote control and monitoring systems, shall be inspected daily or at intervals prescribed by the District Supervisor and necessary maintenance or repairs thereto made immediately.

2.3 *Pollution Reports.* All spills of oil and liquid pollutants shall be reported orally to the District Supervisor and confirmed in writing. The reports shall include the cause, location, ocean state, meteorological conditions, size and appearance of slick, volume of spill and action taken.

2.3.1 *Spills.* Spills shall be reported orally as follows:

(a) Less than 1.0 cubic meters (6.3 barrels) within 12 hours.

(b) 1.0 to 5.0 cubic meters (6.3 to 31.5 barrels) within 4 hours.

(c) More than 5.0 cubic meters (31.5 barrels) without delay.

2.3.2 *Observed Malfunctions.* Operators shall notify each other upon observation of equipment malfunction or pollution resulting from another's operation.

3. *Pollution-Control Equipment and Oil Spill Contingency Plan.*

3.1 *Equipment.* Standby pollution-control equipment and materials shall be maintained by, or shall be available to, each operator at an offshore location, or at such location as required by the Supervisor. This shall include containment booms, skimming apparatus, cleanup materials, and chemical agents, and shall be available prior to the commencement of operations. The use of chemicals shall be permitted only after approval by the Supervisor in accordance with Annex X, National Oil and Hazardous Substances Pollution Contingency Plan. The equipment and materials shall be inspected monthly and maintained in good condition for use. The results of the inspections shall be recorded and maintained at the site.

3.2 *Oil Spill Contingency Plan.* The operator shall submit an oil spill contingency plan for approval by the Supervisor prior to approval of an application for a permit to conduct operations. This plan shall contain the following:

(a) Provisions to assure that full resource capability is known and can be committed during an oil discharge situation, including the identification and inventory of applicable equipment, materials, and supplies which are available locally and regionally, both committed and uncommitted, and the time required for deployment.

(b) Provisions for varying degrees of response effort depending on the severity of the oil discharge.

(c) Provisions for protecting areas of special biological sensitivity.

(d) Establishment of notification procedures for the purpose of early detection and timely notification of an oil discharge including a current list of names, telephone numbers, and addresses of the responsible persons and alternates on call to receive notification of an oil discharge, as well as the names, telephone numbers, and addresses of regulatory organizations and agencies to be notified when an oil discharge is discovered.

(e) Provisions for well defined and specific actions to be taken after discovery and notification of an oil discharge including:

(1) Specification of an oil discharge response operating team consisting of trained, prepared, and available operating personnel.

(2) Predesignation of an oil discharge response coordinator who is charged with the responsibility and delegated commensurate authority for directing and coordinating response operations.

(3) A preplanned location for an oil discharge response operations center and a reliable communications system for directing the coordinated overall response operations.

(4) Provisions for disposal of recovered spill material.

4. *Drills and Training.* Drills and training classes for familiarization with pollution control equipment and operational procedures shall be held by the operator either at the offshore structures and drilling vessels or at onshore locations where pollution and containment equipment is based. The drills shall be realistic and include deployment of equipment. A drill schedule acceptable to the Supervisor shall be set by the operator, and a copy shall be sent to the District Supervisor in sufficient time for U.S. Geological Survey personnel to witness any of the drills or training classes. All equipment need not be deployed at each drill. Records of the drills shall be kept and be made available to Geological Survey personnel. Where drill performance and results are deemed inadequate by the District Supervisor, the operator shall increase the frequency of the drills until satisfactory results are achieved.

5. *Spill Control and Removal.* Immediate corrective action shall be taken in all cases where pollution has occurred. Corrective action taken under the operator's Oil Spill Contingency Plan shall be subect to modification when directed by the Area Supervisor. The primary jurisdiction to require corrective action to abate the source of pollution and to enforce the subsequent cleanup by the lessee or operator shall remain with the Supervisor pursuant to the provisions of this Order and the memorandum of understanding between the Department of Transportation (U.S. Coast Guard) and the Department of the Interior (U.S. Geological Survey) dated August 16, 1971.

6. *Contingency Plan Review.* Contingency plans shall be reviewed annually, and all modifications shall be submitted to the Supervisor for approval, together with the results of the review.

Approved:

Acting Chief, Conservation Division

UNITED STATES DEPARTMENT OF THE INTERIOR, GEOLOGICAL SURVEY, CONSERVATION DIVISION

NATIONAL ORDERS, OCS ORDER NO. 8

EFFECTIVE----------

Platforms and Structures

This Order is established pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.19(a). All departures from the requirements specified in this Order shall be subject to approval pursuant to 30 CFR 250.12(b).

The operator shall be responsible for compliance with the requirements of this Order in the installation and operation of all platforms and structures. All applications for approval under the provisions of this Order shall be submitted to the appropriate District Supervisor.

Following approval of applications, installations and operations shall be performed as approved. If deemed advisable, significant changes to approved applications may be proposed; however, approval of such proposals shall be required prior to implementation. For the purposes of compliance with this paragraph, a significant change is any structural change which materially alters the original plan or any major deviation from operations as originally approved. Any question as to whether a change is significant enough to require approval shall be referred to the Supervisor.

The following requirements are applicable to all platforms and structures approved and installed subsequent to the effective date of the Order. When structural or equipment modifications to existing platforms and structures are proposed, only requirements relevant to the modification shall be applicable.

1. *General Platform Design.* A platform or structure shall be designed for safe installation and operation for its intended use and service life at a specific site. Steel structures shall be planned and designed in accordance with those provisions of American Petroleum Institute (API) Recommended Practice (RP) 2A, "Planning, Designing, and Constructing Fixed Offshore Platforms," Eighth Edition, April 1977, or subsequent revisions as approved by the Supervisor. Additionally, the design shall include considerations for fatigue which are outlined in paragraph 2 below. Alternatively, the operator may utilize "Rules for the Design, Construction, and Inspection of Fixed Offshore Structures," May 1977, or subsequent revisions published by Det Norske Veritas of Norway where said rules meet or exceed the provisions of API RP 2A (as modified above) when approved by the appropriate Supervisor. The design of structures other than steel shall be evaluated on an individual basis. Consideration shall be given to conditions which may contribute to structural damage such as:

(a) Forces due to seismic and thermal stresses, snow, ice buildup (live load and fouling effects), collision with floating ice, wind, wave, and current effects (including dynamic amplification where appropriate), and other environmental loading forces.

(b) Functional loading conditions including the weight of the structure and all permanently fixed equipment, and the effects of static and dynamic functional load conditions during installation and the design operational service period.

(c) Water depth, bottom topography, surface and subsurface soil conditions, slope stability, scour conditions, and other pertinent geologic conditions based on information from on-site investigations.

2. *Fatigue Considerations.*

2.1 *Steel Structures.* The results of the fatigue analysis performed in accordance with API RP 2A shall indicate a minimum expected life of twice the time period selected for the "design life (20 year minimum)" of the platform where sufficient structural redundancy exists to prevent catastrophic failure of the platform in the event of failure of the member or joint under consideration. Where such redundancy does not exist, the results shall indicate a minimum expected life of three times the "design life." Where weld treatments such as grinding are performed for reduction in stress concentration factors, such information shall be submitted for the Supervisor's consideration in his assessment of platform approval.

2.2 *Concrete Structures.* Those areas of the platform which are subject to fatigue are to be analyzed to determine the effects of cyclic loading on the concrete and reinforcement by employing the latest "state-of-the-art" methods and procedures. Factors of safety on "design life" are to be the same as for steel structures.

3. *Application.* Prior to installation of a fixed platform or structure, the operator shall submit for approval four copies of an application showing essential features of the platform or structure, including the support information listed in subparagraphs 3.1 through 3.5.

3.1 *General Information.*

3.1.1 *Identification Data.* Identification data, which shall include the platform or structure designation, lease number, area name, block number, and operator.

3.1.2 *Location Data.* Location data, giving the longitude and latitude coordinates and Universal Transverse Mercator grid system coordinates, and the Lambert system coordinates, where appropriate, including a plat showing the distance from the nearest block lines.

3.1.3 *Intended Uses.* Primary use and other intended functions, including planned drilling, production, and storage operations.

3.1.4 *Personnel Facilities.* Personnel facilities, personnel access to living quarters, boat landings, and heliports.

3.1.5 *Platform or Structure Details.* Drawings and plats to clearly illustrate essential parts, including number and location of well slots, water depth nominal size and thickness of jacket and deck column legs, nominal size, thickness, and design penetration of piling.

3.1.6 *Corrosion Protection.* A description of the method of corrosion protection.

3.2 *Environmental Information.*

3.2.1 *Environmental Data.* List of pertinent environmental data which have a bearing on the installation, operation, or design of the platform or structure, including wave heights and periods, current, wind and gust velocities at defined heights above the water surface, water depth, seismic history, storm and astronomical tide data, marine growth loading, air and sea temperatures, rainfall, snowfall, icing conditions, floating ice conditions, and factors considered in subparagraph 1.c.

3.2.2 *Acoustic Profiling.* Multi-sensor, high resolution, acoustic profiling information which determines overburden thickness and shallow geological structural detail at each proposed structure location.

3.2.3 *Loading.* Listing of total design functional loads, live loads due to snow and ice buildup and forces due to ice collision, wind, wave, and current forces for longitudinal, transverse, and diagonal approaches. Design values for maximum wave height, wind, and current shall be based on an average recurrence interval of not less than 100 years.

3.3 *Foundation.*

3.3.1 *Seabed Testing.* A listing of on-site investigations and tests and a basic summary of resultant determinations. Test results shall include properties and conditions of seabed and subsoil, and the presence of any manmade hazards or obstructions shall be noted.

3.3.2 *Foundation Loads.* A description of foundation loads for environmental and functional forces listed in subparagraphs 3.2.1 and 3.2.2.

3.3.3 *Soil Stability Analysis.* In areas susceptible to soil movement, an analysis of slope and soil stability in relation to the foundation design loads.

3.4 *Installation.* A statement shall be submitted to the effect that the installation recommendations contained in API RP 2A were adopted or that significant deviations from the recommendations of API RP 2A were adopted and are herewith submitted for approval.

3.5 *Specific Supporting Design Information Submittal.* Information listed in 3.5.1 through 3.5.4 shall be developed and utilized in platform design and submitted with the installation application.

3.5.1 *Critical Design Loading.* A description of the critical design loading and design criteria, taking into consideration maximum environmental and operational loading conditions expected over the service life of the platform or structure. This shall include those conditions considered under subparagraphs 1.a through 1.c above.

3.5.2 *Steel Structure Data.* For steel structures, a description of the materials, specifications, strength and fatigue analyses, including a summary of results, and allowable stresses over the service life.

3.5.3 *Concrete Structure Data.* For concrete structures, a description of the materials, specifications, strength and serviceability requirements, and analyses of the reinforcing systems.

3.5.4 *Nondestructive Testing.* Plans for the method(s) and extent of nondestructive testing of welding and materials.

4. *Certification.*

4.1 *Certification of Plans.* Detailed structural plans certified by a registered professional structural engineer or civil engineer specializing in structural design shall be on file and maintained by the operator or his designee.

4.2 *Certification by Operator.* The following certification, signed and dated by a company representative, shall accompany the application:

"---------- certifies that
(Operator)
this platform has been certified by a registered professional structural engineer or civil engineer specializing in structural design and the structure will be constructed, operated, and maintained as described in the application and any approved modification thereto. Certified Plans are on file at----------."

Approved:

Acting Chief, Conservation Division

UNITED STATES DEPARTMENT OF THE INTERIOR, GEOLOGICAL SURVEY, CONSERVATION DIVISION

NATIONAL ORDER, OCS ORDER NO. 12

EFFECTIVE ----------

Public Inspection of Records

This Order is established pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.97 and 43 CFR Part 2. Requests for information made under the Freedom of Information Act, 5 U.S.C. § 552, will be governed by the provisions of 43 CFR Part 2 (40 F.R. 7304, February 19, 1975). All departures from the requirements

specified in this Order shall be subject to approval pursuant to 30 CFR 250.12(b).

1. *Filing of Reports.* All reports on Forms 9–152, 9–330, 9–331, 9–331C, 9–1869, 9–1870, and the forms used to report the results of multi-point back pressure tests shall be filed by the operator in accordance with the following:

(a) All reports submitted on these forms shall include a copy with the words "Public Information" shown on the lower right-hand corner. This copy of the form shall be made available for public inspection.

(b) All items on the form not marked "Public Information" shall be completed in full, and such forms and all attachments thereto shall not be available for public inspection.

(c) The copy marked "Public Information" shall be completed in full, except that the items described in 2.1 through 2.4 below and the attachments relating to such items may be excluded.

2. *Availability of Records.* It has been determined that certain records pertainng to leases and wells in the Outer Continental Shelf and submitted under 30 CFR 250 shall be made available for public inspection, as specified below, in the Area office. Certain other portions of these records have been determined to be exempt from disclosure. The reason for these exemptions is discussed in Paragraph 3 of this Order.

2.1 *Form 9–152—Monthly Report of Operations.* All information contained on this form shall be available except the information required in the "Remarks" column.

2.2 *Form 9–330—Well Completion or Recompletion Report and Log.*

2.2.1 *Prior to Commencement.* Prior to commencement of production, all information contained on this form shall be available, except:

(a) Item 1a, Type of Well.

(b) Item 4, Location of Well, at top production interval and at total depth.

(c) Item 22, if Multiple Completion, how many.

(d) Item 24, Producing Interval.

(e) Item 26, Type Electric and Other Logs Run.

(f) Item 28, Casing Record.

(g) Item 29, Liner Record.

(h) Item 30, Tubing Record.

(i) Item 31, Perforation Record.

(j) Item 32, Acid, Shot, Fracture, Cement Squeeze, etc.

(k) Item 33, Production.

(l) Item 37, Summary of Porous Zones

(m) Item 38, Geologic Markers.

2.2.2 *After Commencement of Production.* After commencement of production, all information shall be available except Item 37, Summary of Porous Zones, and Item 38, Geologic Markers.

2.2.3 *Five Years Elapsed Time.* If production has not commenced after an elapsed time of 5 years from the date of filing Form 9–330 as required in 30 CFR 250.38(b), excluding the total of such time that operations and production are suspended by direction of the Secretary of the Interior or his duly authorized representative, and further excluding the total of such time that operations and production are stopped or prohibited by Court order, all information contained on this form shall be available except Item 37, Summary of Porous Zones, and Item 38, Geologic Markers. Within 90 days prior to the end of the 5-year period, exclusive of exceptions noted above, the lessee or operator shall file a Form 9–330 containing all information requested on the form except Item 37, Summary of Porous Zones, and Item 38, Geologic Markers, to be made available for public inspection. Objections to the release of such information may be submitted with the completed Form 9–330.

2.3 *Form 9–331—Sunday Notices and Report on Wells.*

2.3.1 *"Request for Approval to."* When used as a "Request for Approval to" conduct operations, all information contained on this form shall be available except Item 4, Location of Well, at top production interval and at total depth, and Item 17, Describe Proposed or Completed Operations.

2.3.2 *"Subsequent Report of."* When used as a "Subsequent Report of" operations, and after commencement of production, all information contained on this form shall be available, except information under Item 17 as to subsurface locations and measured and true vertical depths for all markers and zones not placed on production.

2.4 *Form 9–331C—Application for Permit to Drill, Deepen or Plug Back.* All information contained on this form, and location plat attached thereto, shall be available except Item 4, Location of Well at Proposed Production Zone, and Item 23, Proposed Casing and Cementing Program.

2.5 *Form 9–1869—Quarterly Oil Well Test Report.* All information contained on this form shall be available.

2.6. *Form 9–1870—Semi-Annual Gas Well Test Report.* All information contained on this form shall be available.

2.7 *Multi-point Back Pressure Test Report.* All information contained on this form used to report the results of required multi-point back pressure test of gas wells shall be available.

2.8 *Sales of Lease Production.* Information contained on monthly Geological Survey computer printout showing sales volumes, value, and royalty on production of oil, condensate, gas and liquid products, by lease, shall be made available.

2.9 *Availability of Inspection Records.* All accident investigation reports, pollution incident reports, facilities inspection data, and records of enforcement actions are also available for public inspection.

2.10 *Availability of Data and Information Submitted by Lessees as a Requirement of OCS Orders and Notices.* It has been determined that much information submitted by lessees as a result of OCS Orders and OCS Notices to Lessees and Operators is nonproprietary in nature and will be made available for public inspection. This will include:

(a) Notices of support activity.

(b) Oceanographic, meteorological, and performance data collected from drilling units and production facilities during the period of operations.

(c) Results of site surveys required prior to drilling or placement of structures, except for those portions which the lessee shall designate, with the Supervisor's approval, as trade secrets and commercial or financial information which is privileged or confidential.

(d) Drawings, maximum environmental design criteria, and performance data of mobile drilling units and structures.

(e) Oil spill contingency plans.

(f) Critical operations and curtailment plans.

3. *Information Exempt from Public Inspection.* The requirements of this paragraph are applicable to leases issued after June 11, 1976. It has been determined that certain information as discussed in paragraphs 1 and 2.1 through 2.4 of this Order is exempt from disclosure, under exemption No. 9 of the Freedom of Information Act [5 U.S.C. § 552(b)(9) and 43 CFR 2.13 subparagraph (c) *"Statutory Exemptions."* (9)]. This information has been determined to qualify as "geological and geophysical information and data including maps concerning wells." In accordance with 30 CFR 250.97, *"Public Inspection of Records,"* subparagraph (a), geophysical data shall not be available for public inspection without the consent of the lessee as long as the lease remains in effect or for a period of 10 years after the date of submission, whichever is less, unless the Supervisor, with the approval of the Director, determines that earlier release of such information is necessary for the proper development of the field or area. Subparagraph (b) requires that geological data shall not be made available for public inspection without the consent of the lessee, as long as the lease remains in effect or for a period of 2 years after the date of submission, whichever is less, unless the Supervisor, with the approval of the Director, determines that earlier release of such information is necessary for the proper development of the field or area.

Approved:

Acting Chief, Conservation Division

APPENDIX I

OCS ORDERS GOVERNING OIL AND GAS LEASE OPERATIONS IN THE OUTER CONTINENTAL SHELF

UNITED STATES DEPARTMENT OF THE INTERIOR, GEOLOGICAL SURVEY, CONSERVATION DIVISION

GULF OF MEXICO AREA, OCS ORDER NO. 2

EFFECTIVE ----------

Drilling Procedures

The preamble to this Order is common to all Areas of the Outer Continental Shelf. Refer to National Order No. 2.

1. *Drilling Platforms and Mobile Drilling Units.* Refer to National OCS Order No. 2.

2. *Well Casing and Cementing.* The requirements of this paragraph are the same as National OCS Order No. 2, except subparagraph 2.2.3 below.

2.2.3 *Conductor and Surface Casing Setting Depths.* Casing design and setting depths shall be based upon all engineering and geologic factors, including the presence or absence of hydrocarbons or other potential hazards and water depths. These strings of casing shall be set at the depths specified, subject to approved variation to permit the casing to be set in a competent bed, or through formations determined desirable to be isolated from the well by pipe for safer drilling operations; provided, however, that the conductor casing shall be set immediately prior to drilling into formations known to contain oil or gas, or, if unknown, upon encountering such formations. These casing strings shall be run and cemented prior to drilling below the specified setting depths. For those wells which may encounter abnormal pressure conditions, the District Supervisor may prescribe the exact setting depths. Conductor casing setting depths shall be between 152 meters (499 feet) and 305 meters (1,000 feet) TVD below Gulf floor, and surface casing setting depths shall be between 457 meters (1,499 feet) and 1372 meters (4,500 feet) TVD below Gulf floor.

Engineering and geologic data used to substantiate the proposed setting depths of the conductor and surface casing (such as estimated fracture gradients, pore pressures, shallow hazards, etc.) shall be furnished with the Application for Permit to Drill.

3. *Directional Surveys.* Refer to National OCS Order.

4. *Blowout Preventer Equipment Requirements.* Refer to National OCS Order.

5. *Mud Program.* Refer to National OCS Order.

6. *Supervision, Surveillance, and Training.* Refer to National OCS Order.

7. *Hydrogen Sulfide* Refer to National OCS Order.

8. *Critical Operations and Curtailment Plans.* Refer to National OCS Order.

D. W. SOLANAS,
Area Oil and Gas Supervisor.

Approved:

Acting Chief, Conservation Division

UNITED STATES
DEPARTMENT OF THE INTERIOR,
GEOLOGICAL SURVEY, CONSERVATION DIVISION

GULF OF MEXICO AREA, OCS ORDER NO. 5
EFFECTIVE----------

Subsurface Safety Devices and Surface Safety Systems

The preamble to this Order is common to all Areas of the Outer Continental Shelf. Refer to National OCS Order No. 5.

1. *Technological Improvements.* Refer to National Order.

2. *Subsurface Safety Devices.* In addition to the requirements of National OCS Order No. 5, the following items are required:

(a) *Wells completed subsequent to June 5, 1972.*

(1) All tubing installations in wells completed after June 5, 1972, with a shut-in pressure of 4,000 psig or greater shall be equipped with a subsurface-controlled subsurface safety device. A surface- or remote-controlled subsurface safety device may be installed if approved by the Supervisor. When the shut-in tubing pressure declines below 4,000 psig, a surface- or other remote-controlled subsurface safety device shall be installed when the tubing is first removed and reinstalled.

(2) All tubing installations in wells completed after June 5, 1972, with a shut-in tubing pressure initially below 4,000 psig shall be equipped with a surface- or remote-controlled subsurface safety device.

(b) *Wells completed prior to June 5, 1972.* (1) All tubing installations in wells completed prior to June 5, 1972, with a shut-in tubing pressure of 4,000 psig or greater, shall be equipped with a subsurface-controlled subsurface safety device. A surface- or remote-controlled subsurface safety device may be installed if approved by the Supervisor. When the shut-in tubing pressure declines below 4,000 psig, a surface- or other remote-controlled subsurface safety device shall be installed when the tubing is first removed and reinstalled.

(2) All tubing installations in wells existing prior to June 5, 1972, with a shut-in tubing pressure initially below 4,000 psig shall be equipped with a subsurface controlled subsurface safety valve. A surface- or remote-controlled subsurface safety device shall be installed when the tubing is first removed and reinstalled.

(c) *Satellite and sub-sea completion.* Tubing installations in wells completed from single-well and multiwell satellite caissons or jackets and ocean floor completions may be equipped with a subsurface-controlled subsurface safety device in lieu of a surface- or other remote-controlled subsurface safety device, upon application, justification, and approval.

(d) *Testing of subsurface-controlled subsurface safety devices.* Each subsurface-controlled subsurface safety device installed in a well shall be removed, inspected, and repaired or adjusted as necessary and reinstalled at intervals not exceeding:

(1) 6 months for those devices not installed in a landing nipple.

(2) 12 months for those devices installed in a landing nipple.

Each velocity-type device shall be designed to close at a flow rate not to exceed the larger of either 150 percent of, or 200 BFPD above, the most recent well-test rate which equals or exceeds the approved production rate. The above closing flow rate shall not exceed the calculated capacity of the well to produce against a flowing wellhead pressure of 50 psig. Each preset tubing-pressure-actuated device shall be designed to close prior to reduction of the flowing wellhead pressure to 50 psig.

3. *Design, Installation, Operation, and Testing of Surface Production Facilities Safety Systems.* Refer to National Order.

4. *Additional Safety and Pollution Control Requirements.* The requirements of this paragraph are the same as National OCS Order No. 5, except subparagraph 4.1.8 below.

4.1.8 *Firefighting Systems.* A firefighting water system of rigid pipe with fire hose stations shall be installed and may include a fixed water-spray system. Such a system shall be installed in a manner necessary to provide needed protection in areas where production-handling equipment is located. A firefighting system using chemicals may be used in lieu of a water system if determined to provide equivalent fire protection control.

An alternate fuel or power source shall be installed to provide continued pump operation for the system during platform shutdown, unless an alternate firefighting system is provided.

A diagram of the firefighting system showing the location of all equipment shall be posted in a prominent place on the platform or structure.

5. *Crane Operations.* Refer to National Order.

6. *Employee Orientation and Motivation Programs for Personnel Working Offshore.* Refer to National Order.

7. *Requirements for Drilling Rigs.* Refer to National Order.

Drilling procedures

The preamble to this Order is common to all Areas of the Outer Continental Shelf. Refer to National OCS Order No. 2.

1. *Drilling Platforms and Mobile Drilling Units.* Refer to National OCS Order No. 2.

2. *Well Casing and Cementing.* The requirements of this paragraph are the same as National OCS Order No. 2, except Subparagraphs 2.2.2 and 2.2.3 below.

2.2.2. *Surface Casing.* This casing shall be cemented with a quantity of cement sufficient to protect all freshwater sands and provide well control until the next string of casing is set, and sufficient to fill the calculated annual space to the ocean floor, or as approved by the District Supervisor. After drilling a maximum of 30 meters (98 feet) below the surface casing shoe, a pressure test shall be obtained to aid in determining a formation fracture gradient either by testing to formation leak-off or by testing to a predetermined equivalent mud weight. The results of this test and any subsequent tests of the formation shall be recorded on the driller's log and used to determine the depth and maximum mud weight of the intermediate hole.

2.2.3 *Conductor and Surface Casing Setting Depths.* Casing design and setting depths shall be based upon all engineering and geologic factors, including the presence or absence of hydrocarbons or other potential hazards and water depths. These strings of casing shall be set at the depths specified, subject to approved variation to permit the casing to be set in a competent bed, or through formations determined desirable to be isolated from the well by pipe for safer drilling operations; provided, however, that the conductor casing shall be set immediately prior to drilling into formations known to contain oil or gas, or, if unknown, upon encountering such formations. These casing strings shall be run and cemented prior to drilling below the specified setting depths. For those wells which may encounter abnormal pressure conditions, the District Supervisor may prescribe the exact setting depths. Conductor casing setting depths shall be between 91 meters (298 feet) and 152 meters (499 feet) TVD below the ocean floor. Surface casing setting depths shall be between 305 meters (1,000 feet) and 366 meters (1,200 feet) TVD below the ocean floor, but may be set 455 meters (1,501 feet) in the event that conduct casing is set as deep as 137 meters (449 feet) TVD below the ocean floor.

Engineering and geologic data used to substantiate the proposed setting depths of the conductor and surface casings (such as estimated fracture gradients, pore pressures, shallow hazards, etc.) shall be furnished with the Application for Permit to Drill.

3. *Directional Surveys.* Refer to National OCS Order.

4. *Blowout Preventer Equipment Requirements.* Refer to National OCS Order.

5. *Mud Program.* Refer to National OCS Order.

WESTERN REGION, ALASKA AREA, GULF OF ALASKA
OCS ORDER NO. 2, EFFECTIVE ----------

Drilling Procedures

The preamble to this Order is common to all Areas of the Outer Continental Shelf. Refer to National OCS Order No. 2.

1. *Drilling Platforms and Mobile Drilling Units.* In addition to the requirements of National OCS Order No. 2, the following items are required:

1.1.5 *Oceanographic, Meteorological, Performance Data.* Operators shall collect and report oceanographic, meteorological, and performance data during the period of operations. The type of information collected, method of collection, and report requirements will be as specified by the Supervisor.

1.1.6 *Subfreezing Operations.* Operators shall furnish evidence that the drilling equipment, drilling safety systems, and other associated equipment are conditioned to assure proper operation under subfreezing conditions where operations will take place over winter months in areas which experience these conditions.

2. *Well Casing and Cementing.* The requirements of this paragraph are the same as National OCS Order No. 2, except Subparagraph 2.2.3 below.

2.2.3 *Conductor and Surface Casing Setting Depths.* Casing design and setting depths shall be based upon all engineering and geologic factors, including the presence or absence of hydrocarbons or other potential hazards and water depths. These strings of casing shall be set at the depths specified, subject to approved variation to permit the casing to be set in a competent bed, or through formations determined desirable to be isolated from the well by pipe for safer drilling operations; provided, however, that the conductor casing shall be set immediately prior to drilling into formations known to contain oil or gas, or, if unknown, upon encountering such formations. These casing strings shall be run and cemented prior to drilling below the specified setting depths. For those wells which may encounter abnormal pressure conditions, the District Supervisor may prescribe the exact setting depths. Except as may otherwise be prescribed, conductor casing setting depths shall be between 91 meters (298 feet) and 305 meters (1,000 feet) TVD below ocean floor, and surface casing setting depths shall be between 305 meters (1,000 feet) and 1,400 meters (4,592 feet) TVD below ocean floor.

Engineering, geophysical, and geologic data used to substantiate the proposed setting depths of the conductor and surface casings (such as estimated fracture gradients, pore pressures, shallow hazards, etc.) shall be furnished with the Application for Permit to Drill.

3. *Directional Surveys.* Refer to National OCS Order.

4. *Blowout Preventer Equipment Requirements.* In addition to the requirements of National OCS Order No. 2, the following is required:

4.1.3 *Subfreezing Operations.* The blowout preventers and related control equipment must be equipped and conditioned to assure proper operation under subfreezing conditions when operations will be conducted over winter months in areas likely to experience these conditions.

5. *Mud Program.* Refer to National OCS Order.

6. *Supervision, Surveillance, and Training.* Refer to National OCS Order.

7. *Hydrogen Sulfide.* Refer to National OCS Order.

8. *Critical Operations and Curtailment Plans.* Refer to National OCS Order.

2.3 *Surface-Controlled Subsurface Safety Devices.* The operator must furnish evidence that the surface-controlled subsurface safety devices and related equipment are capable of full operation under subfreezing conditions.

3. *Design, Installation, Operation, and Testing of Surface Production Facilities Safety Systems.* In addition to the requirements of National OCS Order No. 5, the following item is required:

The operator must furnish evidence that the surface safety systems and related equipment are capable of full operation under subfreezing conditions, and that all equipment and operating procedures take into account floating ice and other extreme environmental conditions that may occur in the area.

4. *Additional Safety and Pollution Control Requirements.* Refer to National OCS Order.

5. *Crane Operations.* Refer to National OCS Order.

6. *Employee Orientation and Motivation Programs for Personnel Working Offshore.* Refer to National OCS Order.

7. *Requirements for Drilling Rigs.* Refer to National OCS Order.

APPENDIX V

OCS ORDERS GOVERNING OIL AND GAS LEASE OPERATIONS IN THE OUTER CONTINENTAL SHELF

UNITED STATES DEPARTMENT OF THE INTERIOR, GEOLOGICAL SURVEY, CONSERVATION DIVISION

EASTERN REGION, ATLANTIC AREA, NORTH ATLANTIC AREA OCS ORDER NO. 2, EFFECTIVE ----------

Drilling Procedures

The preamble to this Order is common to all Areas of the Outer Continental Shelf. Refer to National OCS Order No. 2.

1. *Drilling Platforms and Mobile Drilling Units.* In addition to the requirements of National OCS Order No. 2, the following items are required:

1.1.5 *Oceanographic, Meteorological, and Performance Data.* Operators shall collect and report oceanographic, meteorological, and performance data during the period of operations. The type of information collected, method of collection, and report requirements will be as specified by the Supervisor.

1.1.6 *Subfreezing Operations.* Operators shall furnish evidence that the drilling equipment, drilling safety systems, and other

associated equipment are conditioned to assure proper operation under subfreezing conditions where operations will take place over winter months in areas which experience these conditions.

2. *Well Casing and Cementing.* The requirements of this paragraph are the same as OCS Order No. 2, except Subparagraph 2.2.3 below.

2.2.3 *Conductor and Surface Casing Setting Depths.* Casing design and setting depths shall be based upon all engineering and geologic factors, including presence or absence of hydrocarbons or other potential hazards and water depths. These strings of casing shall be set at the depths specified, subject to approved variation to permit the casing to be set in a competent bed, or through formations determined desirable to be isolated from the well by pipe for safer drilling operations; provided, however, that the conductor casing shall be set immediately prior to drilling into formations known to contain oil or gas, or, if unknown, upon encountering such formations. These casing strings shall be run and cemented prior to drilling below the specified setting depths. For those wells which may encounter abnormal pressure conditions, the District Supervisor may prescribe the exact setting depths. Except as may otherwise be prescribed, conductor casing setting depths shall be between 91 meters (298 feet) and 305 meters (1,000 feet) TVD below ocean floor, and surface casing setting depths shall be between 305 meters (1,000 feet) and 1,400 meters (4,592 feet) TVD below ocean floor.

Engineering, geophysical, and geologic data used to substantiate the proposed setting depths of the conductor and surface casings (such as estimated fracture gradients, pore pressures, shallow hazards, etc.) shall be furnished with the Application for Permit to Drill.

3. *Directional Surveys.* Refer to National OCS Order.

4. *Blowout Preventer Equipment Requirements.* In addition to the requirements of National OCS Order No. 2, the following is required:

4.1.3 *Subfreezing Operations.* The blowout preventers and related control equipment must be equipped and conditioned to assure proper operation under subfreezing conditions when operations will be conducted over winter months in areas likely to experience these conditions.

5. *Mud Program.* Refer to National OCS Order.

6. *Supervision, Surveillance, and Training.* Refer to National OCS Order.

7. *Hydrogen Sulfide.* Refer to National OCS Order.

8. *Critical Operations and Curtailment Plan.* Refer to National OCS Order.

DWAYNE E. HULL,
Area Oil and Gas Supervisor.

Geological Survey

BOARD ON GEOGRAPHIC NAMES DOMESTIC NAMES COMMITTEE

Meetings

Announcement is made of the following two meetings of the Committee:

Name: Board on Geographic Names, Domestic Names Committee.

Date: October 25, 1977.

Place: Auditorium, Interior South Building, 1951 Constitution Avenue, NW., Washington, D.C.

Time: 0930–1130; 1330–1700.

Date: November 10, 1977.

Place: Assembly Chambers, City of Anchorage, 3500 E. Tudor Road, Anchorage, Alaska.

Time: 0930–1130; 1330–1700.

Purpose of meetings: A proposal to change the name of Mt. McKinley in Alaska to the Indian name "Denali" will be discussed. Interested parties may express their views on the proposal prior to a decision on the matter by the entire U.S. Board on Geographic Names and the Secretary of the Interior.

The meetings of the Domestic Names Committee are open to the public. Parties wishing to make oral statements at the meeting(s) are asked to notify the Committee at least 5 days prior to meeting(s) which they plan to attend in order that time may be reserved for their presentations.

Any member of the public may file a written statement with the Committee, before, during, or immediately after each meeting. To the extent that time permits, the Committee Chairman may allow public presentations of oral statements at the meeting(s) from individuals who have not preregistered with the Committee.

All communications regarding the meeting in Washington, D.C. should be addressed to:

Mr. Donald J. Orth, Executive Secretary, Domestic Names Committee, U.S. Geological Survey, 523 National Center, Reston, Va. 22092.

Communications pertaining to the Anchorage, Alaska, meeting should be addressed to:

Mr. Jerry Z. Gilliland, Field Representative, Department of the Interior, P.O. Box 120, Anchorage, Alaska 99501.

By the Domestic Names Committee.

S. M. LANG,
Acting Executive Secretary.

National Park Service

[Order No. 6, Amdt. 2]

ADMINISTRATIVE OFFICER, ET AL., EVERGLADES NATIONAL PARK, FLORIDA

Delegation of Authority

Sections 1 and 2 of Order No. 6 published in the FEDERAL REGISTER of July 25, 1972, (FR 14821) are hereby canceled and superseded as follows:

Section 1. *Administrative Officer and Procurement Officer.* The Administrative Officer and Procurement Officer, Everglades National Park, may execute, approve, and administer contracts and issue purchase orders not in excess of $500,000 for equipment, supplies, and services, in conformity with applicable regulations and statutory authority and subject to availability of appropriated funds. This authority may be exercised by the Administrative Officer and Procurement Officer in behalf of any coordinated area.

Section 2. Purchasing Agent. The Purchasing Agent, Everglades National Park, may issue purchase orders not in excess of $10,000 for supplies, equipment, or services in conformity with applicable regulations and statutory authority and subject to availability of appropriated funds. This authority may be exercised by the Purchasing Agent in behalf of any coordinated area.

(National Park Service Order No. 77 (38 FR 7478) as amended; Southeast Region Order No. 5 (37 FR 7721) as amended.)

Dated: December 15, 1976

JOHN M. GOOD,
Superintendent,
Everglades National Park.

[FR Doc 77-24563 Filed 8-24-77;8:45 am]

[Order No. 92]

CHIEF, CONTRACTING AND PROPERTY DIVISION, ET AL

Delegation of Authority

SECTION 1. Chief, Contracting and Property Management Division. The Chief, Contracting and Property Management Division, Washington Office, is authorized to execute, approve, and administer contracts for construction, equipment, supplies, and services, in conformity with applicable regulations and statutory requirements and subject to the availability of appropriated funds.

SEC. 2. Chief, General Services Division. The Chief, General Services Division, Washington Office, is authorized to execute, approve, and administer contracts for construction, equipment, supplies, and services, in conformity with applicable regulations and statutory requirements and subject to the availability of appropriated funds.

SEC. 3. Contract Specialist. The Contract Specialist, General Services Division, Washington Office, is authorized to execute, approve, and administer contracts for construction, equipment, supplies, and services, in conformity with applicable regulations and statutory requirements and subject to the availability of appropriated funds.

SEC. 4. Purchasing Agent. The Purchasing Agent may issue purchase orders not in excess of $10,000 for supplies, equipment, or services in conformity with applicable regulations and statutory requirements and subject to the availability of appropriated funds.

SEC. 5. Revocation. This order revokes National Park Service Delegation of Authority No. 89 (42 FR 10344) published February 22, 1977.

(205 DM, as amended; 245 DM, as amended; Sec. 2 of Reorganization Plan of 1950.)

Dated: August 5, 1977.

WILLIAM J. WHALEN,
Director.

WESTERN REGIONAL ADVISORY COMMITTEE

Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a field trip and public meeting of the Western Regional Advisory Committee will be held in Sequoia National Park and Visalia, California respectively. The field trip will begin on September 16, 1977 at Giant Forest and end the same date in Visalia. A public meeting will be held at 9:00 a.m. PDT on September 17, 1977 in

the Sequoia Room of the Convention Center, 303 E. Acequia, Visalia, California.

The purpose of the Western Regional Advisory Committee is to provide for the free exchange of ideas between the National Park Service and the public and to facilitate the solicitation of advice or other counsel from members of the public on programs and problems pertinent to the Western Region of the National Park Service.

The members of the Advisory Committee are as follows:

Lewis S. Eaton, Fresno, California (Chairman).
Ben Avery, Phoenix, Arizona.
David W. Ballie, Jr., Waipahu, Hawaii.
Ed Fike, Las Vegas, Nevada.
Bernard Fontana, Tucson, Arizona.
Jean Ford, Las Vegas, Nevada.
Sonya Thompson, Aqoura, California.
Jack Walston, San Marino, California.
Todd Watkins, Bishop, California.

The field trip will provide the committee with an onsite orientation of the present planning activities by the National Park Service for the Giant Forest Lodgepole and Clover Creek areas within Sequoia National Park. They will also be provided an on the ground briefing of the Mineral King area.

Due to a lack of space, only the Advisory Committee members and associated National Park Service personnel will be provided transportation for the field trip.

The meeting will be open to the public. Any member of the public will also be able to file, with the committee, a written statement concerning the matters to be discussed.

Persons wishing further information concerning this meeting or who wish to submit written statements may contact Ray C. Foust, Executive Assistant to the Regional Director, Western Regional Office at (415) 556-8227.

Resolutions or recommendations made by the committee as a result of this meeting will be available for public inspection four weeks after the meeting through the Western Regional Office, National Park Service, 450 Golden Gate Avenue, San Francisco, California 94102.

Dated: August 16, 1977.

HOWARD H. CHAPMAN,
Regional Director,
Western Region.

[FR Doc.77-24564 Filed 8-24-77;8:45 am]

Office of the Secretary

PRIVACY ACT OF 1974

Modification of System Notice

Notice is hereby given that the Department of the Interior has under consideration modification of the system notice describing a records system which it maintains which is subject to section 3 of the Privacy Act of 1974, 5 U.S.C. 552a.

By notice published in the FEDERAL REGISTER on April 11, 1977 (42 FR 19062–19069), the Department adopted a system notice describing the Health and Safety Training Records including Qualification and Certification Data (Interior, MESA–15).

It is now proposed to maintain records of training, to verify that individuals have completed required training, and to monitor and/or expand safety training programs. The proposed modification in the system notice will reflect this change.

The system notice, as it is proposed to be modified, is set out below. The modified portions of the notice are indicated by underlining.

Comments on the proposed modification may be submitted to the Assistant Solicitor, General Legal Services, Office of the Solicitor, U.S. Department of the Interior, 18th and C Streets, NW., Washington, D.C. 20240. All comments received on or before September 25, 1977, will be considered. Copies of any comments received may be inspected in Room 6510 at the above address.

RICHARD R. HITE,
Deputy Assistant Secretary
of the Interior.

AUGUST 17, 1977.

INTERIOR/EMS–15

System name:

Health and Safety Training Records Including Qualification and Certification Data—Interior, MESA—15.

System location:

Qualification and Certification Unit, Education and Training, Mining Enforcement and Safety Administration, U.S. Department of the Interior, 603 Miller Court, Lakewood, Colorado 80215.

Categories of individuals covered by the system:

Contains training data on miners, mining industry personnel, and State and Federal employees who have taken MFSA approved training courses.

Categories of records in the system:

Contains name, Social Security Number, mine ID number, training course, instructor's name and other relevant data.

Authority for maintenance of the system:

Section 317(i) and Section 502 of P.L. 91–173, Federal Coal Mine Health and Safety Act of 1969 (30 U.S.C. 877 and 952) and Section 15 of Pub. L. 89–577, Federal Metal and Nonmetallic Mine Safety Act of 1966 (30 U.S.C. 734).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The primary uses of the records are to *(a) maintain records of training of individual miners, mining industry personnel, and State and Federal employees who have taken MESA approved training courses; (b) issue certificates or certification cards to individuals who become qualified or certified under the law, as appropriate;* (c) issue certification cards to instructors authorizing them to teach MESA *approved* training courses; *(d) provide information to monitor and/or expand safety training programs; (e) to verify that individuals have completed required training;* (f) statistical reporting of training data in various formats for a variety of uses, e.g., reporting to Congress, publications, etc. Disclosures outside of the Department of the Interior may be made (1) to coal companies requesting information to verify training required by law; (2) to Unions requesting information on training status of its members; (3) to coal operators associations requiring training for policy and programming utilization; (4) to the U.S. Department of Justice when related to litigation or anticipated litigation; (5) of information indicating a violation or potential violation of a statute, regulation, rule, order or license, to appropriate Federal, State, local or foreign agencies responsible for investigating or prosecuting the violation or for enforcing or implementing the statute, rule, regulation, order or license; (6) from the record of an individual in response to an inquiry from a Congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Manual: Microfilm—original training records; and Computer: Magnetic tape-training, certification and qualification of Individual.

Retrievability:

Microfilm: Computerized document listing; filed by mine ID number; filed by date processed. Magnetic tape: retrieved by feeding in the individual's Social Security Number.

Safeguards:

In accordance with 43 CFR 2.51.

Retention and disposal:

Computer records are kept indefinitely; reporting outputs are discarded after they have served their purpose; microfilm records are permanently retained for historical file.

System manager(s) and address:

Education Specialist, Qualification and Certification Unit, Education and Training, 603 Miller Court, Lakewood, Colorado 80215.

Notification procedure:

To determine whether the records are maintained on you in the system, write to the System Manager.

Record access procedure:

To see your records write the System Manager cited under "Records Location". Describe as specifically as possible the records sought. If copies are desired, indicate the maximum you are willing to pay.

Contesting record procedures:

To request corrections or the removal of material from your files, write the System Manager.

Record source categories:

An individual on whom the record is maintained, Instructors of the train-

ing courses, *mine inspection personnel, mine operators, State personnel and miners' representatives or organizations who provide training courses required by MESA.*

INTERNATIONAL TRADE COMMISSION

[AA1921-173]

CERTAIN RAILWAY TRACK MAINTENANCE EQUIPMENT FROM AUSTRIA

Investigation and Hearing

Having received advice from the Department of the Treasury on August 11, 1977, that railway track maintenance equipment from Austria is being, or is likely to be, sold at less than fair value, the United States International Trade Commission, on August 19, 1977, instituted investigation No. AA1921-173 under section 20(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160 (a)), to determine whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

Hearing. A public hearing in connection with the investigation will be held in Washington, D.C., beginning at 10 a.m., e.d.t, on Thursday, October 6, 1977, in the hearing room, U.S. International Trade Commission Building, 701 E Street NW., Washington, D.C. 20436. All persons shall have the right to appear by counsel or in person, to present evidence, and to be heard. Requests to appear at the public hearing, or to intervene under the provisions of section 201(d) of the Antidumping Act, 1921, shall be filed with the Secretary of the Commission, in writing, not later than noon, Thursday, September 29, 1977.

Issued: August 22, 1977.

By order of the Commission.

KENNETH R. MASON,
Secretary.

[FR Doc.77-24554 Filed 8-24-77;8:45 am]

[Investigation No. 337-TA-20]

CERTAIN WELDED STAINLESS STEEL PIPE AND TUBE

Order Dismissing Certain Respondents

This matter comes before the Commission as a result of the recommendation of the presiding officer to dismiss Nippon Steel Corp., Nippon Kokan Kabushiki Kaisha, Itoman & Co., Ltd., Nishimura Kogyo Co., Ltd., Shinshowa Kokan Co., Ltd., Sanwa Metal Industries, Ltd., Sumikin Bussan Kaisha, Ltd., Iwatani and Co., Ltd., Mitsubishi Corp., and Nippon Stainless Steel Co., Ltd., as respondents in the instant investigation. After considering the presiding officer's recommendation, Prehearing Order No. 17, issued July 29, 1977, and the evidence in support thereof including both affidavits filed in support of the motions to dismiss and discovery responses of the respondents, and the pleadings of all parties concerning these motions, the Commission has decided to adopt recommendations 1-10 of Prehearing Order No. 17.

We also adopt the presiding officer's opinion. It would appear that he set up a special wave of discovery to inquire into jurisdictional facts. In light of the interrogatory answers that have been filed and the respondents' affidavits, the Commission will not disturb the presiding officer's findings.

It is, therefore, hereby ordered, That:

1. The motion of Nippon Steel Corporation (M29-11) to be removed as a party is granted.

2. The motion of Nippon Kokan Kabushiki Kaisha (M29-12) to be removed as a party is granted.

3. The motion of Itoman and Co., Ltd. (M29-13) to be removed as a party is granted.

4. The motion of Nishimura Kogyo Co., Ltd. (M29-14) to be removed as a party is granted.

5. The motion of Shinshowa Kokan Co., Ltd. (M29-15) to be removed as a party is granted.

6. The motion of Sanwa Metal Industries, Ltd. (M29-16) to be removed as a party is granted.

7. The motion of Sumikin Bussan Kaisha, Ltd. (M29-17) to be removed as a party is granted.

8. The motion of Iwatani and Co., Ltd. (M29-18) to be removed as a party is granted.

9. The motion of Mitsubishi Corporation (M29-35) to be removed as a party is granted.

10. The motion of Nippon Stainless Steel Company (M29-50) to be removed as a party is granted.

Issued: August 22, 1977.

By order of the Commission.

KENNETH R. MASON,
Secretary.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 77-51]

SPACE SCIENCE STEERING COMMITTEE, SPACE TELESCOPE AD HOC ADVISORY SUBCOMMITTEE

Meeting

The Space Science Steering Committee, Space Telescope Ad Hoc Advisory Subcommittee, will meet at NASA Headquarters on September 19, 20, and 21, 1977. The meetings will be held as follows: September 19: Room 5026; 9:00 a.m.-5:30 p.m.; Rooms 5137 and 6004; 10:30 a.m.-5:30 p.m.; September 20: Rooms 5026, 5092, and 5137; 8:30 a.m.-5:00 p.m.; September 21: Room 5026; 8:30 a.m. to 5:00 p.m.

The Subcommittee section will discuss, evaluate, and categorize proposals for participation in scientific investigations to be performed on the Space Telescope mission. Throughout the Subcommittee session the professional qualifications of the proposers, the merits of their proposed flight investigations and the associated instrumentation, and the potential scientific contribution of the proposers to the mission will be candidly discussed and appraised. Discussion of these matters in a public session would invade the privacy of the proposers and the other individuals involved. The meeting will be closed to members of the public.

Since the Subcommittee sessions will be concerned throughout with matters listed in 5 U.S.C. 552b(c)(6), it has been determined that these sessions should be closed to the public.

For further information please contact Dr. Nancy G. Roman, NASA Headquarters, Washington, D.C. 20546, telephone 202-755-3649.

Dated: August 19, 1977.

KENNETH R. CHAPMAN,
Assistant Administrator for DOD and Interagency Affairs.

[FR Doc.77-24584 Filed 8-24-77;8:45 a.m.]

[Notice 77-52]

NASA RESEARCH AND TECHNOLOGY ADVISORY COUNCIL PANEL ON AVIATION SAFETY AND OPERATING SYSTEMS, AD HOC PANEL ON TERMINAL CONFIGURED VEHICLES

Meeting

The NASA Research and Technology Advisory Council, Panel on Aviation Safety and Operating Systems, Ad Hoc Panel on Terminal Configured Vehicles will meet on September 14-16, 1977, at the NASA Langley Research Center, Hampton, Va. 23665. The meeting will be held in Conference Room 246 of Building 1202. The meeting will be open to the public on a first-come, first-served basis, up to the seating capacity of the room, which is about 50 persons. All visitors must report to the Receptionist in Room 246, Building 1202.

The NASA Research and Technology Advisory Council's Panel on Aviation Safety and Operating Systems, Ad Hoc Panel on Terminal Configured Vehicles serves in an advisory capacity only. The Panel reviews and evaluates all phases of terminal configured vehicle research and technology in relevance to current needs and requirements, and also provides recommendations and advice on the goals, trends, content, and benefits in areas of Panel responsibility. The Chairman is John A. Gorham.

There are 10 members. The following list sets forth the approved agenda and schedule for the September 14-16, 1977 meeting of the Panel. For further information, please contact the Executive Secretary, Mr. Kenneth E. Hodge, Code RO, NASA Headquarters, Washington, D.C. 20546, area code 202-755-2375.

SEPTEMBER 14, 1977

Time and Topic

12:00 Noon: Registration of Members, Invited Guests, and Visitors.

12:30 p.m.: Convene. Welcoming Remarks and Introductory Statement.

12:45 p.m.: Report of the Chairman (Purpose: To report on the May 24-26, 1977 meeting of the Panel on Aviation Safety and Operating Systems and to relay to the members that Panel's response to this Ad Hoc Panel's activity and recommendations).

1:00 p.m.: Report of the Executive Secretary (Purpose: To advise the Panel of recent or proposed changes in NASA policy, organization, and in pertinent aeronautics programs, to review FY 1978 and FY 1979 budget status and to present other items of interests).

1:15 p.m.: Discussion of Metering and Spacing Simulations and Cockpit Display of Traffic Information (Purpose: To describe two tasks which are being conducted jointly with the FAA and which have been active since the last meeting and to obtain Panel comments on the plan for future activities).

1:35 p.m.: Discussion of Longitudinal Separation in the Terminal Area and Runway Feeding (Purpose: To update for the Panel the results of high speed runway turn-off tests, sensitivity studies of high speed turn-off parameters, and study of effects of reduction of wake vortex separation minima. Panel comments will be solicited on contents of the tasks).

2:15 p.m.: Reduced Fuel Consumption Techniques (Purpose: To obtain Panel comments on a plan for profile descent research designed with reduced fuel utilization as the objective).

2:45 p.m.: Discussion of Use of an Oculometer as a Research Tool in Defining Pilot Information Needs (Purpose: To report on status and future thrusts of research using an oculometer in developing new cockpit display arrangements including display concepts).

3:30 p.m.: Reduction of Wind Shear Effects (Purpose: To inform the Panel of recent results of simulation studies of on-board wind shear detection, display, and aircraft control; to summarize wind shear data gathered during flights; and to give the status of wind shear probe development and test).

SEPTEMBER 15, 1977

8:30 a.m.: Summary of Microwave Landing Systems Related Activities and Future Plans (Purpose: To brief the Panel of ongoing and planned activities related to the Microwave Landing System and to obtain Panel comments on the contents of the planned tasks.).

9:00 a.m.: Status of the Research Support Flight System (Purpose: To inform the Panel of the improvements which have been made in the aircraft systems of the modified Boeing 737 airplane.).

9:15 a.m.: Description of Near-Term Tasks and Long-Term Activities of the Terminal Configured Vehicles Program (Purpose: To solicit Panel comments and recommendations on the content of these tasks.).

10:30 a.m.: Status Reports from Ames and Langley Research Centers on Research of Interest to the Panel (Purpose: Cognizant Center representatives will present brief reports to the Panel summarizing progress and accomplishments on various research projects relating to terminal area operations.).

1:00 p.m.: Members' Reports (Purpose: To report on non-NASA research and technology of interest to the Panel.).

3:00 p.m.: Issues for Panel Consideration and Recommendations (Purpose: To identify issues on which the Panel can provide useful suggestions.).

SEPTEMBER 16, 1977

8:30 a.m.: Members' Discussions and Development of Panel Recommendations (Purpose: To discuss relevancy, timing, scope, and efficacy of research and technology activities presented at this Panel meeting and to provide recommendations and resolutions to be reported to the parent Panel.).

11:45 a.m.: Chairman's Concluding Remarks.

1:00 p.m.: Tour of Langley Research Center Facilities.

3:00 p.m.: Adjournment.

Dated: August 19, 1977.

KENNETH R. CHAPMAN,
Assistant Administrator for DOD and Interagency Affairs.

[FR Doc.77-24583 Filed 8-24-77;8:45 am]

NATIONAL CAPITAL PLANNING COMMISSION

TENTATIVE AGENDA ITEMS

In order to provide notice regarding matters which may be acted upon by the Commission and to solicit written comments prior to and oral comments at meetings of the Commission in accordance with the Commission's Procedures for Citizen Participation and Intergovernmental Liaison, approved April 7, 1977, there is set forth below a list of agenda items tentatively scheduled for consideration by the Commission at its meeting at 9:30 a.m. on September 8 and 15, 1977 and at subsequent meetings. The Commission meets in its Tenth Floor Conference Room at 1325 G Street NW., Washington, D.C.

FILE NO. AND ITEM

CP01 1203: Comprehensive Plan for the National Capital: Foreign Missions and International Agencies (Commission action requested: Adoption of proposed element and related conforming modifications to other elements pursuant to Section 4 of the National Capital Planning Act of 1952).

CP14: Prince George's County, Md. Fiscal Years 1978-1983 Capital Improvements Program (Commission action requested: Comments on Federal interest to Prince George's County Council); George Washington Memorial Parkway, Fort Hunt Subarea, Fairfax County, Va.

MP53: (a) General Development Plan (Commission action requested: Approval of revised subarea plan pursuant to Section 5 of the National Capital Planning Act of 1952).

1691: (b) Maintenance Unit Replacement (Commission action requested: Approval of preliminary site and building plans pursuant to Section 5 of the National Capital Planning Act of 1952).

0338: Perry Simmons Elementary School Replacement, First and Eye Streets NW. (Commission action requested: Approval of final site and building plans pursuant to Section 5 of the National Capital Planning Act of 1952 and D.C. Code, sec. 5-428); U.S. Postal Service.

0489: (a) Northern Virginia Central Facility and Vehicle Maintenance Facility, Merrifield, Va.—Exterior Fence Modifications (Commission action requested: Approval of revised site plan pursuant to Section 5 of the National Capital Planning Act of 1952).

1014: (b) City Post Office, North Capitol Street and Massachusetts Avenue NE.—Exterior alterations for entrance for handicapped (Commission action requested: Approval of final site development plan pursuant to Section 5 of the National Capital Planning Act of 1952 and D.C. Code, sec. 5-428).

1018: (c) Dale City Branch, Woodbridge, Va., Prince William County, Va. (Commission action requested: Approval of revised location pursuant to Section 5 of the National Capital Planning Act of 1952).

0841: U.S. Coast Guard, Fort Hunt Remote Site, Fairfax County, Va. (Commission action requested: Comments on GSA Land Utilization Report).

1158: Pennsylvania Avenue Development Corporation—Preliminary Special Street Plan (Commission action requested: Approval pursuant to Section 5 of the National Capital Planning Act of 1952).

1199: U.S. Reservations 44, 45, 46, 47, 48 and 49, Eighth Street and Pennsylvania Avenue SE. (Commission action requested: Approval of revised final site development plan pursuant to Section 5 of the National Capital Planning Act of 1952).

1066: Federal Reserve Board Building, Constitution Avenue and 21st Street NW.—Podium Enclosure (Commission action requested: Approval of final site and building plans pursuant to Section 5 of the National Capital Planning Act of 1952 and D.C. Code, sec. 5-428).

1700: Proposed amendment to Zoning Map of the District of Columbia: Change from R-2 to R-3 lots 3, 4, 804 and 809 in Square 1672 (south side of Ellicott Street NW., between 42nd and 43rd Streets) (Zoning Commission Case No. 76-22) (Commission action requested: Report to Zoning Commission pursuant to D.C. Code, sec. 5-417).

1725: Oxon Run Relief Sewer and Stream Improvements, from Joliet Street SE., northeastward to Southern Avenue (Commission action requested: Recommendations on final site development plan pursuant to Section 5 of the National Capital Planning Act of 1952).

1727: General Services Administration, Central Heating Plant, 13th and D Streets SW.—Oil Handling Facility (Commission action requested: Approval of final site and building plans pursuant to Section 5 of the National Capital Planning Act of 1952 and D.C. Code, sec. 5-428).

1728: Suitland Federal Center, Prince George's County, Md.—Satellite Communication Earth Station (Commission action requested: Approval of preliminary and final site and building plans pursuant to Section 5 of the National Capital Planning Act of 1952).

OCTOBER 6 AND 13, 1977

0348: District of Columbia 1979-1984 Multiyear Capital Improvements Program (Commission action requested: Comments on Federal interest pursuant to the National Capital Planning Act of 1952).

1729: Zoning Commission Case No. 77-15, text amendment prohibiting sex oriented businesses in districts other than C-3-B and C-4 (Zoning Commission Order No. 161) (Commission action requested: Report to Zoning Commission pursuant to D.C. Code, sec. 5-417).

NOVEMBER 3 AND 10, 1977

——: West Potomac Park, District of Columbia.

MP49: (a) Subarea Master Plan (Commission action requested: Approval pursuant to Section 5 of the National Capital Planning Act of 1952).

0570: (b) Franklin Delano Roosevelt Memorial (Commission action requested: Approval of preliminary site and building plans pursuant to Section 5 of the National Capital Planning Act of 1952).

DECEMBER 1 AND 8, 1977

1676: Washington, D.C. Civic Center, 9th and H Streets NW. (Commission action requested: Approval of location and pro-

gram pursuant to Section 5 of the National Capital Planning Act of 1952 and D.C. Code, sec. 5-428).

The Commission affords interested and affected organizations and individuals an opportunity to present their views on any of the items in writing prior to and/or in person at the meeting at which such item is considered, with such limitations on the number and length of oral presentations as the agenda item and the length of the agenda appear to warrant.

Organizations and individuals desiring to make a statement or otherwise communicate their views on any item tentatively scheduled for the September 8 and 15 meeting should advise Samuel K. Frazier, Chief, Office of Public Affairs, National Capital Planning Commission, Washington, D.C. 20576, telephone 724-0174. Copies of the Executive Director's Recommendation on any action item on the agenda for the September 8 and 15 meeting may be obtained from Mr. Frazier on or after September 6. Agenda items with respect to which no organization or individual has advised Mr. Frazier by Thursday, September 1, 12:00 Noon, of a desire to present views in person to the Commission and on which the Executive Director recommends approval or a favorable report, may be placed on the "consent calendar" and acted upon by the Commission, without presentation or discussion, at the beginning of the Commission meeting on September 8. To insure that written comments on any items are placed before the Commission prior to Commission action thereon, written statements must be received by Mr. Frazier by Wednesday, September 7, 12:00 Noon.

The Commission's Procedures for Citizen Participation and Intergovernmental Liaison, copies of which may be obtained from Mr. Frazier, generally provide that comments on District plans and projects should address their effect on the Federal establishment and/or on Federal interests in the National Capital Region.

DANIEL H. SHEAR,
Secretary.

AUGUST 19, 1977.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts

THEATRE RESEARCH PROJECT

Meeting

The National Endowment for the Arts has contracted with Mathtech, Inc. to conduct a research study on the condition and needs of American theatre. Consultants representing the theatre community will assist the contractor in this study.

The second meeting of these consultants is scheduled for September 9, 1977, from 10:00 A.M.-5:00 P.M. in the Board Room, League of New York Theatres and Producers, 226 West 47th Street, New York, New York 10036.

The agenda of the meeting will include: (1) Review and discussion of the data collection and analysis process during the period of June-August; (2) Comments and suggestions by the Advisory Group.

Further information may be obtained from Dr. Robert J. Anderson, Jr., Vice President and Director of Economics, Mathtech, Inc., P.O. Box 2392, Princeton, New Jersey 08540, 609-799-2600.

ROBERT M. SIMS,
Administrative Officer, National Endowment for the Arts, National Foundation on the Arts and Humanities.

[FR Doc.77-24595 Filed 8-24-77;8:45 am]

NATIONAL SCIENCE FOUNDATION

ADVISORY COUNCIL, TASK GROUP NO. 3

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

NAME: Task Group No. 3 of the NSF Advisory Council.

PLACE: Room 421, National Science Foundation, 1800 G Street NW., Washington, D.C. 20550.

DATE: September 9, 1977.

TIME: 9:00 a.m.

TYPE OF MEETING: Open.

CONTACT PERSON: Ms. Margaret L. Windus, Executive Secretary, NSF Advisory Council National Science Foundation, Room 518, Washington, D.C. 20550. Telephone: 202-632-4384.

PURPOSE OF TASK GROUP: The purpose of the Task Group, composed of members of the NSF Advisory Council, is to provide the full Council with a mechanism to consider numerous issues of interest to the Council that have been assigned by the National Science Foundation.

SUMMARY MINUTES: May be obtained from the Committee Management Coordination Staff, Division of Personnel and Management, Room 248, National Science Foundation, Washington, D.C. 20550.

AGENDA: To evaluate the impact on scientific research, on educational institutions and on industry of an NSF policy to support basic research in industry.

M. REBECCA WINKLER,
Acting Committee Management Officer.

AUGUST 22, 1977.

[FR Doc.77-24545 Filed 8-24-77;8:45 am]

SCIENCE FOR CITIZENS ADVISORY COMMITTEE

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

NAME: Science for Citizens Advisory Committee.

DATE: September 15 and 16, 1977.

TIME: 9:00 to 6:00 each day.

PLACE: Room 651, 5225 Wisconsin Avenue, NW., Washington, D.C.

TYPE OF MEETING: Open.

CONTACT PERSON: Ms. Rachelle Hollander, Acting Program Manager, Science for Citizens, Office of Science and Society, National Science Foundation, Washington, D.C. 20550. Telephone 202-282-7770.

SUMMARY MINUTES: May be obtained from the Office of Science and Society, Science for Citizens Program, National Science Foundation, Washington, D.C. 20550

PURPOSE OF ADVISORY COMMITTEE: To provide advice and recommendations concerning the development of Science for Citizens program.

AGENDA: Discussion of draft report to Congress.

M. REBECCA WINKLER,
Acting Committee Management Officer.

AUGUST 22, 1977.

[Docket No. 50-250]

NUCLEAR REGULATORY COMMISSION

FLORIDA POWER AND LIGHT CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 27 to Facility Operating License No. DPR-31, issued to Florida Power and Light Company, for operation of the Turkey Point Nuclear Generating Unit No. 3 located in Dade County, Florida. The amendment is effective as of the date of issuance.

The amendment to the operating license will allow continued operation of Turkey Point Unit No. 3 until the next refueling (presently scheduled for January 1978) at which time the steam generators shall be inspected.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environment impact and that pursuant to CFR § 51.5 (d)(4) an environmental impact statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated August 5, 1977, as modified by letter dated August 10, 1977, (2) Amendment No. 27 to License No. DPR-31, and (3) the Commission's Related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Environmental & Urban Affairs Library, Florida International University, Miami, Florida 33199. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 16th day of August 1977.

For the Nuclear Regulatory Commission.

GEORGE LEAR,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[FR Doc.77-24306 Filed 8-24-77;8:45 am]

Atomic Safety and Licensing Board

[Docket No. 50-322]

LONG ISLAND LIGHTING CO. (SHOREHAM NUCLEAR POWER STATION, UNIT 1)

Order

The special prehearing conference scheduled in the above captioned matter for September 19, 1977 is postponed at the request of counsel for intervenors OHILI and North Shore to September 26, 1977. The hearing will take place at Port Jefferson Village Hall, 121 West Broadway (Route 25A), Port Jefferson, L.I., New York 11777 at 1:00 p.m.

Dated at Bethesda, Maryland, this 17th day of August 1977.

For the Atomic Safety and Licensing Board.

JOHN M. FRYSIAK,
Chairman.

[FR Doc.77-24307 Filed 8-24-77;8:45 am]

[Docket Nos. 50-282 and 50-306]

NORTHERN STATES POWER CO.

Issuance of Amendment to Facility Operating Licenses and Negative Declaration

The U.S. Nuclear Regulatory Commission (the Commission) has, pursuant to the Initial Decision of its Atomic Safety and Licensing Board dated August 12, 1977, issued Amendment Nos. 22 and 16 to Facility Operating License Nos. DPR-42 and DPR-60, issued to the Northern States Power Company (the licensee), which revised the licenses and Technical Specifications for operation of Unit Nos. 1 and 2 of the Prairie Island Nuclear Generating Plant (the facilities) located in Goodhue County, Minnesota. The amendments are effective as of their date of issuance.

The amendments revised the licenses and Technical Specifications for the facilities to permit replacement of the existing spent fuel storage racks having a capacity of 198 fuel assemblies with new storage racks having a capacity of 687 fuel assemblies.

The Initial Decision is subject to review by an Atomic Safety and Licensing Appeal Board prior to its becoming final. Any decision or action taken by an Atomic Safety and Licensing Appeal Board in connection with the Initial Decision may be reviewed by the Commission.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Notice of Proposed Issuance of the Amendments was published in the FEDERAL REGISTER on January 10, 1977 (42 FR 2140). A hearing was requested by the Minnesota Pollution Control Agency. The hearing was held from June 14 through 17, 1977, and subsequently the above-referenced Initial Decision issued August 12, 1977.

The Commission has prepared an environmental impact appraisal entitled "Discussion and Conclusions By the Office of Nuclear Reactor Regulation Relating to Environmental Considerations Associated with Modifications to the Spent Fuel Pool of the Prairie Island Nuclear Generating Station Units 1 and 2" dated April 18, 1977, and has concluded that an environmental impact statement for this particular action is not warranted because the actions authorized by these license amendments will not significantly affect the quality of the human environment.

For further details with respect to this action, see (1) the application for amendments dated November 24, 1976, as supplemented by filings dated March 1, 11, and 21, and April 14 and 27, 1977, (2) Amendment Nos. 22 and 16 to License Nos. DPR-42 and DPR-60, respectively, (3) the Commission's related Safety Evaluation dated April 15, 1977, (4) the Commission's Environmental Impact Appraisal dated April 18, 1977, and (5) The Initial Decision of the Atomic Safety and Licensing Board dated August 12, 1977. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Environmental Conservation Library of the Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, Minnesota 55401. A single copy of items (2), (3), (4), and (5) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C., 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 16th day of August, 1977.

For the Nuclear Regulatory Commission.

DON K. DAVIS,
Acting Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[FR Doc.77-24308 Filed 8-24-77;8:45 am]

[Docket No. 50-277]

PHILADELPHIA ELECTRIC CO., ET AL.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 36 to Facility Operating License No. DPR-44 issued to Philadelphia Eelectric Company, Public Service Electric and Gas Company, Delmarva Power and Light Company, and Atlantic City Electric Company, which revised Technical Specifications for operation of the Peach Botton Atomic Power Station, Unit No. 2. The amendment is effective as of its date of issuance.

The amendment consists of changes which will modify the Technical Specifications to (1) permit operation of the facility with 172 Reload 2 (Cycle 3) 8 x 8 fuel bundles with holes drilled in the lower tie plate of all reload bundles to provide an alternate bypass flow path and (2) to increase the setpoints of the relief valves to reduce the probability of excessive leakage around the setpoint pilot valve. Reduction in leakage will reduce spurious valve openings and failure of reclosure.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the applications for amendment dated March 14, 1977 (as supplemented by letter dated June 14, 1977) and June 21, 1977, (2) Amendment No. 36 to License No. DPR-44, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Martin Memorial Library, 159 E. Market Street, York, Pennsylvania 17401. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission,

Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 18th day of August 1977.

For the Nuclear Regulatory Commission.

GEORGE LEAR,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[FR Doc.77-24475 Filed 8-24-77;8:45 am]

REGULATORY GUIDE

Issuance and Availability

The Nuclear Regulatory Commission has issued a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 1.90, Revision 1, "Inservice Inspection of Prestressed Concrete Containment Structures with Grouted Tendons," describes bases acceptable to the NRC staff for developing an appropriate surveillance program for prestressed concrete containment structures with grouted tendons. This guide was revised to reflect public comment and additional staff review.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a).)

Dated at Rockville, Maryland this 17th day of August 1977.

For the Nuclear Regulatory Commission.

RAY G. SMITH,
Acting Director, Officer of Standards and Development.

[FR Doc 77-24476 Filed 8-24-77;8:45 am]

REGULATORY GUIDE

Issuance and Availability

The Nuclear Regulatory Commission has issued a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commisison's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 1.100, Revision 1, "Seismic Qualification of Electric Equipment for Nuclear Power Plants," describes a method acceptable to the NRC staff for complying with the Commission's regulations for verifying the adequacy of the seismic design of electric equipment for all types of nuclear power plants. The guide endorses IEEE Standard 344-1975, "IEEE Recommended Practices for Seismic Qualification of Class 1E Equipment for Nuclear Power Generating Stations." This guide was revised as the result of public comment and additional staff review.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

NATIONAL TRANSPORTATION SAFETY BOARD

[N-AR 77-34]

SAFETY RECOMMENDATIONS AND RESPONSES

Availability and Receipt

Railroad Safety Recommendations R-77-20 through 23 and R-77-24.—A call to establish operating and procedure standards for the Nation's rail rapid transit systems was made August 19 by the National Transportation Safety Board. Recommendation R-77-24 was issued to the Federal Railroad Administration following investigation into the August 18, 1976, rear end collision of two trains operated by the Greater Cleveland (Ohio) Regional Transit Authority (RTA). Train No. 461 struck the rear of train No. 409 which was standing near the East 79th Street Station in Cleveland. Twenty persons were injured and property damage was estimated to be $61,000.

Investigation of the accident indicated that the method of employing the automatic train stop nullifies protection that could be afforded by that system for an occupied signal block. Train No. 461 was able to pass a stop signal with the trip arm in up position by only reducing the speed. However, after No. 461 passed the stop signal, it resumed speed and passed the stop signal of the occupied block. The trip arm at this signal was not activated. Safety for the movement of the train rested with the operator, who failed to discharge his responsibility, sped past the signal, and struck the standing train.

Investigation also disclosed that while the operators are informed of operating and safety rules during training, they are not provided with a copy of those rules. Since the operators are not given refresher courses, the rules become vague and some are forgotten.

The Safety Board found that RTA operators are not required to make predeparture tests of automatic train stops, automatic train controls, cab signals, brakes, or radio equipment. A record of tests made by maintenance personnel is not provided to the operators. Also, cars that are disconnected from multicar trains to be used as single-unit trains may not be tested at all. The brakes are not tested by the operator until after the train departs the terminal.

The requirement that delays be reported to central control is apparently not being enforced. The Board stated that all delays beyond a normal station stop should be immediately reported and central control should in turn notify all trains in the area.

In view of the above, the Safety Board recommends that the Greater Cleveland Regional Transit Authority:

Develop a system assurance and safety program that will provide and insure (1) a set of operating rules and procedures that will provide objective requirements for a safe and efficient operation, (2) a training program that will originally acquaint operating personnel with the rules and a system of reexamination to keep them current with the rule requirements, and (3) a system of supervision which will enforce the rules and will provide an efficient operation. (R-77-20)

Operate trains on an absolute block and, if it becomes necessary to enter an occupied block in an emergency, provide procedures that will insure safe operation. (R-77-21)

Implement a system to insure that general orders and bulletins are read and understood. (R-77-22)

Expand the current automatic train control test facilities so that all equipment entering main track service can be tested, require more comprehensive inspections and tests to include all vital components or systems of the equipment, and provide a record of the results to the operator using the equipment. (R-77-23)

In a separate letter to the Federal Railroad Administration issuing recommendation R-77-24, the Safety Board expressed its belief that FRA should begin exercising its regulatory responsibilities relative to rail rapid transit systems. The Board stressed the need for operating standards and a system of checks and balances to insure conformance.

Each of the above recommendations is designated "Class II, Priority Followup." The Safety Board's report on the investigation of the RTA accident will be made available to the public in the near future.

Railroad Safety Recommendation R-77-25.—The establishment of a policy and procedures to insure that all trains are operated in compliance with company rules and Federal power brake regulations was recommended by the Safety Board on August 19. This Class II recommendation was issued to the Norfolk & Western Railway Company (N&W) after the Board completed its investigation into the October 19, 1976, head-on collision of two N&W freight trains at New Haven, Indiana.

Investigation revealed that each train was traveling at about 10 mph when the westbound freight and eastbound yard train collided on the single track main line. The freight train's front brakeman was killed and four crewmembers were injured when the caboose, coupled immediately behind the locomotive, jackknifed and was crushed between the locomotive and following cars. Estimated cost of damages was $168,400.

Also disclosed in the investigation was the fact that the last five cars of the 11-car westbound freight train did not have their airbrake systems connected to the rest of the train. When adding the last seven cars to their train, the crewmembers failed to inspect the cars as required by company rules and the Federal Power Brake Law of 1958. Consequently, the uncoupled air hoses between the fifth and sixth cars from the rear and the closed angle cock on the east end of the sixth car were not detected.

The Safety Board notes that Federal regulations require that the brakes on each freight car added to a train be inspected for proper application and release and that brake operation on a train's last car be observed to make sure that the engineer can control brakes on all of the cars.

The Board's formal investigation report is expected to be available for distribution within the next few weeks.

RESPONSE TO HIGHWAY SAFETY RECOMMENDATIONS

Following a further review of recommendations H-77-2 and 3, the Safety Board on August 12 replied to the State of Iowa Department of Transportation letter of last March 21. These recommendations were issued following investigation of the August 6, 1976, Tri-Center Community Schools schoolbus accident at Neola, Iowa. (See 42 FR 10915. February 24, 1977.) The schoolbus struck and overrode a guardrail and concrete bridge parapet.

The recommendations asked the Iowa Department of Transportation to adhere to the maintenance principles of Highway Safety Program Standard Number 12 and to establish procedures that will insure appropriate, cost-efficient, and timely corrective repair of damaged highway safety equipment (H-77-2), and to incorporate the general principles and standards identified in the *Handbook of Highway Safety Design and Operating Practices* and the *National Cooperative Highway Research Program Report 118*, into those designs established for corrective repair of damaged highway safety equipment (H-77-3).

The Iowa Department of Transportation's March 21 response reported that following the Neola accident immediate repairs were made with the same kind of section of guardrail that was damaged and that this type of treatment is "certainly safer than the delays accompanying new materials, designs, etc." "We are in *full compliance* with the maintenance principles of Highway Safety Program Standard Number 12 and operate under procedures that assure appropriate, cost efficient and *timely corrective repair* of damaged highway safety equipment," the Department emphasized.

According to the Department's March 21 response, upgrading of the guardrail for the Neola Bridge on all four bridge post ends will be accomplished during this construction season to the presently approved design standards. The type of design used will provide for a longer section of guardrail on all four end posts and ties into the end posts; also, a new concrete safety rail is being constructed through the bridge on both sides. The Department states, "This type of work does *not* fall into a repair type activity. It is a replacement activity utilizing different principles and design than the replacement of the guardrail section would involve." The Department said that Iowa is on an extensive program of upgrading safety features, including correcting substandard guardrail.

The Iowa Department of Transportation reported that it is reviewing the feasibility of an open end guardrail construction contract whereby modern guardrail approach sections could be placed on all four end post approaches at the time of an accident. The Department finds that this type of activity is beyond its maintenance force capability due to the increased manpower, equipment, and materials that would be required. The one drawback to the open end construction contract, the Department said, would be the requirement for a contractor to mobilize immediately with manpower and equipment for a situation anywhere in the State. The standby requirement would likely be extremely costly.

The Safety Board's August 12 reply notes that further review of the subject of corrective repair of crash-damaged highway equipment has revealed that there is a wide variety of opinion regarding what constitutes an adequate interpretation of those segments of Highway Safety Program Standard Number 12. According to Iowa Department of Transportation's interpretation, temporary repairs of crash-damaged guardrail may be made by replacing that damaged with the same kind of equipment in place at the time of the accident; the temporary repair is then followed by a corrective update of the location. On the other hand, the Board noted, since 1968 the State of Maryland has had the following policy on repair of damaged guardrail: "In the interest of highway safety and in order to forestall criticism of the State Road Commission, it is mandatory that when guardrail is being repaired after being struck and damaged by motor vehicles that the repaired section be installed in accordance with the latest safety standards."

The Safety Board further noted that the Federal Highway Administration and the American Association of State Highway and Transportation Officials encourage the practice of upgrading damaged installations at the time corrective repair or replacement is made, if this can be accomplished in a timely manner. The Board also stated that FHWA is developing further policy statements, training programs, and manuals that will hopefully establish what model corrective repair programs constitute an adequate interpretation of this goal.

NOTE: The above notice consists of summaries of safety recommendation letters issued by the Safety Board and other correspondence relating to recommendations which were made available during the week preceding publication of the notice in the FEDERAL REGISTER. The recommendation letters in their entirety are available to the general public; single copies are obtainable without charge. Copies of the full text of responses to recommeindations and other Board correspondence may be obtained at a cost of $4.00 for service and 10¢ per page for reproduction. All requests must be in writing, identified by the recommendation number and date of publication of this notice. Address inquiries to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594.

OFFICE OF MANAGEMENT AND BUDGET

PRIVACY ACT OF 1974

Reports on New Systems

The purpose of this notice is to list reports on new systems filed with the Office of Management and Budget to give members of the public the opportunity to make inquiries about them and to comment on them.

The Privacy Act of 1974 requires that agencies give advance notice to the Congress and the Office of Management and

Budget of their intent to establish or modify systems of records subject to the Act (5 U.S.C. 552a(o)). During the period August 8, 1977 through August 18, 1977 the Office of Management and Budget received the following reports on new (or revised) systems of records.

DEPARTMENT OF AGRICULTURE

System Name:
Audit Information System.

Report Date:
August 8, 1977.

Point-of-Contact:
Mr. Douglas S. Wood, Room 2321 S. U.S. Department of Agriculture, Washington, D.C. 20250.

Summary:

The proposed system covers personal information which may be maintained for short periods of time during USDA audits.

FEDERAL TRADE COMMISSION

System Names:
(1) Information Mailing List, (2) Correspondence Control System, (3) Mail Order Rule Complaint Letters, Abstracts of (4) Applications for Compensation for Participation in Rulemaking Proceedings, (5) Employee Locator System

Report Date:
August 8, 1977.

Point-of-Contact:

Mr. Harry Hull, Federal Trade Commission, Washington, D.C. 20580.

Summary:

The Public Information Mailing List, Correspondence Control System, and Employee Locator System are used for FTC administration; the Mail Order Rule Complaint Letters, Abstracts aids enforcement of the Mail Order Merchandise Rule; and Applications for Compensation for Participation in Rulemaking is used to determine whether to compensate parties for their expenses in participating in FTC rulemaking.

DEPARTMENT OF THE INTERIOR

System Name:

Health and Safety Training Records including Qualification and Certification Data—Interior.

Report Date:

August 9, 1977.

Point-of-Contact:

Mr. Warren Dahlstrom, Department of the Interior, Washington, D.C. 20240.

Summary:

The Department of the Interior proposes to expand an existing system of records to maintain additional training records and monitor/expand safety training courses.

VELMA N. BALDWIN,
Assistant to the Director for Administration.

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

WORKING GROUP ON BASIC RESEARCH IN THE DEPARTMENT OF DEFENSE

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the Office of Science and Technology Policy announces the following meeting:

NAME: Working Group on Basic Research in the Department of Defense.

DATE: September 22-23, 1977.

TIME: 9:00 a.m. to 4:00 p.m.

PLACE: Room 3104, New Executive Office Building, 17th and Pennsylvania Avenue NW., Washington, D.C. 20500.

TYPE OF MEETING: Open.

CONTACT PERSON: Dr. William P. Raney, Executive Office of the President, Office of Science and Technology Policy, Washington, D.C. 20500, telephone 202-395-3934.

SUMMARY MINUTES: May be obtained from the Office of Science and Technology Policy, Washington, D.C. 20500.

PURPOSE OF ADVISORY COMMITTEE: The Office of Science and Technology Policy is conducting a study which will lead to the formulation of policy governing the performance of basic research by or for the mission agencies. Under the guidance of the Steering Committee on Basic Research in Mission Agencies, the Working Group on Basic Research in the DOD is to examine the policies and procedures and research programs of that agency for adequacy and balance between near-term and long-term technical objectives.

AGENDA: 9:00 a.m. to 4:00 p.m. Planning meeting to discuss detailed objectives of the study, methods of approach, and work schedule and assignments.

WILLIAM MONTGOMERY,
Executive Officer.

[FR Doc.77-24510 Filed 8-24-77;8:45 am]

OFFICE OF TELECOMMUNICATIONS POLICY

INTERAGENCY COMMITTEE ON RURAL TELECOMMUNICATIONS

Meeting

Notice is hereby given that the Interagency Committee on Rural Telecommunications will hold a meeting on August 25, 1977, at 9:30 a.m., at the Office of Telecommunications Policy, 1800 G Street NW., Room 730, Washington, D.C.

The purpose of the Committee is to identify regulatory and institutional barriers to the use of telecommunication technology for improvement of social services in rural areas. The Committee includes representatives from the following Federal agencies: Department of Commerce; Department of Health, Education, and Welfare; Department of Labor; Department of Agriculture; National Science Foundation; and the Office of Telecommunications Policy.

The first half of the meeting will include presentations on rural communications by Phil Rubin of the Corporation for Public Broadcasting and John Dimling of the National Association of Broadcasters.

During the second half of the meeting, status reports will be presented by the Subcommittee on Regulatory Barriers, the Subcommittee on Institutional Barriers, and the Subcommittee on Demonstration Options.

The meeting will be open to the public; any member of the public will be permitted to file a written statement with the Committee before or after the meeting. Further information pertaining to the meeting may be obtained from Dr. Vincent Sardella, Office of Telecommunications Policy, Washington, D.C. 20504 (telephone, 202/395-3122).

Dated: August 19, 1977.

VINCENT SARDELLA,
Program Manager.

DEPARTMENT OF STATE

[Public Notice CM-7/105]

SHIPPING COORDINATING COMMITTEE, SUBCOMMITTEE ON SAFETY OF LIFE AT SEA

Meeting

The Shipping Coordinating Committee will conduct an open meeting at 9:30 a.m. on Thursday, September 29, 1977 in room 8236 of the Department of Transportation Building, 400 Seventh Street SW., Washington, D.C. 20590.

The purpose of this meeting is to finalize preparations for the Intergovernmental Maritime Safety Committee/Marine Environment Protection Committee (MSC/MEPC) meeting on Tanker Safety and Pollution Prevention which is scheduled for October 10-21, 1977 in London. In particular, the Shipping Coordinating Committee will discuss development of U.S. positions dealing with inter alia, the following topics:

Acceleration of entry into force of 1973 Marine Pollution Convention and 1974 Safety Convention.

Consideration of Draft Protocol to 1974 Safety Convention (SOLAS).

Consideration of Draft Protocol to 1973 Marine Pollution Convention.

Consideration of proposal on Marine Safety Corps.

Procedures for the control of ships under 1954 Oil Pollution Convention as amended in 1969.

Arrangements for International Convention on Tanker Safety and Pollution Prevention.

Requests for further information on the meeting may be directed to Captain R. A. Biller, United States Coast Guard (G-AIA/83), 400 Seventh Street SW., Washington, D.C. 20590. He may be reached by telephone on (area code 202) 426-2280.

The Chairman will entertain comments from the public as time permits.

Dated: August 17, 1977.

RICHARD K. BANK,
Chairman,
Shipping Coordinating Committee.

[Public Notice CM-7/104]

SHIPPING COORDINATING COMMITTEE, SUBCOMMITTEE ON SAFETY OF LIFE AT SEA

Meeting

The working group on radiocommunications of the Subcommittee on Safety of Life at Sea, a subcommittee of the Shipping Coordinating Committee, will hold an open meeting at 9:30 a.m. on September 15, 1977 in Room 8442 of the Department of Transportation, 400 Seventh Street SW., Washington, D.C.

The purpose of the meeting is the prepare position documents for the Eighteenth Session of the Subcommittee on Radiocommunications of the Intergovernmental Maritime Consultative Organization (IMCO) to be held in London during Nov. 28-Dec. 2, 1977. In particular, the working group will discuss the following topics:

Code of of safety requirements for mobile off-shore drilling units;

Operational standards for shipboard radio equipment;

Operational requirements for emergency position-indicating radio beacons and portable radio apparatus for survival craft;

Matters resulting from the World Maritime Administrative Radio Conference, 1974, and the work of the International Radio Consultative Committee.

Requests for further information on the meeting should be directed to Lt. F. N. Wilder, United States Coast Guard (G-OTM/74), Washington, D.C. 20590. He may be reached by telephone on (area code 202) 426-1345.

The Chairman will entertain comments from the public as time permits.

Dated: August 16, 1977.

RICHARD K. BANK,
Chairman,
Shipping Coordinating Committee.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[77-164]

SHIP STRUCTURE SUBCOMMITTEE

Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I) notice is hereby given of a meeting of the Ship Structure Subcommittee to be held Thursday, September 29, 1977 at 9:00 A.M. in the Lecture Room, National Academy of Sciences, 2101 Constitution Ave., Washington, D.C. The agenda for this meeting is as follows: This is a joint meeting of the Ship Structure Subcommittee, Hull Structure Committee of the Society of Naval Architects and Marine Engineers, and the Ship Research Committee of the National Academy of Sciences. Presentations will be made on agency marine structural research programs and needs.

Attendance is open to the interested public. With the approval of the Chairman, members of the public may present oral statements at the hearing. Persons wishing to attend and persons wishing to present oral statements should notify, not later than the day before the meeting, and information may be obtained from, LCDR T. H. Robinson, USCG, Secretary, Ship Structure Committee, U.S. Coast Guard Headquarters, Washington, D.C. 20590 (202) 426-2205. Any member of the public may present a written statement to the Committee at any time.

W. M. BENKERT,
Rear Admiral, U.S. Coast Guard,
Chief, Office of Merchant Marine Safety.

[FR Doc.77-24642 Filed 8-24-77;8:45 am]

Federal Aviation Administration

RADIO TECHNICAL COMMISSION FOR AERONAUTICS (RTCA), SPECIAL COMMITTEE 127—EMERGENCY LOCATOR TRANSMITTERS

Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I) notice is hereby given of a meeting of the RTCA Special Committee 127 on Emergency Locator Transmitters to be held September 20, 21, 22, 1977, Conference Room 246, Building 1202, NASA Langley Research Center, Hampton, Virginia commencing at 9:30 a.m. The Agenda for this meeting is as follows: (1) Chairman's Comments; (2) Approval of Minutes of Seventh Meeting held June 7, 8, 9, 1977; (3) Review Final Draft of Minimum Performance Standards for Emergency Locator Transmitters.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the hearing. Persons wishing to attend and persons wishing to present oral statements should notify, not later than the day before the meeting, and information may be obtained from, RTCA Secretariat, 1717 H Street NW., Washington, D.C. 20006; 202-296-0484. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, D.C. on August 19, 1977.

KARL F. BIERACH,
Designated Officer.

Federal Highway Administration

[FHWA Docket No. 76-9]

BAYONNE BRIDGE, GOETHALS BRIDGE, GEORGE WASHINGTON BRIDGE AND OUTERBRIDGE CROSSING TOLLS

Decision of the Administrator

This proceeding was instituted under section 4 of the General Bridge Act of 1906, 33 U.S.C. § 494 (1970 ed.), to enable the Secretary of Transportation, acting through the Federal Highway Administrator, to determine whether existing tolls for four bridges under the jurisdiction of the Port Authority of New York and New Jersey are reasonable and just.

Section 4 provides in full:

"* * * If tolls shall be charged for the transit over any bridge constructed under the provisions of said sections, of the engines, cars, streetcars, wagons, carriages, vehicles, animals, foot passengers, or other passengers, such tolls shall be reasonable and just, and the Secretary of the Army may, at any time, and from time to time, prescribe the reasonable rates of toll for such transit over such bridge, and the rates so prescribed shall be the legal rate and shall be the rate demanded and received for such transit.

Jurisdiction to prescribe rates under this section was originally granted to the Secretary of War. This function was transferred from the Secretary of the Army to the Secretary of Transportation by 49 U.S.C. § 1655(g)(6)(B), who has, in turn, delegated this authority to the Administrator, 49 CFR 1.48(a)(1)(1976).

The George Washington Bridge connects New Jersey and New York between New Jersey and 178th Street in New York City. The Goethals Bridge, Bayonne Bridge and Outerbridge Crossing connect Staten Island with New Jersey. In addition to the bridges, the Port Authority also operates the Hudson and Lincoln tunnels, the interstate Port Authority Trans-Hudson Railroad (PATH), two bus terminals, two truck terminals, seven marine terminals, four airports, two heliports, and the World Trade Center.

Effective May 1975, the Port Authority raised its tolls on the four bridges. This was the first increase in tolls for the facilities in question since they were opened for traffic, which, in the case of the Goethals Bridge and Outerbridge Crossing was 1928, and for the George Washington and Bayonne Bridges was 1931. The new toll schedule raised the standard automobile round trip rate on the bridges from $1 to $1.50, the commuter round trip rate from 50 cents to $1, and increased the truck rate by 50 percent. At the same time, the Port Authority instituted a carpool discount whereby vehicles carrying a total of three or more persons during weekdays would be charged 66⅔ percent of the standard automobile rate.

Following an evidentiary hearing pursuant to 49 CFR Part 310, Administrative Law Judge John E. Faulk issued a decision in which he recommended that the Administrator should not find the tolls reasonable and just under the General Bridge Act of 1906. The basis for this recommendation was that the tolls produced more revenues than were necessary to cover direct operating expense, debt service, and provide the Port Authority with a reasonable return on its investment, which was recommended to be limited to all four bridges considered as a whole. The Administrative Law Judge rejected the suggestion that the capital in any non-bridge facility be included within the rate base. In this regard, it was recommended that the Administrator determine, as a matter of law, that the Port Authority is not allowed to use revenues derived from toll collections for any purpose other than those directly related to the operation of the bridges. Because the return on the Port Authority's net investment in the four bridges exceeded the 6.5 percent ceiling the Administrative Law Judge determined to be reasonable, he recommended the tolls be reduced to the level which existed prior to May 1975. In addition, the Administrtaive Law Judge recommended that the Port Authority submit a feasibility study on peak-hour pricing.

Pursuant to 49 U.S.C. § 310.12(b), exceptions, with supporting briefs, were filed by the following parties: the Automobile Club of New York and the AAA Clubs of New Jersey, which urged adoption of the major parts of the recommended decision; Citizens for Clean Air, which stated that the Administrator should sustain, subject to the elimination of all commuter discounts, the existing tolls on the bridges; the Environmental Defense Fund, which opposed any reduction in the bridge tolls; the city of New York, which advocated retention of the Port Authority's new toll schedule; the Port Authority, which contended that the rate base should be the integrated system of bridge, tunnel, rail, and terminal facilities that it operates to facilitate movements across the waters in question; Public Counsel, which advocated that the proper rate base against which the rate of return should be allowed is the net investment in functionally related facilities—i.e., one group consisting of the Staten Island bridges and another comprised of the George Washington Bridge, the Hudson, and Lincoln tunnels, the bus terminals and PATH—; New York Senator Linda Winikow, who supported the Administrative Law Judge's recommendations except with respect to the proposed studies concerning peak-hour pricing; and Mrs. Julia F. Lamb, who supported a rate structure compatible with effective traffic management.

Reply briefs have been filed, and the matter is now ripe for decision.

Upon consideration of the entire record, the Administrator has determined to reject the Administrative Law Judge's recommendations concerning the composition of the rate base against which the rate of return should be applied. Specifically, the Administrator has concluded that the investment base should consist of the Port Authority's net investment in the four bridges, the tunnels, PATH, and the bus terminals that it operates. The Administrator has further determined that the rate of return to be applied against this rate base should not exceed 6.5 percent. Based upon the foregoing and consideration of other relevant factors, the Administrator finds that the toll rates established by the Port Authority on April 25, 1976, are reasonable and just.

The Administrator has decided to adopt the Administrative Law Judge's recommendations concerning the need for a comprehensive feasibility study to be compiled for peak-hour charges and the impact that carpooling and commuter discounts have upon congestion.

Fairness to the User

Section 4 of the General Bridge Act of 1906 requires the Administrator to determine whether the Port Authority's tolls on the four bridges are "reasonable and just." Such a determination requires the Administrator to assess a variety of considerations. While many of these vary from case to case, the analysis must begin with balancing the competing interests of the public with those of the bridge owner.

As the legislative history of the General Bridge Act makes clear, one guiding purpose of the statute was to prevent the operators of toll bridges from exploiting what was often a monopoly position to exact excessively high tolls from bridge users.

While later parts of this decision will discuss whether it is reasonable and just to require bridge users to finance mass transportation, there is little doubt on this record that the Port Authority's 1975 toll schedules are fair to the users. Any increase in tolls, no matter how small, will have some adverse affect upon bridge users. Nevertheless, this class does not have any justifiable expectation that, in an era of escalating costs, tolls will remain the same. These are the first increases the Port Authority has sought in 40 years.

The tolls also compare favorably to those applicable to river crossings elsewhere in the vicinity. The present standard automobile toll of $1.50 is identical to that charged by the Triborough Bridge and Tunnel Authority on the Triborough, Bronx, Whitestone, and Throgs Neck bridges, as well as for the Queens-Midtown and Brooklyn-Battery tunnels. (PA–7D).

Determination of Rate Base

The fairness of the tolls to the users having been established, the Administrator must consider the relation of the revenues produced by the tolls to the needs of the Port Authority. In order to be reasonable and just to the interests of the bridge owners, the revenues covered by tolls should be sufficient to cover not only the direct costs of bridge operation but to provide an element of return to the owner that will ensure retention and attraction of capital in amounts adequate to foster economic stability and development. The requirement of a fair return is equally applicable to a public body as to a private bridge owner. While not entitled to a profit per se, the Port Authority should be entitled to a rate of return on actual investment that will support its activities. *Delaware River Port Authority* v. *Tiemann*, 403 F. Supp. 1117, 1123, n.1. (D.N.J. 1975), vacated and remanded, 531 F. 2d 699 (3rd Cir. 1976). Owing to certain internal restrictions, the Port Authority is prohibited from seeking additional financing unless the net revenues from its facilities attain a certain level in relation to the costs of debt service (PA–8 at 8). Thus, without the subject toll increase, there is evidence that the Port Authority's ability to obtain additional outside capital would be inhibited (Id. table C).[2]

The record compiled in this case reflects complete agreement that the revenues produced by the May 1975 toll increase are more than adequate to cover operating expenses on the four bridges (Recommended Decision, Appendices A–G). While no party seriously quarrels with the right of the Port Authority to earn an adequate return on its investment, the most serious controversy in this case concerns whether the investment base against which the rate of return is measured should include non-bridge capital as well as that invested in bridges.

The crux of the matter is this: if net operating revenues produced by the tolls exceed an appropriate rate of return on the investment used in the rate base, the tolls cannot in any circumstance be found by the Administrator to be reasonable and just. If, on the other hand, net operating revenues do not exceed a proper rate of return on the proper investment base, the tolls producing these revenues may in proper circumstances be sustanied as reasonable and just. It is therefore critical to this decision to address the extent of the investment which should be used to measure the rate of return.

A. Legality of including related-non-bridge investments in the rate base

The Administrator considers the reasonable and just standard of section 4 of the General Bridge Act of 1906 to be sufficiently broad to permit capital investments in related non-bridge facilities to be included within the investment base used to determine the rate of return. Precedent for such a step is to be found in proceedings held under the General Bridge Act of 1946, 33 U.S.C. § 525–533.[3] Section 503 of the General Bridge Act of 1946, as does section 4 of the General Bridge Act of 1906, requires tolls to be "reasonabel and just."[4] In *In the Matter of Camden Bridge Tolls*, decided May 4, 1954, the Secretary of the Army[5] approved as reasonable and just an increase in tolls by the Delaware River Port Authority for the Benjamin Franklin Bridge between Philadelphia and Camden. The purpose of the toll increase was to support port development and improvement activities and to finance the completion of the Walt Whitman Bridge. Because Congress had approved the bi-state compact establishing the Delaware River Port Authority, authorizing the pooling of revenues from all of its income-producing activities, and authorizing the expenditure of revenues so pooled for port development and port promotion activities, the Secretary of the Army held that the application of toll revenues by the Authority to finance operations that did not directly benefit highway users was reasonable and just. Thus, in appropriate situations, the Administrator may include capital invested in non-bridge facilities to form the rate base used to determine whether the level of tolls meets the statutory standard of section 4, even if to do so would require bridge users to contribute toward the support of other transportation facilities.

The Administrative Law Judge's finding that, as a matter of law, only the four bridges could be included in the investment base (Recommended Decision at 12–14) must be rejected. To the contrary, there is ample legal authority and substantial public interest considerations favoring the pooling of revenue from various Port Authority facilities and, thus, the combination of appropriate Port Authority facilities in a single investment base.

The powers and duties of the Port Authority were established by an interstate compact between the States of New York and New Jersey. Congress gave its assent to the compact in 1921, 42 Stat. 174 (1921). In addition to the powers and duties specifically stated in the compact, articles 3 and 7 of the compact approved by Congress gave the Authority "such additional powers and duties as may hereafter be delegated and imposed upon it from time to time by the action of the legislature of either State concurred in by the legislature of the other." 42 Stat. 172 (1921). In accordance with these two sections, the two State legislatures have conferred additional authority and duties on the Port Authority to operate facilities other than the bridges and have also required the Port Authority to pool the revenues of all its facilities.[6]

The Port Authority's power to pool all revenues therefore must be considered to have equal authority with the powers contained in the original compact. *Courtesy Sandwich Shop* v. *Port of New York Authority*, 240 N.Y.S. 2d. 1, 190 N.E. 2d 402, 406 (1963), appeal dismissed, 375 U.S. 78 (1963), reh. denied, 375 U.S. 960 (1963); *Kheel* v. *Port of New York Authority*, 331 F.Supp. 118 (S.D.N.Y. 1971), *aff'd*, 456 F.2d 46 (2d Cir. 1971), cert. den'd 409 U.S. 983 (1972); *Port of New York Authority Bondholders Protective Committee* v. *Port of New York Authority*, 270 F.Supp. 947, 951 (S.D.N.Y. 1967), aff'd, 387 F.2d 259, 262 (2d Cir. 1967). The Administrator must respect the rights and duties that are federally sanctioned through an interstate compact.

Contrary to the view of the Administrative Law Judge (Recommended Decision at 12–13), comparison with the powers of the Delaware River Port Authority (DRPA) confirms, rather than contradicts, the position that the Administrator may consider investments other than those in bridges as permitted under the "reasonable and just" standard of section 4.

As previously mentioned, the DRPA is subject to the General Bridge Act of 1946, which contains reasonable and just language identical to that involved in the present proceeding. Unlike the General Bridge Act of 1906, which contains no direct prohibition against application of toll revenues to non-bridge activities, section 506 of the General Bridge Act of 1946 expressly limits the use of toll revenues to specific bridge-related purposes.[7] The failure of the General Bridge Act of 1906 to contain a similar restriction strongly suggests that the reasonable and just standard of section 4 does not impose a *per se* bar against tolls designed to finance other activities.

But Congress' action with respect to the DRPA impact lends even stronger support for the Administrator's construction of the reasonable and just standard as permitting capital investments in non-bridge facilities to form part of the rate base. In approving certain amendments to the interstatee compact creating the DRPA in 1952, Congress permitted the Authority to combine revenues and to use tolls for the purposes of financing other facilities. Pub. L. No. 574, 82d Cong., 2d Sess. § 3, 66 Stat. 571–72 (1952). To facilitate these powers, Congress specifically exempted DRPA from the limitation on the collection of tolls prescribed by section 506 of the General Bridge Act of 1946. Had Congress intended the reasonable and just provisions of section 503 of the General Bridge Act of 1946 to bar the use of toll revenues to finance other activities, it would have certainly excepted the DRPA from section 503 as well as from section 506.

To the contrary, congressional reports preceding the approval of the DRPA

[2] In addition, the Port Authority has a policy requiring it to maintain in its reserves a sum sufficient to cover its bonded debt service for the succeeding 2 (years PA–8 at 7). Without the toll increase, the Port Authority would have to depart from this policy (Id. at Table 4), which may have an adverse effect on investor confidence and impair the Port Authority's ability to attract capital.

[3] This statute applies to interstate bridges over navigable waters of the United States, the construction of which was approved after 1946. 33 U.S.C. § 530.

[4] Section 503, 33 U.S.C. § 526, now provides:

If tolls shall be charged for the transit over any interstate bridge of engines, cars, street cars, wagons, carriages, vehicles, animals, foot passengers, or other passengers, such tolls shall be reasonable and just, and the Secretary of Transportation may, at any time, and from time to time, prescribe the reasonable rates of toll for such transit over such bridge, and the rates so prescribed shall be the legal rates and shall be the rates demanded and received for such transit.

[5] Jurisdiction under this statute was also transferred to the Secretary of Transportation by 49 U.S.C. § 1655(g)(4)(B) and (6)(c).

[6] N.Y. Uncol. Laws § 7002 and N.J.S. 32:1–142 provide: In all cases where the port authority has raised or shall hereafter raise moneys for the establishment, acquisition, construction or effectuation of terminal and/or transportation facilities by the issue and sale of bonds legal for investment, as herein defined and limited, the surplus revenues received by or accruing to the Port Authority from or in connection with the operation of such terminal and/or transportation facilities built in whole or in part by the proceeds of the sale of such bonds shall be pooled and applied by it to the establishment and maintenance of a general reserve fund in an amount equal to one-tenth (1/10) of the par value of all bonds legal for investment, as herein defined and limited, issued by the Port Authority and currently outstanding. . . . Any surplus revenues not required for the establishment and maintenance of the aforesaid general reserve fund shall be used for such purposes as may hereafter be directed by the two said States. (Emphasis supplied).

[7] Section 506, 33 U.S.C. 529, provides: If tolls are charged for the use of an interstate bridge . . . the rates of toll shall be so adjusted as to provide a fund sufficient to pay for the reasonable cost of maintaining, repairing, and operating the bridge under economical management, and to provide a sinking fund sufficient to amortize the amount paid therefor, including the reasonable interest and financing cost, as soon as possible under reasonable charges, but within a period of not to exceed 30 years from the date of completing or acquiring the same.

VOL 42 NO 165 AUG 25 77 UM

amendments cited the New York Port Authority's policy of using toll revenues to finance other facilities as a desirable and necessary means to develop the Delaware port area. H.R. Rep. No. 2293, 82d Cong., 2d Sess. 3 (1952). Congress thus manifested its awareness of New York's policy of pooling revenues and implied its approval that New York had authority to do this under the reasonable and just standard of the General Bridge Act of 1906.

The Administrator therefore must reject the Administrative Law Judge's conclusion that the rate base for the Port Authority's bridge tolls must be restricted to the investment in the four bridges.

B. INVESTMENT TO BE CONSIDERED IN RATE BASE

Having decided that the rate base need not be restricted to the four bridges as a matter of law, the Administrator must determine whether the investment in any other Port Authority facilities should be considered and, if so, which facility or facilities. In the absence of any guidance from legislative history, past interpretations of the statute, or the Recommended Decision, the Administrator must turn to principles of regulatory law from other fields.

Generally speaking, the "entire interconnected operating property of a utility used and useful for the convenience of the public in the territory served, without regard to particular groups of consumers of local subdivisions" is the unit for rate-making purposes. *Wabash Valley Electric Co. v. Young*, 287 U.S. 488, 497 (1933). See also *Bluefield Waterworks and Improvement Co. v. Public Service Commission of West Virginia*, 262, U.S. 679 (1923) and *Simpson v. Shepherd (The Minnesota Rate Cases)*, 230 U.S. 352 (1912). As a corollary to this principle, it should be noted that other property, although it contributes to the income of a regulated entity, should be excluded from the rate base if it is not "used and useful" for the performance of services of the type subject to regulation. *Denver Union Stock Yard Co. v. United States*, 304 U.S. 470 (1938).

The Administrator has determined that the property used and useful for the convenience of the four bridges should consist of the bridges themselves, the Holland and Lincoln tunnels, PATH, and the bus terminals. Because the record shows that all of these facilities act to relieve congestion that would otherwise overburden the bridges, their investment should be considered along with that in the bridges themselves to determine whether, in light of the combined operating results of these facilities, the toll increases produce a fair rate of return.

The record shows that if any one facility were not in existence, the use of others would increase correspondingly, as, significantly, would the congestion of these other facilities. The relationship among the Hudson River crossings—namely, the Holland and Lincoln tunnels, PATH, and the George Washington Bridge—is well demonstrated on the record. PATH and the Lincoln and Holland tunnels all have terminals in the Manhattan central business district and all provide nearly inter changeable transportation options for persons residing in New Jersey and working in the central business district. Thus, discontinuance of any facility would significantly increase use and congestion of any other.

The evidence also establishes that the Staten Island bridges divert traffic that would otherwise cross and congest the Hudson River Tunnels, PATH or the George Washington Bridge. When the Verrazano Narrows Bridge was opened, allowing access between New Jersey and Long Island via Staten Island, traffic in the Holland Tunnel decreased while the number of Staten Island crossings increased (PA–7 at 4). It is true, as AAA points out (AAA–11 at 4–5), that the decrease in Holland Tunnel traffic and the increase in Staten Island crossings do not exactly coincide, but the interdependency between the two has been sufficiently established to demonstrate that the discontinuance of one would add to congestion on the other.

The relationship between the George Washington and the Staten Island bridges seems adequately established, both by the planning studies referred to in PA–7 at 23 and by cross-examination of the Port Authority's witness (Tr. 11/4 at 95–97). In addition, the relationship between PATH and the Staten Island bridges is sufficient to justify including them within a single rate base (Tr. 11/4 at 111).

The Port Authority's bus terminals facilitate bus movement across the Hudson and thereby are factors in avoiding congestion on the bridges. For this reason, the investment should be added to the relevant rate base. There has been no demonstration, on the other hand, that the Port Authority's truck terminals serve to alleviate congestion on the bridges since trucks will have to cross the Hudson River on the George Washington Bridge in order to reach either the New York terminal from New Jersey or the Newark terminal from New York. The investment in these facilities should not be included in the rate base. Similar reasoning favors exclusion of the Port Authority's other projects—including the World Trade Center and Kennedy Airport—from consideration, since neither of these affects the congestion of the bridges.

The avoidance of congestion is of unquestionable advantage for bridge users. Congestion not only produces lost time and increases aggravation but contributes to the degradation of the environment of the congested facility by increased noise and engine emissions. Although it is virtually impossible to measure these costs in dollars, avoidance of them has an economic benefit to the user which should be charged to him. Because this economic benefit is as equally unquantifiable as the penalties of the costs avoided, a proxy for its value can be substituted. This proxy consists of the cost of providing other transportation facilities that divert traffic that would otherwise use and congest the bridges. The Administrator therefore concludes that, since each of the facilities does contribute towards avoiding congestion on the bridges, inclusion of the capital invested in them in the rate base for the tolls is a reasonable proxy cost for the benefit conferred upon the bridge users.

Another independent reason exists for including the investment of all these facilities in a single rate base. This is because these facilities were planned and have been operated by the Port Authority as an integrated, interdependent transportation system used to facilitate cross-water movements (PA–7, passim).[8] The Administrator must pay some deference to the Port Authority's fiscal policy of pooling revenues and costs in all these facilities and making its investment decisions on the basis of net operating revenues considered as a whole. Moreover, the record shows, that each transportation instrumentality serves to facilitate this cross-water movement in its own fashion, thereby benefitting not only its own users but also the users of other such instrumentalities. As previously mentioned, the existence of mass-transportation facilities serves to avoid congestion on all bridges. The bridges in turn benefit the users of these other facilities by contributing towards their financial support. It is therefore appropriate for the Administrator to include the capital invested in each in forming the investment base to measure the rate of return.

C. RATE OF RETURN

The rate of return which the Port Authority may reasonably earn on its amortized investment in use of the facilities making up the rate base, excluding government contributions, is a matter of less dispute than the rate base itself. The record advocates a rate of return as low as 5.03 percent and as high as 10 percent. The Administrative Law Judge found that a rate of return "not exceeding 6.5 percent" was appropriate (Recommended Decision at 20–23, 26).

The Administrator will adopt the recommendation of the Administrative Law Judge on the rate of return. As the conflicting evidence on this issue makes clear, there is no single accepted standard of measurement for measuring the supply price of capital, which is the paramount consideration in determining a fair return. Rather, if a single figure is to be selected, this must be done on the basis of informed judgment and discretion. The record shows that the Administrative Law Judge considered all evidence, and thus, properly exercised his discretion in recommending

[8] Again, the Administrator considers that the investment base in the Port Authority's truck facilities should be excluded because of the lack of evidence connecting these with across-harbor, as distinct from other movement. The same ground exists for excluding the World Trade Center, Kennedy Airport, and other facilities not involved in transwater crossings.

that the rate of return applicable here should not exceed 6.5 percent.

As shown by Appendix A to this decision, the rates of return on the Port Authority's capital investment in facilities that the Administrator has determined to constitute the rate base do not exceed this figure, ranging as they do from 4.0 percent in 1976 to —2.6 in 1981. In these circumstances, it is not necessary for the Administrator to determine an exact rate of return or even establish a range of return in order to determine whether the tolls in question comport with standards of the General Bridge Act of 1906.

It is possible for the Port Authority to increase these tolls beyond their present limits without exceeding the 6.5 percent rate of return determined to be reasonable in this case. However, the Administrator considers that the need for a toll to produce revenues sufficient to maintain a reasonable rate of return is far from paramount in the ultimate determination of whether a particular toll is reasonable and just. Thus, any further toll increase would have to be assessed in the light of the other factors mentioned in this decision.

The Public Interest

In addition to considering the Port Authority's rate of return on investment, the Administrator must also consider other public interest factors indicated in *Delaware River Port Authority v. Tiemann, supra.*, and *Burlington v. Turner*, 336 F.Supp. 594 (S.D. Iowa 1972), modified, 471 F.2d 120 (8th Cir. 1973).

In addition to the fact that the Port Authority toll schedules provide the lowest possible tolls consistent with the financial well-being of the bridge owner, evidence in the record demonstrates other favorable impacts on the public. To the extent that toll revenues are used to support and improve mass-transit facilities, reduced congestion and improved traffic flow resulting from increased patronage of mass-transit can benefit both the bridge users and other users of surface transport in the New York area.

In this regard, the Administrator considers it reasonable and just for the Port Authority to use excess toll revenues to support mass transportation enterprises. This use is fully consistent with the declaration of congressional policy in forming the Department of Transportation that the Nation requires (49 U.S.C. § 1651):

> The development of national transportation policies and programs conducive to the provision of fast, safe, efficient, and convenient transportation at the lowest cost consistent therewith and with other national objectives including the efficient utilization and conservation of the Nation's resources.

By permitting bridge toll revenues to aid the support and improvement of mass transit projects, the Port Authority is acting in support of the national objective of the efficient utilization and conservation of important transportation resources. The proper solution to the many problems that beset transportation in large urban areas can only be found in redressing some of the imbalances between private and public transportation. The Port Authority's policy of using bridge tolls to support other modes of transportation promotes a more efficient utilization of mass transportation, thereby decreasing dependency upon the automobile. The financial support that toll revenues will make towards the improvement of mass transportation is substantial and will tend to enhance the attraction of these modes of travel.

In sum, the Administrator must conclude that, in these circumstances, it is fair and reasonable for the Port Authority to require the users of bridges to contribute towards the financial support of other transportation facilities.

D. VIABILITY OF CONSTRUCTION PROJECTS

The Port Authority's justification of its 1975 toll increases was to obtain $40 million to pay the debt service on bonds to finance four mass transit projects: the PATH extension to Plainfield, New Jersey, the Erie-Lackawana Direct Rail Service project, the Kennedy Rail Service project, and the bus terminal extension. Tr. 11/4 at 124–126. Of the four projects, only the bus terminal expansion is now actually in progress. Tr. 11/4 at 155–156. Much of the testimony and arguments of the opponents to the toll increase is directed to the point that the toll increase is unneeded because of the uncertainty surrounding these projects.

It is not necessary for the Administrator to decide the viability of these and other projects in order to decide whether the tolls are reasonable and just. Given the determination that the toll schedule provides a reasonable return on the Port Authority's investment in the bridges and related facilities, the nature of these projects need not be reviewed by the Administrator in a toll proceeding unless the projects are outside the authority of the toll agency or are so unreasonable as to constitute a burden on the toll-paying public in terms of requiring higher tolls and failing to contribute to the betterment of the transportation system. It has not been shown that such is the case here.

RATE STRUCTURE

The record contains some discussion of the effect of giving discounts to buses, commuters and carpools and some advocacy in favor of peak-hour pricing as a disincentive to car use during rush hours. For example, Public Counsel produced evidence suggesting that the Port Authority's toll increase combined with the carpool discount served to increase the use of carpools and thereby decrease congestion (PC–6, 22–25). Another witness for Public Counsel stated his opinion that, in order to be more effective, carpool discounts should be confined to peak hours (PC–7, at 74). He added that the commuter discount was too large to be justified in any savings in administrative costs (PC–7 at 24).

The Administrator has determined that the evidence is inconclusive on the issue of whether the carpool and commuter discount features of the Port Authority's rate structures are reasonable and just.[9] Given the present state of the record, the Administrator is unable to determine whether the existing carpool and commuter discounts are reasonable and just and whether, in order to conform to this statutory standard, the Port Authority's rate structure should have peak-hour charges. Although the Administrator has the power to prescribe reasonable rates of toll, as well as the authority exercised here to review tolls, the exercise of this power on such an inadequate record is not warranted.

For this reason, the Administrator will reserve decision on these aspects of the Port Authority's toll structure. The Administrator will therefore direct the Port Authority to prepare, within 1 year from the date of the final order, a study concerning the economic feasibility, traffic management and environmental effects, and impact on mass transit of various alternative rate structures of commuter and carpool discounts and of peak-hour pricing. Copies of this study shall be filed with the Administrator, and all parties. Upon receipt of this study, the Administrator will provide for an opportunity for the other parties to comment. Based upon this study and comments thereon, the Administrator will then dispose of this remaining issue as he deems appropriate in the circumstances.

ORDER

The Federal Highway Administrator, after consideration of the evidence in the record of this matter, and for the reasons heretofore stated, finds that the existing toll schedule for the crossings of the George Washington Bridge, the Goethals Bridge, the Bayonne Bridge, and the Outerbridge Crossing is reasonable and just, and that the toll schedule adopted by the Port Authority of New York and New Jersey on April 10, 1975, effective May 5, 1975, is the legal rate to be demanded and received for transit over these bridges.

The Administrator also orders the Port Authority to prepare and submit to the Administrator and all parties a comprehensive feasibility study and recommendations for peak-hour charges and the impact that carpooling and commuter discounts have upon congestion.

Exceptions to the decision and order of this date may be submited to the Ad-

[9] Although it is not necessary for a proper disposition of this proceeding, the Administrator considers that the burden of proof is upon those parties opposing tolls. This is consistent with the finding of the Administrator in previous proceedings and with section 6(d) of the Administrative Procedure Act, 5 U.S.C. § 556(d), which places the burden of proof upon "the proponent of a rule or order." Since challengers to a toll can be considered proponents of an order finding it to be unjust and unreasonable and extensive discovery is available in administrative proceedings under the statute, they should bear the burden of proof.

V 42 AUG 25 77 UM

ministrator within 30 days of the date of this decision. The Administrator, upon review of the exceptions, will issue a final order on the issues resolved in this decision.

Issued this 9th day of August, 1977, in Washington, D.C.

WILLIAM M. COX,
Administrator, Federal Highway Administration.

National Highway Traffic Safety Administration

[Docket No. EX 77-3; Notice 2]

BRISTOL CARS, LTD.

Petition for Temporary Exemption From Motor Vehicle Safety Standards

This notice grants the petition by Bristol Cars, Ltd. of England for a temporary exemption of the Bristol 412 passenger car from five Federal motor vehicle safety standards (Nos. 201, 202, 212, 214, and 219) on the basis that compliance would cause it substantial economic hardship. Exemption is denied from Standard No. 215.

Notice of the petition was published on March 24, 1977 (42 FR 16014), and an opportunity afforded for comment.

Petitioner is a manufacturer whose annual production of motor vehicles has not exceeded 150 units in the past 3 years. Bristol seeks a 2-year exemption from Standards Nos. 201, *Occupant Protection in Interior Impact*, and 202, *Head Restraints*, and for 3 years from Standards Nos. 212, *Windshield Mounting*, 214, *Side Door Strength*, 215, *Exterior Protection*, and 219, *Windshield Zone Intrusion*. With the exception of Standard No. 215 the company believes that it may already comply with the standards for which exemption is requested, and it describes the engineering reasoning in support of its belief. However, it wishes to test to verify conformance and the costs are such that to immediately conduct them would create an economic problem. With respect to Standard No. 215 the bumper system of the 412 has not been designed or tested in accordance with it. The cost of bumper testing and conversion is estimated at slightly over $100,000. The 2 and 3 year exemption will allow an orderly scheduling of tests and exhaustion of inventory of noncomplying parts (if any) as well as permitting it to test the U.S. market potential. Bristol had a net loss of approximately $92,000 in 1975 with a total accumulated loss of approximately $156,000 as of the end of that year. Bristol argued that the exemption would be in the public interest because it purchases its engines, transmissions and drive trains from Chrysler Corporation, providing work for a U.S. corporation. If the exemption is granted, the company will also buy its air conditioning systems and electric seat adjustments from Chrysler.

No comments were received on the petition.

Petitioner's belief that it may already comply with five of the six standards from which it requests exemption means that conformance may have been achieved or that any nonconformance is minimal. The small volume of its production and its uncertainty as to its acceptance in the American market indicates that the exposure of the vehicle to the public will be limited. It is evident from its picture of corporate financial loss that it cannot immediately afford to conduct the conformance tests it wishes and that these must be phased in on an orderly basis in order not to create substantial economic hardship within the meaning of the statute. Its purchase of American components supports its argument that an exemption would be in the public interest.

It has been determined that to require immediate conformance would cause Bristol substantial economic hardship and that a temporary exemption would be in the public interest and consistent with the objectives of the National Traffic and Motor Vehicle Safety Act.

In consideration of the foregoing Bristol Cars, Ltd. is hereby granted NHTSA Exemption No. 77-3, from the standards listed below and expiring on the dates indicated: Motor Vehicle Safety Standard No. 201, *Occupant Protection in Interior Impact*, and 49 CFR 571.202, Motor Vehicle Safety Standard No. 202, *Head Restraints*, expiring July, 1, 1979; 49 CFR 571.212, Motor Vehicle Safety Standard No. 212, *Windshield Mounting;* 49 CFR 571.214, Motor Vehicle Safety Standard No. 214, *Side Door Strength;* and 49 CFR 571.219, Motor Vehicle Safety Standard No. 219, *Windshield Zone Intrusion*, expiring July 1, 1980.

With respect to Standard No. 215, however, Bristol has stated only that the bumper system of the 412 has not been designed or tested in accordance with it. In order to provide an exemption, however, Section 123(a)(1)(A) of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1410(a)(1)(A)) requires the Administrator to find that Bristol "has, in good faith, attempted to comply" with Standard No. 215. The information submitted to date is insufficient to support such a finding. Accordingly, Bristol's petition for exemption from Standard No. 215 is hereby denied, without prejudice.

(Sec. 3, Pub. L. 92-548, 86 Stat. 1159 (15 U.S.C. 1410); delegation of authority at 49 CFR 1.50.)

Issued on August 18, 1977.

HOWARD DUGOFF,
Acting Administrator.

Office of Pipeline Safety Operations

[Docket No. OPSO 77-8W]

TRANS-ALASKA CRUDE OIL PIPELINE

Grant of Waiver

By petition dated July 25, 1977, the Alyeska Pipeline Service Company (Alyeska) requested a waiver from compliance with 49 CFR 195.218 with respect to seven girth welds at the Valdez Terminal. The welds, identified as Weld Nos. 139, 362C, 363, 442, 1085, 346, and 420, were made without offsetting the longitudinal seams on adjacent pipe lengths as required by Section 195.218. Alyeska, operating on the mistaken belief that Part 195 did not apply to that portion of the pipeline system where these particular welds were located, had not taken steps to ensure that offsets were provided for at the time of construction.

In support of the waiver request, Alyeska asserted that the technical bases upon which the Materials Transportation Bureau (MTB) relied in granting Alyeska a waiver from Section 195.218 for Weld No. 49344T at the Jim River Crossing No. 2 (Docket No. OPSO 76-10W, 41 FR 38202, September 9, 1976) also apply in the case of the present welds. In the Jim River situation, as for every waiver request, MTB evaluated all available data relative to determining whether pipeline safety would be jeopardized by granting the waiver. MTB found that a waiver from Section 195.218 for the Jim River weld would not be inconsistent with pipeline safety because of the difficulties attendant to weld replacement activities in the river crossing and the following reasons:

1. The girth weld exceeds the standards of acceptability in Sec. 6 of API Standard 1104 and does not contain any weld defect which might grow to an unacceptable level under cyclic loadings.

2. The ductility of the pipe and girth weld metals would provide for localized yielding where high residual stresses may exist and thereby prevent fracture initiation and failure of the weld. (Section 195.218 was adopted when pipe and weld materials in general use were less ductile than the materials at Weld No. 49344T.)

3. The similarity of mechanical properties between the girth weld and pipe metals minimizes the likelihood of any concentration of residual stresses existing at the intersection of welds and surrounding heat-affected zone.

4. The fact that the longitudinal seams are ground flush with the inside pipe circumference at the joint mitigates the likelihood of any concentration of residual stresses caused by excess metal at the intersection of welds. (The longitudinal seams were ground flush with the inside circumference at pipe ends when the pipe was manufactured to accommodate an internal line-up clamp during welding.)

MTB agrees with Alyeska that the aforementioned technical reasons why the Jim River weld is safe apply equally to the seven welds at the Valdez Terminal. Moreover, in light of modern pipeline materials and welding technology, the safety rationale appears applicable to all girth welds currently made on steel pipelines intended to carry hazardous materials. This position is substantiated by the fact that neither the Federal gas pipeline safety standards in 49 CFR Part 192 nor the industry standards applicable to liquid pipelines, ANSI B31.4, contain a requirement for seam offsetting such as § 195.218. Therefore, although the working conditions at Valdez do not have the adversities of a river crossing, MTB believes that a waiver from § 195.218 for the seven welds is nonetheless appropriate because the requirement itself does not appear necessary for safety. Thus, on July 27, 1977, Alyeska was advised by telephone and telegram that its waiver request was granted. This Notice publicly announces that decision.

Because of the significance of the decision and its impact on pipelines to be constructed by others, MTB will issue a Notice of Proposed Rulemaking to repeal the general requirement in 49 CFR 195.218.

(18 USC 831-835, 49 CFR 1.53(g).)

Issued in Washington, D.C., on August 17, 1977.

CESAR DELEON,
Acting Director, Office of Pipeline Safety Operations.

AGENCY: Internal Revenue Service.

ACTION: Delegation of Authority.

SUMMARY: The authorities granted to the Commissioner of Internal Revenue by 26 CFR 301.7602-1(b), 301.7603-1, 301.7604-1, and 301.7605-1(a) to issue summonses; to set the time and place for appearance; to serve summonses; to take testimony under oath of the person summoned; to receive and examine books, papers, records, or other data produced in compliance with the summons; and to enforce summonses, are delegated to the officers and employees of the Internal Revenue Service as specified in the delegation order. This revision expands the delegation to include tax examiners in the Service Center Correspondence Audit Branch and trainee tax examiners in the Correspondence Audit Branch, and tax auditor trainees.

EFFECTIVE DATE: August 22, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. William Schutt, CP:A:S:S, 1111 Constitution Avenue NW., Room 2140, Washington, D.C. 20224 (202-566-6815, not toll free).

JACK CHIVATERO,
Acting Assistant Director, Audit Division.

AUTHORITY TO ISSUE SUMMONSES, TO ADMINISTER OATHS AND CERTIFY, AND TO PERFORM OTHER FUNCTIONS

1(a). The authorities granted to the Commissioner of Internal Revenue by 26 CFR 301.7602-1(b), 301.7603-1, 301.7604-1, and 301.7605-1(a) to issue summonses; to set the time and place for appearance; to serve summonses; to take testimony under oath of the person summoned; to receive and examine books, papers, records or other data produced in compliance with the summons; and to enforce summonses, are delegated to the officers and employees of the Internal Revenue Service specified in paragraphs 1(b), 1(c), and 1(d) of this Order and subject to the limitations stated in paragraphs 1(b), 1(c), 1(d), and 6 of this Order.

(b) The authorities to issue summonses and to perform the other functions related thereto specified in paragraph 1(a) of this Order, are delegated to the following officers and employees, provided that the authority to issue a summons in which the proper name or names of the taxpayer or taxpayers is not identified because unknown or unidentifiable (hereinafter called a "John Doe" summons) may be exercised only by said officers and employees and by them only after obtaining pre-issuance legal review by Regional Counsel or the Chief Counsel in the case of Inspection and International Operations.

(1) Inspection: Assistant Commissioner and Director, Internal Security Division.

(2) District Intelligence: Chief of Division.

(3) International Operations: Director and Chiefs of Divisions.

(4) District Collection Activity: Chief of Division.

(5) District Audit: Chief of Division.

(6) District Employee Plans and Exempt Organizations: Chief of Division.

(c) The authorities to issue summonses except "John Doe" summonses, and to perform other functions related thereto specified in paragraph 1(a) of this Order, are delegated to the following officers and employees:

(1) Inspection: Regional Inspectors and Assistant Regional Inspectors (Internal Security) and Chief, Investigations Branch.

(2) District Intelligence: Assistant Chief of Division; Chiefs of Branches; and Group Managers.

(3) International Operations: Assistant Director; Chiefs of Branches; Case Managers; and Group Managers.

(4) District Collection Activity: Assistant Chief of Division; Chiefs of Field Branches and Office Branches; Chief, Special Procedures Staff; and Group Managers.

(5) District Audit: Chiefs of Examination Branches; Case Managers; and Group Managers.

(6) District Employee Plans and Exempt Organizations: Group Managers.

(d) The authority to issue summonses except "John Doe" summonses and to perform the other functions related thereto specified in paragraph 1(a) of this Order is delegated to the following officers and employees except that in the instance of a summons to a third party witness, the issuing officers' case manager, group manager, or any supervisory official above that level, has in advance personally authorized the issuance of the summons. Such authorization shall be manifested by the signature of the authorizing officer on the face of the original and all copies of the summons or by a statement on the face of the original and all copies of the summons, signed by the issuing officer, that he/she had prior authorization to issue said summons and stating the name and title of the authorizing official and the date of authorization.

(1) International Operations: International Revenue Agents; Attorneys, Estate Tax; Estate Tax Examiners; Special Agents; Revenue Service and Assistant Revenue Service Representatives; Tax Auditors; and Revenue Officers, GS–9 and above.

(2) District Intelligence: Special Agents.

(3) District Collection: Revenue Officers, GS–9 and above.

(4) District Audit: Internal Revenue Agents; Tax Auditors; Attorneys, Estate Tax; and Estate Tax Examiners.

(5) District Employee Plans and Exempt Organizations: Internal Revenue Agents; Tax Law Specialists; and Tax Auditors.

(e) Each of the officers and employees referred to in paragraphs 1(b), 1(c), and 1(d) of this Order may serve a summons whether it is issued by him, her or another official.

2. Each of the officers and employees referred to in paragraphs 1(b), 1(c), and 1(d) of this Order, authorized to issue summonses, is delegated the authority under 26 CFR 301.7602–1(b) to designate any other officer or employee of the Internal Revenue Service referred to in paragraph 4(b) of this Order, as the individual before whom a person summoned pursuant to Section 7602 of the Internal Revenue Code shall appear. Any such other officer or employee of the Internal Revenue Service when so designated in a summons is authorized to take testimony under oath of the person summoned and to receive and examine books, papers, records, or other data produced in compliance with the summons.

3. Internal Security Inspectors are delegated the authority under 26 CFR 301.7603–1 to serve summonses issued in accordance with this Order by any of the officers and employees of the Inspection Service referred to in paragraphs 1(b)(1) and 1(c)(1) of this Order even though Internal Security Inspectors do not have the authority to issue summonses.

4(a). The authorities granted to the Commissioner of Internal Revenue by 26 CFR 301.7602–1(a), and 301.7605–1(a) to examine books, papers, records, or other data, to take testimony under oath and to set the time and place of examination are delegated to the officers and employees of the Internal Revenue Service specified in paragraphs 4(b), 4(c), and 4(d) of this Order and subject to the limitations stated in paragraphs 4(c) and 6 of this Order.

(b) General Designations:

(1) Inspection: Assistant Commissioner; Director, Internal Security Division; Director, Internal Audit Division; Regional Inspectors; Internal Auditors; and Internal Security Inspectors.

(2) District Intelligence: Chief and Assistant Chief of Division; Chiefs of Branches; Group Managers; and Special Agents.

(3) International Operations: Director; Assistant Director; Chiefs of Divisions and Branches; Special Agents; Case Managers; Group Managers; Internal Revenue Agents; Attorneys, Estate Tax; Estate Tax Examiners; Revenue Service and Assistant Revenue Service Representatives; Tax Auditors; and Revenue Officers.

(4) District Collection Activity: Chief and Assistant Chief of Division; Chiefs of Field Branches and Office Branches; Chiefs, Special Procedures Staffs; Group Managers; and Revenue Officers.

(5) District Audit: Chief of Division; Chiefs of Examination Branches; Conferees; Case Managers; Group Managers; Internal Revenue Agents; Tax Auditors; Attorneys, Estate Tax; and Estate Tax Examiners.

(6) Regional and District Employee Plans and Exempt Organizations; Conferees; Chief of Division; Chief of Examination Branch; Chief, Technical Staff; Group Managers; Internal Revenue Agents; Tax Law Specialists; and Tax Auditors.

(7) Service Center: Chief, Audit Division; Chief, Intelligence Staff; Revenue Agents; Tax Auditors; Tax Examiners in the Correspondence Audit Branch; and Special Agents.

(c) District Directors, Service Center Directors, Regional Inspectors, the Chief of Investigation Branch, and the Director of International Operations may redelegate the authority under 4(a) of this Order to aides or trainees, respectively, for the positions of revenue agent, tax auditor, tax examiner in the service center Correspondence Audit Branch, tax law specialist, revenue officer, internal auditor, internal security inspector, and special agent, provided that each such aide or trainee shall exercise said authority only under the direct supervision, respectively, as applicable of a revenue agent, tax auditor, tax examiner in the service center Correspondence Audit Branch, tax law specialist, revenue officer, special agent, internal auditor or internal security inspector.

(d) District Directors may redelegate the authority under 4(a) of this Order to Revenue Representatives and Office Collection Representatives.

5. Under the authority granted to the Commissioner of Internal Revenue by 26 CFR 301.7622–1, the officers and employees of the Internal Revenue Service referred to in paragraphs 1(b), 1(c), 1(d), and 4(b) and 4(c) of this Order are designated to administer oaths and affirmations and to certify to such papers as may be necessary under the internal revenue laws and regulations except that the authority to certify shall not be construed as applying to those papers or documents the certification of which is authorized by separate order or directive. Revenue Representatives and Office Collection Representatives referred to in paragraph 4(d) of this Order are not designated to administer oaths or to perform the other functions mentioned in this paragraph.

6. The authority delegated herein may not be redelegated except as provided in paragraphs 4(c) and 4(d).

7. This Order supersedes Delegation Order No. 4 (Rev. 3), issued November 24, 1975.

WILLIAM E. WILLIAMS,
Acting Commissioner.

AUGUST 5, 1977.

[Delegation Order No. 16 (Rev. 1)]

ASSISTANT COMMISSIONER (COMPLIANCE), ET AL.

Delegation of Authority

AGENCY: Internal Revenue Service.

ACTION: Delegation of Authority.

SUMMARY: The authority of the Commissioner of Internal Revenue to approve payments for confidential expenditures pertaining to violations of federal statutes administered and enforced by the Internal Revenue Service is delegated to certain management officials. The text of the delegation order appears below.

EFFECTIVE DATE: August 18, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Loren P. Kraft, CP:I:P, 1111 Constitution Avenue NW., Room 2429, Washington, D.C. 20224, 202–566–1554 (Not Toll Free).

WILLARD M. CUMMINGS,
Acting Director,
Intelligence Division.

AUTHORIZATION TO APPROVE CONFIDENTIAL EXPENDITURES

Pursuant to authority vested in the Commissioner of Internal Revenue by Treasury Department Order 150–37, authority to approve payments for confidential expenditures pertaining to violations of federal statutes administered and enforced by the Internal Revenue Service is hereby delegated to the following officials as well as the dollar limitation, where appropriate, that each official may approve:

A. Assistant Commissioner (Compliance) is authorized to approve all confidential expenditures for information related to violations of Title 26, United States Code from informants or payments on behalf of informants exceeding $2000 in each single assigned case or project; all confidential expenditures for undercover operations exceeding $2000 in each single assigned case or project; and other confidential expenditures exceeding $2000 in each single assigned case or project.

B. Assistant Commissioner (Inspection) is authorized to approve all Internal Security Activity confidential expenditures for information related to violations of Title 26, United States Code from informants or payments on behalf of informants; undercover operations; and other confidential expenditures.

C. Regional Commissioners are authorized to approve all confidential expenditures for information related to violations of Title 26, United States Code from informants or payments on behalf of informants for $2000 or less in each single assigned case or project; all confidential expenditures for undercover operations for $2000 or less in each single assigned case or project; and other confidential expenditures for $2000 or less in each single assigned case or project. The authority to approve confidential expenditures for information related to violations of Title 26, United States Code for informants or payments on behalf of informants and other confidential expenditures may be redelegated to District Director for $1000 or less.

D. Regional Inspectors are authorized to approve all Internal Security Activity confidential expenditures up to a limit of $2000 for each single assigned case or project, for information related to violations of Title 26, United States Code from informants or payments on behalf of informant; undercover operations; and other confidential expenditures.

E. District Directors are authorized in emergency situations to approve expenditures up to $1000 for payments to informants for information leading to the apprehension of fugitives named in wanted circulars issued in connection with violations of Title 26, United States Code.

F. Director, Internal Security Division is authorized to approve all Internal Security Activity confidential expenditures, involving National Office cases or projects, up to a limit of $2000 for each single assigned case or project, for information related to violations of Title 26 United States Code from informants or payments on behalf of informants; undercover operations; and other confidential expenditures.

This authority delegated herein may not be redelegated.

This order supersedes Commissioner Delegation Order No. 16 issued January 13, 1956.

WILLIAM E. WILLIAMS,
Acting Commissioner.

JULY 15, 1977.

Office of the Secretary

[Department Circular Public Debt Series—No. 21–77]

TREASURY NOTES OF SEPTEMBER 30, 1981 SERIES K–1981

AUGUST 22, 1977.

1. INVITATION FOR TENDERS

1.1. The Secretary of the Treasury, under the authority of the Second Liberty Bond Act, as amended, invites tenders for approximately $2,500,000,000 of United States securities, designated Treasury Notes of September 30, 1981, Series K–1981 (COSIP No. 912827 GZ 9). The securities will be sold at auction with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued for cash to Federal Reserve Banks as agents of foreign and international monetary authorities.

2. DESCRIPTION OF SECURITIES

2.1. The securities will be dated September 7, 1977, and will bear interest from that date, payable on a semiannual basis on March 31, 1978, and each subsequent 6 months on September 30 and March 31 until the principal becomes payable. They will mature September 30, 1981, and will not be subject to call for redemption prior to maturity.

2.2. The income derived from the securities is subject to all taxes imposed under the International Revenue Code of 1954. The securities are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2.3 The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2.4. Bearer securities with interest coupons attached, and securities registered as to principal and interest, will be issued in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of coupon, registered and book-entry securities, and the transfer of registered securities will be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. SALE PROCEDURES

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Daylight Saving time, Tuesday, August 30, 1977. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Monday, August 29, 1977.

3.2. Each tender must state the face amount of securities bid for. The minimum bid is $1,000 and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.11%. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender and the amount may not exceed $1,000,000.

3.3. All bidders must certify that they have not made and will not make any agreements for the sale or purchase of any securities of this issue prior to the deadline established in Section 3.1. for receipt of tenders. Those authorized to submit tenders for the account of customers will be required to certify that such tenders are suomitted under the same conditions, agreements, and certifications as tenders submitted directly by bidders for their own account.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3.5. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by a deposit of 5% of the face amount of securities applied for (in the form of cash, maturing Treasury securities or readily collectible checks), or by a guarantee of such deposit by a commercial bank or a primary dealer.

3.6. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full at the weighted average price (in three decimals) of accepted competitive tenders, and competitive tenders with the lowest yields will be accepted to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, a coupon rate will be established, on the basis of a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a low-

est accepted price above the original issue discount limit of 99.000. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the weighted average price of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full or when the price is over par.

4. RESERVATIONS

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. PAYMENT AND DELIVERY

5.1. Settlement for allotted securities must be made or completed on or before Wednesday, September 7, 1977, at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received at such institution no later than:

(a) Friday, September 2, 1977, if the check is drawn on a bank in the Federal Reserve District of the institution to which the check is submitted (the Fifth Federal Reserve District in case of the Bureau of the Public Debt), or

(b) Thursday, September 1, 1977, if the check is drawn on a bank in another Federal Reserve District.

Checks received after the dates set forth in the preceding sentence will not be accepted unless they are payable at the applicable Federal Reserve Bank. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment is not completed on time, the deposit submitted with the tender, up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered as deposits and in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon (securities offered by this circular) to be delivered to (name and address)." Specific instructions for the issuance and delivey of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. These certificates shall be issued in bearer form and shall be exchangeable for definitive securities of this issue, when such securities are available, at any Federal Reserve Bank or Branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be returned at the risk and expense of the holder.

5.5 Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. GENERAL PROVISIONS

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

PAUL H. TAYLOR,
Deputy Fiscal
Assistant Secretary.

[FR Doc.77-24562 Filed 8-22-77;11:50 am]

VETERANS ADMINISTRATION

VETERANS EDUCATION

Policies and Procedures

AGENCY: Veterans Administration.

ACTION: Request for public comment.

SUMMARY: The Veterans Administration is publishing for public comment various new and revised statements of policy and procedures which have been adopted by the Agency to implement Public Law 94-502 (90 Stat. 2383). These documents have already been issued to staff and interested persons, but the publication here is intended to apprise persons that may not have received them. It is hoped that interested persons will provide input to allow the Veterans Administration to gauge the effectiveness of the policies and procedures.

DATES: Comments must be received on or before September 23, 1977.

ADDRESSES: Send written comments to: Administrator of Veterans Affairs (271A) Veterans Administration, 810 Vermont Avenue, NW. Washington, DC 20420.

Comments will be available for inspection at the address shown above during normal business hours until October 3, 1977.

FOR FURTHER INFORMATION CONTACT:

June C. Schaeffer, Assistant Director for Benefits and Facilities, Education and Rehabilitation Service, Department of Veterans Benefits, Veterans Administration, Washington, D.C. 20420 (202-389-2092).

SUPPLEMENTARY INFORMATION: The Veterans Administration has published portions of this material in the FEDERAL REGISTER in the past. On December 16, 1976 (41 FR 55021) we published DVB Circular 20-76-84 and appendixes (A) through (H). On February 9, 1977 (42 FR 8255), appendixes (I) through (O) to DVB Circular 20-76-84 were published in the FEDERAL REGISTER. Also published on that date was appendix (H) as it had been revised (including two changes to it in the form of changes 1 and 2 of DVB Circular 20-76-84). Finally on April 12, 1977 (42 FR 19243) we published DVB Cirlulars 20-77-24 and 20-77-25.

Since these circulars have been revised in many respects by subsequent changes and since DVB Circular 20-77-10 with it own changes has been promulgated, the following documents are being published at this time so that the reader may have the complete current versions of each item. New material not previously included in the FEDERAL REGISTER is denoted by brackets.

This publication contains the entire content of DVB Circular 20-77-10, including change 1; DVB Circular 20-77-24, including changes 1, 2 and 3 and appendix A; appendix A, revised, of DVB Circular 20-76-84; appendix C, as revised by change 3 of DVB Circular 20-76-84; appendix D, revised, of DVB Circular 20-76-84; appendix H, revised, as revised by changes 4 and 6 of DVB Circular 20-76-84; appendix M, as revised by change 5 of DVB Circular 20-76-84; and appendix P of DVB Circular 20-76-84. These publications deal with the procedures and policy required to implement provisions of Public Law 94-502 as to approval of facilities located off the main campus of a school; advance payment and termination of prepayment of benefits; the 6-month normal completion time requirement for correspondence courses; the requirement that a school shall have operated the course for a minimum of 2 years; the prohibition of assignment of educational assistance benefits; the requirements that at least 15 percent of the students in a course be nonveterans; the prohibition of payments of educational assistance for courses not counted to satisfy graduation requirements; and other miscellaneous requirements. All of these publications have been implemented and have been distributed through normal channels to interested persons.

ADDITIONAL COMMENT INFORMATION

Interested persons are invited to submit written comments, suggestions, or objections regarding these documents to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays), until October 3, 1977. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Services Unit in room 132. Such visitors to any VA field station will be informed that the records are available for inspection only in Central Office and furnished the address and the above room number.

APPROVED: August 17, 1977.

By the direction of the Administrator.

RUFUS H. WILSON,
Deputy Administrator.

DVB Circular 20-77-10.
January 25, 1977.

DEPARTMENT OF VETERANS BENEFITS,
Veterans Administration,
Washington, D.C.

APPROVAL CONSIDERATIONS FOR FACILITIES LOCATED OFF THE MAIN CAMPUS

1. *General.* In implementing certain provisions of PL 94-502, primarily concerning the two-year rule and the 85-15 percent requirement, it has become apparent that some clarification is required concerning additional facilities, branches and extensions. This circular examines administrative capability and summarizes certain approval requirements for resident courses offered at additional facilities, branches and extensions.

2. *Definitions.*—a. An "additional facility" (per VAR 14251(F)) is an off-campus location for which the following conditions exist:

(1) The parent facility has been in operation for a period of 2 years or more;

(2) The parent school has reached the limit of its enrollment capacity in its present

(3) The courses offered at the additional facility are the same as those given at the parent facility, and

(4) The additional facility is within normal commuting distance of the parent facility.

NOTE.—A branch, as well as the main campus, may be the "parent facility" for the purpose of acquiring additional facilities under this definition.)

b. A "branch" or "subsidiary branch" is any location apart from the main campus that does not meet the necessary criteria to be considered an additional facility.

c. An "extension" is synonymous with a "branch" for Veterans Administration purposes.

d. For "normal commuting distance" see the note in DVB Circular 20-76-84. Appendix C, paragraph 4a(2).

3. *Approval Requirements.*—a. An additional facility is considered to be a part of the parent school and therefore no separate approval is required. However, if the additional facility is located in a different State from the parent facility (e.g., a school in the District of Columbia with a facility 3 miles away in Virginia), the SAA (State approving agency) of the State in which the additional facility is located must approve the courses offered there. The two-year rule and the 85-15 percent requirement do not apply independently to additional facilities.

b. A branch or extension is considered to be a separate school and must meet all of the requirements necessary for course approval, including the following:

(1) Obtain a separate approval from the SAA in the State where the branch is located.

(2) Fulfill the 85-15 percent requirement as outlined in VAR 14202(C)(1) and DVB Circular 20-76-84, appendix H, Revised, and

(3) Meet the two-year rule as outlined in VAR 14251 and DVB Circular 20-76-84, appendix C.

4. *Administrative Capability of a Branch.* Up to this time, the VA has held the policy that in order to be approved for VA benefits, each branch must have a separate SAA approval and have an administrative capability separate from the parent facility. However, certain situations have been encountered which are considered valid exceptions to this policy. These exceptions will be examined below after restating the criteria of an administrative capability.

a. A branch is considered to have an administrative capability when the following criteria are met:

(1) The branch maintains sufficient records and files for VA purposes pertaining to students enrolled therein;

(2) The branch designates a named certifying official;

(3) The branch is able to furnish all reports and certifications to the VA without resort to the parent school; and

(4) The branch maintains a local mailing address.

b. Branches are excepted from the requirement to have an administrative capability if they are located in the same State as the parent facility and any of the following conditions exist:

(1) The course offering consists of a small number of unit subjects which do not comprise a program of education or a set curriculum large enough to allow pursuit on a continuing basis; or

(2) The course offering is being given on a temporary basis (i.e., no more than a few cycles of the training are contemplated), or

(3) The site itself cannot provide the minimum space needed to develop an administrative capability. This exception contemplates facilities such as high school classrooms that are vacant at night, unused classrooms of local colleges and other community facilities available on a part-time basis.

NOTE.—Branches located overseas are not required to have a separate administrative capability as long as all administrative requirements are handled by the parent institution.)

c. A branch that is excepted from the requirement to have an administrative capability may nevertheless be approved if all other approval requirements, including the two-year rule and 85-15 percent requirement, are met.

(1) A separate approval will not be required. Courses at such branches will be included in the approval of the parent facility.

(2) The SAA must make an onsite inspection prior to approval (unless the branch is overseas) in order to determine if an administrative capability exists or is required. The approval should list each off-campus site that is not required to have an administrative capability and indicate the specific courses approved at each site.

[NOTE.—Current approvals which include courses at such branches should not be considered invalid. Only new approvals and revisions which include a new branch will require prior onsite inspection. Where existing approvals include branch instruction which was approved without an onsite inspection, the SAA will make such an inspection as soon as their workload allows.]

(3) When certifying enrollments, the parent facility must specify the off-campus site where the instruction will be furnished.

(4) Compliance surveys, as warranted, will include off-campus class checks.

d. All out-of-State branches, as well as those branches that are not excepted (under subpar. b above), require a separate approval and a separate administrative capability.

5. *Specific Situations.* The following examples point out the most common situations encountered in dealing with off-campus locations:

Example 1: Acme County Junior College offers a freshman-level English course at the Acme County Community Center and also at the Community Center in neighboring Shaw County, whenever enough students are interested. These are not additional facilities, since the parent facility has not reached the limit of its enrollment capacity. These branches are not required to have an administrative capability nor a separate approval. However, the 85-15 percent requirement does apply to these branches. Although the two-year rule does not apply to the Acme County Branch, it does apply to the Shaw County Branch since the parent school is supported solely by Acme County and the branch is located in Shaw County, outside of the taxing jurisdiction.

Example 2: Maryland State University has a branch in Pennsylvania. The branch must have an administrative capability and a separate approval from the Pennsylvania SAA, since it is located outside of Maryland. The branch courses must meet the 85-15 percent requirement. The two-year rule also applies because the parent school is tax supported and the branch is located outside of the taxing jurisdiction.

Example 3: Smythe Business College of Plainville (a nonprofit IHL) opens a branch 9 miles away in Muddale and offers an associate degree program there. The new branch does not meet any of the conditions outlined in paragraph 4b. Therefore a separate approval is required and the branch must

have an administrative capability. The 85–15 percent requirement applies. However, the two-year rule does not apply since the parent school is a proprietary nonprofit institution and the branch is located within the normal commuting distance of the main campus.

Example 4: Alamnus College of New York has a branch location in California which meets all approval requirements (new and old). This branch offers night courses at several high schools within the community (within a 10-mile radius of the branch). The high school locations are considered additional facilities because the main branch campus (the parent facility) has reached the limit of its enrollment capacity and the high schools are located within normal commuting distance. Also, the courses offered at the additional facilities are the same as those given at the main branch campus which has been in operation for over 2 years. As additional facilities, the high school locations are not required to have an administrative capability nor a separate approval, but should be included with the approval of the main branch campus. The two-year rule and the 85–15 percent requirement do not apply independently to the additional facilities."

RUFUS H. WILSON,
Chief Benefits Director.

DVB Circular 20–77–24.
March 18, 1977.

DEPARTMENT OF VETERANS BENEFITS,
VETERANS ADMINISTRATION,
Washington, D.C.

CHANGES TO PREPAYMENT, ADVANCE PAYMENT AND RELATED PROCEDURES

[The circular printed below contains content changes to various paragraphs indicated by the bracketed portions. The original circular was published on March 18, 1977. The changes to paragraphs 2, 4, 5, and 8 were published on May 6, 1977. These changes to the prepayment and advance payment procedures were brought about because several stations and schools have expressed concern that continuing summer students will experience an unnecessary interruption of payments under the original procedures. The changes are intended to prevent or minimize any interruption of payment for these students. Also, the changes further clarify the effect of postpayment and allow stations to determine locally if VA Form 22–1999–1, Reenrollment Certification, should be processed without the claims folder. Other changes, made on March 31, 1977, are denoted by brackets in paragraph 3b and c, on May 26, 1977 additional changes to paragraph 5 were made (subparagraph c was amended and subparagraph d was added). Paragraph 5b states that full course awards with a full calendar month break after May 1, 1977, would be automatically terminated and a computer writeout, with message 996 issued. Inadvertently, awards with less than a full calendar month break but more than a 30-day break were also terminated. In these automatically terminated cases, a computer letter was issued to the claimant and a VA Form 22–1999–1 was issued to the school. The purpose of this change is to provide instructions for the remaining full course awards that were not terminated and to delete paragraph 7d in addition to the other changes made.]

1. *General.* This circular describes changes to the prepayment and advance payment procedures brought about by Public Law 94–502. (See DVB Circular 20–76–84.) It also provides instructions on related subjects including confirmed enrollments, end of full course certifications, interval payments, summer enrollments, computer-generated reenrollment forms, special payments, April check stuffer and required liaison actions. Enrollments with effective dates on or after June 1, 1977, may now be processed. Instructions for chapter 31 will be issued at a later date.

2. *End of prepayment.* Regular monthly benefits will no longer be prepaid at the beginning of each month after May 1977. This means that regular monthly checks issued on or after June 1, 1977, will represent payment for the preceding month rather than for the current month. The regular monthly checks for June will not be issued under the new system until July 1. Under most circumstances, students will not receive a check in June of this year.

[(NOTE.—Under the new payment system, regular (nonadvance) payment for the initial month or partial month of both IHL and NCD enrollments will be issued no earlier than the first of the following month. Payment for the final month or partial month of IHL enrollment will be issued or earlier than the first of the following month; the final NCD payment will be issued when the certification of attendance is processed.)]

3. *Advance Payment.* Effective June 1, 1977, the law provides that advance payment may not be made unless the veteran or eligible person requests such payment and the Veterans Administration finds that the educational institution has agreed to and can satisfactorily carry out the advance payment provisions of the law.

a. All affected schools in your area should be advised immediately by letter of the new requirements for advance payment listed in subparagraphs b and c below which apply to enrollments with beginning dates on or after June 1, 1977. The letter should request each school to state in writing whether or not they wish to receive advance payments. A school that agrees to receive advance payments will be asked to certify in their reply that they can satisfactorily carry out the advance payment provisions in 38 U.S.C. 1780(d)(5) (B) and (C), and (6). (These pars. will be quoted in the letter to the school.) A response will be requested within 30 days. A 30-day control will be established and a followup letter will be sent to any school that does not reply within 30 days to the first letter. The responses will be filed in the school approval file, and a listing for the Adjudication and Counseling and Rehabilitation activities will be prepared showing those schools which have declined to participate in the advance payment program (either expressly in writing or by failure to respond to the first letter within 60 days). Any enrollment certifications properly requesting advance payment, timely received and otherwise in order will be honored unless there is a specific statement in the approval file from the school that they decline to participate in the advance payment program or the school fails to reply within 60 days to the first letter from the regional office.

b. The requirements for advance payment are: (1) The enrollment must be for a school course for at least half-time training;

(2) The school must agree to receive and process the advance payment;

[(3) The student must specifically request advance payment on the enrollment certification or on a separate document attached to the enrollment certification;]

(4) The enrollment certification must be received by the VA at least 30 days but not more than 120 days in advance of registration; and

(5) The enrollment must begin at least one full calendar month after the student's prior term (for example, the student's prior term ended in May; advance payment would be in order for enrollment beginning in July since June is a full calendar month).

c. Pending revision of the application, enrollment and reenrollment certification forms (e.g., VA Forms 22–1990, 22–1999, 22–1999–1), advance payment may be requested by entering "I request advance payment" in the remarks section of the enrollment certification, and by having the student enter his or her signature and the date below this request.

[Alternatively, the advance payment request may be made on a separate document which is signed and dated by the student and attached to the enrollment certification.]

d. If advance payment is properly requested and timely received in the VA but for some reason cannot be processed in time for advance payment, Adjudication must notify the student and the school that regular payment will be issued instead of advance payment and the reason why. Enrollments in this category requiring confirmation (see par. 4a below), must be confirmed by telephone prior to an award action.

e. If advance payment is improperly requested or received too late for processing, the school will be advised of the problem by the Liaison activity. The student will be informed by Adjudication Division that regular payment will be made instead of advance payment and the reason why. Enrollments in this category requiring confirmation (see par. 4a below) will either be returned to the school or held and confirmed by telephone prior to award action.

f. If a station Director determines that a school cannot satisfactorily carry out advance payment and the reason why. Enroll-M22–2, part IV, chapter 8, paragraph 8. 01d, will be applied.

4. *Confirmed enrollments.* [a. An enrollment certification is considered to be confirmed if it is signed and dated on or after the beginning date certified. Confirmation in this sense is not an issue when advance payment is requested and issued. The following confirmation rules apply to *non-advance-payment* cases:

(1) Confirmation will always be required for the student's initial term (or initial enrollment for NCD students) at a particular school.

(2) Confirmation will be required for any subsequent term or enrollment period *except* when there will be less than a full calendar month break between the terms or other enrollment periods at a particular school.

(3) Fall enrollments must be confirmed if there will be a full calendar month break between summer and fall terms. Fall enrollments with less than a full calendar month break between summer and fall terms at the same school need not be confirmed; however, these fall enrollments may be certified to the VA no earlier than the beginning of the student's summer term but only if the student is actually registered or preregistered for fall. (NOTE.—If there is a full calendar month break during the summer term, the fall enrollment may be submitted no earlier than the beginning of the summer period which follows the full calendar month break.)

EXAMPLES

(a) *Advance payment is requested for one terms:* A confirmed enrollment certification is not required;

(b) *A student's spring term ends in May and the fall term begins in August:* A confirmed enrollment for the fall term is required unless advance payment is requested;

(c) *A student who enrolls in a second summer session beginning in June was enrolled in a spring term ending in May:* A confirmed summer enrollment is not required since there is not a full calendar month break;

(d) *A student whose summer term ends in August is preregistered at the same school for a fall term which begins in September:* A confirmed fall enrollment will not be required. Instead, the fall enrollment may be signed and dated as early as the beginning of the student's first summer term provided there will be no full calendar month break during the summer term.]

b. Schools should be cautioned not to submit non-advance-payment enrollments requiring confirmation prior to the beginning date certified. If such unconfirmed enrollments are received they will be confirmed by telephone call to the school or returned to the school, and the school will be requested to resubmit the documents when they can be redated and submitted as confirmed enrollments.

c. For institutions of higher learning, it should be noted that the beginning date certified should be the registration date or the date the student is required to report in advance of registration, but not earlier than 14 days prior to the start of classes nor later than the date classes start.

d. All schools are reminded that they are still required to report changes in enrollment status such as reductions in training time, interruptions or terminations in accordance with VAR 14203.

5. *End of Full Course Certifications.* [a. Effective immediately, schools operating on a term basis should discontinue, if they have not already done so, the practice of certifying the complete course. Instead, the period certified should never exceed 12 months on any one enrollment certification form. However,

(1) A non-advance-payment enrollment certification should not include any future term which is preceded by a full calendar month break; and

(2) A fall term preceded by less than a full calendar month break may not be included on any enrollment certification unless the student is registered or preregistered for fall and the student's summer term has actually begun.

(Regional Offices Note: The procedures described in M22–2, pt. IV, ch. 8, par. 8.11c, regarding automatic generation of advance payment will be deleted on 6–1–77 from the computer program. Advance payment, therefore, can be issued only if OX, or 6X is shown on the *first* award line.)]

b. Programming has been requested to terminate full course awards currently in the system with a future break of a full calendar month or more after May 1, 1977 since there is no specific request for advance payment of record for these cases, and if advance payment were not made there would be no way to confirm the reenrollment if confirmation were required. The termination will be effective at the end of the term preceding the full calendar month break. A computer-generated VA Form 22–1999–1, Reenrollment Certification, will be issued for these terminated cases, and the veteran will be advised by computer letter that he or she met contact the school for a new enrollment certification if he or she reenrolls. A computer writeout with message number *996* and the legend "Future Award Periods Terminated" will be issued in May for drop-filing in these cases.

c. [IHL (Institution of Higher Learning) cases with more than a 30-day break occurring after May 1, 1977, were automatically terminated in a one-time review on cycle 0 May. However, there are still a significant number of full-course IHL awards that were not terminated. These are cases with a break of 30 days or less between terms. Fall enrollments need *not* be submitted for these cases if the fall term is already included on the full-course award. To assist in the identification of the remaining full-course IHL awards, the following points are for consideration:

(1) If a VA Form 22–1999–1, Reenrollment Certification, has been issued to a school,

a new fall enrollment certification will be necessary to continue payments. The VA Form 22–1999–1 should be issued.

(2) A special listing of active master records will be issued at the end of May. This listing should accurately show which cases have full-course awards that were not automatically terminated and do not require fall enrollments. (The quarterly listing produced at the end of April does not reflect the automatic terminations on May 1, and is, therefore, less accurate than the listing which will be produced at the end of May.)

d. Additional considerations for the remaining full-course IHL awards are as follows:

(1) A special verification of pursuit card, VA Form 22–6553, is planned to be issued in October for the full-course awards identified in May that were not automatically terminated, nor subsequently amended. This card will be used in lieu of a fall enrollment certification.

(2) If an existing full-course award must be amended because of a change in training time or dependency, it will *not* be necessary to change the ending date of the award unless an earlier ending date has been certified by the school.]

6. *Interval Payment.*—a. Payment for an interval between terms will be authorized in all cases except in the following situations:

(1) An interval between terms, regardless of length, if the student is training at less than a half-time rate, or is on active duty;

(2) An interval between terms at the same school which spans a complete calendar month or more;

(3) An interval of more than 30 days between consecutive terms when the veteran or eligible person transfer to *another school*;

(4) An interval, regardless of length, preceding a change of program;

(5) An interval, regardless of length, which is specifically designated by a school as an interval between the end of one school year and the beginning of the next, *if the school operates on other than a term, quarter or semester basis*;

(6) An interval between terms for which the eligible student requests, prior to award authorization or prior to check negotiation, that no benefits be paid; and

(7) An interval during which the veteran's entitlement will be exhausted and it is to his or her advantage not to receive benefits for the interval.

b. If otherwise in order, interval payment will be authorized upon processing of a reenrollment document. Use either an amended or reentrance type of award action in these cases. However, under no circumstances should a non-advance-payment reentrance award with reason code *60* be submitted to DPC Hines more than 60 days before the beginning date of the award. The rate of payment for the interval will be at the rate in effect for the previous term.

7. *Summer Enrollment.* It should be noted from the above discussion that: a. Advance payment requests for continuing students for the summer term will generally be inappropriate because there is usually less than a full calendar month break between spring and the summer terms; b. Interval payment between spring and summer terms will generally be in order for the same reason; c. Non-advance-payment summer enrollments for continuing students at the same school may be submitted and processed before the start of the summer term since confirmation of these summer enrollments will not be required; [ ]

8. *Computer-Generated VA Form 22–1999–1.*—a. [Schools are advised that the instructions contained in this circular concerning advance payment, confirmed enrollments, and maximum length of certification apply to the computer-generated VA Form 22–1999–1 as well as to the other enrollment certification forms. The instructions in the circular are to be followed where they are in conflict with VA Form 22–8410, Instruction Sheet For Use of VA Form 22–1999–1.]

b. Except for stations that use CRT terminals, it is not contemplated that regional offices will process any VA Forms 22–1999–1 without review of the claims folder this year because otherwise: (1) Interval payment might be omitted when due; (2) Advance payment might be authorized in a case with less than a full calendar month break resulting in a possible delay in the issuance of the advance payment check; (3) An erroneous award action might occur as the result of a failure to timely drop file the VA Form 22–1999–1. [Nevertheless, station directors who believe that these problems can be minimized by close school liaison and timely drop filing may continue to process VA Form 22–1999–1 without the claims folder to the extent permitted by M22–2, part IV, chapter 5.]

9. *Special Payment.* Changes to special payment rules will be issued in a separate publication. Meanwhile, station Directors are reminded of their authority to modify the 30-day rule contained in M22–2, Part IV, chapter 9, paragraph 9.01a(2), if conditions warrant.

10. *April and May Check Stuffers.* A stuffer which will describe the end of prepayment and the changes in the advance payment procedures will be included in all checks issued in April and May. The stuffer tells the claimant to contact the school if advance payment is desired. Regional offices should be prepared for inquiries on both prepayment and advance payment.

11. *Liaison.* Sufficient copies of this circular will be supplied for State approving agencies, IHL's, and NCD's. However, close liaison with the schools will be necessary to ensure their understanding of these changes. Particular emphasis should be placed on the following points: a. The end of prepayment (par. 2); b. The five requirements for advance payment (par. 3); c. The definition of a confirmed enrollment and the situations in which confirmed enrollments are required (par. 4); d. The maximum period that may be certified for schools operating on a term, quarter, or semester basis (par. 5); e. The impending termination of full course awards with a future break of a full calendar month occurring after May 1, 1977 (par. 5); f. The effect of the new changes on summer enrollments (par. 7); and g. The requirement that only reenrollments beginning with fall 1977 may be certified on VA Form 22–1999–1 (par. 8).

A. J. BOCHICCHIO,
Acting Chief
Benefits Director.

DVB Circular 20–77–24.
Appendix A.

DEPARTMENT OF VETERANS BENEFITS,
VETERANS ADMINISTRATION,
Washington, D.C.

CHANGES TO PREPAYMENT, ADVANCE PAYMENT AND RELATED PROCEDURES UNDER CHAPTER 31

1. *General.* This appendix supplements DVB Circular 20–77–24 by providing instructions regarding changes to prepayment, advance payment and other procedures for chapter 31 brought about by PL 94–502. Where the instructions contained in the basic circular are applicable to chapter 31, this is indicated by cross-reference to the pertinent paragraph(s) of the circular.

2. *End of Prepayment.* See paragraph 2 of DVB Circular 20–77–24.

3. *Advance Payment.* Effective June 1, 1977, advance payment may be made only if the veteran requests such payment, the VA finds that the educational institution has agreed to and can satisfactorily carry out the advance payment provisions of the law and, if the student was previously enrolled, the new enrollment period will begin at least one full calendar month after the prior enrollment period ends.

a. *Veteran's Request for Advance Payment.* The veteran's request must be submitted in writing and must be received by the VA at least 30 days in advance of registration. The statement "I request advance payment of subsistence allowance" signed and dated by the veteran will suffice. Such statement may be given to the counseling psychologist or vocational rehabilitation specialist during the orientation-to-training session, or during a training assistance visit or may be submitted by mail. It is important that the veteran prior to making such a request have the opportunity to discuss with the vocational rehabilitation specialist whether or not advance pay is desirable in his or her circumstance.

b. *School Agreement to Handle Advance Pay.* (See par. 3a of DVB Circular 20–77–24). It should be noted that the agreement submitted by schools will cover advance pay under all chapters, and a separate letter of agreement pertaining to chapter 31 payments will not be needed, except for schools being utilized for chapter 31 training that are not on the SAA-approved list.

c. *Notification in Instances Where Advance Pay Request Cannot be Processed.* If a request for advance pay cannot be processed, the VRS will notify the veteran that regular payment will be issued instead of advance pay and explain the reason why. If the school has been sent authorization indicating that advance pay was planned, the VRS will explain the change to the school as well as to the veteran.

d. *April and May Check Stuffers.* A stuffer describing the end of prepayment and the changes in advance payment procedures under chapter 31 have been included in all chapter 31 checks issued in April and May. The stuffer tells the veteran that a written request for advance pay must be made and advises him or her to contact the VA vocational rehabilitation specialist prior to making such request.

4. *Period of Training Which May Be Authorized.* In authorizing training in schools operating on a term basis, the policy of authorizing the complete course will no longer be followed. Instead, the period authorized should include the school year plus the following summer term, whenever practicable, unless there is clear indication that the veteran will not attend during the summer. If the veteran begins training during a summer term, training should be authorized for that term plus the following school year, whenever practicable. The VRS should verify the veteran's continuation in training at the beginning of the fall term of that school year. While no action will be taken to review or revise authorizations for longer periods that are now in effect, VRS verification of continued enrollment is essential.

5. *Payment for Intervals Between Terms.* Subsistence may be authorized for the following:

a. Periods between consecutive terms within a certified enrollment period that do not exceed one full calendar month. Leave will be charged for such paid intervals for students enrolled in courses not leading to a standard college degree.

b. Periods between a semester, term or quarter when the educational institution certifies enrollment on an individual semester, term or quarter basis, if the interval does not exceed one full calendar month. For veterans enrolled in courses not leading to a standard college degree, leave will be charged for intervals during which subsistence is paid.

c. Periods between consecutive school terms when the veteran, as part of his or her approved program of vocational rehabilitation, transfers from one educational institution to another for the purpose of enrolling in and pursuing a similar course at the second institution, provided the period does not exceed 30 days. Leave will be charged for such paid intervals for veterans enrolled in courses not leading to a standard college degree.

6. *Granting Advance Leave.* Ordinary leave of absence may be approved, as needed, in excess of the amount of leave accrued to the credit of the veteran, but in no case may ordinary leave in excess of an aggregate of 30 days be authorized in any 12 months of training, beginning with the date of the veteran's entrance into training.

A. J. BOCHICCHIO,
Acting Chief Benefits Director.

DVB Circular 20–76–84,
Appendix A, Revised,
November 12, 1976.

DEPARTMENT OF VETERANS BENEFITS,
VETERANS ADMINISTRATION,
Washington, D.C.

SIX-MONTH NORMAL COMPLETION TIME REQUIREMENT FOR CORRESPONDENCE COURSES—PL 94–502

1. *Purpose.* This appendix provides instructions for implementing the 6-month normal completion time requirement of 38 U.S.C. 1780(a).

2. *General.* PL 94–502 amends 38 U.S.C. 1780(a), effective December 1, 1976, to provide that educational benefits may not be paid for pursuit of any correspondence course or correspondence portion of a combination course leading to a vocational objective if the normal period of time required to complete the correspondence course or correspondence portion is less than 6 months.

3. *Implementation.* Before benefits may be authorized for an enrollment period beginning on or after December 1, 1976, correspondence schools must certify to the Veterans Administration the normal completion time of each correspondence course or portion which is approved.

a. "Normal" completion time of 6 months means that 80 percent or more of the students completing the course over the past 2-year period required 6 months or longer to complete it. Completion time for a course is the span between the date a student was sent the first lesson and the date on which the last lesson was received by the school. Note that dates on which the school services lessons are not used to compute completion time, nor is the date the school issues its diploma or certificate. Delays due to payment or shipping problems must be excluded.

b. Education liaison representatives will immediately notify their respective SAA (State approving agency) and all correspondence schools within the jurisdiction of the regional office of the provisions of the law and all requirements of this appendix. The required certification of normal completion time for each course must be received by the SAA, reviewed and sent to the VA before December 1, 1976. Unless it is established that the normal completion time is 6 months or more, benefits will not be authorized for enrollments beginning on or after December 1, 1976.

(1) Before providing the certification, schools will be required to determine if *each* approved course meets the completion time criterion by computing the completion time for all students who completed the course during the 24 months preceding the date of certification. A school's certification must be based on actual records, and not on estimates. All completers, both veteran and nonveteran, must be considered. If a school has a course or courses for which the audit of actual records cannot be completed before December 1, 1976, and it can with certainty certify that 80 percent of its graduates over the past 2 years required 6 months or longer, it may send such a certification. If a school elects to make such a certification, it must follow it up within 60 days with a certificate of the actual percentage of its graduates over the past 2 years who required 6 months or longer to complete. If the actual percentage report which is subsequently received shows the percentage is less than 80 percent, all awards with commencing dates on or after December 1, 1976 will be terminated retroactively to the date of enrollment. School liability for the resulting overpayments will be considered under existing procedures on the basis of false certifications. If it is found that the school willfully submitted a false or misleading report; e.g., the school fails to submit an actual percentage report or a report is submitted which is substantially below 80 percent, a complete report will be made and referred to the district counsel for possible referral to the Attorney General of the United States in accordance with VAR 14006.

(2) Applications for approval of new correspondence courses received on of after December 1, 1976, must include a certification of normal completion time. Until VA Form 22–8670, State Approving Agency Review Check Sheet (Correspondence Courses), is revised to include this item, inclusion of the required certification will be indicated under "Remarks".

(3) Applications for approval of correspondence courses as similar in character to a previously offered course (VAR 14251(C)) must also include the normal completion certification, even though it cannot be based on a 24-month history of students completing the course in these cases. The SAA and liaison representative must therefore examine the normal completion certification critically, comparing the normal completion length of the new course to that of the old course of alleged similar character. As a general rule, a course that is being considered as similar in character to another course previously offered should not be considered to require a longer period to complete than the course which was previously approved. As an alternative guideline for determining the validity of such a certification of normal completion time, the judgment should be made whether the course material reasonably requires an average of not less than 6 hours of preparation per week for at least 26 weeks, resulting in a 6-month requirement for course completion.

(4) No extensions of time for submission of the required certification shall be granted.

c. It must be emphasized to schools that this is a statutory requirement and normal completion times as certified for each approved course will be reviewed during SAA supervisory visits and VA compliance surveys.

(1) If it is later found that a certification of normal completion time which was accepted, is incorrect, and in fact normal completion time for a particular course is less than 6 months, the approval for that course will be withdrawn and all awards with a beginning date on or after December 1, 1976 terminated retroactively to the date of enrollment. School liability for the resulting overpayments should be considered under existing procedures on the basis of false certifications.

(2) If an SAA forwards a certification for normal completion time, but the regional office of jurisdiction has evidence from certifications of lessons completed, compliance survey reports, etc., that the certification is not accurate, it should not be accepted until a 100 percent audit of students completing the course within the applicable 24-month period is conducted for verification of the certification.

4 *Reports.* Beginning November 8, 1976, and each Monday through November 29, 1976, liaison representatives will notify Central Office (223B) by teletype of the names of those courses for which affirmative certifications or negative determinations were received during the previous week. On December 1, 1976, liaison representatives must teletype to Central Office (223B) a final report listing the names of all courses for which schools have failed to furnish required 6-month normal completion certifications. The final report should also include and identify all affirmative certifications and negative determinations which were not previously reported. The complete title of each course, the name of the school, and the school facility code must be included with each report. If a certification is received subsequent to transmission of the final report, the liaison representative should notify Central Office (223B) by teletype. RCS 22–20–S is assigned to the weekly reports and the final report to December 1, 1976. Do not enter the RCS report number on reports transmitted subsequent to the final report.

a. As notices are received, Central Office will inform all stations by teletype of the names of the courses which fail to meet the 6-month completion requirement. Stations will also be notified by teletype of the names of all courses for which enrollments will not be accepted because the certification was not received from the school. Once the final reports of December 1, 1976, are received, Central Office will send an all-station teletype which will summarize the previous teletypes and will list those courses not previously reported. No award will be prepared to authorize benefits for any enrollment beginning December 1, 1976, or later, for any course which has failed to meet the 6-month normal completion requirement or for any course for which the school has failed to furnish the required certification.

b. The liaison representative will maintain a control for each case where the school certified without actually checking records to assure that the actual percentage computation is properly certified. If the report from the school is not received by February 1, 1977, or if it fails to support the certificate that the course requires 6 months, Central Office (223B) will be notified. Central Office will then notify all stations by teletype to terminate benefits for any enrollment beginning on or after December 1, 1976 effective from the date of enrollment. Central Office will request VA Forms 20–8270a, Education Master Record—Audit Writeout, for all such courses. These forms will be sent to the office of jurisdiction for appropriate action to terminate payments.

c. Please note that enrollments effective before December 1, 1976 are not affected by the 6-month normal completion provision. Awards for all such enrollments will be continued until completion or interruption.

5. Rescission: Appendix A, dated October 21, 1976, to DVB Circular 20–76–84.

RUFUS H. WILSON,
Chief Benefits Director.

DEPARTMENT OF VETERANS BENEFITS,
VETERANS ADMINISTRATION,
Washington, D.C.

DVB Circular 20–76–84,
Appendix C.
October 29, 1976.

PERIOD OF OPERATION OF A COURSE—TWO-YEAR RULE

1. *Purpose.* This Appendix provides detailed instructions and procedures for implementing those provisions of PL 94–502 pertaining to the two-year rule.

2 *General.* PL 94–502 amends 38 U.S.C. 1789 by excepting certain courses from the two-year rule and by applying the rule to courses offered by certain branches and extensions previously excluded. These provisions are effective December 1, 1976.

3. *New exception.* In addition to the five exceptions to the two-year rule listed under 38 U.S.C. 1789(b) and VAR 14251(A), a course offered by an institution under contract with DOD (Department of Defense) is also excepted, provided the following three conditions are met: *first*, the course is given on, or immediately adjacent to, a military base; *second*, the course is available only to active duty military personnel and or their dependents; and *third*, the course is approved by the SAA (State approving agency) in the state where the base is located or, for degree courses offered overseas, by the SAA of jurisdiction over the parent institution. If the first or second condition is not met, the course must be offered continuously for two years before enrollments may be accepted. If the third condition is not met, the course cannot be approved by any other SAA, since all branches and extensions fall under the jurisdiction of the SAA in the state where they are located.

a. The term "immediately adjacent" to a military base refers to facilities that are clearly neighboring or in close proximity to the base so that it is easily accessible to active duty personnel. The location must be such that effective supervision by the military authorities is possible. Presumably, such facilities have been established off base because of a lack of onbase facilities.

[ ]

4. *New courses affected.*

a. A course in operation for less than two years shall not be approved when offered by a branch or extension of the following institutions:

(1) Public or tax-supported institutions where the branch or extension is located outside of the area of the taxing jurisdiction which provides support to the parent institution; or

(2) Proprietary institutions (profit or nonprofit) where the branch or extension is located beyond the normal commuting distance of the main campus. [(Even if located within normal commuting distance, branches or extensions of proprietary profit or nonprofit institutions must be in operation for 2 years unless excepted under VAR 14251(A).)]

NOTE.—"Normal commuting distance" is interpreted to mean within the same general locality from which the main campus draws students. Normal commuting distance may vary with each institution depending on various factors, such as the geography of the area and the proximity of similar institutions. No firm guideline specifying exact mileage can be established, although a location more than 30 miles (48 kilometers) away from the main campus would ordinarily be considered beyond the normal commuting distance.

b. The two-year rule applies to the courses listed above, with *only* the following two exceptions:

(1) A PREP or SAED (Special Assistance for the Educationally Disadvantaged) course offered by a branch or extension of a proprietary nonprofit institution in operation for more than two years, or a public or other tax-supported institution, even though the branch or extension is located beyond the normal commuting distance of the main campus or area of taxing jurisdiction.

(2) A course offered by a branch or extension of an institution under contract with DOD as specified in paragraph 3 above.

5. *Identification of new courses affected.*

a. The liaison representative will request from all the schools within the jurisdiction of the regional office a list of each school's branches and extensions. The list should include the names and addresses of all branches and extensions (in state and out of state) and the courses or curricula offered at each. The school will also be asked to certify to the period of operation of each course or curriculum at each location. The following certification should be used:

"It is hereby certified that the course (or curriculum), (name of course), has been in continuous operation at (name of branch) from (date) to the present inclusive of reasonable vacation and holiday periods."

b. Courses offered by a branch or extension located on a military installation must now be approved by the SAA in the state where the branch or extension is located rather than in the state where the parent institution is located. Enrollments in courses offered at such branches may continue if, in addition to the certification required above the school certifies that application for approval was made to the local SAA on or before December 1, 1976. If such a branch or extension does not meet the two-year requirement, certification to the following will be acceptable pending approval by the local SAA:

(1) The course is given on, or immediately adjacent to, a military base, and

(2) The course is available only to active duty military personnel and or their dependents.

c. The schools should submit their lists and certifications before December 1, 1976; otherwise, no new enrollments will be processed for payment of benefits.

d. The schools will also be advised that, effective immediately, the name and address of the branch or extension must be shown on all enrollment certifications. If the enrollment is at the main campus, that fact must appear on the enrollment certification.

6. *Referral to the SAA.*

a. The liaison representative will screen the lists of branches and extensions as they are received from the schools. In-state branches and extensions which may offer courses that must now meet the two-year requirement (as outlined in par. 4 above) will be referred to the SAA for verification of the schools' certifications. For out-of-state branches (including those on military installations), the information will be forwarded to the regional office where the branch or extension is located for referral to the SAA with jurisdiction over the branch location for approval or disapproval action.

Where out-of-state branches or extensions

b. Where out-of-state branches or extensions are encountered that were not previously identified, the following actions will also be taken (as outlined previously in DVB Circular 20–75–93, rescinded July 1, 1976):

(1) All information on the out-of-state branch or extension (including those on military installations) will be forwarded to the responsible liaison activity with jurisdiction over the area where the branch is located in order to request a new approval from the SAA.

(2) The SAA will initiate approval action and notify the liaison representative at the new office of jurisdiction of all subsequent approvals and denials. The SAA should pro-

VA 2165 AUG 77 UNIVERSITY OF GEORGIA

vide the names and file numbers of all VA education beneficiaries currently enrolled, if obtainable from the branch or extension.

(3) If a course is approved, the liaison representative will process the approval material and establish a new facility code for the branch or extension. The list of names and file numbers will be forwarded to the original regional office of jurisdiction for transfer of folders. Upon transfer, an 02V correction to establish the new facility code must be input in each master record by the Adjudication activity in the receiving station.

(4) If a course approval is denied for reason(s) other than the two-year rule, running awards will be terminated in accordance with VAR 14135(J) at the original office of jurisdiction. (See par. 8b.) Cases that are terminated will *not* be transferred.

7. *SAA action.*

a. The appropriate SAA will be advised as to the date schools certified as the beginning date of each course for the purpose of meeting the two-year requirement at each branch or extension. The SAA will be requested to verify if the two-year period of operation is met or if one of the two exceptions in paragraph 4b applies. The approval should then be amended to show the basis for continued approval or, if appropriate, denial action should be taken.

b. The SAA will notify the liaison representative of the continued approval or denial action for each course. [Amended approval action should be completed by August 1, 1977.]

8. *Regional office control.*

a. The liaison representative will maintain a control on all courses referred to the SAA to ensure that notification of continued approval or denial is received.

[(1) An interim review will be made EOM May 1977, and the SAA will be notified of all courses for which amended approvals are still pending. The SAA will be requested to submit an estimated date for completion of each approval. The SAA must be made aware that unjustified delays beyond August 1, 1977, will necessitate the withdrawal of approvals and the termination of enrollments in those courses that lack proper approval.

(2) A final review will be made on August 1, 1977, to ensure receipt of amended approvals for all cases. Approval will be withdrawn effective August 1, 1977, and no new enrollments or reenrollment will be processed if an amended approval has not been received by that date. If legitimate reasons exist for the delay, the SAA may request up to 30 days' additional time from the regional office. Requests for extensions beyond 30 days must be referred to the Area Field Director (224C) for approval.]

b. If a course approval is denied because the two-year requirement is not met, the approval for that course will be withdrawn and all awards for new enrollments on or after December 1, 1976 will be terminated retroactively to that date. School liability for the resulting overpayments should be considered under existing procedures on the basis of false certification, if the school certified erroneously to the period of operation.

9. *Enrollments.* No new enrollments in a course at a branch or extension location with an effective date on or after December 1, 1976, may be approved if the school's certifications are not received or if the two-year requirement is not met. Students enrolled in and pursuing the course before that date will be permitted to complete their program provided they remain continuously enrolled. A break in enrollment due to extenuating circumstances, such as serious illness, will not be considered an interruption in the student's program. Students attending a school operated on a term basis will not be required to attend the summer term to be considered continuously enrolled. If approval of a course is denied or withdrawn for a reason other than the two-year rule, all awards must be terminated in accordance with VAR 14135 (J).

10. *Followup reviews.* On routine SAA supervisory visits and station compliance surveys, school records will be reviewed to verify the certifications made in accordance with this appendix. If the certifications are found to have been false or erroneous, termination action will be taken and school liability considered in accordance with paragraph 8b.

VETERANS ADMINISTRATION
Washington, D.C.

PROHIBITION OF ASSIGNMENT OF EDUCATIONAL BENEFIT PAYMENTS (PL 94–502)

1. *Purpose.* This appendix provides instructions for implementing the provision of PL 94–502 which prohibits the assignment of educational benefit payments.

2. *General.* PL 94–502 amends title 38 U.S.C. 3101(a) effective December 1, 1976, to prohibit the assignment of educational assistance checks through the practice of a payee designating the address of an attorney-in-fact (usually a school or school representative in this context) as the payee's check mailing address, and also executing a power of attorney agreement authorizing the attorney-in-fact to negotiate Veterans Administration educational benefit checks. Under this legal provision, schools may not negotiate VA educational assistance checks, nor may schools obtain indirect access to the proceeds of such checks. All VA educational assistance checks must be negotiated by the veteran or eligible person.

a. Indirect access to the proceeds of VA checks is construed to mean any device, coercive or otherwise, a school may employ to limit or predetermine a veteran's or eligible person's disposition of the proceeds of a VA check. Such indirect access would constitute an effective assignment of benefits, which the law is intended to prohibit just as it prohibits direct assignment of benefits.

b. A common example of indirect access is the practice of a school receiving a check for a student, stamping it on the reverse "For Deposit Only" to the school's account, and then calling in the student to endorse the stamped check. This procedure has the effect of controlling the student's disposition of the check and is thus prohibited as it is, in effect, an assignment of benefits. Another example of indirect access which is likewise prohibited is the procedure of showing a bank account number in the check mailing address, but the account is held jointly with the veteran by the school. While it is clear that a veteran or eligible person may endorse an educational assistance check payable to a school to satisfy a debt, this action must be entirely voluntary.

3. *Procedural Requirements.* The following procedures concerning award, development, and reporting actions will be followed to ensure that schools are not obtaining assignment of benefits in violation of the law:

a. All correspondence schools must be informed that no enrollments or reenrollments will be processed on or after December 1, 1976, which show the school's address, or a post office box or sales office address of the school as the student cannot be present at the school to receive checks. Such enrollment certifications will be returned to the student at the school address and no further action taken until a home address is provided for the student. All correspondence schools are hereby notified that if a school address is shown as the student's mailing address on any currently running awards, the school must submit a certification (as specified in subpar. d below) to the VA office with liaison jurisdiction that effective December 1, 1976, they will not accept a power of attorney to cash VA educational benefit checks and they will not exercise check-negotiating authority under any power of attorney previously accepted.

(1) Correspondence schools which refuse to provide the certification mentioned above will be reported by teletype to Central Office (223B). Those schools which have failed to certify compliance but have not actively refused should be contacted once again to solicit the certification; if it is not provided, the school will be reported by the office with liaison jursdiction to Central Office (223B) as not in compliance. All final reports of noncompliance are due in Central Office before March 1, 1977. Central Office in turn will notify all stations of correspondence schools which have not indicated compliance with this provision of the law.

(2) If a currently running award (including a suspended award) shows the address of a correspondence school listed as not in compliance with the certification requirement, the award will be suspended or allowed to remain in suspense. The claimant will be informed of the action taken and the legal prohibition against assignment of VA educational benefits. He or she will be requested to furnish a current home mailing address and also informed that no further action may be taken until the requested information is furnished. Such awards should be identified only through routine claims folder processing; special review of claims folders or VA Forms 22–6553b, Certification of Lessons Completed, will not be conducted for this purpose.

(3) Correspondence schools which initially do not certify compliance with the law and are reported to Central Office as not in compliance but later provide the appropriate certification will be immediately reported to Central Office (223B) for removal from the all-station listing of schools not in compliance.

b. All schools, other than correspondence schools, are hereby informed that no enrollments or reenrollments using the school's address or a post office box or sales office address of the school as the student's address will be processed on or after December 1, 1976, unless the school certifies that it holds no power of attorney to negotiate VA benefit checks and it does not have direct or indirect access to the proceeds of such checks other than by direct payment by the payee thereof.

(1) In cases (other than correspondence awards) processed after November 30, 1976, in which the school's address is shown as the payee's mailing address, and the school has not submitted the required certification regarding power of attorney arrangements, or the certification is not acceptable for the reasons explained in subparagraph d(2) below, development will be necessary before processing any enrollments, reenrollments, or adjustments to running awards.

NOTE.—No special review will be made to identify running awards with a school address. However, when these cases are encountered during normal claims processing and the school has not submitted the required certification, the award will be suspended and development undertaken.

(2) The claimant will be informed of the provisions of the law and requested to furnish either a current home mailing address or a signed statement that he or she has not executed a power of attorney authorizing the school to negotiate VA educational assistance checks and no arrangements have been made to provide the school or its representative direct or indirect access to the proceeds of such checks other than by direct payment by the payee thereof. The claimant will also be informed that no further action can be taken until the requested information is furnished.

(3) Similar development must be undertaken if the claimant indicates a post office or bank address as his or her mailing address and the school has not submitted the required certification. The VA will not require an actual home address in these cases, but the signed certification provided for above must be obtained before any award action can be processed.

c. All educational assistance checks which are in the possession of or received by any school on or after December 1, 1976, must be delivered directly to the veteran or eligible person for his or her disposition. If for any reason a check cannot be delivered to a veteran or eligible person, it must be returned to the Treasury Disbursing Center address shown on the check envelope.

d. Each certification required by subparagraph a or b above must be worded as follows and signed by the appropriate school certifying official: "This to certify that, in accordance with title 38 U.S.C. 3101(a), (*name of school*) holds no power of attorney agreements authorizing the school to negotiate educational assistance checks, and neither (*name of school*) nor any of its representatives has direct or indirect access to the proceeds of any such checks other than direct payment by the payee thereof."

(1) As these certifications are received they will be made part of the respective schools' approval folders and the liaison representative will notify the Finance and Adjudication Divisions that the power of attorney requirements of the law have been met, and enrollments and reenrollments in other than correspondence courses, and certifications of attendance or lessons completed may be processed showing a school address.

(2) Checks mailed to a school address based on the appropriate certification will be mailed only to the school location where the student is in attendance and can receive the check. Educational assistance checks will not be mailed to one school location for further distribution to other locations of the school. If a school with multiple locations attempts to use only one address as a check mailing address for all students, development for the addresses of separate locations must be undertaken before processing award actions for students enrolled at those locations. If a particular school location does not have the capability of receiving checks, safeguarding them, and properly delivering them to students, development for a home mailing address for each veteran or eligible person enrolled at that location must be completed as outlined in subparagraph b(2) above.

4. It must be made clear to schools that compliance with this provision of the law will be checked during future compliance surveys. Spot checks may also be made to verify the signatures on negotiated checks. If it is found that a school held a power of attorney and negotiated VA checks or otherwise had access to the proceeds of such checks other than by direct payment by the payee thereof after having certified that it did not, payments (for those beneficiaries involved) for attendance at the school and further enrollments in the school will be suspended under VAR 14134 and the matter will be referred to the Station Committee on Educational Allowances to consider withdrawal of the school's approval. In addition, overpayments may be established and school liability assessed on the basis of false certifications.

5. Rescission: Appendix D, dated October 29, 1976, to DVB Circular 20–76–84.

VETERANS ADMINISTRATION,
Washington, D.C.

EXTENDED 85–15 PERCENT RATIO REQUIREMENTS

[It has been determined that award actions required by Appendix H, revised, when courses fail to meet 85–15% ratio requirements are not consistent with protection of the best interests of veterans who may have enrolled in such a course before the determination of 85–15% noncompliance. The required action in question is the immediate discontinuance of processing new chapter 34 enrollments upon receipt by the Veterans Administration of an unsatisfactory 85–15% certification. This procedure is changed to allow processing of new enrollments which have a beginning date before the date on which a school computes an unsatisfactory 85–15% ratio for a course. In addition, award procedures are clarified for instances when schools fail to submit a required 85–15% certification. Also the BEOG SEOG exemption is exceded to June 30, 1978.]

1. *Purpose.* This appendix provides instructions for implementing the provision of PL 94–502 which extends the 85–15% ratio requirements to additional types of courses and specifies additional types of financial support which must be computed into the 85% portion of the ratio. This appendix also explains the conditions under which the Administrator may waive the requirements because it is determined to be in the best interest of the veteran and the Federal Government.

2. *General.* PL 94–502 amends title 38 U.S.C. 1673(d) to provide that, effective December 1, 1976, the enrollment of an eligible veteran (not already enrolled) may not be approved in any course for a period during which more than 85 percent of the students enrolled are having all or part of their tuition, fees, or other charges paid to or for them by the school, the Veterans' Administration, and or by grants from any Federal agency. Specifically excepted from computing 85–15% ratios are special assistance payments for the educationally disadvantaged (under subchapter V of chapter 34), farm cooperative courses, and courses offered under contract with the Department of Defense on or immediately adjacent to a military base and which are available only to active-duty military personnel and their dependents if approved by the SAA (State approving agency) in the State where the base is located. In the case of a military installation located outside of the United States, approval will be by the SAA in the State where the parent school is located. As noted in paragraph 1, certain requirements can and will be waived by the Administrator. The new law extends the 85–15% ratio requirement to degree-granting institutions, and the requirement now applies to both proprietary profit, proprietary nonprofit institutions and public and other tax-supported schools. In addition, students receiving grants from all Federal agencies other than the VA with certain exceptions as explained below, must now be counted in the 85% portion of the ratio.

3. *Identification of Affected Courses.* An 85–15% ratio must be computed for each course of study or curriculum leading to a separate approved educational or vocational objective. Computations will not be made for unit subjects, unless only one unit subject is approved by the SAA to be offered at a separate branch or extension of a school. Courses or curricula which are offered at separately approved branches or extensions must have an 85–15% ratio computed separately from the same course offered at the parent institution; the student figures from the branch may not be added to those of the parent institution even for the same courses or curricula. Courses or curricula offered at an additional facility, as opposed to a branch or extension, must be added for 85–15% computation purposes to the same course at the parent institution. Pursuit of a course or curriculum that varies in any way, although it may have the same designation as another curriculum, will require a separate 85–15% computation. A course or curriculum will be considered to vary from another if there are different attendance requirements, required unit subjects are different, required completion length is different, etc.

a. For computation purposes, separate courses in IHL's (institutions of higher learning) will be determined by general curriculum only until the point at which it is reasonable to assume a major field would be declared. After that point, 85–15% requirements must be met for each specific curriculum based on a major field of study as certified to the VA. School policy for declaring fields of study must be equal for veterans and nonveterans alike. Because of numerous inquiries and comments, serious consideration has been given to broadening the definition of "course" for 85–15% purposes, but it has been determined that the following guidelines are the most lenient possible within the language of the statute and the underlying intent of Congress.

(1) In 2-year IHL's, general curricula such as AA (Associate of Arts) or AS (Associate of Science) degrees with no major specified will require separate computations. Specific curricula for associate degrees will require separate computation for each curriculum. Terminal 2-year courses (e.g., AAS (Associate of Applied Science) Dental Technology, Auto Mechanics Certificate) must be computed separately for each objective.

(2) Students attending 4-year IHL's and graduate schools may be counted in general curricula such as BA (Bachelor of Arts) and BS (Bachelor of Science) only until the normal point at which the student must declare a major subject at the particular school. Then the 85–15% computation must be made for each specific curriculum; e.g., BS (Bachelor of Science) in Electrical Engineering, MA (Master of Arts) in English, etc. The rules mentioned above regarding branches and extensions must be applied strictly to yield accurate computations and correct approvals.

b. NCD (noncollege degree) courses must be computed separately by approved vocational objective. If several curricula lead to the same coded vocational objective, each must meet the 85–15% requirement separately, unless it can be shown that two or more courses are identical in all respects (scheduling, hours devoted to each unit subject, etc.). Once again, branch or extension courses will be computed as separate courses or curricula. Courses offered on full-time and part-time bases which are identical in length and content will be combined for computing the ratio.

4. *Waivers.* The following waivers for 85–15% computation have been determined by the Administrator to be in the best interest of veterans and the Federal Government, and authority to apply them is hereby delegated to all station Directors. Note that when a type of assistance received by a student is waived, that student must

VA 42165 AUG 25 77 UM

still be counted in the ratio. However, that student will be counted in the non-VA, nonsupported portion of the ratio as a result of the waiver. (See subpar. f.)

Important: Notwithstanding any type of waiver provided for below, station directors are authorized to waive 85–15% computations for institutions which certify that 35% or less of their enrollment receives Veterans Administration educational assistance (compute main campuses and branches separately). Such certifications must be provided to the VA on a continuing basis in accordance with the time limits shown in paragraph 7c. (Such waiver will not be granted for any course in which the percentage of VA-supported veterans enrolled exceeds 85%.) Station directors are responsible for taking forceful action to identify specific courses of study which may exceed 85% VA-supported enrollment even if such courses are offered by schools having 35% or fewer veterans in the total school population. All station directors will require full 85–15% ratio computations for such courses with extraordinarily disproportionate VA-supported enrollments to show compliance with the law. In addition, a temporary waiver is hereby granted to exclude counting recipients of BEOG (Basic Educational Opportunity Grants) and SEOG (Supplementary Educational Opportunity Grants) as federally supported students for purposes of 85–15% ratio requirements. This temporary waiver of the BEOG and SEOG computation requirements [will expire on June 30, 1978.] After that date, computation and waiver provisions shown below relating to BEOG and SEOG will be in effect.

a. Graduate Students; waive counting all Federal assistance (other than VA benefits) and all support from the institution. No specific application for this waiver is required from the school.

b. Undergraduate and NCD Students:

(1) Waive counting all assistance provided by an institution, if the institution policy for determining the recipients of such aid is equal with respect to veterans and nonveterans alike. A specific application for this waiver from the school to the station Director is not required.

(2) Waive computation of the 85–15% ratio for any course offered by an IHL or NCD if 35 percent or fewer of the students *in the course* receive VA educational benefits, and the percentage of VA-supported students in the course plus the percentage of the school's total enrollment receiving BEOG (Basic Educational Opportunity Grants) or SEOG (Supplementary Educational Opportunity Grants) totals 85 percent or less. For example, if a school finds that 29 percent of the enrollees in a business AA degree curriculum receive VA payments and 52 percent of the school's total enrollment receives BEOG or SEOG support, the total of the percentages (81%) qualifies that business AA degree for a waiver of any further 85–15% ratio computation. Satisfactory compliance with the 85–15% requirement is assumed when the above conditions are fulfilled. If the total of the two percentages exceeds 85 percent, the ratio must be computed for that course with BEOG and SEOG recipients included in the 85 percent portion of the ratio.

(a) When more than 35 percent of the enrollment in a course receives VA assistance, the ratio must be computed for that course with BEOG and SEOG recipients included in the 85 percent portion of the ratio.

(b) This count of VA-supported students and BEOG or SEOG recipients must be completed within 30 days of the beginning of each regular academic term (summer sessions excluded) or before the beginning date of the next term, whichever is earlier, for application to the next term for the purpose of waiving computation of an 85–15% ratio for each affected course. For schools not operating on a term basis, counts as of the last day of the quarter must be completed within 30 days of the end of each calendar quarter (March, June, September, December). If this count is not submitted for a course which previously had its ratio computation waived, a complete computation will be required before any new enrollments of eligible veterans may be processed for that course.

(3) Waive counting all forms of Federal assistance other than BEOG and SEOG. Specific examples of this type of waiver are benefits administered by the Social Security Administration, Federal grants supporting specific programs such as law enforcement (LEEP, Safe Cities Act grants), nursing, etc., Government Employees Training Act support, and tuition paid by an Armed Service to active-duty personnel. No specific application is required for this waiver.

(4) Waiver for all so-called military aero clubs which were previously exempt from 85–15% requirements under VAR 14202(C)(3). No specific application is required for this waiver.

(5) Waiver for courses open only to military personnel, their dependents, and civilian employees of a military installation when the course is offered on or adjacent to the base under contract with the Department of Defense and the branch or extension is approved by the SAA in the State where the military installation is located. In the case of foreign military installations, approval will be by the SAA in the State where the parent school is located. This waiver is an expansion of the statutory exclusion explained in paragraph 2 above. If the course is offered to other students, the 85–15% ratio requirement must be met. No specific application is required for this waiver.

c. Schools which submit satisfactory certifications of 85–15% compliance based on use of one or more of the above waivers must maintain records for a period of 3 years following termination of the enrollment period showing the basis for the waiver and the separate percentages of students falling into each waived category. The waivers and supporting data will be reviewed during compliance surveys.

d. Schools which offer courses not meeting the 85–15% requirement for any reason may apply to the appropriate station Director for a specific waiver of the requirements except for VA benefits. This generally will be a request for a waiver for BEOG and SEOG. The school must state the specific basis of the specific waiver request, show the computation of the ratio for the affected course, and submit sufficient information to allow the Director to judge the merits of the request against the criteria shown below. The Director should use all VA sources as well as school-submitted data and statements when considering a specific waiver request in relation to these criteria. (See subpar. f below.)

(1) Availability of comparable alternative educational programs effectively open to veterans in the vicinity of the school requesting a waiver.

(2) Status of the school requesting a waiver as a developing institution primarily serving a disadvantaged population. The school should enclose a copy of the notification of developing status from the Office of Education, if applicable. Otherwise, the school should submit data sufficient to allow the Director to judge whether the school is similar to officially classified developing institutions, according to the criteria and data categories published in Part 169, Subpart B, title 45, Code of Federal Regulations. The requirement that a school be a "Public or Nonprofit" institution need not be met.

(3) Previous compliance history of the school, including such factors as false or deceptive advertising complaints, enrollment certification timeliness and accuracy, and amount of school liability indebtedness to the VA.

(4) General effectiveness of the school's program in providing educational and employment opportunities to the particular veteran population it serves. Factors to be considered should include percentage of veteran students completing the first year of the course of study and completing the entire course, results of the 50 percent employment survey for vocational objective courses, ratio of educational and general expenditures to full-time equivalency enrollment, etc.

(5) If a school does not agree with a Director's determination concerning a specific 85–15% waiver, it may request that the application along with the Director's findings and recommendation be forwarded to Central Office (224C) for administrative review.

e. All waivers of 85–15% requirements, whether partial or total and whether granted by a station Director under delegated authority or by Central Office decision, will be made part of the school approval folder and will be subject to annual review for continuation.

f. Waivers will not be granted for courses in which the percentage of veterans enrolled exceeds 85%, except that the percentage may be exceeded in courses offered by military aero clubs. Of course, the 85% limitation may also be exceeded in courses exempted by law (see paragraph 2 above.)

5. *Countable Assistance for 85–15% Computations.* In conjunction with the delegated waivers provided for in the preceding paragraph, the following types of assistance must be counted for determining compliance with 85–15% requirements.

a. Accredited graduate and advanced professional courses; count only VA assistance provided under chapters 31, 32, 34 and 35, except for courses offered on or adjacent to a military installation as explained in paragraph 2.

b. All other courses:

(1) Count only VA assistance provided under chapters 31, 32, 34 and 35 except farm cooperative, assistance under subchapter V of chapter 34, and courses offered on or adjacent to a military base open to only active-duty personnel and their dependents (and civilian employees of the base, if waived by the station Director).

(2) Count BEOG and SEOG as Federal assistance, unless computation for a course is waived by the station Director (see par. 4b (2)) under delegated authority or waived by Central Office.

(3) Count all support offered by the institution, unless waived by the Station Director or Central Office.

6. *Computation of 85–15% Ratio.* To determine if this requirement has been met, the number of students in a course who are not veterans, are not receiving a form of Federal or institutional aid (exclusive of waivers and statutory exemptions), or are receiving a form of aid which has been waived, will be compared to the total number of students enrolled in the course. If the non-VA, nonsupported students (unless waived) do not comprise at least 15% of the total enrollment, the 85–15% requirement has not been met for that course.

a. If all students in a course are full-time trainees, the ratio is computed simply by dividing non-VA, nonsupported students by total students; e.g., 20 non-VA, nonsupported students divided by 100 total students equals .20; the 15% requirement would be met in this case.

b. Ratios which include less than full-time students may be computed by comparing full-time equivalent non-VA, nonsupported students to the total number of full-time equivalent students. For example, assume that there are 100 students enrolled in a particular course of study; 75 are full-time students and 25 are half time. The total full-time equivalency enrollment would be 75 plus 12.5 or 87.5. Similarly, if 20 non-VA, nonsupported students are full-time trainees and five are half-time students, the non-VA, nonsupported full-time equivalency would be 20 plus 2.5 or 22.5. The ratio is computed by dividing non-VA, nonsupported equivalencies by total full-time equivalencies: 22.5 divided by 87.5 equals .26. In this example the 15% non-VA requirement would be fulfilled.

c. This appendix does not alter methods of 85–15% computation previously required of flight and correspondence schools. However, these schools must recognize the additional forms of aid which may have to be computed into the supported (85%) portion of the ratio.

7. *Certifications of 85–15% Compliance.* The provisions of the new law make it necessary to institute new procedures for initial and continuing certification of compliance with the 85–15% requirements.

a. No initial 85–15% ratio computation is required for any course organized on a term basis which began before December 1, 1976. All computations for courses organized on a term basis beginning on or after December 1, 1976, must be received by the appropriate VA station within 30 days of the beginning date of the course or before February 1, 1977, whichever is later. Computations for all courses not organized on a term basis must be received by the VA before February 1, 1977. This extension for initial certifications of compliance is provided to allow both VA and school personnel to familiarize themselves with the new statutory and administrative requirements.

b. If schools will provide reasonable assurance of 85–15% compliance, enrollment certifications for courses beginning on or after December 1, 1976 will continue to be processed without individual certifications of 85–15% compliance only until actual computations are completed and submitted as specified in subparagraph a above. A school may provide reasonable assurance based on percentages of VA-supported and otherwise federally-supported students enrolled in the school. If a station Director has reason to question any school's reasonable assurance, he or she is authorized to defer processing new chapter 34 enrollments for that school until actual computations are completed and certified to the VA. If a school cannot or will not provide reasonable assurance of compliance, new chapter 34 enrollments may be processed only if they are accompanied by the appropriate individual 85–15% certification.

c. After the initial computation for a course, continuing 85–15% ratio certifications for each course must be received by the VA no later than 30 days after the beginning date of the term (excluding summer sessions) or before the beginning date of the next term, whichever occurs first. Certification for courses not offered on a term basis must be received by the VA no later than 30 days after the end of each calendar quarter.

(1) New enrollments of eligible veterans in a course will be processed based on the most recent available computation and certification of the 85–15% ratio. [If a computation is then received showing that a course fails to meet the 85–15% requirement, new chapter 34 enrollments in that course may be processed for payment of benefits only if the beginning date of the enrollment is prior to or the same as the date on which the unsatisfactory computation was completed by the school. If a school fails to submit a required 85–15% certification within the time limits specified in subparagraph c above, new chapter 34 enrollments with beginning dates beyond the expiration of the allowable computation period will not be processed until an acceptable 85–15% certification is received.] Processing such new enrollments for that course may be resumed only after the school submits a certification showing that the proper ratio has been reestablished. In cases where a school shows a reestablished 85–15% ratio, the school must individually compute each new veteran enrollment submitted after reestablishment into the ratio for the course to ensure that the 85% limitation is not again immediately exceeded. Individual computations will be required until the end of the term for which the ratio was reestablished.

(2) Schools will maintain the records and computations showing 85–15% compliance for each course for a period of 3 years after the ending date of the enrollment period.

d. Once a student is properly enrolled in a course either before December 1, 1976, or enrolls after November 30, 1976 in a course which meets the 85–15% requirement such a student may not have benefits for that course terminated because the 85–15% requirement is subsequently not met, as long as the student's enrollment remains continuous. A student enrolled in an institution organized on a term basis need not attend summer sessions in order to maintain continuous enrollment. An enrollment may also be considered continuous if a "break" in enrollment is wholly due to circumstances beyond the student's control such as serious illness.

e. Compliance surveys performed after December 1, 1976 will include verification of 85–15% compliance under the criteria in this appendix for new enrollments effective on or after December 1, 1976. Item 10 on VA Forms 22–1936 and 22–1936A, Compliance Survey Worksheet for Students Pursuing Training Under Chapter 34 or 35, must be altered to delete the words "proprietary noncollege degree". Revision of these forms will be accomplished soon in accordance with the new provisions of PL 94–502.

8. *85–15% Certification on Enrollment Documents.* Once a school has computed and certified 85–15% compliance to the VA as required in paragraph 7a., all enrollment documents submitted subsequently must bear or have attached the individual 85–15% certification statement shown below.

Attachment of such individual certifications is not required if the school has qualified for a waiver of 85–15% computations on the basis of 35% or fewer students receiving VA educational benefits, and the station director has granted the waiver without reservation (see par. 4 above). If a school cannot qualify for this waiver, the individual certification statement must appear on or be attached to each enrollment document. In cases where a director withholds the 35% waiver from a specific course or courses offered by a school, enrollment documents for only such courses must bear or have attached the individual certification statement. In order to apply this individual certification exception properly, liaison representatives will furnish to the Adjudication Division a list of schools which have been granted a 35% waiver. The list must also show individual courses from which the 35% waiver has been withheld at the director's discretion.

a. VA Forms 22–1999 and 22–1999–1 are being revised to show the proper 85–15% certification statement. Availability of the revised forms cannot be predicted at this time.

b. Until the revised enrollment documents become available, institutional certifying officials must use interim measures to show compliance with the law. The 85–15% certification statement currently shown on enrollment documents must be deleted and a signed certification worded as follows attached to each document certifying a new enrollment covering a period beginning on or after December 1, 1976: "It is hereby certified that for enrollments under chapter 34, computation requirements (including allowable waivers) have been satisfied to show that not more than 85% of the students enrolled in this course are having all or part of their tuition, fees, or other charges paid to or for them by the educational institution, the Veterans Administration under title 38 U.S.C., and or by grants from any Federal agency, unless such payments have been waived by the VA for purposes of this requirement." (Note: This provision does not apply to persons pursuing courses under 38 U.S.C. 1691, farm cooperative courses, or courses offered on military bases solely for military personnel and their dependents if approved by the SAA in the State where the base is located.) Each statement should show the name and VA claim number of the student whose enrollment is being certified. The statement itself may be duplicated, but each statement must bear an original or acceptable facsimile signature of the appropriate school certifying official.

c. No student will be counted more than one time in any computation of an 85–15% ratio. If a student receives both VA or other countable benefits and noncountable or waived type of benefit, that student must be included in the countable (85%) portion of the ratio.

9. *Rescission:* Appendix H, dated November 22, 1976 — DVB Circular 20–76–84.

DEPARTMENT OF VETERANS BENEFITS,
VETERANS ADMINISTRATION,
Washington, D.C.

PROHIBITION OF EDUCATIONAL ASSISTANCE PAYMENTS FOR COURSES NOT COUNTED TO SATISFY GRADUATION REQUIREMENTS

[The original appendix M, published December 10, 1976, did not deal with the problem of incomplete grades and their status for Veterans Administration payment purposes under the provisions of PL 94–502. Based on extensive information presented by various schools and VA field stations, the following procedure has been developed for uniform application. This procedure was published on May 5, 1977. In addition, this change clarifies the application of appendix M to NCD courses. A typographical error is also corrected to show that overpayments *will* be created for audited courses which were certified to the VA, and school liability will be considered. The changes are denoted by brackets in paragraph.]

1. *Purpose.* This appendix provides instructions for the implementation of the provisions of PL 94–502 which prohibit payment of educational benefits for auditing a course or for a course which is not used in computing graduation requirements, including any course from which the student withdraws, unless there is a finding of mitigating circumstances causing the withdrawal.

2. *General.* PL 94–502 amends title 38 U.S.C. 1780(a), to provide that, effective December 1, 1976, no payment of educational benefits will be made to an eligible veteran or person for audited courses or courses for which the grade assigned is not used in computing graduation requirements. This includes prohibition of payments for courses from which the eligible veteran or person withdraws, unless the Administrator finds

V421165 AUG 25 77 UM

mitigating circumstances involved in the withdrawal.

3. *Definitions.* Proper implementation of these statutory provisions will be facilitated if the following concepts are used in determinations concerning benefit payments:

a. *Audited Courses:* Any course which a student attends with a prior understanding between school officials and the student that such attendance will not result in credit being granted toward graduation. Because no credit toward an educational objective can be earned for such a course, it is not properly a part of the student's approved educational program.

b. *Nonpunitive Grade:* Any grade assigned for pursuit of a course, whether upon completion of the course or at the time of withdrawal from it, which has the effect of excluding the course from any consideration in determining progress toward fulfillment of requirements for graduation. No credit toward graduation would be granted for such a grade, nor would there be any effect on other graduation factors imposed by school policy, such as a grade point average. A course for which a nonpunitive grade is assigned is thus equivalent to an audited course for purposes of advancement toward graduation.

c. *Punitive (Failing) Grade:* A grade assigned for pursuit of a course which indicates unacceptable course work and no credit granted toward graduation for that pursuit. Although this type of grade results in no credit, it is distinguished from a nonpunitive grade by the fact that it is considered in determining overall progress toward graduation in that a penalty is exacted on a school graduation requirement, such as grade point average. A course for which a punitive failing grade is assigned is not equivalent to an audited course because the grade is computed into a graduation requirement.

d. *Drop-Add Period:* A reasonably brief period at the beginning of a term (not to exceed 30 days) officially designated by a school for unrestricted enrollment changes by students.

e. *Mitigating Circumstances:* Circumstances which directly hinder eligible veteran's or person's pursuit of a course and which are judged to be out of the student's control. Following are some general categories of mitigating circumstances (this list is not all-inclusive):

(1) Serious illness of the eligible veteran or person.

(2) Serious illness or death in the eligible veteran's or person's immediate family.

(3) Immediate family or financial obligations which require a change in terms, hours, or place of employment which precludes pursuit of a course.

(4) Discontinuance of a course by a school.

(5) Active duty military service, including active duty for training.

(6) Withdrawal from a course or receipt of a nonpunitive grade upon completion of a course due to unsatisfactory work may be considered to be under mitigating circumstances if the student can demonstrate good faith pursuit of the course up to the point of withdrawal or completion *and* the student submits evidence that he or she applied for tutorial aid consulted a Veterans Administration counselor, or consulted a school academic counselor or advisor regarding an attempt to remedy the unsatisfactory work before withdrawal or completion.

4. *Payment and Termination Actions.* Depending on the type of grade assigned, the point during a term when a student withdraws, and/or the presence of mitigating circumstances, payment or award termination actions will be determined as follows:

a. No VA educational assistance will be paid for an audited course. This is consistent with long-standing VA policy, the only difference being that the policy is now expressed in the statute. Schools should never certify audited courses to the VA for payment of benefits. Such certifications, if they occur, will be considered false for purposes of considering school liability for overpayments.

b. If an eligible veteran or person withdraws from a course after the institution's drop-add period, receives a nonpunitive grade for that course, and mitigating circumstances are not found, benefits for that course will be terminated effective the first date of enrollment or December 1, 1976, whichever is later.

c. If an eligible veteran or person completes a course but receives a nonpunitive (no credit or no failure) grade, and mitigating circumstances are not found, benefits for that course will be terminated effective the first date of enrollment or December 1, 1976, whichever is later.

d. As noted in subparagraphs [b and c] above, no overpayments will be created in accordance with these provisions for any period prior to December 1, 1976. School liability provisions will not be applied to overpayments resulting from withdrawals or nonpunitive grades unless a school fails to report changes in student status timely in accordance with VA Regulations and administrative requirements.

e. If an eligible veteran or person withdraws from a course before the end of an institution's drop-add period regardless of circumstances, withdraws from a course and mitigating circumstances are shown, or withdraws from a course under circumstances such that a punitive grade is or will be assigned for that course, reduction of benefits will be effective at the end of the month or the end of the term in which the withdrawal occurs, whichever is earlier. If the eligible person or veteran terminates all courses under these same conditions, termination of benefits will be effective the last date of pursuit. Last date of pursuit in a residence course is the last date of attendance.

[f. Incomplete grades for unit subjects, commonly designated as "I", may not be continued indefinitely without conversion on a student's records. To do so would effectively result in payment for courses not counted toward graduation requirements. For VA payment purposes, an "I" designation for a course must be converted to a credit grade counting toward graduation or a punitive failing grade within one calendar year after the date on which an "I" is assigned.

NOTE.—This provision does not require schools to adopt any particular academic policy with respect to incomplete courses. As explained below, the provision is merely a VA reporting requirement to ensure lawful payment of benefits.

(1) Designations of "I" (incomplete) which have not been converted within the period specified above must be reported to the VA or VA Form 22-1999B. The VA will consider such incomplete designations as equivalent to a "W" (nonpunitive withdrawal) for the course. Benefits for those courses will be terminated by amended award action effective the beginning date of the course or December 1, 1976, whichever date is later, unless mitigating circumstances are found.

(2) If the "I" designation is subsequently changed to a grade for credit toward graduation, or if a punitive grade is assigned in accordance with school academic policy for failure to complete course requirements, the school will report this grading action to the VA. The report should clearly indicate that the grade assigned is a change from an "I" designation which had been reported previously. Upon receipt of such a report, the VA will restore benefits payable for the entire course in question through amended award action.

(3) Grading designations (including designations of "I") indicating continuing enrollment in thesis or dissertation research courses leading to a graduate degree will not be reported for VA action as described above.]

[g.] If an eligible veteran or person terminates a correspondence, flight, farm cooperative, cooperative, or job-training course, termination of benefits will be effective on the following dates:

(1) Correspondence Training: Date last lesson serviced.

(2) Flight Training: Date last instruction received.

(3) Farm Cooperative Training: Date of last classroom attendance.

(4) Cooperative Training: Date of last training.

(5) Job Training: Date of last training.

[(6) Noncollege Degree: Date of last attendance, unless instruction is organized on a block or unit subject basis and the block or unit must be repeated in its entirety (no credit accrued for work completed) due to the withdrawal. For such a block or unit subject of instruction, termination will be as of the first date from which no credit accrued, unless mitigating circumstances are found.]

5. *Mitigating Circumstances—Reporting, Development, and Award Actions.* As indicated previously, the involvement of mitigating circumstances in a student's termination or reduction of training will affect adjustment of the award of benefits.

a. All schools will be encouraged to show mitigating circumstances, provided this information is known, and the grade which is or will be assigned for the course(s) involved, when reporting training time reductions or terminations. Item 3C, Remarks, on VA Form 22-1999B or 22-1999B-1, Notice of Change in Student Status—Institutional Courses only, will be used for this purpose. It should be pointed out to schools that their cooperation in this regard will avoid retroactive termination of benefits, if there were satisfactory mitigating circumstances, to the beginning of the course(s) from which withdrawn, and thus aid the veteran by maintaining proper benefit payments.

b. If the school shows acceptable mitigating circumstances, benefits will be reduced at the end of the month in which the reduction occurs if the student continues a part of his/her course, or terminated effective last date of pursuit when there is an interruption or discontinuance of all unit subjects with no further action required.

c. If mitigating circumstances are not shown on the notice of withdrawal or termination, reduction will be at end of the month in which reduction in training occurs or termination of the award will be effective last date of pursuit, and the following further actions will be required:

(1) A form or dictated development letter will be sent to the student (the computer-generated reduction or termination letter will be allowed to issue). The development letter will indicate the action taken and explain that the student will receive a computer-generated letter showing months of entitlement remaining, amount overpaid (if any), and information concerning repayment and waiver request. The student will be invited to give his or her statement regarding possible mitigating circumstances (not further specified) involved in the reduction or termination of training. Finally, the student will be advised that if no response is received by the VA within 30 days, reduction or termination of benefits will be made effective the beginning date of the course(s) include date of enlistment or assignment to a reserve component, the first subsequent EOD and RAD dates and the character of discharge."

d. Development will not be necessary if a copy of the enlistment agreement under DEP or DCAD is of record. For this agreement the Department of Defense uses DD Form 4C, Enlistment or Reenlistment Agreement (page 4 of which contains the DEP data) and Public Health Service uses PHS 4426, Memorandum of Understanding Concerning Participation in Delayed Call to Active Duty. To be acceptable without additional development, the enlistment agreement must clearly show the date the agreement was entered into and be supported by a DD Form 214.

6. *Additional Conditions for Approval of an Accredited Course Under 38 U.S.C. 1775*

a. In addition to the existing requirements for approval of a course as accredited, schools must now submit to the State approving agency a certification that the school's catalog or bulletin is true and correct in content and policy. This certification must be made by an authorized official of the school. The catalog or bulletin must specifically state the school's progress requirements for graduation and, at the minimum, must include the following information:

(1) The institution's policy and regulations relative to standards of progress required of the student by the institution (this policy will define the grading system of the institution);

(2) The minimum grades considered satisfactory;

(3) The conditions for interruption for unsatisfactory grades or progress and a description of the probationary period, if any, allowed by the institution;

(4) The conditions of reentrance for those students dismissed for unsatisfactory progress;

(5) A statement regarding the progress records maintained by the institution and furnished to the student; and

(6) The institution's policy and regulations relating to student conduct and conditions for dismissal for unsatisfactory conduct.

b. Liaison representatives will notify all schools offering accredited courses of this added provision of 38 U.S.C. 1775. Catalogs or bulletins previously published will not be affected by this requirement. However, the next catalog or bulletin published by the school must meet these requirements and the required certification must be submitted with the catalog or bulletin.

c. PL 94-502 also amends 38 U.S.C. 1775 relating to the basic approval of accredited courses, to codify institutional responsibility for recordkeeping and enforcing their standards of progress. This provision does not add any additional approval requirement but states in statutory language the standards of progress requirements currently contained in VAR 14253(D) (1) and (3). The statute now requires that SAA's must find that adquate records are kept by the educational institution to show the program of each eligible person or veteran and must include as a minimum the following requirements:

(1) Adequate records as prescribed by the SAA relating to progress or grades; and

(2) Adequate records showing satisfactory standards relating to progress and conduct are enforced.

RUFUS H. WILSON,
Chief Benefits Director.

volved, resulting in creation of an overpayment or additional over-payment. (NOTE: A new VA Form Letter will be developed for this purpose. Until it is available, modified current form letters or dictated letters must be used.)

(2) Each case developed in this manner will be placed under pending end product control for 30 days using end product code 220. (NOTE: A one-time code 220 may not be recorded in addition to establishing the pending 220 control.) If no response is received during this period, or if the student's claim of mitigating circumstances is not judged to be satisfactory, amended award action will be taken to reduce or terminate benefits effective the beginning date of the course(s) involved and final action recorded on the end product code 220. The computer-generated letter will be allowed to issue to explain remaining entitlement, amount of overpayment, etc., but a form or dictated letter must also be issued to explain the reason for retroactive termination or reduction of benefits. If mitigating circumstances are established, final action will be recorded on the pending end product code 220.

(3) The potential abuse of the provision for mitigating circumstances in order to obtain benefits otherwise not payable is obvious. Therefore, if a pattern of withdrawals or terminations develops with mitigating circumstances shown or claimed in each instance, the student will be required to submit a signed statement of circumstances before any further favorable judgments can be made. Other corroborative evidence, such as statements from employers or physicians, may also be required if deemed necessary. For purposes of this provision, a pattern of withdrawals or terminations will exist upon the third occurrence within a term or the third occurrence in consecutive terms.

RUFUS H. WILSON,
Chief Benefits Director.

DVB Circular 20-76-84.
Appendix P.
February 1, 1977.

DEPARTMENT OF VETERANS BENEFITS
VETERANS ADMINISTRATION
Washington, D.C.

MISCELLANEOUS PROVISIONS OF PL 94-502

1. *Purpose.* This appendix provides instructions for implementing various provisions of PL 94-502 which have not been covered elsewhere. This appendix also provides rate tables showing rates payable under this law for chapters 34 and 35 beneficiaries.

2. *Ending Date—Chapter 34 Eligibility.* PL 94-502 establishes final dates beyond which active duty service will no longer establish eligibility to chapter 34 educational assistance.

a. The basic ending date is December 31, 1976. Individuals entering service after December 31, 1976 (with limited exceptions) have no eligibility to benefits under chapter 34. Basic eligibility, therefore, is based on those periods of active duty, any part of which occurred after January 31, 1955 and before January 1, 1977.

b. The exception mentioned in subparagraph a above applies to a person who prior to January 1, 1977, enlists in or is assigned to a reserve component under a DEP (Delayed Enlistment Program) or DCAD (Delayed Call to Active Duty) and subsequently serves on active duty for a continuous period of 181 days, any part of which occurs on or before January 1, 1978, and is discharged or released from active duty under conditions other than dishonorable. Such a person would be entitled to chapter 34 educational assistance. When the period of active duty is less than 181 days, eligibility to chapter 34 educational assistance may be established if the person is discharged or released from active duty due to a service-connected disability.

3. *Ending Date Chapter 34 Entitlement Computation.*

a. The ending date for computing an otherwise eligible person's entitlement to chapter 34 educational assistance shall be the date of such person's first discharge or release from active duty after December 31, 1976, for any person serving on active duty on December 31, 1976, or any person entitled to chapter 34 benefits due to enlistment in a DEP or DCAD program.

b. The phrase *first discharge* or *release* as used above means the first such date a person is eligible for complete separation from service (i.e., first enlistment period ending on or after January 1, 1977) even though said person may reenlist for subsequent service on the same date.

4. *Final Cutoff Date—Chapters 34 and 36 Benefits.* No educational assistance allowance may be afforded under chapter 34 or 36 after December 31, 1989.

5. *Explanation of DEP (Delayed Enlistment Program) and DCAD (Delayed Call to Active Duty)*

a. The DEP and the DCAD are programs whereby individuals enlist in or are assigned to a reserve component and subsequently enter active duty in the Armed Forces or the Public Health Service. (NOTE: The National Oceanic and Atmospheric Administration does not have such a program.) Normally, under these programs, a person may delay his her entry onto active duty for 180 to 270 days up to a maximum of 365 days from the time of entering into the enlistment agreement. Although in certain instances extensions may be granted, the person must enter into the DEP or DCAD agreement prior to January 1, 1977, and begin serving on active duty on or before January 1, 1978, in order to have potential chapter 34 eligibility.

b. If a claimant's application for chapter 34 educational assistance and/or the DD Form 214, Armed Forces of the United States Report of Transfer or Discharge (Public Health Service uses PHS Form 1867), show a basic EOD (Entered on Active Duty) date subsequent to December 31, 1976, and prior to January 2, 1978, a careful review must be undertaken to determine possible eligibility as outlined in paragraph 2b of this appendix. If the DD Form 214 or application indicates an enlistment or assignment date to a reserve component prior to January 1, 1977, and a subsequent EOD prior to January 2, 1978, then verification from the appropriate Service Department or the Public Health Service concerning the applicant's enlistment under a DEP or DCAD program must be undertaken, unless sufficient supporting documentation is already of record.

c. Whenever development is necessary a VA Form 07-3101, Request for Information, will be completed and forwarded to the appropriate records center requesting verification of the applicant's enlistment under a DEP or DCAD. The VA Form 07-3101 should state the following:

"Request verification of enlistment under (DEP (Delayed Enlistment Program) or DCAD (Delayed Call to Active Duty)) to in-

INTERSTATE COMMERCE COMMISSION

[Volume No. 31]

PETITIONS, APPLICATIONS, FINANCE MATTERS (INCLUDING TEMPORARY AUTHORITIES), RAILROAD ABANDONMENTS, ALTERNATE ROUTE DEVIATIONS, AND INTRASTATE APPLICATIONS

AUGUST 10, 1977.

PETITIONS FOR MODIFICATION, INTERPRETATION, OR REINSTATEMENT OF OPERATING RIGHTS AUTHORITY

NOTICE

The following petitions seek modification or interpretation of existing operating rights authority, or reinstatement of terminated operating rights authority.

The Commission has recently provided for easier identification of substantive petition matters and all documents should clearly specify the "docket", "sub", and "suffix" (e.g. M1, M2) numbers identified by the FEDERAL REGISTER notice.

An original and one copy of protests to the granting of the requested authority must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protest shall comply with Special Rule 247(d) of the Commission's General Rules of Practice (49 CFR 1100.247)[1] and shall include a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition should not be tendered at this time. A copy of the protest shall be served concurrently upon petitioner's representative, or petitioner if no representative is named.

No MC-29748 M1 (notice of filing of petition to modify permit), filed June 20, 1977. Petitioner: M. C. Cumbie, Inc., 5011 Ecoff Avenue, Chester, Va. 23831. Petitioner's representative: Stanley I. Goldman, 1700 K Street, N.W., Washington, D.C. 20006. Petitioner holds a motor *contract carrier* permit in No. MC-29748, issued March 29, 1971 authorizing transportation, as pertinent, over irregular routes, of *Sheet iron products*, between Richmond, Va., on the one hand, and, on the other, points in Virginia, North Carolina and South Carolina. By the instant petition petitioner seeks to modify the above commodity description to read: *Iron and steel articles*, in lieu of sheet iron products.

No. MC 35320 (Sub-No. 78) (M1) (notice of filing of petition to delete restriction), filed August 8, 1977. Petitioner: T.I.M.E.-DC, INC., 2598 74th Street, Lubbock, Tex. 79108. Petitioner's representative: Kenneth G. Thomas (same address as petitioner). Petitioner holds a motor *common carrier* certificate in No. MC 35320 (Sub-No. 78), issued November 23, 1964, authorizing transportation, as pertinent, over regular routes, of *Classes A and B explosives* and *general commodities*, (except those of unusual value, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) between Chattanooga, Tenn., and Tuscumbia, Ala., serving all intermediate points and the off-route points of Fackler, Wheeler Dam, and Listerhill, Ala., the Widow's Bar Steam Plant of the Tennessee Valley Authority, located between Bridgeport and Stevenson, Ala., and the Huntsville Arsenal, Redstone Ordnance Works, and the Gulf Chemical Warfare Depot, near Huntsville, Ala.: From Chattanooga over U.S. Highway 72 via Huntsville, Ala., to Tuscumbia, and return over the same route; and (2) Between Huntsville, Ala., and Decatur, Ala., serving all intermediate points and the off-route points of Fackler, Wheeler Dam, and Listerhill, Ala., and the Huntsville Arsenal, Redstone Ordnance Works, and the Gulf Chemical Warfare Depot, near Huntsville, Ala.: From Huntsville over Alabama Highway 20 to Decatur, and return over the same route. Restriction: The authority granted in the two routes next above shall be subject to the restriction that carrier shall not transport shipments between points on its regular routes in Alabama, on the one hand, and, on the other, Nashville, Tenn., and points beyond. By the instant petition, petitioner seeks to modify the above authority by deleting the restriction.

No. MC 55889 (Sub-No. 40) (M1) (notice of filing of petition to delete restriction), filed July 20, 1977. Petitioner: AAA COOPER TRANSPORTATION, P.O. Box 2207, Dothan, Ala. 36301. Petitioner's representative: Kim D. Mann, Suite 1010, 7101 Wisconsin Avenue, Washington, D.C. 20014. Petitioner holds a motor *common carrier* certificate in No. MC 55889 (Sub-No. 40) issued, May 12, 1976, authorizing transportation, over regular routes, of *General commodities* (except classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), (I) Between New Orleans, La., and Jacksonville, Fla., serving Mobile, Ala., as an intermediate point: From New Orleans, over U.S. Highway 90 (also over Interstate Highway 10) to Jacksonville, and return over the same route; (II) Between Thomasville, Ga., and St. Petersburg, Fla.: From Thomasville, over U.S. Highway 19 to St. Petersburg, and return over the same route; (III) Between Albany, Ga., and Miami, Fla., serving Tifton, Ga., as an intermediate point: From Albany over U.S. Highway 82 to Tifton, Ga., thence over Interstate Highway 75 to Tampa, Fla. (also from Tifton over U.S. Highway 41 to Tampa), thence over U.S. Highway 41 to Miami, and return over the same route; (IV) Between Bainbridge, Ga., and Miami, Fla.: From Bainbridge over U.S. Highway 27 to Miami, and return over the same route:

(V) Between junction Interstate Highway 75 and Florida's Turnpike at or near Wildwood, Fla., and Miami, Fla.: From junction Interstate Highway 75 over Florida's Turnpike at or near Wildwood, Fla., to Miami, and return over the same route; (VI) Between Naples, Fla., and Fort Lauderdale, Fla.: From Naples over Florida Highway 84 to Fort Lauderdale, and return over the same route; (VII) Between Jacksonville, Fla., and Miami, Fla.: From Jacksonville, over U.S. Highway 1 (also over Interstate Highway 95) to Miami, and return over the same route; (VIII) Between Baldwin, Fla., and junction Florida's Turnpike at or near Wildwood, Fla.: From Baldwin over U.S. Highway 301 to junction Florida's Turnpike at or near Wildwood, Fla., and return over the same route; (IX) Between Daytona Beach, Fla., and St. Petersburg, Fla.: From Daytona Beach over U.S. Highway 92 (also over Interstate Highway 4) to St. Petersburg, and return over the same route; (X) Between Tampa, Fla., and junction Florida's Turnpike at or near Yeehaw Junction, Fla.: From Tampa over Florida Highway 60 to junction Florida's Turnpike at or near Yeehaw Junction, Fla., and return over the same route; (XI) Between Geneva, Ala., and Dothan, Ala., serving no intermediate points: From Geneva over Alabama Highway 52 to Dothan, and return over the same route. Serving in connection with routes (I) through (X) above, (1) all intermediate points in Florida, except those in connection with Route (I) above, and (2) all other points in Florida on and east of the Apalachicola River as off-route points. Restrictions: The operations authorized hereinabove are restricted as follows:

(a) against service at intermediate points in Alabama and Georgia (except Tifton, Ga., as authorized in III above), (b) against the transportation of traffic either (i) originating at points in the commercial zone of Birmingham, Ala., points in the commercial zone of Montgomery, Ala., and points in the commercial zone of Columbus, Ga., and destined to those points in Florida described in (1) and (2) above, or (ii) originating at those points in Florida described in (1) and (2) above and destined to points in the commercial zone of Birmingham, Ala., points in the commercial zone of Montgomery, Ala., and points in the commercial zone of Columbus, Ga. (c) against the transportation of traffic either (i) originating at points in the commercial zone of Dothan, Ala., points in the commercial zone of Tifton, Ga., and points in Georgia which applicant holds authority to serve under heretofore issued operating rights and destined to Tampa, Fla., and the Tampa, Fla., commercial zone, and to points in that portion of Florida on and west of Interstate Highway 75 extending between the Florida-Georgia State line and Gainesville, Fla., and those points on and north of Florida Highway 24 extending between Gainesville, Fla., and Cedar Key, Fla., or (ii) originating at points in that portion of Florida described immediately above in (c)(i) and destined to points in the commercial zone of Dothan, Ala., points in the commercial zone of Tifton, Ga., and points in Georgia which applicant holds authority to serve under heretofore issued operating rights. (d) serv-

[1] Copies of Special Rule 247 (as amended) can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

ice at Mobile, Ala., restricted to the transportation of shipments moving from or to points in (1) and (2) above, except no service authorized to those Florida points described in (c) above. (e) service over Route (XI) restricted to the transportation of shipments moving from or to points in Florida described in (1) and (2) above in connection with service authorized in routes (I) through (X) above. By the instant petition, petitioner seeks to modify the above authority by deleting the restriction in (b) (i) and (ii) insofar as it applies to traffic originating at or destined to points in the commercial zones of Birmingham and Montgomery, Ala. Petitioner does not seek to affect the restriction insofar as it applies to Columbus, Ga. traffic.

No. MC 109490 (Sub-Nos. 1 and 9) (M1) (Notice of filing of petition for removal of restriction), filed July 26, 1977. Petitioner: HEDING TRUCK SERVICE, INC., Union Center, Wis. 53962. Petitioner's representative: Richard A. Westley, 4506 Regent Street, Suite 100, Madison, Wis. 53705. Petitioner holds motor *common carrier* Certificate No. MC 109490 (Sub-Nos. 1 and 9), issued April 17, 1973 and December 6, 1977, respectively, authorizing transportation (1) in No. MC 109490 (Sub-No. 1), as pertinent, over irregular routes, of (a) *Animal and poultry feed, animal and poultry feed ingredients* (except commodities in bulk) and (b) *animal and poultry medications* in mixed loads with the commodities in (1)(a) above (except commodities in bulk), from Howard Lake, Minn., to points in Illinois, Iowa, and Wisconsin; Restriction: Under the commodity description above are restricted to the transportation of traffic originating at the plant site and storage facilities of American Feeds & Livestock Co., located at Howard Lake, Minn.; (c) *Animal and poultry feeds* and *animal and poultry feed ingredients* (except commodities in bulk), from Union Center, Wis., to points in Colorado, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, New Jersey, New York, Ohio, and Pennsylvania; and (d) *Materials, equipment and supplies* used in the manufacture or distribution of animal and poultry feeds and animal and poultry feed ingredients, from the destination states in (c) above to Union Center, Wis., restricted in (c) and (d) above to the transportation of traffic originating at or destined to the plant site and storage facilities of Merrick Dry Milk Co., Inc., located at Union Center, Wis.; (2) in No. MC 109490 (Sub-No. 9) over irregular routes, and (a) *animal and poultry feeds* and *animal and poultry feed ingredients* (except in bulk), from Union Center, Wis., to points in the United States (except points in Alaska, Colorado, Hawaii, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, New Jersey, New York, Ohio, and Pennsylvania); and (b) *materials, equipment and supplies* (except acids and chemicals and commodities in bulk), used in the manufacture or distribution of animal and poultry feeds and animal and poultry feed ingredients, from points in the destination states named in (2)(a) above, to Union Center, Wis., restricted to the transportation of traffic originating at or destined to the facilities of Merrick Dry Milk Co., Inc., located at Union Center, Wis. By the instant petition, petitioner seeks to delete the words "except commodities in bulk" in the above authority.

No. MC 112520 (Sub-No. 155) (M1) (Notice of filing of petition to reinstate certification), filed July 25, 1977. Petitioner: McKENZIE TANK LINES, INC., 122 Appleyard Drive, P.O. Box 1200, Tallahassee, Fla. 32302. Petitioner's representative: W. Guy McKenzie, Jr. (same address as petitioner). Petitioner formerly held a motor *common carrier* certificate in No. MC 112520 (Sub-No. 155), originally issued June 9, 1967 for a five-year term, reissued August 7, 1972, with an expiration date of June 9, 1973. Said certificate had authorized the transportation of *liquefied petroleum gas*, in bulk, in tank vehicles, from Panama City, Fla., to points in Alabama, over irregular routes. By the instant petition, petitioner seeks to have the formerly held authority above the reinstated with an indefinite expiration term or for such period as may be appropriate under current Commission regulations or policy.

No. MC 113545 (Sub-No. 9 and pending Sub-Nos. 16 and 18) (M1) (Notice of filing of petition to modify commodity description), filed July 26, 1977. Petitioner: CORMETT FORWARDING CO., INC., P.O. Box 38, Jersey City, N.J. 07303. Petitioner's representative: Morton E. Kiel, 5 World Trade Center, Suite 6193, New York, N.Y. 10048. Petitioner holds motor *contract carrier* Permits in No. 113545 (Sub-No. 9 and pending Sub-Nos. 16 and 18), issued April 26, 1974, respectively, authorizing transportation (1) in 113545 (Sub-No. 9) over irregular routes, of *Radiopharmaceuticals, radioactive drugs*, and *medical isotopes*, from South Plainfield, N.J., to Newark Airport, Newark, N.J.; New York, N.Y.; Silver Spring, Md.; and Wilmington, Del.; and to points in Nassau, Suffolk, Westchester, Rockland, Orange, Ulster, Sullivan, Putnam, and Dutchess Counties, N.Y.; Fairfield and New Haven Counties, Conn.; Philadelphia, Bucks, Montgomery, and Delaware Counties, Pa., under a continuing contract or contracts with Medi-Physics, Inc. (2) in MC 113545 (pending Sub-No. 16) over irregular routes, of *radiopharmaceuticals, radioactive drugs and medical isotopes*, from South Plainfield, N.J., to points in Middlesex, New London and Hartford Counties, Conn., and Lehigh and Northhampton Counties, Pa., under a continuing contract or contracts with Medi-Physics, Inc.; and (3) in MC 113545 (pending Sub-No. 8) over irregular routes, of *radiopharmaceuticals, radioactive drugs and medical isotopes*, from South Plainfield, N.J., to points in Cecil, Harford, Anne Arundel, Baltimore, and Baltimore City Counties, Md., under a continuing contract or contracts with Medi-Physics, Inc. By the instant petition, petitioner seeks to modify the commodity description in all of the above authority to read "*Radiopharmaceuticals, radioactive drugs, medicals isotopes, and medical test kits and related apparatus.*"

No. MC 119626 (Sub-Nos. 1, 2, 7, and 9) (M1) (Notice of filing of petition to modify commodity description), filed June 24, 1977. Petitioner: ILL.-PAC COAST TRANSPORTATION CO., a corporation, 1601 Market St., P.O. Box 128, Madison, Ill. 62060. Petitioner's representative: Ernest A. Brooks II, 1301 Ambassador Bldg., St. Louis, Mo. 63101. Petitioner holds a motor *common carrier* Certificates in No. MC 119626 and (Sub-Nos. 1, 2, 7, and 9), issued May 20, 1960, September 20, 1960, August 2, 1961, July 23, 1971 and April 24, 1975 respectively, authorizing transportation, over irregular routes in No. MC 119626 of: *Meat products and meat by-products*, as described in Section A of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, from St. Louis, Mo., to Los Angeles, San Francisco, and Stockton, Calif.; the Certificate in No. MC 119626 (Sub-No. 1) authorizes transportation of *Meats, meat products, and meat by-products*, as described in section A of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, from Springfield, Ill., to San Diego, Sacramento, Los Angeles, and San Francisco, Calif.; the Certificate in No. MC 119626 (Sub-No. 2) authorizes transportation of *Meats, packinghouse products*, and *commodities used by packinghouses*, as described in Appendix I to the report in *Descriptions in Motor Carriers Certificates*, 61 M.C.C. 209 and 766, between Chicago, Ill., on the one hand, and, on the other, St. Louis, Mo.; No. MC 119626 (Sub-No. 7) authorizes transportation of *Meats, packinghouse products*, and *commodities used by packinghouses*, as described in Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, from Springfield, Ill., to Las Vegas, Nev.; and in No. MC 119626 (Sub-No. 9) the authority in the Certificate is to transport *Meats, meat products, and meat by-products*, as described in Section A of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk), from the facilities of Krey Packing Company, B. Constantio and Sons Co., Inc., and Continental Meat Distributors, Inc., at St. Louis, Mo., Springfield, Ill., and Chicago, Ill., to points in Arizona, Nevada, and New Mexico, restricted to the transportation of shipments originating at the above-named origins and destined to the named destinations. By the instant petition, petitioner seeks to modify the commodity descriptions in the above certificates by adding the following words: "and exempt poultry products when transported in the same vehicle".

No. MC 123476 (Sub-No. 17) (M1) (Notice of filing of petition to change the location of a plantsite), filed July 25, 1977. Petitioner: CURTIS TRANSPORT, INC., 2616 Jeffco Blvd., P.O. Box 388, Arnold, Mo. 63010. Petitioner's rep-

VOL 42 NO 165 AUG 25 77 UM

resentative: David G. Dimit (same address as petitioner). Petitioner holds a motor *common carrier* certificate in NO. MC 123476 (Sub-No. 17), issued January 20, 1975, authorizing transportation, as pertinent, over irregular routes, of *Materials, equipment and supplies* used in the manufacture and distribution of the foregoing commodities, from points in Alabama, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Vermont, Virginia, West Virginia, Wisconsin, and Wyoming, and the District of Columbia to the facilities of Dow Chemical Company, located at Cape Girardeau, Mo. By the instant petition, petitioner seeks to modify the above authority by substituting Pevely, Mo., as the location of the Dow Chemical plant-site, in lieu of Cape Girardeau, Mo.

No. MC 128988 (Sub-No. 3, 28 and pending Sub-No. 27) (M1) (notice of petition for modification of permits), filed July 12, 1977. Petitioner: JO/KEL, INC., P.O. Box 1249, City of Industry, Calif. 91749. Petitioner's representative: Patrick E. Quinn, P.O. Box 82028, Lincoln, Nebr. 68501. Petitioner holds motor *contract carrier* Permits in No. MC 128988 (Sub-Nos. 3, 28 and pending Sub-No. 27), issued October 16, 1975 and March 3, 1975, respectively, authorizing transportation (1) in MC 128988 (Sub-No. 3) over irregular routes, of: (a) *Upholstery or carpet tacking rims* or *strips, nails, adhesive cement, mechanic hand tools,* and *advertising materials, racks, and stands* therefor, from points in North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, Texas, Wisconsin, Illinois, Indiana, Michigan, Ohio, Pennsylvania, New Jersey, New York, Connecticut, Rhode Island, Massachusetts, New Hampshire, Vermont, Maine, Delaware, Maryland, Virginia, West Virginia, Kentucky, Tennessee, North Carolina, South Carolina, Georgia, Alabama, Mississippi, Florida, Iowa, Minnesota, Missouri, Arkansas, Louisiana, and the District of Columbia; and (b) *Materials, equipment,* and *supplies* used in the manufacture and distribution of the commodities described above, from points in the above-named destination states, to City of Industry, Calif., restricted against the transportation of commodities in bulk, under a continuing contract or contracts with Taylor Industries, a Division of Consolidated Foods Corporation.

(2) in MC 128988 (Sub-No. 28) over irregular routes, of: (a) *Upholstery and carpet tacking rims* and *strips, nails, adhesive cement, mechanic hand tools,* and *advertising materials, racks,* and *stands* therefor, from City of Industry, Calif., to points in Oregon, Washington, Idaho, Nevada, Arizona, New Mexico, Utah, Colorado, Wyoming, and Montana; and (b) *Materials, equipment* and *supplies* used in the manufacture and distribution of the commodities described in (2)(a) above, from points in the above-named destination states to City of Industry, Calif., restricted against the transportation of commodities in bulk, under a continuing contract or contracts with Taylor Industries, Division of Consolidated Foods Corporation; and (3) in 128988 (pending Sub-No. 27), over irregular routes, of: (a) *Upholstery* and *carpet tacking rims and strips, nails, adhesive cement, mechanic hand tools,* and *advertising materials, racks,* and *stands* therefor, from Conyers, Ga., to City of Industry, Calif., and points in the United States in and east of North Dakota, South Dakota, Nebraska, Kansas, Oklahoma and Texas; and (b) *Materials, equipment, and supplies* used in the manufacture and distribution of the commodities described above, from points in the above-named destination states to Conyers, Ga., restricted against the transportation of commodities in bulk, under a continuing contract or contracts with Taylor Manufacturing, Inc., doing business as, Taylor Industries. By the instant petition, petitioner seeks (A) to modify all its above permits by deleting City of Industry, Calif., wherever it appears in the above authority and substituting in lieu thereof, Santa Fe Springs, Calif., and (B) to change the name of the shipper in MC 128988 (Sub-Nos. 3 and 28) from Taylor Industries, Inc., a division of Consolidated Foods Corporation, to Taylor Manufacturing, Inc., d.b.a. Taylor Industries.

No. MC 135973 (Sub-No. 1) (M1) (Notice of filing of petition to modify territorial description and add an additional contracting shipper), filed July 12, 1977. Petitioner: EXPEDITED TRANSPORTATION CORPORATION, 5 Wood Avenue, Secaucus, N.J. 07094. Petitioner's representative: Joel C. Feffer, 235 East 42nd Street, New York, N.Y. 10017. Petitioner holds a motor *contract carrier* Permit in No. MC 135973 (Sub-No. 1), issued July 16, 1975, authorizing transportation, over irregular routes, of *Film, video tape, and sound tracks,* between New York, N.Y., on the one hand, and, on the other, Wilmington, Del. RESTRICTION: The operations authorized herein are limited to a transportation service to be performed, under a continuing contract, or contracts, with the following shippers: Proctor and Gamble Co., of Cincinnati, Ohio; Grey Advertising, Inc., of New York, N.Y.; and Doyle Dane Bernbach, Inc., of New York, N.Y. By the instant petition, petitioner seeks to modify the territorial description by the deletion of Wilmington, Del., and the substitution of Newark, Del. in lieu thereof and addition of Lever Bros., Inc. as an additional contract shipper to the above authority.

No. MC 136403 (Sub-No. 22) (M1) (Notice of filing of petition to add a contracting shipper), filed July 5, 1977. Petitioner: CARGO CONTRACT CARRIER CORP., P.O. Box 206, U.S. Highway 20, Sioux City, Iowa 51102. Petitioner's representative: William J. Hanlon, 55 Madison Avenue, Morristown, N.J. 07960. Petitioner holds a motor *contract carrier* permit in No. MC 136403 (Sub-No. 22), issued June 29, 1976, authorizing transportation, over irregular routes, of *Chemicals,* (except in bulk in tank vehicles), from Wallingford, Conn., and Linden, N.J., to points in Ohio, Michigan, Indiana, and Illinois, under a continuing contract, or contracts, with American Cyanamid Co. By the instant petition, petitioner seeks to modify the above authority by adding Merck & Co. as an additional contracting shipper.

No. MC 139769 (M1) (Notice of filing of petition to delete restriction), filed July 22, 1977. Petitioner: FALCON CHARTER SERVICE, INC., 120 Perry Street, San Francisco, Calif. 94107. Petitioner's representative: Eldon M. Johnson, 650 California Street, Suite 2808, San Francisco, Calif. 94108. Petitioner holds a motor *common carrier* certificate in No. MC 139769 issued February 9, 1977, authorizing transportation, over irregular routes, of *Passengers and their baggage,* in the same vehicle with passengers, in special and charter operations, beginning and ending at San Francisco, Calif., and extending to points in Arizona, California, Colorado, Idaho, Montana, Nevada (except Carson City, Nev., and points in Washoe, Douglas, and Storey Counties, Nev.), New Mexico, Oregon, Utah, Washington, and Wyoming.

By the instant petition, petitioner seeks to delete the following language from the above authority: "except Carson City, Nev., and points in Washoe, Douglas and Storey Counties, Nev."

REPUBLICATIONS OF GRANTS OF OPERATING RIGHTS AUTHORITY PRIOR TO CERTIFICATION

NOTICE

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the FEDERAL REGISTER.

An original and one copy of a petition for leave to intervene in the proceeding must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such pleading shall comply with Special Rule 247(d) of the Commission's *General Rules of Practice* (49 CFR 1100.247) addressing specifically the issue(s) indicated as the purpose for republication, and including copies of intervenor's conflicting authorities and a concise statement of intervenor's interest in the proceeding setting forth in detail the precise manner in which it has been prejudiced by lack of notice of the authority granted. A copy of the pleading shall be served concurrently upon the carrier's representative, or carrier if no representative is named.

No. MC 113678 (Sub-No. 561) (Republication), filed September 12, 1974, published in the FEDERAL REGISTER issue of October 3, 1974, and republished this issue. Applicant: CURTIS, INC., 4810 Pontia Street, Commerce City (Denver),

Colo. 80022. Applicant's representative: Richard A. Peterson, P.O. Box 81849, Lincoln, Nebr. 68501. An Order of the Commission, Review Board Number 2, dated November 25, 1975, and served December 9, 1975, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier* by motor vehicle, over irregular routes, in the transportation of *bakery goods,* not frozen, (1) from Finderne and Metuchen, N.J., to points in Nebraska, Kansas, Colorado, Missouri, Iowa, Minnesota, Wisconsin, Illinois, Kentucky, Indiana, Arizona, Nevada, California, Washington, Oregon, Montana, North Dakota, South Dakota, Wyoming, Utah, New Mexico, and Idaho, and (2) from Elizabeth, N.J., to points in Wisconsin, Arizona, Nevada, California, Washington, Oregon, Montana, North Dakota, South Dakota, Wyoming, Utah, New Mexico, and Idaho; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to indicate the addition of the authority in part (2) in applicant's grant of authority.

No. MC 114004 (Sub-No. 156) (Republication, filed November 26, 1976, published in the FEDERAL REGISTER issue of December 9, 1976, and republished this issue. Applicant: CHANDLER TRAILER CONVOY, INC., 8828 New Benton Highway, Little Rock, Ark. 72209. Applicant's representative: Harold G. Hernly, Jr., 118 North St. Asaph St., Alexandria, Va. 22314. An Order of the Commission, Review Board Number 1, dated July 22, 1977, and served August 5, 1977, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier* by motor vehicle, over irregular routes, in the transportation of (1) *Trailers,* designed to be drawn by passenger automobiles, and *buildings* in sections, mounted on wheeled undercarriages, in initial movements, from points in Franklin, Morgan, and Tallapoosa Counties, Ala., Lonoke and Mississippi Counties, Ark., Columbia, Hillsborough, Lake, Manatee, Marion, Polk, and Sarasota Counties, Fla., Coffe, Floyd, Meriwether, Schley, and Ware Counties, Ga., Cowley, Franklin, Johnson, Lyon, McPherson, Riley, and Rooks Counties, Kans., Cecil County, Md., Lapeer, Osceola, St. Joseph, and Sanilac Counties, Mich., Columbia, Erie, and Oneida Counties, N.Y., Anson, Davie, Harnett, Montgomery, Rowan, Stanly, Union, and Vance Counties, N.C., Holmes, Huron, Noble, Tuscarawas, and Wood Counties, Ohio, Blair, Clarion, Lancaster, and Snyder Counties, Pa., Maury County, Tenn., and Angelina, Bell, Bowie, Fannin, Grimes, Hopkins, Hunt, Johnson, McLennon, Tarrant, and Van Zandt Counties, Tex., to points in the United States, including Alaska, but excluding Hawaii.

(2) *Trailers* designed to be drawn by passenger automobiles, in initial movements, from points in Burke County, Ga., Sumner County, Kans., Bossier and Lincoln Counties, La., Washington County, Md., Williams County, Ohio and Gregg County, Tex., to points in the United States, including Alaska, but excluding Hawaii. (3) *Trailers* designed to be drawn by passenger automobiles, and *buildings,* in sections, mounted on wheeled undercarriages, from points in Adams and Boulder Counties, Colo., to points in Texas, Oklahoma, and those points in that part of the United States east of the western boundaries of Minnesota, Iowa, Missouri, Arkansas, and Louisiana. (4) *Buildings,* in sections, when mounted on wheeled undercarriages, in secondary movements, (1) from points in Florida to points in Arkansas, Georgia, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas, (2) from points in Georgia to points in Arkansas, Florida, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas, (3) from points in South Carolina, to points in Arkansas, Florida, Georgia, Mississippi, North Carolina, Oklahoma, Tennessee, and Texas, and (4) from points in Texas to points in Arkansas, Florida, Georgia, Mississippi, North Carolina, Oklahoma, South Carolina, and Tennessee. Restriction: Service authorized in parts (1) and (2) above is restricted against the transportation of trailers designed to be drawn by passenger automobiles from points in Kansas and Michigan to points in Alaska; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to indicate the deletion of the restrictions against the transportation of recreational vehicles and prefabricated buildings in the commodity description of applicant's grant of authority.

No. MC 114004 (Sub-No. 157) (Republication), filed November 26, 1976, published in the FEDERAL REGISTER issue of December 9, 1976, and republished this issue. Applicant: CHANDLER TRAILER CONVOY, INC., 8828 New Benton Highway, Little Rock, Ark. 72209. Applicant's representative: Harold G. Hernly, Jr., 118 North St. Asaph St., Alexandria, Va. 22314. An Order of the Commission, Review Board Number 1, dated July 22, 1977, and served August 5, 1977, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier* by motor vehicle, over irregular routes, in the transportation of (1) *Trailers,* designed to be drawn by passenger automobiles, and *buildings,* in sections, when mounted on wheeled undercarriages, from points in Reno County, Kans., Saratoga County, N.Y., Rockingham County, N.C., and Sumner County, Tenn., and points in Maricopa and Pinal Counties, Ariz., Los Angeles, Orange, Riverside, Sacramento, San Bernardino, Solano, Tulare, Yolo, and Yuba Counties, Calif., Allen, Clay, Elkhart, Fulton, Jay, and Marshall Counties, Ind., Brown, Murry, Nobles, and Redwood Counties, Minn., Holmes, Lincoln, and Union Counties, Miss., Merrick, Scotts Bluff, and York Counties, Nebr., Deschute, Marion, Washington, and Yamhill Counties, Oreg., Franklin, Pittsylvania, and Shenandoah Counties, Va., and Adams, Crawford, and Grant Counties, Wis., to points in the United States, including Alaska, but excluding Hawaii, (2) *trailers* designed to be drawn by passenger automobiles, and *buildings,* in sections, mounted on wheeled undercarriages, from points in Adams and Boulder Counties, Colo., to points in the United States west of the western boundaries of Minnesota, Iowa, Missouri, Oklahoma, and Texas, including Alaska, but excluding Hawaii and Colorado. (3) *buildings,* in sections, when mounted on wheeled undercarriages in secondary movements, (1) from points in California to points in the United States, including Alaska, but excluding California and Hawaii, (2) from points in Mississippi to points in Arkansas, Florida, Georgia, North Carolina, South Carolina, Tennessee, and Texas, and (3) from points in North Carolina to points in Arkansas, Florida, Georgia, Mississippi, Oklahoma, South Carolina, Tennessee, and Texas.

(4) buildings, in sections, mounted on wheeled undercarriages, in initial movements, from points in Ontario County, N.Y., to points in Massachusetts and Pennsylvania; that applicant is fit, willing; and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to indicate the deletion of the restrictions against the transportation of recreational vehicles and prefabricated buildings in the commodity description of applicant's grant of authority.

No. MC 114055 (Sub-No. 7) (Republication), filed March 29, 1976, published in the FEDERAL REGISTER issue of April 29, 1976, republished as corrected in the FEDERAL REGISTER issue of June 3, 1976, and republished this issue. Applicant: RAY KOLNIK, doing business as RAY KOLNIK TRUCKING, Prairie View Road, Walworth, Wis. 53184. Applicant's representative: Joseph E. Ludden, 309 State Bank Bldg., La Crosse, Wis. 54601. An Order of the Commission, Review Board Number 2, dated June 29, 1977, and served July 27, 1977, finds that operation by applicant, in interstate or foreign commerce, as a *contract carrier* by motor vehicle, over irregular routes, in the transportation of *malt beverages,* from the facilities of the G. Heileman Brewing Company, Inc., at La Crosse, Wis., to Chicago, Ill., under a continuing contract, or contracts, with James J. Paulus, Inc., will be consistent with the public interest and the national transportation policy; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The

purpose of this republication is to indicate the substitution of James J. Paulus, Inc. as contracting shipper in lieu of C & K Distributors in applicant's grant of authority.

No. MC 141033 (Sub-No. 10) (Republication), filed March 4, 1976, published in the FEDERAL REGISTER issue of April 8, 1976, and republished this issue. Applicant: CONTINENTAL CONTRACT CARRIER CORP., 15045 E. Salt Lake Ave., P.O. Box 1257, City of Industry, Calif. 91479. Applicant's representative: R. A. Peterson P.O. Box 81849, Lincoln, Nebr. 68501. An Order of the Commission, Review Board Number 3, dated June 29, 1977, and served August 2, 1977, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier* by motor vehicle, over irregular routes, in transportation of (1) *parts and materials* for rotary mowers, chain saws, mini-bikes, go-carts, snowmobiles, and engines, from Glennville, Ga., to points in the United States (except Alaska, Hawaii, California, Indiana, Massachusetts, Rhode Island, Connecticut, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, North Carolina, South Carolina, Tennessee, Georgia, Alabama, and Florida, and the District of Columbia); and (2) *materials and supplies* used in the manufacture of rotary mowers, chain saws, mini-bikes, go-carts, snowmobiles, and engines (except in bulk), from points in the states named as destinations in (1) above to Glennville, Ga. The purpose of this republication is to indicate the changes made in the commodity descriptions in applicant's' grant of authority.

No. MC 142025 (Sub-No. 2) (Republication), filed June 22, 1976, published in the FEDERAL REGISTER issue of July 29, 1976, and republished this issue. Applicant: DON FOWLER, doing business as FOWLER'S MOBILE HOME TRANSIT, Rt. No. 1, Box 40A, Winchester, Va. 22601. Applicant's representative: Frank B. Hand, Jr., P.O. Box 187, Berryville, Va. 22611. An Order of the Commission, Review Board Number 3, dated July 15, 1977, and served August 12, 1977, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier* by motor vehicle, over irregular routes, in the transportation of *trailers* designed to be draw by passenger automobiles, in secondary movements, and *buildings*, in sections mounted on wheeled undercarriages, from origins other than points of manufacture, between points in Albemarle, Clarke, Culpeper, Fairfax, Fauquier, Fluvanna, Frederick, Goochland, Greene, Henrico, Loudoun, Louisa, Madison, Orange, Page, Prince William, Rappahannock, Rockingham, Shenandoah, Spotsylvania, Stafford, and Warren Counties, Va., on the one hand, and, on the other, Baltimore, Md., and points in Allegany, Anne Arundel, Baltimore, Calvert, Carroll, Charles, Frederick, Garrett, Howard, Montgomery, Prince Georges, St. Marys, and Washington Counties, Md., Adams, Allegheny, Bedford, Fayette, Franklin, Fulton, and Greene Counties, Pa., Barbour, Berkeley, Grant, Greenbrier, Hampshire, Hardy, Jefferson, Mercer, Mineral, Monroe, Morgan, Pendleton, Preston, Randolph, Summers, Tucker, and Upshur Counties, W. Va., and the District of Columbia; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to indicate the modifications made to the commodity description in applicant's grant of authority.

No. MC-142350 (Sub-No. 2) (Republication), filed September 23, 1977, published in the FEDERAL REGISTER issue of November 18, 1977, and republished this issue. Applicant: MALT TRANSPORT, INC., 58 Rogers Avenue, West Springfield, Mass. 01089. Applicant's representative: William P. Sullivan, Suite 1030, 1819 H Street, NW., Washington, D.C. 20006. An order of the Commission, Review Board Number 1, dated July 26, 1977, and served July 29, 1977, finds that the present and future public convenience and necessity require operations by applicant, in interstate or foreign commerce, as a *common carrier* by motor vehicle, over irregular routes, in the transportation of (1) *malt beverages* from South Volney, N.Y., to points in Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont, and (2) *rejected and returned malt beverages* and *returned empty malt beverage containers*, from points in Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont to South Volney, N.Y. The purpose of this republication is to reflect applicant's inbound service of rejected and returned malt beverages from the above-named destination States to South Volney, N.Y.

MOTOR CARRIER, BROKER, WATER CARRIER AND FREIGHT FORWARDER OPERATING RIGHTS APPLICATIONS

NOTICE

The following applications are governed by Special Rule 247 of the Commission's *General Rules of Practice* (49 CFR § 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date of notice of filing of the application is published in the FEDERAL REGISTER. Failure to seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with Section 247(d)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the specific portions of its authority which protestants believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularly the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if not representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(d)(4) of the special rules, and shall include the certification required therein.

Section 247(f) further provides, in part, that an applicant who does not intend timely to prosecute its application shall promptly request dismissal thereof, and that failure to prosecute an application under procedures ordered by the Commission will result in dismissal of the application.

Further processing steps will be by Commission order which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the Federal Register of a notice that the proceeding has been assigned for oral hearing.*

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

No. MC 2900 (Sub-No. 307), filed July 11, 1977. Applicant: RYDER TRUCK LINES, INC., 2050 Kings Road, P.O. Box 2408, Jacksonville, FL 32203. Applicant's representative: S. E. Somers, Jr. (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: General commodities (except household goods as defined by the Commission, Classes A and B explosives, commodities in bulk and those requiring special equipment): Serving the plantsite and warehouse facilities of the Goodyear Tire and Rubber Co., located at or near Lawton, Okla., as an off route point in connection with applicant's presently authorized regular route operations.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 2900 (Sub-No. 308), filed July 14, 1977. Applicant: RYDER TRUCK LINES, INC., 2050 Kings Road, P.O. Box 2408, Jacksonville, Fla. 32203. Applicant's representative: S. E. Somers, Jr. (same address as applicant). Authority to operate as a *common carrier*, by motor vehicle, over *regular* routes, transporting: *General commodities* (except household goods as defined by the Commission,

Classes A and B explosives, commodities in bulk, and those requiring special equipment): Serving the plantsite and warehouse facilities of Ampacet Corp., located at or near DeRidder, La., as an off-route point in connection with carrier's presently authorized routes.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or New York, N.Y.

No. MC 4405 (Sub-No. 560), filed July 11, 1977. Applicant: DEALERS TRANSIT, INC., 522 South Boston Avenue, Tulsa, Oklahoma 74103. Applicant's representative: Alan Foss, 502 First National Bank Bldg., Fargo, North Dakota 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, in interstate or foreign commerce, transporting: *Metal and metal articles*, from Whitewater, Ohio, to points in Michigan, Indiana, Ohio, Kentucky, Tennessee, Virginia, West Virginia, Arkansas, Mississippi, Alabama, Georgia, North Carolina, South Carolina, Florida, Texas, New Mexico, Arizona, Nevada, California, and Oregon.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at Columbus, Ohio, or Washington, D.C.

No. MC 5470 (Sub-No. 127), filed July 5, 1977. Applicant: TAJON, INC., R.D. 5, Mercer, PA 16137. Applicant's representative: Brian L. Troiano, 918 16th Street NW., Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle over irregular routes, transporting: (1) *Alloys, ores, silicon metals, and scrap steel shapes*, in dump vehicles, from Calvert City, Ky.; Charleston, S.C.; and Theodore, Ala., to points in Florida and (2) *Scrap metals and alloy fines*, in dump vehicles, from points in Florida to Calvert City, Ky.; Charleston, S.C.; and Theodore, Ala.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held in Washington, D.C., or Buffalo, N.Y.

Docket No. MC 5470 (Sub-No. 129), filed July 14, 1977. Applicant: TAJON, INC., R.D. 5, Mercer, Pennsylvania 16137. Applicant's representative: Brian L. Troiano, 918 16th Street NW., Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Aluminum ingots, aluminum sows, aluminum dross, and aluminum scrap*, in dump vehicles, between points in Brazoria County, Tex., on the one hand, and, on the other, points in Alabama, Indiana, Kentucky, and Tennessee.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Houston, Tex.

No. MC 5623 (Sub-No. 33), filed July 15, 1977. Applicant: ARROW TRUCKING CO., a corporation, P.O. Box 7280, Tulsa, OK 74105. Applicant's representative: J. G. Dail, Jr., P.O. Box 567, McLean, VA 22101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Air pollution, heating, and cooling equipment, and parts and accessories for such commodities*, from the plantsite and facilities of the Fuller Company, located in Houston, Tex., to those points in that part of the United States in and east of Kansas, Nebraska, North Dakota, South Dakota, Oklahoma, and Louisiana.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at Houston, Tex.

No. MC 7680 (Sub-No. 3), filed July 13, 1977. Applicant: BOWMAN BROS. TRUCKING CO., INC., P.O. Box 624, West Paterson, N.J. 07424. Applicant's representative: George A. Olsen, 69 Tonnele Ave., Jersey City, N.J. 07306. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: Fork Lifts, Fabricated Steel Products, and Aluminum Products, from the facilities of Consolidated Diesel Electric Co., located at or near Old Greenwich, Conn. to Albany, Ga.; Barstow, Calif.; Pueblo, Colo.; Tooele, Utah, restricted to the transportation of shipments originating at the named origin and destined to the named destinations.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either New York, N.Y., or Newark, N.J.

No. MC 11207 (Sub-No. 396), filed July 8, 1977. Applicant: DEATON, INC., 317 Avenue W., P.O. Box 938, Birmingham, Alabama 35201. Applicant's representative: Kim D. Mann, Suite 1010, 7101 Wisconsin Avenue, Washington, D.C. 20014. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *sheet iron and steel containers*, from Canton, Miss., to points in Alabama, Arkansas, Florida, Georgia, Louisiana, Tennessee, and Texas.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held in Chicago, Ill., or Jackson, Miss.

MC 14215 (Sub-No. 11), filed July 13, 1977. Applicant: SMITH TRUCK SERVICE, INC., P.O. Box 1329, Steubenville, Ohio 43952. Applicant's representative: James R. Stiverson, 1396 West Fifth Avenue, Columbus, Ohio 43212. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Coal tar pitch*, in bulk, in dump vehicles, (1) From Youngstown, Ohio, and Follansbee, W. Va., to Loyer, Md., and Catlettsburg, Ky.; and (2) from Follansbee, W. Va., to West Haven, Conn.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at either Pittsburgh, Pa., or Washington, D.C.

No. MC 19227 (Sub-No. 237), filed July 11, 1977. Applicant: LEONARD BROS. TRUCKING CO., INC., 2515 NW. 20th Street, P.O. Box 520602, Miami, Florida 33152. Applicant's representative: Thomas A. Leonard, 2515 NW. 20th Street, Miami, Florida 33152. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cranes and bulk material handling systems, and parts and accessories thereof which because of their size or weight require special handling or the use of special equipment, and related parts and accessories moving in connection therewith*, between plantsites and facilities of Paceco division of Fruehauf Corp. in Harrison County, Mississippi on the one hand, and, on the other, points in the United States (except Alaska and Hawaii).

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at either San Francisco, Calif., or Washington, D.C.

No. MC 19227 (Sub-No. 238), filed July 11, 1977. Applicant: LEONARD BROS. TRUCKING CO., INC., 2515 NW. 20th Street, P.O. Box 520602, Miami, Florida 33152. Applicant's representative: Thomas A. Leonard (same address as applicant). Authority is sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and Steel Articles* as described in Appendix V to the *report in Descriptions in Motor Carrier Certificates 61 MCC 209*, from the plantsite and warehouse facilities of Nucor Steel Corp., located at or near Darlington County, South Carolina, to points in Alabama, Connecticut, Delaware, District of Columbia, Florida, Georgia, Kentucky, Maine, Maryland, Massachusetts, New Jersey, New Hampshire, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, Tennessee, Vermont, Virginia, and West Virginia; and return of refused or rejected shipments.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests that it be held at Columbia, S.C., Atlanta, Ga., or Washington, D.C.

No. MC 19311 (Sub-No. 34), filed July 11, 1977. Applicant: CENTRAL TRANSPORT, INC., 34200 Mound Road, Sterling Heights, Michigan 48077. Applicant's representative: Leonard R. Kofkin, 39 South LaSalle Street, Chicago, Illinois 60603. Authority sought to operate as a *common carrier*, by motor vehicle, over *regular* routes, transporting *general commodities*, except classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment; between Milwaukee, Wisconsin and Chicago, Illinois, serving all intermediate points, and serving Chicago, Illinois and points within its commercial zone as points of joinder only: (1) from Milwaukee, Wisconsin over U.S. Highway 41 to Chicago, Illinois and return over the same route; (2) from Milwaukee, Wisconsin Highway 32 to the Wisconsin Illinois State Line, thence over Sheridan Road (formerly Illinois Highway 42) to Chicago, Illinois and return over the same route.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held either at Chicago, Illinois or Detroit, Michigan. Common control may be involved.

No. MC 24784 (Sub-No. 8), filed July 8, 1977. Applicant: BARRY, INC., 463 South Water Street, Olathe, Kansas 66061. Applicant's representative: Arthur J. Cerra, P.O. Box 19251, 2100 TenMain Center, Kansas City, Missouri 64141. Authority is sought to operate as a *common carrier* by motor vehicle, over irregular routes, transporting building, roofing and insulation materials, (except iron and steel articles and commodities in bulk) from Kansas City, Missouri, to the plant site of G.A.F. Corporation in Denver, Colorado; points in Kansas and Nebraska; and Muskogee, Sapulpa and Tulsa, Oklahoma.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Kansas City, Missouri.

No. MC 25869 (Sub-No. 135), filed June 10, 1977. Applicant: NOLTE BROS. TRUCK LINE, INC., 6217 Gilmore Avenue, P.O. Box 7184, South Omaha Station, Omaha, Nebr. 68107. Applicant's representative: Donald Stern, Suite 530, Univac Building, 7100 West Center Road, Omaha, Nebr. 68106. Authority sought to operate as a motor *common carrier*, by motor vehicle, over irregular routes transporting: *Meats, meat products, meat by-products, dairy products, and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides and commodities in bulk in tank vehicles), from Omaha, Nebr., to points in Connecticut, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, South Carolina, Tennessee, Virginia, West Virginia, and Wisconsin.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 26396 (Sub-No. 151), filed July 6, 1977. Applicant: POPELKA TRUCKING CO. d/b/a THE WAGGONERS, P.O. Box 990, Livingston, Montana 59047. Applicant's representative: Jacob P. Billig, 2033 K Street NW., Washington, D.C. 20006. Authority sought to operate as a *common carrier* by motor vehicle over irregular routes, transporting: *Common cement pipes, containing asbestos fiber and accessories necessary for the installation thereof*, from the plantsite and storage facilities of Certain-Teed at Bellefontaine Neighbors, Missouri, to points in Arkansas, Colorado, Florida, Kansas, Illinois, Michigan, Minnesota, Nebraska, North Dakota, Ohio, South Carolina, South Dakota, Wisconsin, and Wyoming.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C.

No. MC 43867 (Sub-No. 33), filed July 6, 1977. Applicant: A. LEANDER McALISTER TRUCKING COMPANY, a Corporation, P.O. Box 2214, Wichita Falls, Texas 76307. Applicant's representative: Brian E. Brewton (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Flat Glass* from the facilities of PPG Industries, Inc., located at or near Wichita Falls, Texas, to points in Arizona, California, Colorado, Idaho, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held on a consolidated hearing with similar applications at Denver, Colo.

No. MC 49567 (Sub-No. 9), filed July 11, 1977. Applicant: GOLDEN BROS., INC., 234 E. McClure Street, Kewanee, Ill. 61443. Applicant's representative: Donald S. Mullins, 4704 W. Irving Park Road, Chicago, Ill. 60641. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Heating Systems and Power Boilers, including parts and equipment incidental thereto*, from Kewanee, Illinois, to Baltimore, Maryland, limited to a transportation service to be performed under a continuing contract with Kewanee Boiler Corporation of Kewanee, Illinois.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at Chicago, Ill.

No. MC 50866 (Sub-No. 5), filed June 23, 1977. Applicant: BURLINGAME TRUCK LINE, INC., R.R. 2, Scranton, Kans. 66537. Applicant's representative: Clyde N. Christey, 514 Capitol Federal Bldg., Topeka, Kans. 66603. NOTE.—If a hearing is deemed necessary, applicant requests it be held at Topeka, Kans. or Kansas City, Mo.

No. MC 52579 (Sub-No. 165), filed July 11, 1977. Applicant: GILBERT CARRIER CORP., One Gilbert Drive, Secaucus, N.J. 07094. Applicant's representative: Irving Klein, 371 Seventh Avenue, New York, N.Y. 10001. Authority sought to operate as a *common carrier* by motor vehicle over irregular routes transporting wearing apparel on hangers from Decherd, Tennessee to Atlanta, Georgia; Columbus, Ohio; and Wilmington, Del.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at either Atlanta, Georgia or Washington, D.C.

No. MC 52579 (Sub-No. 166), filed July 14, 1977. Applicant: GILBERT CARRIER CORP., 1 Gilbert Drive, Secaucus, N.J. 07094. Applicant's representative: Irving Klein, 371 Seventh Avenue, New York, N.Y. 10001.

Authority sought to operate as a *common carrier* by motor vehicle, over irregular routes transporting: Wearing apparel, loose on hangers, (1) from Paris,, Texas; Winfield, Louisiana; Arkadelphia, Arkansas and Hamilton, Alabama, to Memphis, Tenn.; and (2) from Memphis, Tenn., to points in California, Colorado, Florida, Georgia, Illinois, Indiana, Michigan, Minnesota, Missouri, New York Commercial Zone, Ohio, Pennsylvania, Texas.

NOTE.—Common control may be involved. If a hearing is necessary, applicant requests that it be held at either Washington, D.C. or Memphis, Tenn.

No. MC 52704 (Sub-No. 148), filed July 8, 1977. Applicant: GLENN McCLENDON TRUCKING COMPANY, INC., P.O. Drawer "H", LaFayette, Ala. 36862. Applicant's representative: Archie B. Culbreth, Suite 246, 1252 West Peachtree St., NW., Atlanta, GA. 30309. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Glass containers and container accessories*, between the plantsite and warehouse facilities of Kerr Glass Manufacturing Corporation located in Wilson County, N.C., on the one hand, and, on the other, points in Kentucky, South Carolina, Missouri, Virginia, points in Arkansas on and east of U.S. Highway 63, points in Mississippi north of Mississippi Highway 6, points in Oklahoma north of Interstate Highway 40 and east of U.S. Highway 183 from the junction of Interstate Highway 40 and U.S. Highway 183, points in Pennsylvania on and west of U.S. Highway 219 and on and south of U.S. Highway 30, from its junction with U.S. Highway 15 to its junction with U.S. Highway 219, points in Maryland on and west of U.S. Highway 522, points in West Virginia on and south of U.S. Highway 52, and points in Florida (other than to Arcadia, Belle Glade, Daytona Beach, Deland, DeFuniak Springs, Fort Myers, Gainesville, Jacksonville, Jasper, Kissimmee, Live Oak, Lakeland, Marianna, Miami, Orlando, Ocala, Palatka, Pensacola, Panama City, Plant City, Quincy, River Junctions, Sarasota, St. Petersburg, Sanford, Stark, Trenton, Tampa, Tarpon Springs, Tallahassee, West Palm Beach, and Winter Haven, Fla.), and (2) *Materials, equipment and supplies* used in the manufacture and distribution of glass containers and container accessories (except commodities in bulk), From points in the states named in (1) above to the plantsite and warehouse facilities of Kerr Glass Manufacturing Corporation located in Wilson County, N.C.

NOTE.—If a hearing is deemed necessary, applicant requests it be held in Atlanta, Ga.

No. MC 56553 (Sub-No. 32), filed July 5, 1977. Applicant: PULASKI, HIGHWAY EXPRESS, INC., 640 Hamilton Avenue, Nashville, Tenn. 37203. Applicant's representative: A. O. Buck, 618 United American Bank Building, Nashville, Tenn. 37219. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except classes A and B explosives, commodities in bulk, household goods as defined by the Commission, and those requiring special equipment), (1) between Pulaski, Tenn. and Lewisburg, Tenn., serving all intermediate points; from Pulaski over U.S. Highway 31 Alternate to Lewisburg, and return over the same route; (2) between Pulaski, Tenn. and Ardmore, Ala., serving all intermediate points; from Pulaski over U.S. Highway 31 to Ardmore, and return over the same route; (3) between Pulaski, Tenn. and Frankewing, Tenn., serving all intermediate points; from Pulaski over U.S. Highway 64 to Frankewing, and return over the same route; (4) between Lawrenceburg, Tenn., and Ethridge, Tenn., serving all intermediate points; from Lawrenceburg over U.S. Highway 43 to Ethridge, and return over the same route; (5) between Columbia, Tenn. and Lewisburg, Tenn., as an alternate route for operating convenience only, in connection with carrier's regular-route operations; from Columbia over Tennessee Highway 50 to Lewisburg, and return over the same route. Restriction: Service at Lewisburg, Tenn. and its commercial zone is restricted against the handling of traffic originating at, destined to, or interchanged at Nashville, Tenn. and its commercial zone. If a hearing is deemed necessary applicant requests that it be held at Lewisburg, Tenn.

No. MC 56553 (Sub-No. 33), filed July 11, 1977. Applicant: PULASKI HIGHWAY EXPRESS, INC., 640 Hamilton Avenue, Nashville, Tennessee. Applicant's representative: Roland M. Lowell, 618 United American Bank Building, Nashville, Tennessee 37219. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting *general commodities* (except those of unusual value, classes A & B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment) (1) between Nashville, Tenn., and Clarksville, Tenn., as an alternate route for operating convenience only, in connection with carrier's regular-route operations, serving no intermediate points and serving Clarksville for the purpose of Joinder only; from Nashville over U.S. Highway 41 Alternate to Clarksville, and return over the same route, (2) between Nashville, Tenn. and the junction of Interstate Highway 24 and U.S. Highway 68, as an alternate route for operating convenience only, in connection with carrier's regular-route operations; from Nashville over Interstate Highway 24 to its junction with U.S. Highway 68, and return over the same route, (3) between the junction of U.S. Highway 41 and Kentucky Highway 181 and Elkton, Kentucky, as an alternate route for operating convenience only, in connection with carrier's regular-route operations; from junction of U.S. Highway 41 and Kentucky Highway 181, over Kentucky Highway 181 to Elkton, Kentucky, and return over the same route.

NOTE.—If a hearing be deemed necessary, applicant requests that it be held at Nashville, Tennessee.

No. MC 57311, Sub-No. 11, filed July 11, 1977. Applicant: PUTNAM TRANSFER & STORAGE CO., a corporation, 1502 Woodlawn Avenue, Zanesville, Ohio 43701. Applicant's representative: A. Charles Tell, 100 East Broad Street, Columbus, Ohio 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Class A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment) between points in Ohio.

NOTE.—Applicant states it is presently authorized to operate between points in Ohio through observance of various gateways. This application seeks elimination of gateways. If a hearing is deemed necessary, the applicant requests that it be held at Columbus, Ohio.

No. MC 64808 (Sub-No. 27), filed June 13, 1977. Applicant: W. S. THOMAS TRANSFER, INC., P.O. Box 501, 1854 Morgantown Avenue, Fairmont, W. Va. 26554. Applicant's representative: Henry M. Wick, Jr., 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities*, (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), from Baltimore, Md. to Morgantown, W. Va. serving Morgantown only for purposes of tacking with applicant's irregular route authority at Sub-No. 19G, as follows: From Baltimore over Interstate Highway 70 to Hancock, Md., thence over U.S. Highway 40 to junction U.S. Highway 48 (Also Maryland Highway 48 and West Virginia Highway 48) to Morgantown, W. Va.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Washington, D.C. or Pittsburgh, Pa.

No. MC 69834 (Sub-No. 14), filed July 11, 1977. Applicant: PRICE TRUCK LINE, INC., 2945 North Market, Wichita, Kans. 67219. Applicant's representative: William H. Shawn, 1730 M Street NW., Suite 501, Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular-routes, transporting: *school, art, and hobbies supplies and commodities used in the manufacturing, packaging, and transporting of school, art, and hobbies supplies* between the facilities of Binney & Smith, Inc., located at Winfield, Kans., Cincinnati, Ohio, and Easton, Pa., and Vandalia, Ill.

NOTE.—Common control may be involved If a hearing is deemed necessary, applicant requests that it be held in Wichita, Kans., or Washington, D.C. Applicant states that the contract carrier authority sought in No. MC 141586 (Sub-No. 1) has been converted to common carrier authority, thereby obviating the possibility of objectionable dual operations.

No. MC 71652 (Sub-No. 11), filed July 8, 1977. Applicant: SOUTHERN TRUCKING, INC., 4669 Crater Lake Hwy., P.O. Box 1124, Medford, Ore. 97501. Applicant's representative: William D. Taylor, 100 Pine Street, Suite 2550, San Francisco, Calif. 94111. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber and lumber products, particleboard and fiberboard*, from points in Crook, Klamath, Deschutes, Douglas, Marion, Lane, Linn and Multnomah Counties, Ore., to points in California.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Medford, Oreg. or San Francisco, Calif.

No. MC 73688 (Sub-No. 75), filed July 8, 1977. Applicant: SOUTHERN TRUCKING CORPORATION, 1500 Orenda Ave., Memphis, Tenn. 38107. Applicant's representative: Charles W. Singer, 2440 E. Commercial Blvd., Ft. Lauderdale, Fla. 33308. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities* as are dealt in, or used by, agricultural equipment, industrial equipment and lawn and leisure products manufacturers and dealers (except commodities in bulk), between the facilities of, or used by, International Harvester Company at Louisville, Ky., and Memphis, Tenn., on the one hand

VOL 42 NO 165 AUG 25 77 UM

and, on the other, points in Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee, Texas and Virginia, restricted to the transportation of traffic (a) originating at the facilities of, or used by, International Harvester Company located at the points named therein and destined to points in the states named therein; and (b) originating at points in the States named therein and destined to the facilities of, or used by, International Harvester Company located at the points therein (except that the restrictions in (a) and (b) above shall not apply to traffic moving in foreign commerce.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at either Washington, D.C. or Chicago, Ill.

No. MC 75281 (Sub-No. 9), filed July 14, 1977. Applicant: RIGHTER TRUCKING CO., INC., 1238 Meadowbrook Drive, Cape Girardeau, Mo. 63701. Applicant's representative: Frank D. Hall, Suite 713, 3384 Peachtree Road, N.E., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Classes A & B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), between Paducah, Ky., on the one hand, and, on the other, points in Alexander County, Ill., and Scott, Perry, Miss., Pemiscot and Cape Girardeau Counties, Mo.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at either St. Louis, Mo. or Cairo, Ill.

No. MC 75281 (Sub-No. 10), filed July 15, 1977. Applicant: RIGHTER TRUCKING CO., INC., 1238 Meadowbrook Drive, Cape Girardeau, Mo. 63701. Applicant's representative: Frank D. Hall, Suite 713, 3384 Peachtree Road, N.E., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities* as are dealt in by manufacturer of pipe, conduit, wire, cable, cord sets, plastic materials, and materials, equipment, and supplies used in the conduct of such business (except commodities in bulk, in tank vehicles), between plantsites and warehouses of Triangle PWC, Inc., a subsidiary of Triangle Industries, Inc., located in Sikeston, Mo., on the one hand, and, on the other, points in Alabama, Arizona, Arkansas, California, Colorado, Idaho, Kansas, Iowa, Louisiana, Mississippi, Missouri, Montana, Nebraska, Nevada, North Dakota, New Mexico, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, Wyoming, Florida, Connecticut, New Jersey, Minnesota, Massachusetts, Rhode Island, Tennessee, Georgia, Illinois, Indiana, Michigan, North Carolina, Kentucky, South Carolina and Wisconsin.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at either St. Louis, Mo. or Cairo, Ill.

No. MC 82063 (Sub-No. 82), filed July 7, 1977. Applicant: KLIPSCH HAULING CO., a corporation, 10795 Watson Road, Sunset Hills, St. Louis, Mo. 63127. Applicant's representative: E. Stephen Heisley, 805 McLachlen Bank Building, 666 Eleventh Street, NW., Washington, D.C. 20001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid chemicals*, in bulk, in tank vehicles, from Iowa City, Iowa, to points in the United States (except Alaska and Hawaii).

NOTE.—If a hearing is deemed necessary, applicant requests that it be held in Des Moines, Iowa, or Memphis, Tenn.

No. MC 82841 (Sub-No. 213), filed July 8, 1977. Applicant: HUNT TRANSPORTATION, INC., 10770 "I" Street, Omaha, Nebr. 68127. Applicant's representative: Donald L. Stern, 530 Univac Building, 7100 West Center Road, Omaha, Nebr., 68106. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of such commodities as are dealt in, or used by, agricultural equipment, industrial equipment and lawn and leisure products manufacturers and dealers (except commodities in bulk), (1) between the facilities of, or used by, International Harvester Co. at East Moline and Moline, Ill., on the one hand, and, on the other, points in Colorado, Indiana, Iowa, Kansas, Kentucky, Michigan, Missouri, Nebraska, Ohio, West Virginia, and Wyoming; (2) between the facilities of, or used by, International Harvester Co. at Canton and Rock Island, Ill., on the one hand, and, on the other, points in Colorado, Iowa, Kansas, Missouri, Nebraska, and Wyoming. Restrictions: The above authorities are restricted to the transportation of traffic (a) originating at the facilities of, or used by, International Harvester Co. at the points named in each of the respective paragraphs above and destined to points in the States named in said paragraph, or (b) originating at points in the States named in each of the respective paragraphs above shall not apply to traffic moving in foreign commerce.

NOTE.—Applicant seeks authority to serve Ports of Entry on the international boundary line between the United States and Canada located in the United States and Canada located in the involved states bordering on Canada and to participate in traffic moving from and to Canadian Provinces which can be served in connection therewith. If a hearing is deemed necessary, applicant requests it to be held at Washington, D.C., or Chicago, Ill.

No. MC 85465 (Sub-No. 62), filed June 27, 1977. Applicant: WEST NEBRASKA EXPRESS, INC., Mart Plaza Building, P.O. Box 1159, St. Joseph, Mo. 64502. Applicant's representative: Henry O. Barnhart, P.O. Box 10280, Palo Alto, Calif. 94303. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment): Between Denver, Colo. and junction U.S. Highway 160 and Colorado Highway 17, serving no intermediate points and serving junction U.S. Highway 160 and Colorado Highway 17 for purposes of joinder only: From Denver over U.S. Highway 85 to junction U.S. Highway 285, thence over U.S. Highway 285 to junction Colorado Highway 17, thence over Colorado Highway 17 to junction U.S. Highway 160 and return over the same route. Restricted against the transportation of shipments having a point of origin or point of destination in Conejos, Costilla, Rio Grande and Alamosa Counties, Colo.

NOTE.—Common control may be involved. If a hearing is deemed necessary, Applicant requests that it be held at San Francisco, Calif.

No. MC 87511 (Sub-No. 21), filed July 11, 1977. Applicant: SAIA MOTOR FREIGHT LINE, INC., P.O. Box 10157, Station 1, Houma, La. 70360. Applicant's representative: Phillip Robinson, P.O. Box 2207, Austin, Tex. 78768. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities which because of size or weight require the use of special equipment): Serving the compressor station of United Gas Pipeline Co. located near Vinton, La., as an off-route point in connection with carrier's presently authorized regular route operations between Vidor, Tex., and Kinder, La., over U.S. Highway 190, and between Houston, Tex., and Lafayette, La., over U.S. Highway 90 and Interstate Highway 10, coordinating service to and from said compressor station with such presently-authorized operations.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at New Orleans, La.

No. MC 94265 (Sub-No. 249), filed July 12, 1977. Applicant: BONNEY MOTOR EXPRESS, INC., P.O. Box 305, Windsor, Va. 23487. Applicant's representative: Harry G. Buckwalter, P.O. Box 305, Windsor, Va. 23487. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting *meats, meat products, and meat by-products and articles* distributed by meat packing-houses (Except commodities in bulk in tank vehicles), from Muncie, Ind., to points in Maryland, Virginia, West Virginia, North Carolina and District of Columbia. Restriction: Restricted to traffic originating at the plant site and/or storage facilities of Marhoefer Packing located at or near Muncie, Indiana and destined to named destinations.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C.

No. MC 95540 (Sub-No. 989), filed July 11, 1977. Applicant: WATKINS MOTOR LINES, INC., 1144 West Griffin Road, P.O. Box 1636, Lakeland, Fla. 33802. Applicant's representative: Benjy W. Fincher, 1144 West Griffin Road, P.O. Box 1636, Lakeland, Fla. 33802. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Clay and clay products and pet food* (except in bulk); from the plantsites and warehouse facilities of Sunshine Mills, Inc., at or near Tupelo, Mississippi; Red Bay, Alabama; and Ochlocknee, Georgia, to points in the United States in and East of Texas, Oklahoma, Colorado, Nebraska, Iowa, and Minnesota.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests that it be held at Birmingham, Ala.; Washington, D.C.; or Tampa, Fla.

No. MC 97009 (Sub-No. 26), filed July 13, 1977. Applicant: HERZOG TRUCKING COMPANY, INC., 200 Delaware Street, Honesdale, Pa. 18431. Applicant's representative: George A. Olsen, 69 Tonnele Avenue, Jersey City, N.J. 07306. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Candles, wax products*, and (2) *materials and supplies*, used in the manufacture, sale, and distribution of the above named commodities (except commodities in bulk), in vehicles equipped with mechanical refrigeration, between the facilities of Diamond Candle located at Newburgh, N.Y., on the one hand, and, on the other, points in that part of Pennsylvania on and west of the Susquehanna River, Arkansas, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Michigan, Missouri, Ohio, Oklahoma, Tennessee, Texas, Virginia, West Virginia, and Wisconsin. Restriction: The operations authorized herein are restricted to the transportation of traffic originating at the named origin and destined to the indicated destinations.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Albany, N.Y., or Washington, D.C.

No. MC 99808 (Sub-No. 7), filed June 27, 1977. Applicant: C-LINE EXPRESS, a corporation, 525 Silverado Trail, Napa, Calif. 94558. Applicant's representative: Robert Pieri, 199 Kaanapali Drive, Napa, Calif. 94558. RAMCO, located at or near Los Angeles, Calif., and City of Industry, Calif., to Salt Lake City, Utah; and (2) *carpet pads*, from the plantsites of Upholstery Supply Co./RAMCO, located at or near Los Angeles and City of Industry, Calif., to points in Idaho and Utah.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at either Salt Lake City, Utah, or Boise, Idaho.

No. MC 116014 (Sub-No. 83) (Correction), filed June 16, 1977, published in the FEDERAL REGISTER issue of August 4, 1977, as MC 116014, republished as corrected this issue. Applicant: OLIVER TRUCKING COMPANY, INC., P.O. Box 53, Winchester, Ky. 40391. Applicant's

V 42 165 AUG 25 77 A
UMI

representative: Louis J. Amato, P.O. Box E, Bowling Green, Ky. 42101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Materials and supplies* (except commodities in bulk), used in the manufacture of bed springs, bedstead rails, cots, cot frames and bed springs and bed spring assemblies and metal sleeper fixtures, from points in South Carolina to Winchester, Ky.

NOTE.—The purpose of this republication is to indicate the correct docket number MC 116014 Sub 83 in lieu of MC 116014. If a hearing is deemed necessary, the applicant requests that the hearing be held in Louisville, Ky.

No. MC 116200 (Sub-No. 13), filed July 12, 1977. Applicant: UNITED PARCEL SERVICE, INC., 643 West 43rd Street, New York, New York 10036. Applicant's representative: S. Harrison Kahn, Suite 733 Investment Building, 1511 K Street NW., Washington, D.C. 20005. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting *general commodities*, except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, between points in Maine, Vermont, New Hampshire, Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, New Jersey, Delaware, Maryland, Virginia, West Virginia, and the District of Columbia, subject to the following restrictions: (a) service is restricted to packages originating at, or destined to, the premises of the Catalog Distribution Facility of J. C. Penney Company, Inc., in Lenexa, Kansas, having an immediately prior or subsequent movement by United Parcel Service, Inc. (an Ohio corporation), (b) no service shall be rendered in the transportation of any package or article weighing more than 50 pounds or exceeding 108 inches in length and girth combined, and each package or article shall be considered as a separate and distinct shipment, and (c) no service shall be provided in the transportation of packages or articles weighing in the aggregate more than 100 pounds from one consignor at one location to one consignee at one location on any one day.

NOTE.—Applicant holds motor contract carrier authority in No. MC 63063 and subs thereunder, therefore, dual operations may be involved. Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at New York, N.Y.

No. MC 116514 (Sub-No. 36), filed July 12, 1977. Applicant: EDWARDS TRUCKING, INC., P.O. Drawer 428, Hemingway, S.C. 29554. Applicant's representative: Edward G. Villalon, 1032 Pennsylvania Building, Pennsylvania Avenue and 13th St. NW., Washington, D.C. 20004. Authority sought as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of non-alcoholic and soft drink products and materials and supplies used in the manufacture, mixing, distribution and sale of such products between Cheraw, S.C., on the one hand, and, on the other, points in North Carolina, South Carolina and Georgia.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Columbia, S.C. or Washington, D.C.

No. MC 117119 (Sub-No. 646), filed July 14, 1977. Applicant: WILLIS SHAW FROZEN EXPRESS, INC., P.O. Box 188, Elm Springs, Arkansas 72728. Applicant's representative: M. M. Geffon, P.O. Box 338, Willingboro, New Jersey 08046. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes transporting: Such merchandise as dealt in retail sewing centers from Trumann, Arkansas to Albuquerque, New Mexico; Denver, Colorado; Des Moines, Iowa; Los Angeles, California; Minneapolis, Minnesota; Phoenix, Arizona; Portland, Oregon; San Francisco, California; and Seattle, Washington.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at New York, N.Y. or Washington, D.C.

No. MC 117589 (Sub-No. 42), filed July 7, 1977. Applicant: PROVISIONERS FROZEN EXPRESS, INC., 3801 7th Avenue South, Seattle, Wash. 98108. Applicant's representative: Michael D. Duppenthaler, 515 Lyon Building, 607 3rd Ave., Seattle, Wash. 98104. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen Human Blood Plasma*, from Eugene, Oreg., to Los Angeles, Calif.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Seattle, Wash.

No. MC 117686 (Sub-No. 177), filed July 14, 1977. Applicant: HIRSCHBACH MOTOR LINES, INC., 5000 South Lewis Blvd., P.O. Box 517, Sioux City, Iowa 51102. Applicant's representative: Robert A. Wichser (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Sugar* (except in bulk), from the plantsite and storage facilities utilized by American Crystal Sugar Company, at Crookston, East Grand Forks, and Moorhead, Minn., to Mason City, Iowa.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Fargo, N. Dak.; Omaha, Nebr.; or Washington, D.C.

No. MC 117940 (Sub-No. 225), filed July 11, 1977. Applicant: NATIONWIDE CARRIERS, INC., P.O. Box 104, Maple Plain, Minnesota 55359. Applicant's representative: Allan L. Timmerman (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) Such merchandise as is dealt in by retail stores, except foodstuffs and commodities in bulk, and (2) Foodstuffs in mixed shipments with the commodities in (1) above, from the facilities of Target Stores, Inc. at or near Minneapolis, Minnesota to points in Colorado, Texas, and Oklahoma. Restricted to traffic originating at the facilities of Target Stores, Inc. at named origins and destined to the facilities of Target Stores, Inc. at named destinations.

NOTE.—If a hearing is deemed necessary the applicant requests it be held at Minneapolis Minnesota or St. Paul, Minnesota. Applicant holds contract carrier authority in No. MC 11489 (Sub-No. 16) and other subs thereunder, therefore, dual operations may be involved.

No. MC 118831 (Sub-No. 152), filed July 8, 1977. Applicant: CENTRAL TRANSPORT, INCORPORATED, P.O. Box 7007, High Point, North Carolina 27264. Applicant's representative: Earlie O. Jones, P.O. Box 7007, High Point, N.C. 27264. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: Chemicals, in bulk, in tank vehicles and hopper-type trucks, from the plant site of Tennessee Eastman Company, Kingsport, Tennessee, to points in the United States in and east of Minnesota, Iowa, Nebraska, Kansas, Oklahoma, and Texas.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at Washington, D.C.

No. MC 118831 (Sub-No. 153), filed July 8, 1977. Applicant: CENTRAL TRANSPORT, INCORPORATED, P.O. Box 7007, High Point, N.C. 27264. Applicant's representative: Earlie O. Jones (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: Plastics (except expanded), in bulk, from the 3M (Minnesota Mining & Manufacturing Company) plant site located at Greenville, S.C., to Prairie du Chien, Wis.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at Washington, D.C.

No. MC 119547 (Sub-No. 46), filed July 8, 1977. Applicant: EDGAR W. LONG, INC., 3815 Old Wheeling Road, Zanesville, Ohio, 43701. Applicant's representative: Richard H. Brandon, 220 West Bridge Street, Post Office Box 97, Dublin, Ohio, 43017. Authority sought to operate as a *common carrier* by motor vehicles, over irregular routes, transporting (1) *Paper Trays, corrugated post and clay products* (except commodities in bulk) from the plant sites of Lowe's, Inc., at or near Bloomfield, Missouri; Olmsted, Illinois; and Paris, Tennessee; to points in the United States, except Alaska and Hawaii, and (2) *Clay and Clay Products* (except commodities in bulk) from Oran, Missouri, to points in Florida, Idaho, Maine, Montana, New Hampshire, Nevada, Oregon, Utah, Vermont, Washington, and Wyoming.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Columbus, Ohio.

No. MC 119619 (Sub-No. 112), filed July 11, 1977. Applicant: DISTRIBUTORS SERVICE CO., a corporation, 2000 West 43rd Street, Chicago, Illinois 60609. Applicant's representative: Arthur J. Piken, One Lefrak City Plaza, Flushing, New York 11368. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cornstarch* (except in bulk in tank vehicles), from the plant site of A. E. Staley Manufacturing Co. at Morrisville (Bucks Co.), Pennsylvania, to points in Illinois, Indiana, Iowa, Michigan, Minnesota, Ohio, and Wisconsin.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Philadelphia, Pa.

No. MC 119741 (Sub-No. 80), filed July 14, 1977. Applicant: GREEN FIELD TRANSPORT COMPANY, INC., 3225 Fifth Avenue South, Fort Dodge, Iowa 50501. Applicant's representative: D. L. Robson, P.O. Box 1235, Fort Dodge, Iowa 50501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: Meats, meat products, meat by-products, and articles distributed by meat packinghouses, as described in sections A and C of appendix I to the report in descriptions in motor carrier certificates, 61 M.C.C. 209 and 766 (except hides and commodities in bulk, in tank vehicles), from the facilities of Premier Boneless Meats, Inc. at or near Lyons, Nebraska, to points in North Dakota, South Dakota, Kansas, Missouri, Iowa, Minnesota, Illinois, Indiana, Ohio, Michigan, Wisconsin, Kentucky, New York, New Jersey, Maryland, Connecticut, Rhode Island, Massachusetts, and Pennsylvania.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Omaha, Neb. or Sioux City, Iowa.

No. MC 119777 (Sub-No. 338), filed July 8, 1977. Applicant: LIGON SPECIALIZED HAULER, INC., P.O. Drawer "L", Madisonville, Kentucky 42431. Applicant's representative: Carl U. Hurst, P.O. Drawer "L", Madisonville, Kentucky, 42431. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, between the plantsite of Nucor Steel at or near Jewett, Texas, on the one hand, and on the other, points in Alabama, Arkansas, Florida, Georgia, Kansas, Louisiana, Mississippi, Missouri, New Mexico and Oklahoma.

NOTE.—Common control and dual operations may be involved. Applicant holds contract carrier authority in MC 126970 Subs 1 and 3. If a hearing is deemed necessary, applicant requests it be held at either Houston, Texas, or Dallas, Texas.

No. MC 119988 (Sub-No. 115), filed July 7, 1977. Applicant: GREAT WESTERN TRUCKING CO. INC., P.O. Box 1384, Highway 103 East, Lufkin, Tex. 75901. Applicant's representative: Hugh T. Matthews, 2340 Fidelity Union Tower, Dallas, Tex. 75201. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plastic articles*, from Temple, Tex., to points in California, New Mexico, Arizona, Illinois, Oregon, and Washington.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Dallas, Tex.

No. MC 120761 (Sub-No. 25), filed July 13, 1977. Applicant: NEWMAN BROS. TRUCKING COMPANY (a corporation), 6559 Midway Road, P.O. Box 13302, Fort Worth, Texas 76118. Applicant's representative: Clint Oldham, 1108 Continental Life Building, Fort Worth, Texas 76102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Roofing materials, composition shingles, rolled roofing, roofing compounds, and accessories thereto* from the plantsite and storage facilities of Elk Corp at or near Stephens and Camden, Ark., to points in Alabama, Kentucky, Louisiana, Mississippi, Oklahoma, Tennessee, and Texas.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at Dallas, Tex., or Oklahoma City, Okla.

No. MC 121654 (Sub-No. 4), filed July 11, 1977. Applicant: COASTAL TRANSPORT & TRADING CO., a corporation, P.O. Box 7438, Savannah, Georgia 31408. Applicant's representative: Alan E. Serby, 3379 Peachtree Road NE., Suite 375, Atlanta, Georgia 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Roofing, building, and insulating materials* (except iron and steel articles and commodities in bulk) from points in Chatham County, Ga., to points in Alabama, Florida, Mississippi, North Carolina, South Carolina, and Tennessee; and (2) *such materials, equipment, and supplies* as used in the manufacture, installation, and distribution of roofing, building, and insulating materials, from points in the above described destination territory (in 1 above) to points in Chatham County, Ga. Restriction: Operations in (1) and (2) above are restricted against the transportation of (a) commodities in bulk, and (b) those which because of size or weight require the use of special equipment.

NOTE.—Common control and dual operations may be involved. If a hearing is deemed necessary, applicant requests that it be held at Atlanta, Ga., or Washington, D.C.

No. MC 123048 (Sub-No. 360), filed July 11, 1977. Applicant: DIAMOND TRANSPORTATION SYSTEM, INC., 5021 21st Street, P.O. Box 1557, Racine, WI 53401. Applicant's representative: Paul C. Gartzke, 121 West Doty Street, Racine, WI 53703. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities as are dealt in, or used by, agricultural equipment, industrial equipment, and lawn and leisure products manufacturers and dealers* (except commodities in bulk), (1) between the facilities of, or used by, International Harvester Company at East Moline, Moline, and Rock Island, Ill., on the one hand, and, on the other, points in Alabama, Connecticut, Delaware, Florida, Georgia, Indiana, Kentucky, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, West Virginia, and District of Columbia; (2) between the facilities of, or used by, International Harvester Company at Louisville, Ky., on the one hand, and, on the other, points in Illinois, Indiana, Iowa, Kentucky, Michigan, Ohio, Pennsylvania, and West Virginia; (3) between the facilities of, or used by, International Harvester Company at Memphis, Tenn., on the one hand, and, on the other, points in Indiana, Kentucky, Michigan, Ohio, Pennsylvania, and West Virginia; (4) from the facilities used by International Harvester Company at the Port of New Orleans, La., and points in its commercial zone to points in Illinois, Indiana, Iowa, Kentucky, Michigan, Ohio, Pennsylvania, and West Virginia; (5) from the facilities used by International Harvester Company at the Port of Savannah, Ga., and points in its commercial zone to points in Illinois, Iowa, Minnesota, Montana, North Dakota, South Dakota, and Wisconsin. Restrictions: The authorities in paragraphs (1), (2), and (3) above are restricted to the transportation of traffic (a) originating at the facilities of, or used by, International Harvester Company at the points named in each of said respective paragraphs and destined to points in the States named in said paragraphs and the District of Columbia, or (b) originating at points in the States named in each of said respective paragraphs and the District of Columbia and destined to the facilities of, or used by, International Harvester Company at the points named in said paragraphs, except that the restrictions in (a) and (b) above shall not apply to traffic moving in foreign commerce; and the authorities in paragraphs (4) and (5) above are restricted to the transportation of traffic (a) having a prior movement by water and (b) destined to the facilities or dealers of International Harvester Company.

NOTE.—Applicant seeks authority to serve Ports of Entry on the international boundary line between the United States and Canada located in the involved States bordering on Canada and to participate in traffic moving from and to Canadian Provinces which can be served in connection therewith. If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C., or Chicago, Ill.

No. MC 123255 (Sub-No 108), filed July 11, 1977. Applicant: B & L MOTOR FREIGHT, INC., 140 Everett Avenue, Newark, Ohio 43055. Applicant's representative: C. F. Schnee, Jr. (same address as applicant). Authority sought to operate as a *common carrier* by motor vehicle over irregular routes transporting *aluminum articles*, between the plantsite of Kaiser Aluminum & Chemical Corp., located at or near Ravenswood, W. Va., on the one hand, and, on the other, points in Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, New Jersey, New York, Ohio, Pennsylvania, and Wisconsin.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the appli-

V 42165 AUG 25 77 UM

cant requests that it be held at Columbus, Ohio.

No. MC 123255 (Sub-No. 109), filed July 11, 1977. Applicant: B & L MOTOR FREIGHT, INC., 140 Everett Avenue, Newark, Ohio 43055. Applicant's representative: C. F. Schnee, Jr., 140 Everett Avenue, Newark, Ohio 43055. Authority sought to operate as a *common carrier* by motor vehicle over irregular routes transporting (1) *fibreboard cans and closures therefor*, from Greenville, N.C., to points in Alabama, Connecticut, Florida, Georgia, Illinois, Indiana, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Mississippi, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Virginia, West Virginia, and Wisconsin, and (2) *materials and supplies incidental to the manufacture of fibreboard cans and closures therefor*, from points in the above named destination states to Greenville, N.C.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Columbus, Ohio.

No. MC 123255 (Sub-No. 110), filed July 13, 1977. Applicant: B & L MOTOR FREIGHT, INC., 140 Everett Avenue, Newark, Ohio 43055. Applicant's representative: C. F. Schnee, Jr. (same address as applicant). Authority sought to operate as a *common carrier* by motor vehicle over irregular routes transporting *expanded plastic products* (except commodities in bulk), from Channahon, Ill., to points in the United States on and east of U.S. Highway 85.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at Columbus, Ohio.

No. MC 123255 (Sub-No. 111), filed July 13, 1977. Applicant: B & L MOTOR FREIGHT, INC., 140 Everett Avenue, Newark, Ohio 43055. Applicant's representative: C. F. Schnee, Jr., 140 Everett Avenue, Newark, Ohio 43055. (v) Between points in Tennessee on and west of Interstate Highway 65, on the one hand, and, on the other, all points in Maryland, Delaware, and West Virginia; (w) between points in Tennessee on and east of Interstate Highway 65, on the one hand, and, on the other, all points in Iowa and Wisconsin; (x) between points in Tennessee on and west of a line commencing at the Kentucky-Tennessee State line on U.S. Highway 27, thence south on U.S. Highway 27 to the Tennessee-Georgia State line, on the one hand, and, on the other, all points in Maine, Connecticut, New York, and Vermont; (y) between points in Tennessee on and west of a line commencing at the Kentucky-Tennessee State line on Tennessee State Highway 56, thence south on Tennessee Highway 56 to the Alabama-Tennessee State line, on the one hand, and, on the other, points in Ohio and Pennsylvania; (z) between points in Tennessee on and east of Interstate Highway 65, on the one hand, and, on the other, points in Illinois on and north of a line commencing at the Missouri-Illinois State line on U.S. Highway 54, thence northeast on U.S. Highway 54 to the junction of U.S. Highway 36, thence east on U.S. Highway 36 to the Illinois-Indiana State line; (aa) between points in Tennessee on and east of U.S. Highway 127, on the one hand, and, on the other, points in Missouri, on and north of Interstate Highway 70; and (bb) between points in Tennessee on and west of a line commencing at the Kentucky-Tennessee State line on Interstate Highway 75, thence south on Interstate Highway 75 to junction U.S. Highway 129 at Knoxville, Tenn., thence south on U.S. Highway 129 to the Tennessee-North Carolina State line, on the one hand, and, on the other, all points in the Lower Peninsula of Michigan.

NOTE.—Applicant states that it intends to tack or join the elements of the above described operating authority at all common points for the purpose of rendering a through-service, and requests appropriate authorization to accomplish this purpose. Applicant states that it presently holds the authority sought in this application under Certificates of Public Convenience issued in Docket No. MC 134906 and Sub-Nos. 1 through 7 and Sub-No. E1 thereto. The application is directly related to Docket No. 134906 and Sub-Nos. 1 through 7, *Cape Air Freight, Inc., Kansas City, Kans.*, in which by Order served September 16, 1976, Division 1 reopened the proceedings for consideration of possible cancellation or revocation of all or part of applicant's certificates. It is the position of applicant that regardless of the ultimate decisions in the proceeding referenced, the public convenience and necessity requires the continuance of its present operations in the transportation of the commodities identified, within the territory described, subject only to the restrictions contained in its existing authority. Consolidation of this application proceeding with the reopened proceedings in Docket No. MC 134906 and Sub-Nos. 1-7 has been requested concurrently. If a hearing is deemed necessary, the applicant requests that it be held at Atlanta, Ga., and New Orleans, La.

No. MC 134970 (Sub-No. 16), filed July 11, 1977. Applicant: UNZICKER TRUCKING, INC., P.O. Box 35, El Paso, Ill. 61738. Applicant's representative: Michael J. Ogborn, P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen pork sausage*, from the plantsite of Bird Provision Co. at or near Pekin, Ill., to points in Indiana, Michigan, Missouri (except St. Louis), Kentucky, Ohio, and Wisconsin.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill. Common control may be involved.

No. MC 135437 (Sub-No. 16), filed July 5, 1977. Applicant: TRI-NORTHEASTERN TRANSPORT, INC., P.O. Box 80, Lyndonville, N.Y. 14098. Applicant's representative: S. Michael Richards, P.O. Box 225, 44 North Ave., Webster, N.Y. 14580. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Canned goods and vegetables, processed* (except frozen), from Turkey, N.C., to points in Connecticut, Delaware, Maine, Massachusetts, Maryland, Illinois, New Jersey, New York, New Hampshire, Ohio, Pennsylvania, Rhode Island, Vermont, and District of Columbia.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Buffalo, N.Y., or Chicago, Ill.

No. MC 135684 (Sub-No. 44), filed July 15, 1977. Applicant: BASS TRANSPORTATION CO., INC., P.O. Box 391, Old Croton Road, Flemington, N.J. 08822. Applicant's representative: Herbert Alan Dubin, Federal Bar Building West, 1819 H Street NW., Suite 1030, Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cleaning products, pot scourers and steel wool*, from London, Ohio, to points in Georgia, Florida, and Michigan.

NOTE.—Applicant holds contract carrier authority in MC 87720 (Sub-No. 2) and other subs, therefore dual operations may be involved. If a hearing is deemed necessary, the applicant requests that it be held at Washington, D.C.

No. MC 135684 (Sub-No. 45), filed July 15, 1977. Applicant: BASS TRANSPORTATION CO., INC., P.O. Box 391, Old Croton Road, Flemington, N.J. 08822. Applicant's representative: Herbert Alan Dubin, Federal Bar Building West, 1819 H Street NW., Suite 1030, Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cleaning and water purifying products, materials, supplies, and equipment* used in the manufacture, sale, and distribu-

V 42165 AUG 25 77 UMI V

tion of cleaning and water purifying products, between St. Louis, Mo. and points in Iowa, Kansas, Minnesota, North Dakota, and South Dakota, a nonradial movement.

NOTE.—Applicant holds motor contract authority in No. MC 87720 (Sub-No. 2) and other subs, therefore, dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 135965 (Sub-No. 3), filed July 13, 1977. Applicant: J. P. WIEST d.b.a. WIEST TRUCK LINE, 1305 6th Avenue SW., Jamestown, N. Dak. 58401. Applicant's representative: James B. Hovland, P.O. Box 1637, 414 Gate City Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Agricultural implements and parts and attachments for agricultural implements*, from the facilities of Haybuster Manufacturing Co. at or near Jamestown, N. Dak., to points in the United States (except Alaska and Hawaii); and (2) *iron and steel articles*, from Chicago, Ill., and Minneapolis, Minn., to the facilities of Haybuster, Manufacturing Co. at or near Jamestown, N. Dak., (1) and (2) under a continuing contract or contracts with Haybuster Manufacturing Co., of Jamestown, N. Dak.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Fargo, N. Dak., or Minneapolis or St. Paul, Minn.

No. MC 136168 (Sub-No. 15), filed July 12, 1977. Applicant: WILSON CERTIFIED EXPRESS, INC., 4545 Lincoln Boulevard, Oklahoma City, Okla. 76102. Applicant's representative: H. P. Simpsen, 4545 Lincoln Boulevard, Oklahoma City, Okla. 76102. Authority sought to operate as a *contract carrier*, by motor vehicles, over irregular routes, transporting: (1) *Cheese* from the facilities of, or those utilized by, Milk House Cheese Corp., at points in Wisconsin: Booneville, Miss.; Lena and Minook, Ill.; Clinton, Mo.; Bongards, Minn.; and Los Angeles, Calif., to points in Texas; Phoenix, Ariz.; Los Angeles, and San Francisco, Calif.; Atlanta and Decatur, Ga.; Shreveport, La.; Albuquerque, N. Mex.; Springfield, Mo.; Memphis, Tenn.; and New York City, N.Y.; and (2) *canned foods* from San Antonio, Tex., to Weyauwega, Wis. Restriction: Restricted to traffic originating at the plantsites, facilities of, or those utilized by, Milk House Cheese Corp. and limited to a transportation service to be performed under a continuing contract with Milk House Cheese Corp.

NOTE.—Applicant has motor common carrier authority pending in No. MC 141041 (Sub-No. 1), and other subs, therefore, dual operations may be involved. Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at Dallas, Tex., or Kansas City, Mo.

No. MC 136343 (Sub-No. 113), filed July 7, 1977. Applicant: MILTON TRANSPORTATION, INC., Box 355, Milton, Pa. 17847. Applicant's representative: Christian V. Graf, 407 North Front Street, Harrisburg, Pa. 17101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Canned and preserved foodstuffs* from the plantsite and shipping facilities of Heinz U.S.A., Division of H. J. Heinz Co., at Fremont and Toledo, Ohio, to points in that part of New York, on and south of Interstate 84; points in New Jersey on and north of New Jersey Highway 33; points in Massachusetts, Connecticut, Rhode Island, Maine, and New Hampshire; and King of Prussia, Oaks, and Philadelphia, Pa., restricted to traffic originating at the named origins and destined to the named destinations.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Washington, D.C., or Harrisburg, Pa.

No. MC 136343 (Sub-No. 115), filed: July 13, 1977. Applicant: MILTON TRANSPORTATION INC., P.O. Box 355, Milton, Pa. 17847. Applicant's representative: George A. Olsen, 69 Tonnele Ave., Jersey City, N.J. 07306. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Printing paper*, from the facilities of the St. Regis Paper Co. located at Bucksport, Maine, to points in Pennsylvania, Ohio, Indiana, Illinois, Kentucky, Maryland, Virginia, District of Columbia, and Tennessee and points in New York on and west of U.S. Route 11.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at New York, N.Y., or Washington, D.C.

No. MC 136512 (Sub.No. 14), filed July 11, 1977. Applicant: SPACE CARRIERS, INC., 444 Lafayette Road, St. Paul, Minn. 55101. Applicant's representative: James E. Ballenthin, 630 Osborn Bldg., St. Paul, Minn. 55102. V 42165 AUG 25 77 UMI

NOTE.—If a hearing is deemed necessary, applicant requests that it be held in (1) Charlotte, N.C., or (2) Washington, D.C.

No. MC 143591, filed July 11, 1977. Applicant: FLOYD WILD, INC., P.O. Box 91, Marshall, Minn. 56258. Applicant's representative Samuel Rubenstein, 301 North Fifth Street, Minneapolis, Minn. 55403. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Manufactured decorative stone* from points in Lyon County, Minn., to points in Colorado, Iowa, Kansas, Montana, Nebraska, North Dakota, South Dakota, Wisconsin, and Wyoming.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Minneapolis, Minn. Applicant holds con-carrier authority in No. MC 133542 (Sub-No. 1 and other subs); therefore dual operations may be involved.

PASSENGERS

No. MC 2890 (Sub-No. 52), filed June 30, 1977. Applicant: AMERICAN BUSLINES, INC., 1501 South Central Avenue, Los Angeles, Calif. 90021. Applicant's representative: R. Y. Schureman, 1545 Wilshire Boulevard, Los Angeles, Calif. 90017. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in special operations, (1) in round-trip sightseeing and pleasure tours beginning and ending at points in Cochise, Maricopa, Pima, Pinal, and Yuma Counties, Ariz.; Clark, Churchill, Elko, Eureka, Humboldt, Lander, Lyon, Pershing, Washoe, and White Pine Counties, Nev.; and Beaver, Davis, Iron, Juab, Millard, Morgan, Salt Lake, Summit, Tooele, Utah, and Weber Counties, Utah, and extending to points in the United States including Alaska (but excluding Hawaii); and (2) in sightseeing and pleasure tours beginning at points in the above-named Arizona, Nevada, and Utah Counties and extending to points in the United States, including Alaska (but excluding Hawaii).

NOTE.—Applicant states it proposes to operate between any and all ports of entry on the International Boundary line between the United States and Canada. Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at either Phoenix, Ariz., Reno, Nevada, or Salt Lake City, Utah.

No. MC 11316 (Sub-No. 1), filed July 3, 1977. Applicant: THE GALION & MANSFIELD TRANSIT CO., a corporation, 1271 Bowman Street, Mansfield, Ohio 44903. Applicant's representative: A. Charles Tell, 100 East Broad Street, Columbus, Ohio 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of *passengers and their baggage* in the same vehicles with passengers in round-trip special and charter operations beginning and ending at points in Ashland, Crawford, Holmes, Huron, Licking, Marion, Morrow, Seneca, Richland, and Wyandot Counties, Ohio, and extending to points in the United States including Alaska, but excluding Hawaii.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Columbus, Ohio.

No. MC 61802 (Sub-No. 15), filed July 12, 1977. Applicant: THE COLONIAL TRANSIT CO., INC., P.O. Box 508, Fredericksburg, Va. 22401. Applicant's representative: L. C. Major, Jr., Suite 400, Overlook Bldg., 6121 Lincolnia Road, Alexandria, Va. 22312. Applicant seeks authority to operate as a *common carrier* by motor vehicle, over a regular route, transporting: *Passengers and their baggage* in the same vehicle with passengers, between Lake of the Woods, Va., and the District of Columbia as follows: From Lake of the Woods, Va., over Virginia Highway 3 to junction with Interstate Highway 95, thence over Interstate Highway 95 to junction with U.S. Highway 17, thence over U.S. Highway 17 to junction with Virginia Secondary Highway 670, thence over Virginia Secondary Highway 670 to the parking lot of the Thr-Rift Inns, Ltd., thence return over Virginia Secondary Highway 670 to junction with U.S. Highway 17, thence via U.S. Highway 17 to junction with Interstate Highway 95, thence over Interstate Highway 95 to the District of Columbia, and return over the same route serving all intermediate points on Virginia Highway 3 between Lake of the Woods and junction Virginia Highway 3 and County Highway 734 (Green Gate Road), at a point approximately .6 of a mile west of junction Virginia Highway 3 and Interstate Highway 95, and the parking lot of Thr-Rift Inns, Ltd., located on Virginia Secondary Highway 670, approximately 0.2 of a mile west of junction of U.S. Highway 17 and Interstate Highway 95. Applicant states it currently is authorized by the certificate issued it in Docket No. MC 61802 Sub-No. 11 to provide service over the entire route being applied for except for the segments of U.S. Highway 17 and Virginia Secondary Highway 670 here involved which authority is being sought solely in order to permit applicant to serve the parking lot of Thr-Rift Inns, Ltd., as a new intermediate point, for the pick-up and discharge of Commuter passengers traveling to and from Washington, D.C.

NOTE.—If a hearing is deemed necessary applicant requests it be held at Washington, D.C.

No. MC 103210 (Sub-No. 5), filed July 8, 1977. Applicant: SERVICE BUS CO. INC., 798 Nepperhan Avenue, Yonkers, N.Y. 10703. Applicant's representative: Sidney J. Leshin, 575 Madison Avenue, New York, N.Y. 10022. NOTE.—If a hearing is deemed necessary, the applicant requests it to be held at San Francisco, Calif., or alternatively Seattle, Wash.

FINANCE APPLICATIONS

NOTICE

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control through ownership of stock, or rail carriers or motor carriers pursuant to Sections 5(2) or 210a(b) of the Interstate Commerce Act.

An original and two copies of protests against the granting of the requested authority must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protests shall comply with Special Rules 240 (c) or 240(d) of the Commission's General Rules of Practice (49 CFR 1100.240) and shall include a concise statement of protestant's interest in the proceeding. A copy of the protest shall be served concurrently upon applicant's representative, or applicant, if no representative is named.

No. MC-F-12443 (supplemental notice) Notice of this proposed transaction was originally published in the FEDERAL REGISTER on March 5, 1975. Authority sought for purchase by JERRY LIPPS, INC., 130 South Frederick Street, Cape Girardeau, Mo. 63701, of the operating rights of PASCAGOULA DRAYAGE COMPANY, INC., 701 East Pine Street, Hattiesburg, Miss. 39401, and for acquisition by Jerry Lipps, 130 S. Frederick Street, Cape Girardeau, Mo. 63701, of control of such rights through the purchase. Applicant's attorney: Edward G. Bazelon, 39 South LaSalle St., Chuoys,

V 42165 AUG 25 77 UM

Ill. 60603 and Harold D. Miller, Jr., P.O. Box 22567, Jackson, Miss. 39205. This transaction was approved, subject to conditions, by a report and order of the Commission, Division 3, Acting as an Appellate Division, served December 6, 1976. The report noted that the operating rights authorized to be transferred in vendor's certificate in No. MC–127689 (Sub-No. 15) had been modified (to change the commodity authorization version from "particleboard" to "fiberboard") and, accordingly, noted the transfer of the operating rights, as modified, should be given in the FEDERAL REGISTER. Notice is hereby given of the proposed transfer of vendor's certificate in No. MC–127689 (Sub-No. 15) which as modified by Division 3's report, authorizes the transportation of fiberboard, from Meridian, Miss., to Truman, Ark., with no transportation for compensation on return except as otherwise authorized, with said authority being restricted to the transportation of traffic originating at the plant site of Kroehler Manufacturing Company in Meridian, Miss., and destined to Truman, Ark. Said certificate will actually be transferred to vendee if no protest or petition is received within 30 days from the date of this notice.

No. MC–F–13304. Authority sought for control and merger by BECKER CORPORATION, P.O. Box 1050, El Dorado, KS 67042, of ROYAL TRANSPORTS, INC., 642 Adams, Kansas City, KS 66105, and for acquisition by FRANK J. BECKER, P.O. Box 1050, El Dorado, KS 67042, of control of such rights through the transaction. Applicants' attorneys: T. M. Brown, 223 Ciudad Bldg., Oklahoma City, OK 73112, John E. Jandera, 641 Harrison St., Topeka, KS 66603, and Michael Dwyer, Ste. 205, 4700 W. 50th Terrace, Shawnee Mission, KS 66205. Operating rights sought to be controlled and merged: Under MC–139227, Gasoline, diesel fuel, aviation fuel, fuel oil, asphalt, and asphalt products, in bulk, in tank vehicles, as a common carrier over irregular routes between points in Kansas, on the one hand, and, on the other, points in Missouri; Under MC–136956 and subs thereunder, the authority is presently pending or Temporary authority. Under MC–1340, (Royal Transports, Inc. of Nebraska) which is a wholly owned subsidiary of Royal Transports, Inc. of Kansas (transferor), Petroleum products, in bulk, as a common carrier over regular routes From Arkansas City, Kans., to points in Nebraska as follows, serving the intermediate points of Augusta, Wichita, and McPherson, Kans., restricted to pickup only, and Grafton, Sutton, Hastings, Kearney, Lexington, North Platte, Hershey, Sutherland, Paxton, Sidney, Potter, Kimball, Gibson, Shelton, Lawrence, Benkelman, Red Cloud, Stratton, Culbertson, McCook, Cambridge, Holdrege, Broken Bow, and Oshkosh, Nebr., restricted to delivery only, and the off route points of Eldorado, Kans., to be served from junction U.S. Highway 81 and Kansas Highway 196 over Kansas Highway 196 restricted to pickup only; Curley and Dalton, Nebr., to be served from Sidney, Nebr., from junction Nebraska Highway 19 and Nebraska Highway 385 (formerly portion Nebraska Highway 19), over Nebraska Highway 385, Wauneta and Palisade, Nebr., to be served from Culbertson, Nebr., over U.S. Highway 6, and Hayes Center, Nebr., to be served from junction U.S. Highway 6 and unnumbered highway (formerly portion Nebraska Highway 17), over unnumbered highway, restricted to delivery only; From Argentine, Kans., to Bushnell, Anselmo, and Fremont, Nebr., as follows, serving the intermediate points of Fairfield, Sutton, Grafton, Hastings, Kearney, Lexington, North Platte, Hershey, Sutherland, Paxton, Sidney, Kimball, Grand Island, and Broken Bow, Nebr., restricted to delivery only; and the off route points of Gurley and Dalton to be served from Sidney, Nebr., from junction Highway 19 and Nebraska Highway 385 (formerly portion Nebraska Highway 19).

Over Nebraska Highway 385, and Lawrence, Nebr., restricted to delivery only; liquid petroleum products, from Kansas points to points in Nebraska and Iowa, as follows, serving the intermediate points of Harlem, Iowa, restricted to delivery only, and Maryville, Mo., restricted to delivery of traffic moving from Eldorado, Kans., only; from Portsmouth, Iowa, to junction Iowa Highway 44 (formerly Iowa Highway 39) and U.S. Highway 30, serving no intermediate points; Petroleum products, in bulk, as a common carrier over irregular routes from refining and distributing points in Kansas to Auburn, Nebr.; liquid petroleum products, in bulk, in tank trucks, from Sugar Creek, Mo., to Anselmo, Ansley, Aranahoe, Ashland, Benkelman, Broken Bow, Cambridge, Culbertson, Dalton, Exeter, Fairbury, Fairfield, Fremont, Friend, Geneva, Gibbon, Grafton, Gretha, Grand Island, Haigler, Hastings, Hebron, Holdrege, Kearney, Kimball, Lawrence, Lexington, Lincoln, Lodgepole, McCook, Milford, North Platte, Ogallala, Omaha, Oshkosh, Palisado, Paxton, Red Cloud, Scribner, Sidney, Stratton, Sutherland, Sutton, Valley, Wahoo, Wallace, and Wauneta, Nebr., from Coffeyville, Kans., to Jolley and Lohrville, Iowa, from Coffeyville, Eldorado, McPherson, Arkansas City, Heodesha, and Augusta, Kans., to Malvern, Council Bluffs, Logan, Sioux City, Red Oak, Wesley, Titonka, Corning, Carroll, Bagley, Wall Lake, Manning, Rippey, Dunlap, Mapleton, and Havelock, Iowa, from Eldorado, McPherson, Arkansas City, Neodetha, and Augusta, Kans., to Jolley, Iowa; liquid petroleum products, in bulk, from refining and distributing points in Kansas to Cambridge, Broadwater, Omaha, Seribner, Fairbury, Arapahoe, Chester, Grafton, Geneva, Hastings, Kearney, Lexington, Paxton, Oshkosh, Ansley, Ogallala, Sutton, Exeter, Friend, Milford, Lincoln, Ashland, Gretna, Wahoo, Fremont, Hebron, Deshler, Irvington, Valley, and Morse Bluff, Nebr.; Catalogs, from McCook, Nebr., to Rexford, Menlo, Gem, Colby, Levant, Brewster, Edson, Goodland, Ruleton, Xanorado, St. Francis, Wheeler, Bird City, McDonald, Beardsley, Blakeman, Atwood, Ludell, Herndon, Traer, and Cedar Bluffs, Kans.; salt, from Hutchinson and Kanapolis, Kans., to McCook, Orleans, Cambridge, Indianola, and Benkelman, Nebr.; fruits and vegetables, from points in Colorado to McCook, Nebr.; Household goods, between McCook, Nebr., and points in Nebraska within 25 miles of McCook, on the one hand, and, on the other, points in Kansas and Colorado. Vendee is authorized to operate as a common carrier in Kansas, Nebraska, Oklahoma, Texas, New Mexico, Colorado, Iowa, South Dakota, North Dakota, Montana, Idaho, Minnesota, Wisconsin, Illinois, Missouri, Arkansas, and Louisiana. Application has been filed for temporary authority under section 210a(b).

NOTE.—Kaw Transport Company presently has contract to purchase Royal Transports, Inc. of Kansas stock. The contract is assigned to Becker Corporation.

No. MC–F 13306. Authority sought for purchase by BEE LINE MOTOR FREIGHT, INC., 1804 Paul Street, Omaha, NB 68102, of a portion of the operating rights of McAllister Transfer, Inc., 2415 Lincoln Avenue, York, NB 68467, and for acquisition by Velma Long, individually, of control of such rights through the purchase. Applicants' attorney: Donald L. Stern, Suite 530 Univac Building, 7100 West Center Road, Omaha, NB 68106. Operating rights sought to be transferred: That portion of Certificate MC 60912 authorizing General Commodities, with the usual exceptions, as a common carrier over regular routes, between Omaha, Nebraska, and Grand Island, Nebr., from Omaha over U.S. Highway 6 to Lincoln, Nebr., thence over U.S. Highway 34 to Grand Island, and all intermediate points west of Lincoln. The Purchase Agreement between Bee Line Motor Freight, Inc. and McAllister Transfer, Inc., is the subject of Sections 5 and 210a(b) applications. The effect of the authority sought to be acquired permits Transferee to serve intermediate points west of Lincoln, Nebraska on U.S. Highway 34 to Grand Island. Transferee already holds authority to serve Omaha, Lincoln, and Grand Island. The authority of Bee Line authorizes operations in the States of Iowa, Nebraska, and Colorado. Approval of this application and the herein noted application of Campbell Sixty-Six Express, Inc., and McAllister Transfer, Inc., will result in a division of that portion of the certificate of McAllister Transfer, Inc., authorizing the transportation of general commodities, with the usual exceptions, over regular routes between Omaha, Nebr., and Grand Island, Nebr. Application has been filed for temporary authority under Section 210a(b).

NOTE.—MC–F 13307 (Campbell Sixty-Six Express, Inc.—Purchase (Portion)—McAllister Transfer, Inc.) is a directly related matter.

OPERATING RIGHTS APPLICATION(S) DIRECTLY RELATED TO FINANCE PROCEEDINGS

NOTICE

The following operating rights application(s) are filed in connection with

pending finance applications under section 5(2) of the Interstate Commerce Act, or seek tacking and/or gateway elimination in connection with transfer applications under Section 212(b) of the Interstate Commerce Act.

An original and two copies of protests to the granting of the authorities must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protests shall comply with Special Rules 247(d) of the Commission's General Rules of Practice (49 CFR 1100.247) and include a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition should not be tendered at this time. A copy of the protest shall be served concurrently upon applicant's representative, or applicant if no representative is named.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

No. MC 37327 (Sub-No. 8), filed August 8, 1977. Applicant: PENN EMPIRE TRANSPORT, INC., P.O. Box 517, Livingston Ave., Jamestown, N.Y. 14701. Applicant's representative: Frederick T. O'Sullivan, P.O. Box 2184, Peabody, Mass. 01960. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *new furniture*, (1) from points in Massachusetts, to points in Allegany, Broome, Cattaraugus, Chautauqua, Erie, Genesee, Chemung, Livingston, Niagara, Orleans, Steuben, Tioga, and Wyoming Counties, N.Y. The purpose of this filing is to eliminate the gateways of Concord and Acton, Mass.; and (2) from points in Massachusetts, to points in Pennsylvania. The purpose of this filing is to eliminate the gateways of Concord and Acton, Mass., and Jamestown, N.Y.

NOTE.—These are gateway elimination requests and are matters directly related to a Section 5(2) proceeding in MC–F 13218 published in the FEDERAL REGISTER issue of July 8, 1977. If a hearing is deemed necessary, applicant requests that it be held at Boston, Mass.

No. MC 83430 (Sub-No. 12), filed August 8, 1977. Applicant: ONEIDA MOTOR FREIGHT, INC., Commercial Avenue, Carlstadt, N.J. 07072. Applicant's representative: William Biederman, 371 7th Avenue, New York, N.Y. 10001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) between points in New York, on the one hand, and, on the other, points in New Jersey, and those points in Bucks, Philadelphia, Delaware, and North Hampton Counties, Pa., the gateways to be eliminated are New York, N.Y., and points in Somerset, Hunterdon, Morris, Sussex, Warren, Passiac, Middlesex, Union, Hudson, Bergen Counties, N.J.; (2) between points in New York, on the one hand, and, on the other, Hartford, Conn., points in that part of Connecticut bounded by a line beginning at the New York-Connecticut State line and extending along U.S. Highway 6 to Sandy Hook, Conn., thence along Connecticut Highway 34 to New Haven, Conn., including points on those parts of the highways specified; the gateways to be eliminated are Essex, Hudson, Bergen, Passaic, and Union Counties, NJ.; and (3) between Athens and Sayre, Pa., on the one hand, and, on the other, Hartford, Conn., and points in New York, New Jersey, and those points in that part of Connecticut bounded by a line beginning at the New York-Connecticut State line and extending along U.S. Highway 6 to Sandy Hook, Conn., including those portions of the highways specified; the gateways to be eliminated are the New York Commercial Zone, Rockland, and Westchester Counties, N.Y., and Union, Somerset, Middlesex, Essex, Hudson, Bayonne, and Passaic Counties, N.J.

NOTE.—This is a matter directly related to a finance proceeding in MC–F 13022 which was noticed in the FEDERAL REGISTER issue of December 2, 1976. If a hearing is deemed necessary, applicant requests it be held at either New York, N.Y., Newark, N.J., or Washington, D.C.

No. MC 120761 (Sub-No. 21), filed June 15, 1977. Applicant: NEWMAN BROS. TRUCKING COMPANY, 6559 Midway Road, P.O. Box 13302, Fort Worth, Texas, 76118. Applicant's representative: Clayte Binion, 1108 Continental Life Building, Fort Worth, Texas 76102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (I) *Machinery, equipment, materials, and supplies*, used in, or in connection with, the discovery, development, production, refining, manufacture, processing storage, transmission, and distribution of natural gas and petroleum and their products and byproducts; and *machinery, materials, equipment, and supplies*, used in, or in connection with, construction, operation, repair, servicing, maintenance, and dismantling of pipelines, including the stringing and picking up thereof (except the stringing or picking up of pipe in connection with main or trunk pipelines); and *heavy machinery, and heavy or cumbersome commodities*, which because of size and weight, require the use of special equipment, and *parts* thereof; (1) between points in Texas; and (2) between points in Texas, on the one hand, and, on the other, points in New Mexico, Oklahoma, and Kansas; (II) *machinery, equipment, materials, and supplies*, used in, or in connection with, the discovery, development, production, refining, manuafcture, processing, storage, transmission, and distribution of natural gas and petroleum, and their products and byproducts; and *machinery, materials equipment, and supplies*, used in, or in connection with, the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, including the stringing and picking up thereof, (except the stringing and picking up of pipe in connection with main or trunk pipelines), between points in Texas, on the one hand, and, on the other, points in Colorado and Wyoming; and (III) *machinery, equipment, materials, and supplies*, used in, or in connection with, the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transportation of natural gas, petroleum, their products and byproducts, water or sewage, restricted to the transportation of shipments moving to or from pipeline rights-of-way: (1) Between points in Texas; and (2) between points in Texas, on the one hand, and, on the other, points in New Mexico, Oklahoma, and Kansas.

NOTE.—This is a Gateway Elimination Application, directly related to MC–F 13182. The purpose of this application is as follows:

To eliminate gateways with respect to Part (I) and Part (III) of the application, between points in that part of Texas, west of a line beginning at the Texas-Oklahoma State line, and extending along U.S. Highway 81 to Fort Worth, Texas, and north of a line beginning at Fort Worth, and extending along U.S. Highway 80 to El Paso, Tex., including points on the indicated portions of the highways specified, and between points in Texas, north of a line beginning at the Texas-New Mexico State line, and extending along the southern boundaries of Parmer, Castro, Swisher, Briscoe, Hall, and Childress Counties, Tex., to junction of Hardeman County line, thence west of a line extending along the Childress-Hardeman County line, to the Texas-Oklahoma State line; and

To eliminate gateways with respect to Part (II) of the application, between points in Texas, north of a line beginning at the Texas-New Mexico State line, and extending along the southern boundaries of Parmer, Castro, Swisher, Briscoe, Hall, and Childress Counties, Tex., to junction of Hardeman County line, thence west of a line extending along the Childress-Hardeman County line, to the Texas-Oklahoma State line; and to eliminate gateways in the State of Kansas.

The purpose of this republication is to add Part (III) to the application. Notice of the application filing in MC–F 13182 appeared in the FEDERAL REGISTER issue of April 21, 1977; and notice of the application filing in this matter appeared in the FEDERAL REGISTER issue of June 30, 1977.

No. MC 121586 (Sub-No. 2), filed June 29, 1977. Applicant: KRUSE TRANSPORTATION COMPANY, INC., 723 South 12th Street, Omaha, Nebr. 68102. Applicant's representative: Earl H. Scudder, Jr., P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of *General Commodities* (except those requiring special equipment), over irregular routes, (1) between points in Cass, Sarpy, Saunders, Dodge, Washington, and Douglas Counties, Nebr., on the one hand, and, on the other, Omaha, Nebr.; and between points in Cass, Sarpy, Saunders, Dodge, Washington, and Douglas Counties, Nebr., on the one hand, and, on the other, points in Nebraska on and east of U.S. Highway 183; (2) between Omaha, Nebr., on the one hand,

V 42165 AUG 25 77 UMI V

and, on the other, points in Otoe, Lancaster, Seward, Cass, Sarpy, Saunders, Butler, Platte, Colfax, Dodge, Washington, Douglas, Cuming, and Burt Counties, Nebr.

NOTE.—This is a matter directly related to a finance proceeding in MC-F 13153 which was noticed in the FEDERAL REGISTER issue of March 24, 1977. If a hearing is deemed necessary, applicant requests it be held at Phoenix, Ariz. Notice of this application having initially appeared in the FEDERAL REGISTER issue of July 14, 1977, and is renoticed above to indicate the broadened request for authority with respect to the second territorial description in Part (1).

MOTOR CARRIER INTRASTATE APPLICATION(S)

NOTICE

The following application(s) for motor common carrier authority to operate in intrastate commerce seek concurrent motor carrier authorization in interstate or foreign commerce within the limits of the intrastate authority sought, pursuant to Section 206 (a) (6) of the Interstate Commerce Act. These applications are governed by Special Rule 245 of the Commission's General Rules of Practice (49 CFR 1100.245), which provides, among other things, that protests and requests for information concerning the time and place of State Commission hearings or other proceedings, any subsequent changes therein, and any other related matters shall be directed to the State Commission with which the application is filed and shall *not* be addressed to or filed with the Interstate Commerce Commission.

Kansas Docket No. 7384, Route No. 71, filed July 29, 1977. Applicant: FRANCIS J. GORRELL, doing business as TOPLIFF TRUCK LINE, 746 North Santa Fe, Salina, Kans. 67401. Applicant's representative: Paul V. Dugan, 2707 West Douglas, Wichita, Kans. 67213. Certificate of Public Convenience and Necessity sought to operate a freight service as follows: Transportation of *General commodities* (except those of unusual value, dangerous explosives, household goods as defined in practices of motor common carrier of household goods, 17 M.C.C. 467, and those injurious or contaminating to other lading), between Salina, Kans., on the one hand, and, Prairie View, Kans., on the other hand, serving intermediate and off-route points of Lebanon, Bellaire, Smth Center, Athol, Kensington, Agra, Gretna, Stuttgart, and Phillipsburg, Kans., following route from Salina, Kans., north on U.S. Highway 81 to Belleville, Kans., thence west on U.S. Highway 36 to Prairie View, Kans. and return over the same route. Intrastate, interstate, and foreign commerce authority sought. Hearing: Date, time, and place scheduled for September 15th and 16th, 1977, at 10 a.m., starting on Thursday at 945 Second Street, North Kansas Savings Association Meeting Room, Phillipsburg, Kans. Requests for procedural information should be addressed to the Kansas State Corporation Commission, State Office Building, Topeka, Kans. 66612 and should not be directed to the Interstate Commerce Commission.

Kansas Docket No. 45376 M, Route No. 4068, filed July 29, 1977. Applicant: FRANCIS J. GORRELL, d.b.a., TOPLIFF TRUCK LINE, 746 North Santa Fe, Salina, Kans. 67401. Applicant's representative: Paul V. Dugan, 2707 West Douglas, Wichita, Kans. 67213. Certificate of Public Convenience and Necessity sought to operate a freight service as follows: Transportation of *Newspapers and light express type merchandise in packages*, not to exceed 150 pounds in weight and $100 in value: To, from, and between Salina, Kans., on the one hand and Phillipsburg, Kans., on the other hand, serving intermediate and off-route points of Glen Elder, Cawker City, Downs, Portis, Harlan, Smith Center, Athol, Kensington, Agra, and Gretna, Kans., over the following route: From Salina, Kans., north on U.S. Highway 81 to the intersection of U.S. Highway 24; thence west on U.S. Highway 24 to intersection of U.S. Highway 281; thence North on U.S. Highway 281 to U.S. Highway 36; thence west to Phillipsburg and return over the same route; and to, from, and between Salina, Kans., on the one hand and Phillipsburg, Kans., on the other hand, serving intermediate and off-route points of Osborne, Bloomington, Alton, Woodston, Stockton, and Glade over the following route: From Salina, Kans., north on U.S. Highway 81 to intersection of U.S. Highway 24; thence west on U.S. Highway 24 to Stockton, Kans.; thence north on U.S. Highway 183 to Phillipsburg, Kans., and return over the same route. Intrastate, interstate, and foreign commerce authority sought. Hearing: Date, time and place scheduled for September 15th and 16th, 1977, at 10 a.m., starting Thursday at 945 Second Street, North Kansas Savings Association Meeting Room, Phillipsburg, Kans. Requests for procedural information should be addressed to the Kansas State Corporation Commission, State Office Building, Topeka, Kans. 66612, and should not be directed to the Interstate Commerce Commission.

Maine Docket No. X-5572 (amendment), filed August 5, 1977. Applicant: LUCIEN BISSON, INC., New Meadows Road, West Bath, Maine 04530. Applicant's representative: Southard, Hunt & Hebert, 128 State Street Augusta, Maine 04106. Certificate of Public Convenience and Necessity sought to operate a freight service as follows: Transportation of *Household goods* as listed in Routes A–1, through A–3 and Scarboro, Maine, for interlining only. Regular routes: A–1 Between Portland-So. Portland and Nobleboro, serving in both directions the following: Portland, South Portland, Freeport, Brunswick, Topsham, Pejepscot, Bath, West Bath, Woolwich, Montsweag, Wiscasset, Sheepscot, Alna, Head Tide, N. Edgecomb along the line of No. 1 highway, Whitehead, Damariscotta Mills, S. Newcastle, Newcastle, Damaruscitta, Walpole, Clark's Cove, So. Bristol, Nobleboro, A–2 Boothbay Harbor to Portland-South Portland as follows: Boothbay Harbor to North Edgecomb including: Boothbay Harbor, Bayville, Edgecomb, Southport, West Bath, Newagen, Trevett, W. Boothbay Harbor, Brunswick, Bath, E. Boothbay, Ocean Point, N. Edgecomb, W. Southport.

Serving to and/or from all points shown above. Wiscasset to Portland-S. Portland including: Wiscasset, Woolwich, Freeport, Yarmouth, Portland-S. Portland. Serving to and from points with only such freight as is shipped from or destined to the points Boothbay-N. Edgecomb shown above.

NOTE.—No freight or merchandise to be picked up at Portland and South Portland to be delivered at Bath and Brunswick and no freight or merchandise to be picked up at Bath and Brunswick to be delivered at Portland and South Portland.

A–3 Portland-S. Portland to Pemaquid, Bristol to Pemaquid including: Bristol, Pemaquid Harbor, Pemaquid, Muscongus, Chamberlain, Bremen, Pemaquid Point, Pemaquid Beach, New Harbor, Medomak, Broad Cove, Round Pond. Serving to and/or from all points.

Pemaquid to Portland-S. Portland, including: Damariscotta, Newcastle, Freeport, Bath, Brunswick, Woolwich, West Bath, Wiscasset, Portland-S. Portland. Serving to and/or from these points with only such freight as is shipped from or destined to points: Bristol, Pemaquid Harbor, Pemaquid, Muscongus, Chamberlain, Bremen, Pemaquid Point, Pemaquid Beach, New Harbor, Medomak, Broad Cove, Round Pond. Intrastate, interstate and foreign commerce authority sought. Hearing: Date, time and place not yet fixed. Requests for procedural information should be addressed to the Maine Public Utilities Commission, State House Annex, Capitol Shopping Center, Augusta, Maine 04330 and should not be directed to the Interstate Commerce Commission.

Montana Docket No. 3389 filed May 11, 1977. Applicant: JAMES VON GUNTEN, doing business as RED RIVER VALLEY STAGE, 1109 11th St., North, Great Falls, Mont. 59401. Applicant's representative: Ray F. Koby, 314 Montana Building, Great Falls, Mont. 59401. Certificate of Public Convenience and Necessity sought to operate a freight service as follows: Transportation of *Passengers, baggage and express* (a) over regular routes from Great Falls, Mont., to East Glacier, Mont. via U.S. Highway 89 from Great Falls to Browning, Mont., and U.S. Highway 2 from Browning to East Glacier, Mont. and return over the same route, serving all intermediate points and the off route point of Valier, Mont. via Montana Highway 216 from its junction with U.S. Highway 89, in Class A service; and (b) in charter service over irregular routes, from all points served in Class A service, to all other points in Montana, in Class B service. Intrastate, interstate and foreign commerce authority sought. Hearing: Date, time and place scheduled for October 4, 1977, in Great Falls, Mont., at a time and place to be later assigned. Requests for procedural information

should be addressed to the Montana Public Service Commission, 1227–11th Avenue, Helena, Mont. 59601 and should not be directed to the Interstate Commerce Commission.

Docket MC 96769, filed August 5, 1977. Applicant: LIBERTY TEX-PACK EXPRESS, INC., Suite 508, Regal Plaza, 1499 Regal Row, Dallas, Tex. 75247. Applicant's representative: Austin L. Hatchell, 1102 Perry Brooks Bldg., Austin, Texas 78701. Authority sought as a *common carrier*, by motor vehicle, over regular routes, as an extension to an existing operations, transporting: *General commodities*, moving in express service, to, from and between all points along the routes appearing below subject to the following restriction: (1) No service shall be provided in the transportation of packages or articles weighing in the aggregate more than 100 pounds from one consignor at one location to one consignee at one location on any one day, over U.S. Hwys. 271 and 67 between Mt. Pleasant and Texarkana, Texas, serving the intermediate points of Omaha, Naples and Maud, Tex., coordinating this service with all existing services and interlining with other carriers at appropriate interline points. Intrastate, interstate and foreign commerce authority sought. Hearing: Date, time and place not yet fixed. Requests for procedural information should be addressed to the Texas Railroad Commission, P.O. Drawer 12967, Capitol Station, Austin, Tex. 78711 and should not be addressed to the Interstate Commerce Commission.

Oklahoma Docket No. MC 23190 (Sub-No. 8), filed August 10, 1977. Applicant: OKMULGEE EXPRESS, INC., 207 North Cincinnati, Tulsa, Oklahoma 74103. Applicant's representative: Rufus H. Lawson, 106 Bixler Building, 2400 Northwest 23rd Street, Oklahoma City, Oklahoma 73107. Certificate of Public Convenience and Necessity sought to operate a freight service as follows: *General Commodities* (except classes A and B explosives, commodities in bulk, articles of unusual value, household goods as defined by the Commission, and commodities requiring special equipment), over regular routes, (1) Between Henryetta, Oklahoma, and McAlester, Oklahoma. From Henryetta, Oklahoma over the Indian Nation Turnpike to junction with U.S. Highway 270, thence over U.S. Highway 270 to McAlester, Oklahoma, serving no intermediate points; (2) Between McAlester, Oklahoma, and Poteau, Oklahoma. From McAlester, Oklahoma over U.S. Highway 270 to its junction with U.S. Highway 271, thence over U.S. Highway 271 to Poteau, Oklahoma, serving all intermediate points and the off-route point of Krebs, Oklahoma; (3) Between Poteau, Oklahoma and the Oklahoma-Arkansas State Line. From Poteau, Oklahoma over State Highway 112 to its junction with U.S. Highway 271, thence over U.S. 271 to the Oklahoma-Arkansas State Line, serving the off-route points of Cameron, Rock Island, and Pocola, Oklahoma, and return over the same route; (4) Between Wister, Oklahoma and Hodgens, Oklahoma. From Wister, Oklahoma over U.S. Highway 270 to Hodgens, Oklahoma; (5) Between Hodgens, Oklahoma and Poteau, Oklahoma. From Hodgens, Oklahoma over U.S. Highway 59 to Poteau, Oklahoma, serving the intermediate points of Howe and Heavener, Oklahoma; and (6) Between Poteau, Oklahoma, and Henryetta, Oklahoma. From Poteau, Oklahoma over U.S. Highway 59 to its junction with I–40, thence over I–40 to Henryetta, Oklahoma, serving the intermediate point of Shady Point and Panama, Oklahoma.

NOTE.—Notice is given that application includes the request to unitize applicant's present authority, and, if granted, the authority sought in this application, to provide service to, from and, between all points under applicant's combined authorities. Intrastate, interstate and foreign commerce authority sought.

Hearing: Date, time and place scheduled for November 1, 1977, at 9 a.m., 3rd Floor Jim Thorpe Office Building, Oklahoma City, Oklahoma 73105. Requests for procedural information should be addressed to the Oklahoma Corporation Commission, Jim Thorpe Office Building, Oklahoma City, Okla. 73105 and should not be directed to the Interstate Commerce Commission.

By the Commission.

H. G. HOMME, JR.,
Acting Secretary.

[Volume No. 29]

PETITIONS, APPLICATIONS, FINANCE MATTERS (INCLUDING TEMPORARY AUTHORITIES), RAILROAD ABANDONMENTS, ALTERNATE ROUTE DEVIATIONS, AND INTRASTATE APPLICATIONS; CORRECTIONS

Petitions for Modification, Interpretation, or Reinstatement of Operating Rights Authority

In FR Doc. 23082 appearing at page 40723 in the issue for Thursday, August 11, 1977, the following corrections should be made.

1. In the third column on page 40736 the application number which now reads, "MC 123407 (Sub No. 338)", should read, "MC 123407 (Sub No. 388)".

2. In the first column on page 40740 the application which now reads, "MC 13447", should read, "MC 134477".

3. In the third column on page 40744 the application number which now reads, "MC 140065", should read "MC 142065".

[Notice No. 464]

Assignment of Hearings

AUGUST 22, 1977.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 97068 (Sub-No. 16), H. S. Anderson Trucking Company, now assigned October 17, 1977, at New Orleans, La., is canceled and reassigned for hearing on October 14, 1977, at Houston, Tex., in a hearing room to be later designated.

MC 142807 Nicholas Marino and Angelina Marino, DBA Farragut Travel Service, now being assigned December 12, 1977 (1 week), at Trenton, N.J., in a hearing room to be later designated.

MC 136605 (Sub-No. 26), Davis Bros. Dist., Inc., now being assigned November 1, 1977 (1 day), for hearing in Billings, Mont., in a hearing room to be later designated.

MC–F 13115 Dixon Bros., Inc.—Control—C. & R. Transfer Company, now being assigned November 2, 1977 (3 days), for hearing in Billings, Mont., in a hearing room to be later designated.

MC 107541 (Sub-No. 45), Washington Oregon Lumber Freighters, Inc., now being assigned November 7, 1977 (2 weeks), for hearing in Portland, Oreg., in a hearing room to be later designated.

MC 116763 (Sub-No. 362), Carl Subler Trucking, Inc., now assigned November 10, 1977 at Columbus, Ohio is cancelled.

IRREGULAR ROUTE MOTOR COMMON CARRIERS OF PROPERTY

Elimination of Gateway Letter Notices

AUGUST 19, 1977.

The following letter notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's Gateway Elimination Rules (49 CFR 1065), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission by September 5, 1977. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successively filed letter notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter notices by number.

No. MC 2607 (Sub-No. E88), filed June 4, 1974. Applicant: BERRY VAN LINES, 747 North Dupont Hwy., Dover, Del. 19901. Applicant's representative: Robert J. Gallagher, Suite 1200, 1000 Connecticut Avenue NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Canned or preserved foodstuffs* (except commodities in bulk), from points in New York to points in Wicomico, Somerset, and Worcester Counties, Md. The purpose of this filing is to eliminate the gateways of points in Caroline, Dorcester, and Talbot Counties, Md.

No. MC 2607 (Sub-No. E95), filed June 4, 1974. Applicant: BERRY VAN LINES, 747 North Dupont Hwy., Dover, Del. 19901. Applicant's representative: Robert J. Gallagher, Suite 1200, 1000 Connecticut Avenue NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Canned or preserved foodstuffs* (except commodities in bulk), from points in New Jersey to points in Wicomico, Worcester, and Somerset Counties, Md. The purpose of this filing is to eliminate the gateways of points in Caroline, Dorcester, and Talbot Counties, Md.

No. MC 2607 (Sub-No. E120), filed June 4, 1974. Applicant BERRY VAN LINES, 747 North Dupont Hwy., Dover, Del. 19901. Applicant's representative: Robert J. Gallagher, Suite 1200, 1000 Connecticut Avenue NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Canned or preserved foodstuffs* (except commodities in bulk), from points in Pennsylvania, to points in Somerset, Worcester, and Wicomico Counties, Md. The purpose of this filing is to eliminate the gateways of points in Caroline, Dorchester, and Talbot Counties, Md.

No. MC 7971 (Sub-No. E1), filed June 4, 1974. Applicant: AMERICAN SECURITY VAN LINE, INC., 4410 Wendell Drive NW., Atlanta, Ga. 30336. Applicant's representative: Harold W. Breffle (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, (1) between points in Cook, Du Page, Lake, and Will Counties, Ill., on the one hand, and, on the other, points in Aransas, Bee Brazoria, Brooks, Calhoun, Cameron, Chanbers, Duval, Fort Bend, Galveston, Goliad, Harris, Hidalgo, Jackson, Jefferson, Jim Hogg, Jim Wells, Kenedy, Kleberg, Liberty, Matagordo, Montgomery, Nueces, Orange, Refugio, San Patrico, Starr, Victata, Webb, Wharton, Willacy, and Zapata Counties, Tex., and (2) between points in Lake County, Ind., and those points in Indiana on and east of a line extending from Hammond, Ind., along U.S. Highway 41 to junction U.S. Highway 52, thence along U.S. Highway 52 to Lafayette, Ind., thence along U.S. Highway 231 to Indiana-Kentucky State line, on the one hand, and, on the other, points in Texas on, south and east of a line beginning at the Texas-Louisiana State line and extending along Texas Highway 21 to junction Texas Highway 103 to Lufkin, Tex.; thence along Texas Highway 94 to Huntsville, Tex., thence along Texas Highway 30 to Bryan, Tex.; thence along Texas Highway 21 to junction U.S. Highway 290 to Austin, Tex.; thence along Interstate Highway 35 to San Antonio, Tex.; thence along U.S. Highway 90 to Del Rio, Tex. The purpose of this filing is to eliminate the gateway of Birmingham, Ala.

No. MC 8973 (Sub-No. E49), filed June 4, 1974. Applicant: METROPOLITAN TRUCKING, INC., 2424 95th Street, North Bergen, N.J. 07047. Applicant's representative: Nicholas A. Mangino (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Gypsum and gypsum products, asphalt and composition roofing products, composition boards, urethane and urethane products, and insulating materials* (except those of unusual value, household goods, as defined by the Commission. Classes A and B explosives, commodities in bulk and those requiring special equipment), (1) from points in Bergen, Essex, Hudson, Middlesex, Passaic, and Union Counties, N.J., to points in Alabama, Arkansas, Illinois, Indiana, Kentucky, Louisiana, Michigan, Mississippi, Ohio, Tennessee, and West Virginia; (2) from points in Morris County, N.J., to points in Alabama, Arkansas, Illinois, Indiana, Kentucky, Louisiana, Michigan, Mississippi, Ohio, and Tennessee; (3) from points in Somerset County, N.J., to points in Alabama, Arkansas, Illinois, Indiana, Kentucky, Louisiana, Michigan, Mississippi, Ohio, and Tennessee; (4) from points in that part of Morris County, N.J., on and west of a line beginning at the junction of New Jersey Highway 23 and Oak Ridge Reservoir and extending along an unmarked road south through Petersburg where it intersects New Jersey Highway 15, thence along New Jersey Highway 15 to junction unmarked road to Kenvil to Succasunna to junction New Jersey Highway 10 and thence south and east to junction unmarked road and thence south along unmarked road to Ralston to junction New Jersey Highway 24, thence south along Rariton River to Morris-Somerset County line to points in West Virginia; (5) from points in Morris County, N.J., to that portion of West Virginia on, south and west of a line beginning at the Ohio-West Virginia State line at Wheeling, W. Va., thence south along West Virginia Highway 2 to junction U.S. Highway 250, thence south and east along U.S. Highway 250 to junction unmarked road, thence south along unmarked road to junction U.S. Highway 19, thence north along U.S. Highway 19 to Fairmont, thence south on an unmarked road to Grafton, thence south on U.S. Highway 250 to Elkins, thence east on U.S. Highway 33 through Brandywine to the West Virginia-Virginia State line.

(6) From points in Somerset County, N.J., to that portion of West Virginia on, south and west of a line beginning at the West Virginia-Pennsylvania State line near Mount Morris and extending south along U.S. Highway 19 through Morgantown to junction West Virginia Highway 7, thence east along West Virginia Highway 7 to the West Virginia-Maryland State line near Oakland, Md., thence commencing at the Maryland-West Virginia State line extending along unmarked highway through Elk Garden, thence south along West Virginia Highway 42 to junction U.S. Highway 50, thence north and east along U.S. Highway 50 to junction U.S. Highway 220 to Keyser, W. Va., thence east along West Virginia Highway 46 to Springfield to junction West Virginia Highway 29 to junction West Virginia Highway 45, thence south along Cacapon River to Capon bridge, thence east along U.S. Highway 50 to the West Virginia-Virginia State line; (7) from that portion of Somerset County, N.J., on, east and north of a line commencing at the Morris-Somerset County line, and extending south along New Jersey Highway 527 to Mount Bethel, N.J., thence south on King George Road to junction Washington Valley Road, thence east on Washington Valley Road to junction New Jersey Highway 525, thence south on New Jersey Highway 525 to junction Chimney Rock Road, thence south on Chimney Rock Road to junction New Jersey Highway 533, thence west and south on New Jersey Highway 533 to junction New Jersey Highway 514, thence east on New Jersey Highway 514 to junction with the track of the Penn Central Railroad Co., thence east along the Penn Central Railroad Track to Middlebush Road, thence south on Middlebush Road to junction Claremont Road, thence east on Claremont Road to the Somerset-Middlesex County line, to points in West Virginia. The purpose of this filing is to eliminate the gateways of New York, N.Y., Edgewater and Carteret, N.J.

No. MC 8973 (Sub-No. E60), filed June 4, 1974. Applicant: METROPOLITAN TRUCKING, INC., 2424 95th Street, North Bergen, N.J. 07047. Applicant's representative: Nicholas A. Mangino (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such building materials*, as are embraced in *gypsum and gypsum products, asphalt and composition roofing products, composition boards, urethane and urethane products and insulating materials* (except those of unusual value, household goods as defined by the Commission. Classes A and B explosives, commodities in bulk, and those requiring special equipment), (1) from points in Bergen, Essex, Hudson, Middlesex, Passaic, and Union Counties, N.J., to points in Alabama, Arkansas, Illinois, Indiana, Kentucky, Louisiana, Michigan, Mississippi, Ohio, Tennessee and West Virginia; (2) from points in Morris County, N.J., to points in Alabama, Arkansas, Illinois, Indiana, Kentucky, Louisiana, Michigan, Mississippi, Ohio, and Tennessee; (3) from points in Somerset County, N.J., to points in Alabama, Arkansas, Illinois, Indiana, Kentucky, Louisiana, Michigan, Mississippi, Ohio, and Tennessee; (3) from points in that part of Morris County, N.J., on and east of a line starting at junction New Jersey Highway 23 and New Jersey Highway 513 near Newfoundland, N.J., and extending south along New Jersey Highway 513 to Victory Gardens, N.J., thence along unumbered highway to junction New Jersey Highway 24, thence easterly 2 miles along New Jersey Highway 24 to unnumbered road, thence south to the Morris County line, to points in West Virginia; (5) from points in Morris County, N.J.; to that part of West Virginia on U.S. Highway 22, thence west on U.S. Highway 22 to junction Tea Street, thence south on Tea Street to junction New Jersey Highway 28, thence west on New Jersey Highway 28 to junction Interstate Highway 287, thence south and east on Interstate Highway 287 to junction Elizabeth Ave., thence south on Elizabeth Ave., to junction Pennsylvania-Central Freight Lines, thence east on Pennsylvania-Central Freight Lines to Middlesex-Somerset County line at Voorhees, to points in West Virginia. The purpose of this filing is to eliminate the gateways of New York, N.Y., Edgewater and Carteret, N.J.

No. MC 40215 (Sub-No. E12), filed May 17, 1974. Applicant: RICHARDSON TRANSFER & STORAGE CO., INC., 246 N. Fifth Avenue, Salina, Kans. 67401. Applicant's representative: James F. Flint, Ephraim & Polydoroff, Suite 600, 1250 Connecticut Avenue, NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, (1) from points in Kansas on and north of a line beginning at Kansas-Missouri State line, and extending along U.S. Highway 24, to junction Kansas Highway 4, to junction Kansas Highway 99, to junction U.S. Highway 50 (formerly U.S. Highway 50S), thence along U.S. Highway 50 to Kansas-Colorado State line, to points in Arizona; (2) from points in Kansas on and east of a line beginning at the Kansas-Nebraska State line, and extending along U.S. Highway 77, thence south along U.S. Highway 77 to junction U.S. Highway 24, thence along U.S. Highway 24 to junction Kansas Highway 18 (formerly U.S. Highway 40), to junction U.S. Highway 77, thence along U.S. Highway 77 to junction U.S. Highway 56 (formerly U.S. Highway 50N), to junction U.S. Highway 156 (formerly U.S. Highway 50N) to Garden City, Kans., thence east along U.S. Highway 50 to junction Kansas Highway 99, thence along Kansas Highway 99 to junction Kansas Highway 4, thence along Kansas Highway 4 to junction U.S. Highway 24, thence east along U.S. Highway 24 to the Kansas-Missouri State line, to points in Kansas; (3) from points in Kansas on and north of a line beginning at the Kansas-Missouri State line, and extending along U.S. Highway 24 to junction Kansas Highway 4, to junction Kansas Highway 99, to junction U.S. Highway 50 (formerly U.S. Highway 50S) to Garden City, Kans., and thence along U.S. Highway 50 to Kansas-Colorado State line, to points in California; (4) from points in Kansas beginning at Garden City, Kans., and extending along U.S. Highway 156 and U.S. Highway 50, thence east along U.S. Highway 156 to junction U.S. Highway 56, thence east along U.S. Highway 56 to junction U.S. Highway 81, thence south along U.S. Highway 81 to junction U.S. Highway 50, thence west along U.S. Highway 50 to Garden City, Kans., to points in Colorado; (5) from points in Kansas to points in the District of Columbia.

(6) (a) From those points in Kansas on and south of a line beginning at the Kansas-Colorado State line, and extending along Interstate Highway 70 and U.S. Highway 24, thence east along Interstate Highway 70 and U.S. Highway 24 to junction U.S. Highway 81, thence south along U.S. Highway 81 to junction U.S. Highway 50, thence west along U.S. Highway 50 to the Kansas-Colorado State line, to points in Idaho north and west of a line begining at the Nevada-Idaho State line and extending on U.S. Highway 93, thence north along U.S. Highway 93 to the Montana-Idaho State line; (b) from points in Kansas on and east of a line beginning at the Kansas-Nebraska State line, and extending along U.S. Highway 77, thence south along U.S. Highway 77 to junction U.S. Highway 24, thence along U.S. Highway 24 to junction Kansas Highway 18 (formerly U.S. Highway 40) to junction U.S. Highway 77, thence along U.S. Highway 77 to junction U.S. Highway 56 (formerly U.S. Highway 50N) to junction U.S. Highway 156 (formerly U.S. Highway 50N) to Garden City, Kans., thence east along U.S. Highway 50 to junction Kansas Highway 99, thence along Kansas Highway 99 to junction Kansas Highway 4, thence along Kansas Highway 4 to junction U.S. Highway 24, thence east along U.S. Highway 24 to the Kansas-Missouri State line, to points in Illinois; (8) from points in Kansas on and east of a line beginning at the Kansas-Nebraska State

VOL 42 165 AUG 25 77 UM

line and extending along U.S. Highway 77, thence south along U.S. Highway 77 to junction U.S. Highway 24, thence along U.S. Highway 24 to junction Kansas Highway 18 (formerly U.S. Highway 40) to junction U.S. Highway 77, thence along U.S. Highway 77 to junction U.S. Highway 56 (formerly U.S. Highway 50N) to junction U.S. Highway 156 (formerly U.S. Highway 50N) to Garden City, Kans., thence east along U.S. Highway 50 to junction Kansas Highway 99, thence along Kansas Highway 99 to junction Kansas Highway 4, thence along Kansas Highway 4 to junction U.S. Highway 24, thence east along U.S. Highway 24 to the Kansas-Missouri State line, to points in Indiana.

(9) From points in Kansas on and south and east of a line beginning at the Kansas-Nebraska State line, and extending along U.S. Highway 77, thence south along U.S. Highway 77 to junction U.S. Highway 24, thence along U.S. Highway 24 to junction Kansas Highway 18 (formerly U.S. Highway 40) to junction U.S. Highway 77, thence along U.S. Highway 77 to junction U.S. Highway 56 (formerly U.S. Highway 40) to junction U.S. Highway 156 (formerly U.S. Highway 50N) to Garden City, Kans., thence east along U.S. Highway 50 to junction Kansas Highway 99, thence along Kansas Highway 99 to junction Kansas Highway 4, thence along Kansas Highway 4 to U.S. Highway 24, thence east along U.S. Highway 24 to the Kansas-Missouri State line, to points in Iowa on and north and east of a line beginning at the Iowa-Nebraska State line and extending along Interstate Highway 80, thence east along Interstate Highway 80 to junction U.S. Highway 65, thence south along U.S. Highway 65 to the Iowa-Missouri State line; (10) from points in Kansas on and north of a line beginning at Kansas-Missouri State line, and extending along U.S. Highway 24 to junction Kansas Highway 4, thence along Kansas Highway 4 to junction Kansas Highway 99, thence along Kansas Highway 99 to junction U.S. Highway 50 (formerly U.S. Highway 50S), thence along U.S. Highway 50 to the Kansas-Colorado State line, to points in Louisiana; (11) from points in Kansas to points in Maryland; (12) from points in Kansas on and east of a line beginning at the Kansas-Nebraska State line, and extending along U.S. Highway 77, thence south along U.S. Highway 77 to junction U.S. Highway 24, thence along U.S. Highway 24 to junction Kansas Highway 18 (formerly U.S. Highway 40) to junction U.S. Highway 77, thence along U.S. Highway 77 to junction U.S. Highway 56 (formerly U.S. Highway 40) to junction U.S. Highway 156 (formerly U.S. Highway 50N) to Garden City, Kans., thence east along U.S. Highway 50 to junction Kansas Highway 99, thence along Kansas Highway 99 to junction Kansas Highway 4, thence along Kansas Highway 4 to U.S. Highway 24, thence east along U.S. Highway 24 to the Kansas-Missouri State line, to points in Michigan.

(13) From points in Kansas bounded by a line beginning at the Kansas-Nebraska State line and extending along U.S. Highway 77, thence south along U.S. Highway 77 to junction U.S. Highway 24, thence along U.S. Highway 24 to junction Kansas Highway 18 (formerly U.S. Highway 40) to junction U.S. Highway 77, thence along U.S. Highway 77 to junction U.S. Highway 56 (formerly U.S. Highway 50N) to junction U.S. Highway 156 (formerly U.S. Highway 50N) to Garden City, Kans., thence east along U.S. Highway 50 to junction Kansas Highway 99, thence along Kansas Highway 99 to junction Kansas Highway 4, thence along Kansas Highway 4 to junction U.S. Highway 24, thence east along U.S. Highway 24 to the Kansas-Missouri State line, to points in Indiana.

(9) From points in Kansas on and south and east of a line beginning at the Kansas-Nebraska State line, and extending along U.S. Highway 77, thence south along U.S. Highway 77 to junction U.S. Highway 24, thence along U.S. Highway 24 to junction Kansas Highway 18 (formerly U.S. Highway 40) to junction U.S. Highway 77, thence along U.S. Highway 77 to junction U.S. Highway 56 (formerly U.S. Highway 40) to junction U.S. Highway 156 (formerly U.S. Highway 50N) to Garden City, Kans., thence east along U.S. Highway 50 to junction Kansas Highway 99, thence along Kansas Highway 99 to junction Kansas Highway 4, thence along Kansas Highway 4 to U.S. Highway 24, thence east along U.S. Highway 24 to the Kansas-Missouri State line, to points in Iowa on and north and east of a line beginning at the Iowa-Nebraska State line and extending along Interstate Highway 80, thence east along Interstate Highway 80 to junction U.S. Highway 65, thence south along U.S. Highway 65 to the Iowa-Missouri State line; (10) from points in Kansas on and north of a line beginning at Kansas-Missouri State line, and extending along U.S. Highway 24 to junction Kansas Highway 4, thence along Kansas Highway 4 to junction Kansas Highway 99, thence along Kansas Highway 99 to junction U.S. Highway 50 (formerly U.S. Highway 50S), thence along U.S. Highway 50 to the Kansas-Colorado State line, to points in Louisiana; (11) from points in Kansas to points in Maryland; (12) from points in Kansas on and east of a line beginning at the Kansas-Nebraska State line, and extending along U.S. Highway 77, thence south along U.S. Highway 77 to junction U.S. Highway 24, thence along U.S. Highway 24 to junction Kansas Highway 18 (formerly U.S. Highway 40) to junction U.S. Highway 77, thence along U.S. Highway 77 to junction U.S. Highway 56 (formerly U.S. Highway 40) to junction U.S. Highway 156 (formerly U.S. Highway 50N) to Garden City, Kans., thence east along U.S. Highway 50 to junction Kansas Highway 99, thence along Kansas Highway 99 to junction Kansas Highway 4, thence along Kansas Highway 4 to U.S. Highway 24, thence east along U.S. Highway 24 to the Kansas-Missouri State line, to points in Michigan.

(13) From points in Kansas bounded by a line beginning at the Kansas-Nebraska State line and extending along U.S. Highway 77, thence south along U.S. Highway 77 to junction U.S. Highway 24, thence along U.S. Highway 24 to junction Kansas Highway 18 (formerly U.S. Highway 40) to junction U.S. Highway 77, thence along U.S. Highway 77 to junction U.S. Highway 56 (formerly U.S. Highway 50N) to junction U.S. Highway 156 (formerly U.S. Highway 50N) to Garden City, Kans., thence east along U.S. Highway 50 to junction Kansas Highway 99, thence along Kansas Highway 99 to junction Kansas Highway 4, thence along Kansas Highway 4 to junction U.S. Highway 24, thence east along U.S. Highway 24 to the Kansas-Missouri State line, to points in Minnesota; (14) from points in Kansas beginning at Garden City, Kans., and extending along U.S. Highway 156, thence east along U.S. Highway 156 to junction U.S. Highway 56, thence east along U.S. Highway 56 to junction U.S. Highway 81, thence south along U.S. Highway 81 to junction U.S. Highway 50, thence west along U.S. Highway 50 to Garden City, Kans., to points in Missouri; (15) from those points in Kansas beginning at Garden City, Kans., and extending along U.S. Highway 156, thence east along U.S. Highway 156 to junction U.S. Highway 56, thence east along U.S. Highway 56 to junction U.S. Highway 81, thence south along U.S. Highway 81 to junction U.S. Highway 50, thence west along U.S. Highway 50 to Garden City, Kans., to points in Nebraska; (16)(a) from points in Kansas on and east of a line beginning at the Nebraska-Kansas State line and extending along U.S. Highway 281, thence south along U.S. Highway 281 to junction U.S. Highway 50, thence east along U.S. Highway 50 to Kansas Highway 99, thence north along Kansas Highway 99 to junction Kansas Highway 4, thence along Kansas Highway 4 to junction U.S. Highway 24, thence east along U.S. Highway 24 to the Kansas-Missouri State line, to points in Nevada; (16)(b) from points in Kansas on, west and south of a line beginning at the Kansas-Nebraska State line, and extending along U.S. Highway 281, thence along U.S. Highway 281 to junction U.S. Highway 50, thence west along U.S. Highway 50 to the Kansas-Colorado State line, to those points in Nevada on and south of a line beginning at the Nevada-California State line, and extending along U.S. Highway 6, thence east along U.S. Highway 6 to junction Nevada Highway 25, thence southeast along Nevada Highway 25 to junction U.S. Highway 93, thence east along U.S. Highway 93 to junction Nevada Highway 25, thence along Nevada Highway 25 to the Nevada-Utah State line; (17) from points in Kansas on and north of a line beginning at the Kansas-Missouri State line, and extending along U.S. Highway 24 to junction Kansas Highway 4, thence along Kansas Highway 4 to junction Kansas Highway 99, thence along Kansas Highway 99 to junction U.S. Highway 50 (formerly U.S. Highway 50S) thence along U.S. Highway 50 to junction Kansas-Colorado State line, to points in New Mexico.

(18) From points in Kansas to points in New York; (19) from points in Kansas on and north of a line beginning at Kansas-Missouri State line, and extending along U.S. Highway 24 to junction Kansas Highway 4, thence along Kansas Highway 4 to junction Kansas Highway 99, thence along Kansas Highway 99 to junction U.S. Highway 50 (formerly U.S. Highway 50S) to Garden City, Kans., and thence along U.S. Highway 50 to the Kansas-Colorado State line, to points in North Carolina; (20) from points in Kansas on and east of a line beginning at the Kansas-Nebraska State line, and extending along U.S. Highway 77, thence south along U.S. Highway 77 to junction U.S. Highway 24, thence along U.S. Highway 24 to junction Kansas Highway 18 (formerly U.S. Highway 40) to junction U.S. Highway 77, thence along U.S. Highway 77 to junction U.S. Highway 56 (formerly U.S. Highway 50N) to junction U.S. Highway 156 (formerly U.S. Highway 50N) to Garden City, Kans., thence along east on U.S. Highway 50 to junction Kansas Highway 99, thence along Kansas Highway 99 to Kansas Highway 4, thence along Kansas Highway 4 to U.S. Highway 24, thence along U.S. Highway 24 to the Kansas-Missouri State line, to points in Ohio; (21) from points in Kansas beginning at Garden City, Kans., at the junction U.S. Highway 156 and U.S. Highway 50, thence east along U.S. Highway 156 to junction U.S. Highway 56, thence east along U.S. Highway 56 to junction of U.S. Highway 81, thence south along U.S. Highway 81 to junction U.S. Highway 50, thence west along U.S. Highway 50 to Garden City, Kans., to points in Oklahoma; (22) from points in Kansas to points in Pennsylvania; (23) from points in Kansas on and east of a line beginning at the Kansas-Nebraska State line, and extending along U.S. Highway 77, thence south along U.S. Highway 77 to junction U.S. Highway 24, thence along U.S. Highway 24 to junction Kansas Highway 18 (formerly U.S. Highway 40) to junction U.S. Highway 77 to junction U.S. Highway 56 (formerly U.S. Highway 50N) to junction U.S. Highway 156 (formerly U.S. Highway 50N) to Garden City, Kans., thence along east on U.S. Highway 50 to junction Kansas Highway 99, thence along Kansas Highway 99 to Kansas Highway 4, thence along Kansas Highway 4 to U.S. Highway 24, thence along U.S. Highway 24 to the Kansas-Missouri State line, to points in Texas.

(25) From points in Kansas on and east and south of a line beginning at the Kansas-Nebraska State line, and extending along U.S. Highway 281, thence south along U.S. Highway 281 to junction Interstate Highway 40, thence west along U.S. Highway 40 to the Kansas-Colorado State line, thence south on the Colorado-Kansas State line to U.S. Highway 50, thence east along U.S. Highway 50 to junction Kansas Highway 99, thence north along Kansas Highway 99 to junction Kansas Highway 4, thence east along Kansas Highway 4 to junction U.S. Highway 24, thence east along U.S. Highway 24 to the Kansas-Missouri State line, to points in Utah; (26) from points in Kansas to those points in Virginia on and east of a line beginning at the Virginia-North Carolina State line, and extending north along U.S. Highway 501 to junction U.S. Highway 29, thence north along U.S. Highway 29 to junction U.S. Highway 522, thence along U.S. Highway 522 to the Virginia-West Virginia State line; (27) from points in Kansas on and north of a line beginning at Kansas-Missouri State line, and extending along U.S. Highway 24, to junction Kansas Highway 4, thence along Kansas Highway 4 to junction Kansas Highway 99, thence along Kansas Highway 99 to junction U.S. Highway 50 (formerly U.S. Highway 50S) thence along U.S. Highway 50 to the Kansas-Colorado State line, to points in West Virginia; (28) from points in Kansas on and east of a line beginning at the Kansas-Nebraska State line and extending along U.S. Highway 77, thence south along U.S. Highway 77 to junction U.S. Highway 24, thence along U.S. Highway 24 to junction Kansas Highway 18 (formerly U.S. Highway 40) to junction U.S. Highway 77, thence along U.S. Highway 77 to junction U.S. Highway 56 (formerly U.S. Highway 50N) to junction U.S. Highway 156 (formerly U.S. Highway 50N), thence east on U.S. Highway 50 to junction Kansas Highway 99, to Kansas Highway 4, thence along Kansas Highway 4 to junction U.S. Highway 24, thence east along U.S. Highway 24 to the Kansas-Missouri State line, to points in Wisconsin; (29) from points in Kansas on and east and south of a line beginning at the Kansas-Nebraska State line, and extending along U.S. Highway 281, thence south along U.S. Highway 281 to junction Interstate Highway 40, thence along Interstate Highway 40 to junction U.S. Highway 40, thence along U.S. Highway 40 to the Kansas-Colorado State line, thence south on the Colorado-Kansas State line to junction U.S. Highway 50, thence east along U.S. Highway 50 to junction Kansas Highway 99, thence north along Kansas Highway 99 to junction Kansas Highway 4, thence east along Kansas Highway 4 to junction U.S. Highway 24, thence east along U.S. Highway 24 to the Kansas-Missouri State line, to points in Tennessee on and south and east of a line beginning at the Tennessee-Kentucky State line extending along U.S. Highway 25-E to junction Tennessee Highway 33, thence along Tennessee Highway 33 to junction Tennessee Highway 62, thence along Tennessee Highway 62 to junction Tennessee Highway 61, thence along Tennessee Highway 61 to junction U.S. Highway 27, thence along U.S. Highway 27 to the Tennessee-Georgia State line. The purpose of this filing is to eliminate the gateways of Coketown, Brooke County, W. Va., and Clarksburg, W. Va.

No. MC 61825 (Sub-No. E1048), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass*, such as is used as construction material, (except commodities in bulk, those of unusual value, commodities requiring special equipment), from points in Harrison County, Ohio, and those points in Tuscarawas County, Ohio within 50 miles of Steubenville, to points in Tennessee on and east and south of a line beginning at the Tennessee-North Carolina State line and extending along U.S. Highway 70 to junction Tennessee Highway 62, thence along Tennessee Highway 62 to junction Tennessee Highway 61, thence along Tennessee Highway 61 to junction U.S. Highway 27, thence along U.S. Highway 27 to the Tennessee-Georgia State line. The purpose of this filing is to eliminate the gateways of Coketown, Brooke County, W. Va., and Clarksburg, W. Va.

No. MC 61825 (Sub-No. E1049), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass*, such as is used as construction material, (except commodities in bulk, those of unusual value, commodities requiring special equipment), from points in Fayette County, Pa., within 50 miles of Steubenville, Ohio, to points in Georgia on and west of a line beginning at the Georgia-North Carolina State line and extending along Georgia Highway 69 to junction U.S. Highway 76, thence along U.S. Highway 76 to junction U.S. Highway 441, thence along U.S. Highway 441 to junction Georgia Highway 17, thence along Georgia Highway 17 to junction Georgia Highway 80, thence along Georgia Highway 80 to junction Georgia Highway 24, thence along Georgia Highway 24 to junction Georgia Highway 21, thence along Georgia Highway 21 to Savannah, Ga., at the Atlantic Ocean. The purpose of this filing is to eliminate the gateways of Coketown, Brooke County, W. Va., and Clarksburg, W. Va.

No. MC 61825 (Sub-No. E1050), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass*, such as is used as construction material, (except commodities in bulk and those of unusual value, commodities requiring special equipment), from points in Greene County, Pa., to points in Georgia on and south of a line beginning at the Georgia-South Carolina State line extending along Georgia Highway 72 to junction Georgia Highway 98, thence along Georgia Highway 98 to junction Georgia Highway 323, thence along Georgia Highway 323 to junction Georgia Highway 141, thence along Georgia Highway 141 to junction U.S. Highway 19, thence along U.S. Highway 19 to junction Georgia Highway 20, thence along Georgia Highway 20 to the Georgia-Alabama State line. The purpose of this filing is to eliminate the gateways of Coketown, Brooke County, W. Va., and Clarksburg, W. Va.

No. MC 61825 (Sub-No. E1051), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a

Kansas-Nebraska State line, and extending along U.S. Highway 281, thence south along U.S. Highway 281 to junction Interstate Highway 40, thence west along U.S. Highway 40 to the Kansas-Colorado State line, thence south on the Colorado-Kansas State line to U.S. Highway 50, thence east along U.S. Highway 50 to junction Kansas Highway 99, thence north along Kansas Highway 99 to junction Kansas Highway 4, thence east along Kansas Highway 4 to junction U.S. Highway 24, thence east along U.S. Highway 24 to the Kansas-Missouri State line, to points in Utah; (26) from points in Kansas to those points in Virginia on and east of a line beginning at the Virginia-North Carolina State line, and extending north along U.S. Highway 501 to junction U.S. Highway 29, thence north along U.S. Highway 29 to junction U.S. Highway 522, thence along U.S. Highway 522 to the Virginia-West Virginia State line; (27) from points in Kansas on and north of a line beginning at Kansas-Missouri State line, and extending along U.S. Highway 24, to junction Kansas Highway 4, thence along Kansas Highway 4 to junction Kansas Highway 99, thence along Kansas Highway 99 to junction U.S. Highway 50 (formerly U.S. Highway 50S) thence along U.S. Highway 50 to the Kansas-Colorado State line, to points in West Virginia; (28) from points in Kansas on and east of a line beginning at the Kansas-Nebraska State line and extending along U.S. Highway 77, thence south along U.S. Highway 77 to junction U.S. Highway 24, thence along U.S. Highway 24 to junction Kansas Highway 18 (formerly U.S. Highway 40) to junction U.S. Highway 77, thence along U.S. Highway 77 to junction U.S. Highway 56 (formerly U.S. Highway 50N) to junction U.S. Highway 156 (formerly U.S. Highway 50N), thence east on U.S. Highway 50 to junction Kansas Highway 99, to Kansas Highway 4, thence along Kansas Highway 4 to junction U.S. Highway 24, thence east along U.S. Highway 24 to the Kansas-Missouri State line, to points in Wisconsin; (29) from points in Kansas on and east and south of a line beginning at the Kansas-Nebraska State line, and extending along U.S. Highway 281, thence south along U.S. Highway 281 to junction Interstate Highway 40, thence along Interstate Highway 40 to junction U.S. Highway 40, thence along U.S. Highway 40 to the Kansas-Colorado State line, thence south on the Colorado-Kansas State line to junction U.S. Highway 50, thence east along U.S. Highway 50 to junction Kansas Highway 99, thence north along Kansas Highway 99 to junction Kansas Highway 4, thence east along Kansas Highway 4 to junction U.S. Highway 24, thence east along U.S. Highway 24 to the Kansas-Missouri State line, to points in Tennessee on and south and east of a line beginning at the Tennessee-Kentucky State line extending along U.S. Highway 25-E to junction Tennessee Highway 33, thence along Tennessee Highway 33 to junction Tennessee Highway 62, thence along Tennessee Highway 62 to junction Tennessee Highway 61, thence along Tennessee Highway 61 to junction U.S. Highway 27, thence along U.S. Highway 27 to the Tennessee-Georgia State line. The purpose of this filing is to eliminate the gateways of Coketown, Brooke County, W. Va., and Clarksburg, W. Va.

No. MC 61825 (Sub-No. E1048), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass*, such as is used as construction material, (except commodities in bulk, those of unusual value, commodities requiring special equipment), from points in Al-legheny, Beaver, Lawrence and Washington Counties, Pa., and those points in Butler and Westmoreland Counties, Pa., within 50 miles of Steubenville, to points in Georgia. The purpose of this filing is to eliminate the gateway of Coketown, Brooke County, W. Va., and Clarksburg, W. Va.

No. MC 61825 (Sub-No. E1049), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass*, such as is used as construction material, (except commodities in bulk, those of unusual value, commodities requiring special equipment), from points in Fayette County, Pa., within 50 miles of Steubenville, Ohio, to points in Georgia on and west of a line beginning at the Georgia-North Carolina State line and extending along Georgia Highway 69 to junction U.S. Highway 76, thence along U.S. Highway 76 to junction U.S. Highway 441, thence along U.S. Highway 441 to junction Georgia Highway 17, thence along Georgia Highway 17 to junction Georgia Highway 80, thence along Georgia Highway 80 to junction Georgia Highway 24, thence along Georgia Highway 24 to junction Georgia Highway 21, thence along Georgia Highway 21 to Savannah, Ga., at the Atlantic Ocean. The purpose of this filing is to eliminate the gateways of Coketown, Brooke County, W. Va., and Clarksburg, W. Va.

No. MC 61825 (Sub-No. E1050), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass*, such as is used as construction material, (except commodities in bulk and those of unusual value, commodities requiring special equipment), from points in Greene County, Pa., to points in Georgia on and south of a line beginning at the Georgia-South Carolina State line extending along Georgia Highway 72 to junction Georgia Highway 98, thence along Georgia Highway 98 to junction Georgia Highway 323, thence along Georgia Highway 323 to junction Georgia Highway 141, thence along Georgia Highway 141 to junction U.S. Highway 19, thence along U.S. Highway 19 to junction Georgia Highway 20, thence along Georgia Highway 20 to the Georgia-Alabama State line. The purpose of this filing is to eliminate the gateways of Coketown, Brooke County, W. Va., and Clarksburg, W. Va.

No. MC 61825 (Sub-No. E1051), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a

common carrier, by motor vehicle, over irregular routes, transporting: *Glass*, such as is used as construction material, (except commodities in bulk, those of unusual value, commodities requiring special equipment, and those injurious or contaminating to other lading), from points in Allegheny, Beaver, and Lawrence Counties, Pa., and those points in Butler County, Pa., within 50 miles of Steubenville, Ohio, to Gallatin, Tenn., and points in Tennessee on and east of a line beginning at the Tennessee-Kentucky State line, extending along U.S. Highway 230 to the Tennessee-Alabama State line. The purpose of this filing is to eliminate the gateway of Coketown, Brooke County, W. Va., and Clarksburg, W. Va.

No. MC 61825 (Sub-No. E1052), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass*, such as is used as construction material, (except commodities in bulk, those of unusual value, and commodities requiring special equipment), from points in Westmoreland County, Pa., within 50 miles of Steubenville, Ohio, to Gallatin, Tenn., and points in Tennessee on and west of a line beginning at the Tennessee-Virginia State line extending along Tennessee Highway 70 to junction Tennessee Highway 31, thence along Tennessee Highway 31 to junction U.S. Highway 11-W, thence along U.S. Highway 11-W to junction U.S. Highway 25-E, thence along U.S. Highway 25-E to junction Interstate Highway 40, thence along Interstate Highway 40 to the Tennessee-North Carolina State line, and extending west along U.S. Highway 231 beginning at the Tennessee-Kentucky State line extending to the Tennessee-Alabama State line. The purpose of this filing is to eliminate the gateway of Coketown, Brooke County, W. Va., and Clarksburg, W. Va.

No. MC 61825 (Sub-No. E1053), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass*, such as is used as construction material (except commodities in bulk, those of unusual value, and commodities requiring special equipment), from points in Washington County, Pa., to points in Tennessee on and east and south of a line beginning at the Tennessee-Virginia State line extending along Tennessee Highway 70 to junction Tennessee Highway 33, thence along Tennessee Highway 33 to junction Tennessee Highway 62, thence along Tennessee Highway 62 to junction Tennessee Highway 61, thence along Tennessee Highway 61 to junction U.S. Highway 70, thence along U.S. Highway 70 to junction Tennessee Highway 96, thence along Tennessee Highway 96 to junction U.S. Highway 231, thence along U.S. Highway 231 to the Tennessee-Alabama State line. The purpose of this filing is to eliminate the gateways of Coketown, Brooke County, W. Va., and Clarksburg, W. Va.

No. MC 61825 (Sub-No. E1054), filed May 13, 1974. Applicant: ROY STONE TRASFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass* such as is used as construction material (except commodities in bulk, those of unusual value, and commodities requiring special equipment), from points in Brooke, Hancock, and Ohio Counties, W. Va., to points in Georgia. The purpose of this filing is to eliminate the gateways of Coketown, Brooke County, W. Va., and Clarksburg, W.Va.

No. MC 61825 (Sub-No. E1055), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass* such as is used as construction material (except commodities in bulk, those of unusual value, and commodities requiring special equipment), from points in Marshall County, W. Va., and points in Wetzel County, W. Va., within 50 miles of Steubenville, Ohio, to points in Georgia on and south of a line beginning at the Georgia-South Carolina State line extending along U.S. Highway 278 to junction U.S. Highway 78, thence along U.S. Highway 78 to the Georgia-Alabama State line. The purpose of this filing is to eliminate the gateway of Coketown, Brooke County, W. Va., and Clarksburg, W. Va.

No. MC 61825 (Sub-No. E1057), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass*, such as is used as construction material (except commodities in bulk, those of unusual value, and commodities requiring special equipment), from points in Brooke County, W. Va., to points in Tennessee on and east and south of a line beginning at the Tennessee-Virginia State line and extending along Tennessee Highway 70 to junction Tennessee Highway 33, thence along Tennessee Highway 33 to junction Tennessee Highway 31, thence along Tennessee Highway 31 to junction U.S. Highway 11-W, thence along U.S. Highway 11-W to junction Tennessee Highway 62, thence long Tennessee Highway 62 to junction Tennessee Highway 61, thence along Tennessee Highway 61 to junction U.S. Highway 70, thence long U.S. Highway 96, thence along Tennessee Highway 96 to junction Tennessee Highway 231, thence along U.S. Highway 231 to the Tennessee-Alabama State line. The purpose of this filing is to eliminate the gateways of Coketown, Brooke County, W. Va., and Clarksburg, W. Va.

No. MC 92983 (Sub-No. E57) (Correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of April 28, 1976, and republished, as partially corrected, this issue. Applicant: AMERICAN BULK TRANSPORT CO., 818 Grand Ave., P.O. Box 2508, Kansas City, Mo. 64142. Applicant's representative: H. B. Foster (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (E) *Chemicals*, in bulk, from points in Wyoming to points in Delaware, District of Columbia, Maryland, New Jersey, New York, Pennsylvania, Virginia, and West Virginia. The purpose of this filing is to eliminate the gateway of Kansas City, Mo.

NOTE.—The purpose of this partial republication is to correct the territorial description by adding the correct origin state of Wyoming under Part (E). The remainder of this letter-notice remains as previously published.

No. MC 104149 (Sub-No. E1) (Correction), filed May 15, 1974, published in the FEDERAL REGISTER issue of July 27, 1977, and republished, corrected, this issue. Applicant: OSBORNE TRUCK LINE, INC., 518 North 31st, Birmingham, Ala. Applicant's representative: William P. Jackson, Jr., 919 Eighteenth St. NW., Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (2) *Iron and steel products* (except commodities in bulk), in minimum shipments of 10,000 pounds, between Birmingham, Ala., on the one hand, and, on the other, points in Kentucky, on and east of a line commencing at the Illinois-Kentucky State line and extending along U.S. Highway 45 to junction U.S. Highway 60, thence along U.S. Highway 60 to junction U.S. Highway 68, thence along U.S. Highway 68 to junction Kentucky Highway 80, thence along Kentucky Highway 80 to junction Kentucky Highway 453, thence alone Kentucky Highway 453 to the Kentucky-Tennessee State line. (*Plantsite of Revere Copper & Brass, Inc., located approximately 6 miles south of Scottsboro, Ala.). (3) *Aluminum and aluminum products*, the transportation of which, because of size or weight; requires the use of special equipment (except commodities in bulk): (c) between points in Florida on, south and west of a line commencing at the Florida-Georgia State line and extending along Interstate Highway 75 to junction U.S. Highway 441, thence along U.S. Highway 441 to junction Florida Highway 528, thence along Florida Highway 528 to the Atlantic Ocean, on the one hand, and, on the other, points in Ohio, on, north and west of a line commencing at the Ohio-Kentucky State line and extending along Ohio Highway 139 to junction Ohio Highway 93, thence along Ohio Highway 93 to junction U.S. Highway 62, thence along U.S. Highway 62 to junction Ohio Highway 21, thence along Ohio Highway 21 to junction U.S. Highway 30, thence along U.S. Highway 30 to junction U.S. 62, thence along U.S. Highway 62 to junction U.S. Highway 422, thence along U.S. Highway 422 to the Ohio-Pennsylvania State line. (*Montgomery, Ala.; and the Plantsite of Revere Copper & Brass, Inc., at or near Scottsboro, Ala.) * * * (g) between points in Georgia, on and south of a line commencing at the Alabama-Georgia State line and extending along Georgia Highway 109 to junction Georgia Highway 18, thence along Georgia Highway 18 to junction Georgia Highway 74, thence along Georgia Highway 74 to junction U.S. Highway 19, thence along U.S. Highway 19 to junction Georgia Highway 22, thence along Georgia Highway 22 to junction U.S. Highway 341, thence along U.S. Highway 341 to junction Georgia Highway 50, thence along Georgia Highway 50 to the Atlantic Ocean, on the one hand, and, on the other, points in Indiana, on and west of a line commencing at the Kentucky-Indiana State line and extending along U.S. Highway 421 to junction U.S. Highway 50, thence along U.S. Highway 50 to junction Indiana Highway 101.

Thence along Indiana Highway 101 to junction U.S. Highway 27, thence along U.S. Highway 27 to junction U.S. Highway 40, thence along U.S. Highway 40 to the Indiana-Ohio State line. (*Birmingham, Ala.; and the plantsite of Revere Copper & Brass, Inc., at or near Scottsboro, Ala.) * * * (j) Between points in Mississippi, on and south of a line commencing at the Louisiana-Mississippi State line and extending along U.S. Highway 84 to junction U.S. Highway 61, thence along U.S. Highway 61 to junction Mississippi Highway 18, thence along Mississippi Highway 18 to junction Interstate Highway 20, thence along Interstate Highway 20 to junction Interstate Highway 55, thence along Interstate Highway 55 to junction Mississippi Highway 16, thence along Mississippi Highway 16 to junction Mississippi 35, thence along Mississippi Highway 35 to junction Mississippi Highway 25, thence along Mississippi Highway 25 to junction U.S. Highway 82, thence along U.S. Highway 82 to the Mississippi-Alabama State line, on the one hand, and, on the other, points in Indiana, on, north and east of a line commencing at the Illinois-Indiana State line and extending along U.S. Highway 41 to junction U.S. Highway 6, thence along U.S. Highway 6 to junction Interstate Highway 65, thence along Interstate Highway 65 to junction U.S. Highway 231, thence along U.S. Highway 231 to junction Indiana Highway 46, thence along Indiana Highway 46 to junction Indiana Highway 7, thence along Indiana Highway 7 to the Indiana-Kentucky State line. (Birmingham or Decatur, Ala.; and the plantsite of Revere Copper & Brass, Inc., at or near Scottsboro, Ala.*). (10) *Iron and steel articles*, the transportation of which, because of size or weight, require the use of special equipment, and *Fibre pipe and fibre pipe fittings* which are contractors' materials and supplies when their transportation is incidental to the transportation of commodities which, because of size or weight, require the use of special equipment: (b) From points in Alabama, on and east of a line commencing at the Alabama-Florida State line and extending along Alabama Highway 41 to junction U.S. Highway 31, thence along U.S. Highway 31 to junction Alabama Highway 83, thence along Alabama Highway 83 to junction Alabama Highway 47, thence along Alabama Highway 47 to junction Alabama Highway 10, thence along Alabama Highway 10 to junction Alabama County Highway 59, thence along Alabama County Highway 59 to junction Alabama County Highway 16, thence along Alabama County Highway 16 to junction Alabama Highway 89, thence along Alabama Highway 89 to junction Alabama Highway 41, thence along Alabama Highway 41 to junction Alabama Highway 22, thence along Alabama Highway 22 to junction U.S. Highway 31, thence along U.S. Highway 31 to junction Alabama Highway 150, thence along Alabama Highway 150 to junction U.S. Highway 11, thence along U.S. Highway 11 to junction Interstate Highway 65, thence along Interstate Highway 65 to junction Alabama Highway 79, thence along Alabama Highway 79 to junction U.S. Highway 72.

Thence along U.S. Highway 72 to the Alabama-Tennessee State line to points in Oklahoma, restricted against the transportation of commodities used in or in connection with the discovery, development, production, refining, manufacturing, processing, storage, transmission, and distribution of natural gas and petroleum and their products and by products. (*Montgomery or Birmingham, Ala.) * * * (c) From points in Alabama, on and east of a line commencing at the Alabama-Florida State line and extending along Alabama Highway 41 to junction U.S. Highway 31, thence along U.S. Highway 31 to junction Alabama Highway 83, thence along Alabama Highway 83 to junction Alabama Highway 47, thence along Alabama Highway 47 to junction Alabama Highway 10, thence along Alabama Highway 10 to junction Alabama County Highway 59, thence along Alabama County Highway 59 to junction Alabama County Highway 16, thence along Alabama County Highway 16 to junction Alabama Highway 89, thence along Alabama Highway 89 to junction Alabama Highway 41, thence along Alabama Highway 41 to junction Alabama Highway 22, thence along Alabama Highway 22 to junction U.S. Highway 31, thence along U.S. Highway 31 to junction Alabama Highway 150, thence along Alabama Highway 150 to junction U.S. Highway 11, thence along U.S. Highway 11 to junction Interstate Highway 65, thence along Interstate Highway 65 to junction Alabama Highway 79, thence along Alabama Highway 79 to junction U.S. Highway 72, thence along U.S. Highway 72 to the Alabama-Tennessee State line, to points in Arkansas, on and west of a line commencing at the Arkansas-Louisiana State line and extending along U.S. Highway 79 to junction Arkansas Highway 15, thence along Arkansas Highway 15 to junction Arkansas Highway 31, thence along Arkansas Highway 31 to junction U.S. Highway 67, thence along U.S. Highway 67 to junction Arkansas Highway 115, thence along Arkansas Highway 115 to the Arkansas-Missouri State line, restricted against the transportation of commodities used in or in connection with the discovery, development, production, refining, manufacturing, processing, storage, transmission, and distribution of natural gas and petroleum and their products and by products. (*Montgomery or Birmingham, Ala.).

(13) Iron and steel products (except commodities in bulk), in minimum shipments of 10,000 pounds, between Birmingham, Ala., and points within 10 miles thereof, on the one hand, and, on the other, points in Kentucky, on and east of a line beginning at the Illinois-Kentucky State line, and extending along U.S. Highway 45 to junction Kentucky Highway 60, thence along Kentucky Highway 60 to junction U.S. Highway 68, thence along U.S. Highway 68 to junction Kentucky Highway 80, thence along Kentucky Highway 80 to junction Kentucky Highway 453, thence along Kentucky Highway 453 to the Kentucky-Tennessee State line. (*Plantsite of Revere Copper & Brass, Inc., located at or near Scottsboro, Ala). (14) Iron and steel products (except in bulk), the transportation of which, because of size or weight, requires the use of special equipment, in minimum shipments of 10,000 pounds: (b) between points in Georgia, on and south of a line commencing at the Alabama-Georgia State line extending along Georgia Highway 109 to junction Georgia Highway 41, thence along Georgia Highway 41 to junction Georgia Highway 90, thence along Georgia Highway 90 to junction Georgia Highway 32, thence along Georgia Highway 32 to junction Georgia Highway 99, thence along Georgia Highway 99 to junction U.S. Highway 341, thence along U.S. Highway 341 to junction Georgia Highway 50, thence along Georgia Highway 50 to the Atlantic Ocean, on the one hand, and, on the other, points in Kentucky, on, north and west of a line commencing at the Kentucky-Indiana State line, and extending along Interstate Highway 65 to junction U.S. Highway 62, thence along U.S. Highway 62 to junction U.S. Highway 41, thence along U.S. Highway 41 to junction U.S. Highway Alternate 41, thence along U.S. Highway Alternate 41 to the Kentucky-Tennessee State line. (*Birmingham, Ala.; and the plantsite of Revere Copper & Brass, Inc., located at or near Scottsboro, Ala.).

V42N165 AUG 25 77 UM

The purpose of this filing is to eliminate the gateways indicated by asterisks above.

NOTE.—The purpose of this correction is to correct Paragraph No. 2, 3(c), 3(g), 3(j), 10(b), 10(c), 13, and 14(b). The remainder of this letter-notice remains as previously published.

No. MC 113843 (Sub-No. E149) (correction), filed May 12, 1974, published in the FEDERAL REGISTER issue of October 7, 1975, and republished, as corrected, this issue. Applicant: REFRIGERATED FOOD EXPRESS, INC., 316 Summer St., Boston, Mass. 02210. Applicant's representative: Lawrence T. Sheils (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dairy products*, as defined by the Commission, from Martins Ferry, Ohio, to those points in Illinois on and north of a line beginning at the Indiana-Illinois State line and extending along Interstate Highway 80 to juction Interstate Highway 180, thence along Interstate Highway 180 to junction Illinois Highway 29, thence along Illinois Highway 29 to Peoria, Illinois, thence along Illinois Highway 116 to junction U.S. Highway 67, thence along U.S. Highway 67 to junction U.S. Highway 34, thence along U.S. Highway 34 to the Mississippi River. The purpose of this filing is to eliminate the gateway of Detroit, Mich.

NOTE.—The purpose of this correction is to show the correct territorial description.

No. MC 113843 (Sub-No. E771) (partial correction), filed May 19, 1974, published in the FEDERAL REGISTER issues of July 17, 1975, and July 20, 1977, and republished, as corrected, this issue. Applicant: REFRIGERATED FOOD EXPRESS, INC., 316 Summer Street, Boston, Massachusetts 02210. Applicant's representative: Lawrence T. Sheils (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, (12) Between Norristown, Pa., on the one hand, and, on the other, those points in Ohio on, north and west of a line beginning at the Ohio-Pennsylvania State line extending along U.S. Highway 20 to Cleveland, thence along U.S. Highway 6 to junction Ohio Highway 13, thence along Ohio Highway 13 to Norwalk, thence along U.S. Highway 20 to junction Ohio Highway 18, thence along Ohio Highway 18 to junction U.S. Highway 224, thence along U.S. Highway 224 to junction U.S. Highway 25, thence along U.S. Highway 25 to junction U.S. Highway 33, thence along U.S. Highway 33 to junction Ohio Highway 29, thence along Ohio Highway 29 to the Ohio-Indiana State line. The purpose of this filing is to eliminate the gateway of Elmira, N.Y.

NOTE.—The purpose of this partial correction is to include a portion omitted in Part (12). The remainder of this letter notice remains as previously published.

No. MC 118518 (Sub-No. E1) (partial correction), filed February 24, 1976, published in the FEDERAL REGISTER issue of August 4, 1977, and republished, as corrected, this issue. Applicant: MUKLUK FREIGHT LINES, INC., 3111 C Street, Anchorage, Alaska 99503. Applicant's representative: Leo C. Franey, 918 Sixteenth St. NW., Washington, D.C. 20006.

NOTE.—The purpose of this Notice is to reflect the correct docket number. This case appeared as "No. MC–119518 (Sub-No. E1)" and should read as "No. MC–118518 (Sub-No. E1)". The letter-notice remains as previously published.

No. MC 119657 (Sub-No. E1) (partial correction), filed June 5, 1974, published in the FEDERAL REGISTER issue of November 13, 1974, and republished, as corrected, this issue. Applicant: GEORGE TRANSIT LINE, INC., 760–4 NE. 47th Place, Des Moines, Iowa 50313. Applicant's representative: Kenneth F. Dudley, Yates Building, 611 Church St., P.O. Box 279, Ottumwa, Iowa 52501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (3) *Animal and poultry feed ingredients*, dry, in bulk, between points in Illinois on and south of a line from the Illinois-Iowa State line along Illinois Highway 164 to the junction of U.S. Highway 34, thence along U.S. Highway 34 to the Junction of Interstate Highway 74, thence along Interstate Highway 74 to the Illinois-Indiana State line, on the one hand, and, on the other, points in Minnesota (except points east of a line from the Minnesota-Iowa State line along Interstate Highway 35 to Burnsville, thence along unnumbered highway to the junction of Minnesota Highway 52, thence along Minnesota Highway 52 to the junction of Minnesota Highway 55, thence along Minnesota Highway 55 to the Minnesota-Wisconsin State line (points in Polk County, Iowa)*. The purpose of this filing is to eliminate the gateways indicated by the asterisks above.

NOTE.—The purpose of this partial correction is to correct Part (3) Illinois Highway 64 to read Illinois Highway 164 instead. The remainder of this letter notice remains as previously published.

No. MC 141969 (Sub-No. E3 through E33). Applicant: NOBLE TRANSPORT, INC., P.O. Box 17B, Denver, Colo. 80217. Applicant's representative: Richard P. Kissinger, Suite 140, Cherry Creek Center, 360 South Monroe, Denver, Colo. 80209. Notice is hereby given that pursuant to MC–F–12573, the authority set forth in the following FEDERAL REGISTERS for Ashworth, No. MC–1872, has been transferred to Noble Transport. October 28, 1975—Subs E20, E21, E22, E23, E24, E25, E26, E27, E28, E29; July 6, 1977—Subs E6, E7, E9, E13, E14, E19, E30, E31, E32, E33; July 7, 1977—Subs E5, E8; July 13, 1977—Subs E3, E4, E17; July 20, 1977—Subs E10, E11, E12, E15, E16.

By the Commission

H. G. HOMME, Jr.,
Acting Secretary.

[Notice No. 214]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under Sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission by September 26, 1977. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC–FC 76995, filed August 19, 1977. Transferee: MERCER BROS. TRUCKING COMPANY, Route 1, Box 248, Wilson, N.C. 27893. Transferor: John Lewis Read (Mrs. Willie S. Read, Administratrix), d.b.a. Read's Truck Line, P.O. Box 664, Warrenton (formerly Norlina), N.C. Applicant's representative: Jerry D. Mercer, P.O. Box 952, Wilson, N.C. 27893. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC 70958 issued August 24, 1949, as follows: *Cotton* from Littleton, N.C. and points within 35 miles thereof to Danville and Norfolk, Va. and points in North Carolina; *lumber* from Fuquay Springs, Durham, and Littleton, N.C. and points within 10 miles of Durham and 35 miles of Littleton to Norfolk and Richmond, Va., Baltimore, Md., and the District of Columbia, points in Virginia within 10 miles of Richmond or 25 miles of Norfolk, and those in Maryland or Virginia within 25 miles of either Baltimore, Md. or the District of Columbia; *agricultural commodities* from Littleton, N.C. and points within 35 miles thereof to Petersburg, Emporia, and Suffolk, Va.; *livestock* from Littleton, N.C. and points within 35 miles thereof to Richmond, Va.; *general commodities* with the usual exceptions from Richmond, Norfolk, and Suffolk, Va. to Littleton, N.C. and points within 25 miles thereof; and *empty glass bottles* from Laurens, S.C. to Littleton, N.C. Transferee is presently authorized to operate as a common carrier under Certificate No. MC–124050; application has not been filed for temporary authority under Section 210a(b).

No. MC–FC 77215, filed July 13, 1977. Transferee: COSTA LINES, INC. d.b.a., Trinidad Freight Service, Santa Fe Yards, Trinidad, Colo. 81082. Transferor: Anna Gasperetti and John B. Gasperetti, Jr., d.b.a. The Tri-C Transfer and Storage, 111 West 10th St., Walsenburg, Colo. 81089. Applicants' representative: Joe Costa, Santa Fe Yards, Trinidad, Colo. 81082. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificates No. MC–135695 and, MC–135695 (Sub-No. 1) issued January 12, 1972 and April 5, 1972 as follows: *Used household goods*, between points in Alamosa, Baca, Bent, Conejos, Costilla, Crowley, Custer, Huerfano, Kiowa, Las Animas, Mineral, Otero, Prowers, Rio Grande, and Saguache Counties, Colo. Also general commodities, except those of unusual value, classes A and B explosives, commodities in bulk, and those requiring special equipment, between Walsenburg, Colo., and Gardner, Colo., serving all intermediate points, and the off-route point of Red Wing, Colo. from Walsenburg over Colorado Highway 69 to Gardner, and return over the same route. And *General commodities* except those of unusual value, Classes A and B explosives, commodities in bulk, and those requiring special equipment, between Walsenburg, Colo., on the one hand, and, on the other, points in Huerfano County, Colo. Transferee is presently authorized to operate as a common carrier under Certificate No. MC–136183 and subs thereafter. Application has been filed for temporary authority under Section 210a(b).

No. MC–FC 77225, filed July 20, 1977. Transferee: SPECIALIZED TRUCKING, INC., 4714 Elysian, Houston, Tex., 77009. Transferor: Gregg Construction Co., Inc., P.O. Box 579, White Oak, Tex., 75693. Applicant's representative: Joe G. Fender, 711 Louisiana, No. 1150, S. Tower, Houston, Tex., 77002. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate of Registration No. MC–99026 (Sub-No. 1), obtained by transferor pursuant to No. MC–FC–76801, consummated March 14, 1977, as follows: various specified commodities wholly within the state of Texas. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC 77230, filed July 25, 1977. Transferee: MOSLEY TRUCKING, INC., Jacksonville, Fla. 32265. Applicants' representative: Sol H. Proctor, Attorney at Law, 1101 Blackstone Bldg., Jacksonville, Fla. 32202. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificates No. MC 117675 and, MC–117675 (Sub-No. 7), issued June 16, 1971, and June 12, 1975, respectively, as follows: *Bananas*, from Miami, Tampa, Fort Lauderdale, and Port Everglades, Fla., and Charleston, S.C., to Jacksonville, Fla., with no transportation for compensation on return except as otherwise authorized. From Jacksonville, Fla., to Savannah, Ga., and Charleston, S.C., with no transportation for compensation on return except as otherwise authorized. From Charleston, S.C. to points in Florida, with no transportation for compensation on return except as otherwise authorized. Also *fresh fruits, berries* and *vegetables*, when transported in the same vehicle with bananas (authorized herein), From Jacksonville, Fla., to Savannah, Ga., and Charleston, S.C., with no transportation for compensation on return except as otherwise authorized. And *bananas*, and *fresh fruits, fresh berries and fresh vegetables* when transported in the same vehicle with bananas, from Gulfport, Miss., to points in Florida, with no transportation for compensation on return except as otherwise authorized. Also *bananas*, and *agricultural commodities*, otherwise exempt from economic regulation under section 203(b)(6) of the Interstate Commerce Act, when transported in mixed loads with bananas. From Mobile, Ala., to points in Florida and Georgia, with no transportation for compensation on return except as otherwise authorized. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC 77233, filed July 28, 1977. Transferee: JOSEPH CHAIRVOLOTTI, INC., P.O. Box 307, Waverly, N.Y. 14892. Transferor: Joseph Chairvolotti, P.O. Box 307, Waverly, N.Y. 14892. Applicant's representatives: S. Michael Richards, Raymond A. Richards, 44 North Avenue, Webster, N.Y. 14580. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Permit No. MC–104222 (Sub-No. 4), issued July 14, 1955, as follows: Such merchandise as is dealt in by wholesale, retail, chain grocery and food business houses, and in connection therewith equipment, materials, and supplies used in the conduct of such business, From Waverly, N.Y., to points in Pennsylvania north of the southern boundaries of Monroe, Carbon, Schuylkill, Northumberland, Union, Centre, Clearfield, Indiana, Armstrong, Butler, and Lawrence Counties, Pa. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC 77240, filed August 4, 1977. Transferee: BARRETT'S PICK UP SERVICE, INC., 478 Deer Trail Road, Chicago Heights, Ill. 60411. Transferor: J. Eugene Weisenberger, d.b.a. Barrett's Pick Up Service, 478 Deer Trail Road, Chicago Heights, Ill. Applicant's representative: Paul J. Maton, Attorney at Law, Suite 1620, 10 So. LaSalle Street, Chicago, Ill. 60603. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC–126755 (Sub-No. 1), issued July 20, 1966, as follows: Name plates, parts, machinery, appliances, wiring, tools, glass bottles, and plastic materials (except commodities in bulk), between Chicago Heights, Ill. and points within 10 miles thereof, and Chicago, Ill. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC 77258, filed August 9, 1977. Transferee: WEST VIRGINIA TRANSFER, INC., 551 28th St. (P.O. Box 2468), Huntington, W. Va. 25725. Transferor: Clyde W. Porter, d.b.a. West End Transfer, 1651 Madison Ave., Huntington, W. Va. 25701. Applicants' representative: Richard J. Bolen, Attorney-at-Law, 6th Ave. & 10th St. (P.O. Box 2185), Huntington, W. Va. 25722. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC–76768, issued July 19, 1962, as follows: *Household goods, office furniture and equipment*, and *store fixtures*, Between Huntington, W. Va., on the one hand, and, on the other, points in Ohio and Kentucky. *Pianos*, new and used, between Huntington, W. Va., on the one hand, and, on the other, points in that part of Lawrence County, Ohio, south of Ohio Highways 141 and 217. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC 77260, filed August 12, 1977. Transferee: GARDEN CITY TRANSPORTATION CO., INC., 2041 Pioneer Court, Suite 1, San Mateo, Calif. 94403. Transferor: G. C. T., Inc., 900 E. Williams St., San Jose, Calif. 95116. Applicants' representative: George M. Carr, Attorney-at-Law, 1620 Russ Building, 235 Montgomery St., San Francisco, Calif. 94104. TRANSPORTATION OF "WASTE" PRODUCTS FOR REUSE OR RECYCLING

Special Certificate Letter Notice(s)

The following letter notices request participation in a Special Certificate of Public Convenience and Necessity for the transportation of "waste" products for reuse or recycling in furtherance of a recognized pollution control program under the Commission's regulations (49 CFR 1062) promulgated in "Waste" Products, Ex Parte No. MC 85, 124 MCC 583 (1976).

An original and one copy of protests (including protestant's complete argument and evidence) against applicant's participation may be filed with the Interstate Commerce Commission by September 14, 1977. A copy must also be served upon applicant or its representative. Protests against the applicant's participation will not operate to stay commencement of the proposed operation.

If the applicant is not otherwise informed by the Commission, operations may commence within 30 days of the date of its notice in the FEDERAL REGISTER, subject to its tariff publication effective date.

P-11-77 (Special Certificate-Waste Products) filed May 13, 1977. Applicant: SERVICE EXPRESS, INC., P.O. Box 1009, Tuscaloosa, Ala. 35401. Applicant's representative: William P. Jackson, Jr., 3426 North Washington Boulevard, P.O. Box 1267, Arlington, Va. 22210. Authority sought to operate pursuant to a Certificate of public convenience and necessity authorizing operations in interstate or foreign commerce, as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Waste products* for reuse and recycling, from points in Louisiana, Arkansas, Mississippi, Tennessee, Georgia, Florida, North Carolina, and South Carolina, to Prattville, Ala., in furtherance of the recognized pollution programs sponsored by Union Camp Corporation of Prattville, Ala. for the purpose of transporting waste products for reuse and recycling.

P-12-77 (Special Certificate-Waste Products) filed June 8, 1977. Applicant: SOUTHERN INTERMODAL LOGISTICS, INC., P.O. Box 1375, Thomasville, Ga. 51792. Applicant's representative: William P. Jackson, Jr., 3426 North Washington Boulevard, P.O. Box 1267, Arlington, Va. 22210. Authority sought to operate pursuant to a Certificate of public convenience and necessity authorizing operations in interstate or foreign commerce, as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Waste products for reuse and recycling*, from points in North Carolina, South Carolina, Tennessee, Alabama, Louisiana, Florida and Georgia, to Savannah, Ga., in furtherance of the recognized pollution programs sponsored by Union Camp Corporation of Savannah, Ga., for the purpose of transporting waste products for reuse and recycling.

P-14-77 (Special Certificate-Waste Products) filed July 20, 1977. Applicant: LOVE BENTA AND LEASING CORPORATION, 2028 Calumet Avenue, Toledo, Ohio 43607. Applicant's representative: James Love (same address as applicant). Authority sought to operate pursuant to a Certificate of public convenience and necessity authorizing operations in interstate or foreign commerce, as a *common carrier*, over irregular routes, transporting: *Waste paper and waste glass* between points in the United States (except Alaska and Hawaii) in furtherance of a recognized pollution program sponsored by Owens-Illinois, Inc., for the purpose of recycling paper and glass.

P-15-77 (Special Certificate-Waste Products) filed June 30, 1977. Applicant: AERO TRUCKING, INC., Box 308, Monroeville, Pa. 15146. Applicant's representative: A. Charles Tell, 100 East Broad Street, Columbus, Ohio 43215. Authority sought to operate pursuant to a certificate of public convenience and necessity authorizing operations in interstate and foreign commerce, as a *common carrier*, over irregular routes, transporting: *Waste products* for reuse and recycling, from points in the United States (except Alaska and Hawaii) to Palmerton, Pa., in furtherance of the recognized pollution programs sponsored by The New Jersey Zinc Co., a division of the Natural Resources Group, Gulf & Western Industries of Palmerton, Pa., for the purpose of recycling and manufacture of zinc or zinc alloy.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

1

FEDERAL DEPOSIT INSURANCE CORPORATION.

CHANGE IN SUBJECT MATTER OF AGENCY MEETING

At its closed meeting held at 10:30 a.m. on August 22, 1977, the Federal Deposit Insurance Corporation's Board of Directors unanimously voted by recorded vote, pursuant to subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), to remove Case No. 43,152-L, regarding the liquidation of assets acquired by the Corporation from Franklin National Bank, New York, New York—In Liquidation, from the agenda for consideration at that meeting.

The Board further determined by recorded vote that Corporation business required its addition of Case No. 43,170-SR, regarding the liquidation of assets acquired by the Corporation from American Bank & Trust Company, New York, New York, to the agenda for consideration at that meeting and that no earlier notice of a change in the subject matter of the meeting was possible.

Dated: August 22, 1977.

FEDERAL DEPOSIT INSURANCE CORPORATION.
ALAN R. MILLER.
Executive Secretary.

6

SECURITIES AND EXCHANGE COMMISSION.

FEDERAL REGISTER CITATION OF PREVIOUS ANNOUNCEMENT:
42 FR 41952, August 19, 1977.

PREVIOUS ANNOUNCED TIME AND DATE:
Tuesday, August 23, 1977, 9:00 a.m. open meeting, Wednesday, August 24, 1977, 3:00 p.m. closed meeting.

CHANGES IN THE MEETING: Rescheduling of agenda listings.
The open meeting scheduled for Tuesday, August 23, 1977, at 9 a.m. has been rescheduled for Wednesday, August 31, 1977, at 10 a.m.
The closed meeting agenda for Wednesday, August 24, 1977, at 3 p.m. will be considered by the Commission on Tuesday, August 30, 1977, at 10 a.m. except for the following closed matters which will be discussed in closed session, immediately following the open meeting scheduled for Thursday, August 25, 1977, at 10 a.m.:
Consideration of *amicus curiae* matter.
Litigation matter.
Chairman Williams, Commissioners Loomis, Evans, and Pollack voted to approve the above changes and determined that no earlier notice thereof was possible.

August 22, 1977.

MERGER AND CONSOLIDATION PROCEDURES

V42165 AUG 25 77 UM

Title 49—Transportation

CHAPTER II—FEDERAL RAILROAD ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[FRA Economics Doc. 5, Notice 3]

PART 268—MERGER AND CONSOLIDATION PROCEDURES

AGENCY: Federal Railroad Administration, DOT

ACTION: Final rule.

SUMMARY: This final rule revises a final rule published by the Federal Railroad Administration ("FRA") on January 26, 1977, covering the procedures and format a proponent should observe when filing a proposed transaction for study by the Federal Railroad Administrator ("Administrator") under section 5(3) of the Interstate Commerce Act ("Act"). On February 24, 1977, FRA held a public meeting to discuss the rule in response to a request by the Association of American Railroads ("AAR"). On March 17, 1977, the AAR filed a petition for reconsideration of the rule. Also on March 17, 1977, the Interstate Commerce Commission ("Commission") published its merger and consolidation regulations under sections 5 (2) and (3) of the Act. Based on the Commission's regulations and the public comments received in the FRA rule, the FRA has determined that some of the data requirements of its originally published regulations needed to be revised, redrafted, or eliminated.

The intended effect of these revised regulations is to provide a flexible procedure reflecting the circumstances of each proposed transaction.

EFFECTIVE DATE: August 25, 1977.

ADDRESS: Submissions under this part are to be filed with the Associate Administrator for Policy and Program Development, 400 Seventh Street, SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Principal attorney: Sander M. Bieber, Office of Chief Counsel, 202–426–8220.

Principal program person: Thomas A. Till, Director, Office of Rail Industry Structure, 202–426–0382.

SUPPLEMENTARY INFORMATION:

Waivers and Modifications

The preamble to the final regulations, as earlier published, noted that:

> The FRA is cognizant that numerous kinds of transactions are covered by section 5(3), and that not all information required by [this part] applies to every transaction that can be proposed, nor can all of the information required by [this part] always be provided by the submitting parties. Section 268.41 [renumbered as 268.45] provides a mechanism by which [a proponent] may request that the Administrator waive or modify any requirement.

This statement, and the wording of the waiver and modification section, were intended to make clear that the regulations could be tailored to fit the particular circumstances of each proposed transaction. Nonetheless, members of the public who attended the February 24 public meeting, and the AAR in its petition for reconsideration, argued that the requirements were too burdensome and rigid.

In order to insure sufficient flexibility, we are now amending the regulations to: (1) Retain the waiver and modification provision, renumbered as § 268.45; (2) change the introductory clause of each of the nine studies sections to begin with the phrase "to the extent applicable to the proposed transaction;" and (3) as discussed below, add a pre-filing conference.

Pre-filing Conference

Based upon the success we have had with the preapplication conference in our title V financial assistance program under the Railroad Revitalization and Regulatory Reform Act of 1976, we have created a pre-filing conference, in § 268.7, for title IV submissions. The conference may be used to discuss anything concerning the proposed transaction. Given the range of transactions that can be proposed under section 5(3) of the Act, the pre-filing conference should be used to discuss the type and detail of information that must be submitted in support of a proposed transaction. Waivers and modifications of submission requirements should be discussed at the conference.

Rejection of Submissions

The AAR, in its petition for reconsideration, recommended that the Administrator's reservation of the right to reject submissions that do not conform with the regulations be deleted. The AAR further recommended that FRA should accept and process any document, noting any insufficiency of information in its report to the Commission.

We believe rejection of nonconforming submissions is warranted and necessary. Section 5(3)(f) requires the Administrator, as the Secretary of Transportation's delegate, to perform the following duties:

1. Publish a summary and a detailed account of the contents of the proposed transaction in the Federal Register.
2. Give notice of the proposed transaction to designated state officials;
3. Conduct an informal public hearing with respect to the proposed transaction;
4. Study each proposed transaction with respect to nine enumerated concerns; and
5. Submit a report to the Commission "setting forth the results of each study conducted * * *," within 10 days after an application is submitted to the Commission. The Administrator would not be fulfilling his/her statutory obligation if his/her report to the Commission is a statement describing his/her inability to perform the study because of noted insufficiencies in the submission.

The treatment of nonconforming submissions is now separately addressed in § 268.11 of the regulations. Section 268.11 (c) emphasizes that if the § 268.7 prefiling conference is appropriately used by the proponent, waivers or modifications of submission requirements and a mutual understanding of what is expected in response to the requirements of this part will have already been reached, facilitating the filing of a conforming submission.

Finally, to address a concern voiced by several participants at our public meeting on February 24, 1977, § 268.7(c) states that the determination of whether a submission is conforming will be made within FRA. Public review of a submission begins only after the submission is accepted by the Administrator. Public comments will be received only on the substance of a submission, not its conformance with the filing requirements.

Needs of Rail Transportation

Comment at our February 24, 1977 public meeting, and the AAR petition, demonstrated the problems created by our request for various traffic analysis data. Our final section 5(3) regulations were published on January 26, 1977, three weeks before the Commission's regulations were served in Ex Parte No. 282 (Sub-No. 1), *Railroad Consolidation Procedures*. Our traffic studies requirement had not been coordinated with the Commission in terms of data collection and presentation techniques, the time period involved, and the possibility that the six month period between filing a submission and filing an application might necessitate the preparation of two traffic studies.

After reviewing these problems, we decided not to conform our regulations with the Commission's traffic studies requirements. Rather, we have decided to forego much of the traffic data required by our previous regulations and by the current Commission regulations. We have, therefore, revised this section along the lies suggested by the AAR. The remaining traffic data requirements in § 268.23 of the regulations will permit us to fulfill the section 5(3)(f)(iv)(A) obligation to study "the needs of rail transportation in the geographical area affected." FRA encourages submission of the underlying traffic data covering the area involved in the proposed transaction, upon which proponent bases its rail transportation analysis.

The requirements pertaining to the financial performance expected to be achieved as a result of the proposed transaction have been retained. The data are relevant to our nine studies required by section 5(3)(f)(iv) of the Act, and are important in coordinating administration of our title V financial assistance programs with our section 5(3) analysis. *See, e.g.*, Regulations Governing Section 505 of the Railroad Revitalization and Regulatory Reform Act of 1976, as amended, 42 FR 28.958 (1977) (to be codified in 49 CFR 258.27(b)(1)).

Environmental Impact

The regulation requiring data relevant to the environmental impact of the proposed transaction and of alternative choices of action has been substantially rewritten to permit greater latitude to the proponent in formulating its response. (Section 268.39.) The FRA environmental impact study is important because it is conducted with a transportation orientation. The important change in the regulations is the recognition that different transactions will have different environmental impacts and different magnitudes of impact.

Other Revisions

In several sections we have made significant editorial changes, and have reorganized the format in which information is requested. The purpose of these editorial revisions is to add clarity and precision to the regulations. For example, the term "applicant" has been replaced by the term "proponent," to eliminate any confusion between a party submitting a proposed transaction to the Administrator—a proponent—and party submitting a merger application to the Commission—an applicant.

There have also been several minor substantive deletions. For the most part, these data requirements were deleted in response to comments made at the February 24 public meeting and the AAR petition. Additionally, any data requirement that a proponent can demonstrate not to apply to its proposed transaction, or to be unduly burdensome, may be waived or modified by the Administrator under section 268.45.

Impact Statements

This document amends and revises regulations previously issued on January 19, 1977 (42 FR 4982 (1977)). For the reasons stated in our earlier publication of these rules, FRA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and Office of Management and Budget Circular A–107.

FRA has evaluated this document in conformance with the Secretary of Transportation's regulatory reform policies (41 FR 16200 (1976)). These regulations govern submissions of proposed transactions which range from complex mergers to joint track usage agreements. The regulations concerning documentation and data requirements relate directly to the nine statutory concerns required to be studied by section 5(3) of the Act, and can be tailored to the particular contours of each proposed transaction with modifications or waivers of the requirements. As determined when these regulations were initially issued, the minimal cost impact of these regulations on the private sector, consumers, and Federal, state, and local governments does not require an evaluation of the effects of these regulations.

In order to facilitate and encourage submission of proposed transactions under these revised regulations, FRA has determined that the public interest is best served by making these regulations effective immediately. Throughout the submission period, FRA staff will provide any resource assistance requested by a proponent.

In consideration of the foregoing, part 268 of title 49 of the Code of Federal Regulations is revised and amended as set forth below:

Subpart A—General Provisions

Sec.
268.1 Applicability.
268.3 Definitions.
268.5 Eligibility.
268.7 Pre-Filing conference.
268.9 Filing procedure, notice of filing.
268.11 Nonconforming submissions.
268.13 Supplemental submissions; time extension.
268.15 Informal public hearings.

Subpart B—Contents of Submissions

268.17 Form and content of consolidation submission.
268.19 Front covers.
268.21 Introductory statement, summary of proposed transaction, and map of proponent.
268.23 Needs of rail transportation.
268.25 Retention and promotion of competition.
268.27 Rationalization of rail system.
268.29 Cost of rehabilitation and modernization compared to alternative choices.
268.31 Impact on shippers, consumers and railroad employees.
268.33 Effect on communities.
268.35 Improvement of rail service.
268.37 Effect on employment.
268.39 Environmental impact.
268.41 Administrator's request for additional information.

Subpart C—Miscellaneous Provisions

268.43 Access to information.
268.45 Waivers and modifications.

Authority: Sec. 8(3) Interstate Commerce Act, 49 U.S.C. 6(3)(f); Department of Transportation Act, 49 U.S.C. 1651 et seq. Regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(u).

Subpart A—General Provisions

§ 268.1 Applicability.

This part prescribes the guidelines and procedures governing merger and consolidation proposals submitted to the Federal Railroad Administrator for evaluation under section 5(3)(f) of the Interstate Commerce Act, 49 U.S.C. 5(3)(f).

§ 268.3 Definitions.

Unless otherwise required by context:

"Act" means the Interstate Commerce Act, 49 U.S.C. 1 et seq.

"Administrator" means the Federal Railroad Administrator, or the designee of the Administrator.

"Application" means the form in which the Interstate Commerce Commission requires the proposed transaction to be submitted to it, following evaluation and study of the proposal by the Administrator.

"Commission" means the Interstate Commerce Commission.

"Consolidation" means all transactions subject to section 5(3) of the Act, including merger, consolidation, unification or coordination project (as described in section 5(c) of the Department of Transportation Act), joint use of tracks or other facilities, or acquisition or sale of assets, which involves any common carrier by railroad subject to Part I of the Act.

"Including" means including but not limited to.

"Lines affected" means those lines which are directly related to or a part of the proposed transaction—either in a marketing, service or operational sense.

"Proponent" means any railroad or railroads submitting a merger or consolidation proposal for evaluation by the Administrator under this part, and all common carriers by railroad subject to Part I of the Act with properties directly involved in the proposed transaction.

"Railroad" means a common carrier by railroad as defined in section 1(3) of Part I of the Act.

"RRRRA" means the Railroad Revitalization and Regulatory Reform Act of 1976, Pub. L. 94–210, as amended.

"Secretary" means the Secretary of the Department of Transportation.

"Submission" means the form and content in which data concerning the proposed transaction is to be submitted to the Administrator for evaluation and study, as set forth in this part.

"Supplemental submission" means data concerning the proposed transaction submitted by the proponent for evaluation by the Administrator, which goes beyond the data which is required to be submitted by this part.

§ 268.5 Eligibility.

Any railroad may, in the period prior to December 31, 1981, submit to the Administrator a consolidation proposal for evaluation under this part.

§ 268.7 Pre-Filing Conference.

(a) *Informal meeting.* When a railroad has developed plans for a transaction which it may submit to the Administrator for evaluation under this part, a responsible official of the railroad may request in writing a meeting with the Associate Administrator for Policy and Program Development to discuss those plans. Upon receipt of this request, the Associate Administrator will schedule a meeting within 30 days at which the railroad will present the transaction to representatives of the Federal Railroad Administration and discuss with them information which is required to be submitted by this part. Railroads which utilize the prefiling conference are not required to prepare a draft submission or other special information for the conference; however, railroads should be prepared to discuss information which management has used in making its decision to undertake the proposed transaction.

(b) *Data requirements waived or modified.* A goal of the prefiling conference is to enable a proponent to file a submission with the Administrator which conforms to this part's form, content, and documentation requirements. To that purpose, the Administrator may consider requests of a proponent to waive or modify any requirement of this part, or make any additional requirements considered necessary, at a prefiling conference.

§ 268.9 Filing Procedure.

(a) Each submission shall bear the date of execution, be signed by or on behalf of the proponent and shall bear the

corporate seal in the case of a proponent which is a corporation. Execution shall be by all partners if a partnership, unless satisfactory evidence is furnished of the authority of a partner to bind the partnership or if a corporation, an association or other similar form of organization, by its president or other executive officer having knowledge of the matters set forth in the submission. Persons signing the submission on behalf of the proponent shall also sign a certificate in form as follows:

---------- certifies that
(Name of official)
(he) (she) is the ----------
(Title of official)
of the ---------- authorized
(Name of proponent)
on the part of the proponent to sign and file with the Administrator this submission, that (he) (she) has carefully examined all of the statements contained in the submission relating to the aforesaid ----------
(Name of
----------: that (he) (she) has knowledge of the matters set forth in the submission and that all such statements made and matters set forth in the submission are true and correct to the best of (his) (her) knowledge, information, and belief.

(Name of official)

(Date)

(b) The original submission and supporting papers, including any data considered relevant by the proponent which are not specifically requested by this part and ten copies of the submission for the use of the Administrator, shall be filed with the Associate Administrator for Policy and Program Development of the Federal Railroad Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Each copy shall bear the dates and signatures that appear in the original and shall be complete in itself, except to the extent otherwise provided in this part, but the signature on the copies may be stamped or typed.

(c) Each proponent shall file a copy of its submission with the regional offices of the Federal Railroad Administration responsible for the area(s) affected by the proposed transaction. The five regional offices, with their locations, are:

Eastern Region, Independence Bldg., Room 1020, 434 Walnut Street, Philadelphia, Pa. 19106.
Southern Region, Suite 216B, 1503 Willingham Drive, College Park, Georgia 30337.
Central Region, 836 S. Clark St., Room 210, Chicago, Illinois 60605.
Southwest Region, Room 11A234, Federal Office Building, 819 Taylor Street, Fort Worth, Texas 76102.
Western Region, No. 2 Embarcadero Center, Suite 630, San Francisco, California 94111.

(d) Each proponent shall make available to any state Department of Transportation or similar state agency of any state in which any rail facilities of proponent are located a copy of its submission under this part upon request by such agency.

(e) Each proponent shall retain a copy of its submission, and shall make the submission available for public inspection in a reasonable manner at the executive offices of the proponent.

(f) The proponent shall submit such additional information to support its submission as the Administrator may request under § 268.41 of this part.

§ 268.11 Nonconforming submissions.

(a) *Original submission rejected.* The Administrator reserves the right to reject a submission which does not conform to this part's form, content and documentation requirements. Upon the filing of a submission, the Administrator will review the submission and determine whether it conforms with all applicable regulations. If the submission is incomplete, or otherwise defective, the Administrator may reject the submission by written notice to the proponent, specifying the reasons for the rejection, within 30 days from the date of filing of the submission.

(b) *Revised submission.* A revised submission may be submitted, and the Administrator will determine whether the resubmitted submission conforms with all prescribed regulations. The resubmission or refiling of a submission shall be considered a de novo filing for the purpose of computation of the time period prescribed in section 5(3) of the Act, provided that such resubmitted submission is considered complete.

(c) *Purpose.* The purpose of this section is to provide the Administrator with a conforming submission that will enable the Administrator to perform the nine statutory studies and other statutory duties required to be performed by section 5(3)(f) of the Act within a six-month period. Successful use of the § 268.7 pre-filing conference should avoid both rejection of a submission and the delay that might occur in revising a submission to conform to this part's requirements. The review of a submission by the Administrator to determine whether it conforms to this part's requirements shall not be subject to public comment or review.

§ 268.13 Supplemental submissions: time extension.

(a) Sections 268.19 through 268.41 inclusive set forth the minimum data requirements, subject to modification or waiver, for filing an effective submission under this part. Supplemental information may be filed along with the initial submission, or at a later time. A proponent is urged to make its supplemental submissions as similar in form and content to the anticipated application to the Commission as is reasonably possible. The Administrator will use any supplemental information submitted in preparing the Administrator's report for the Commission. To the extent that the supplemental submission corresponds to the filing requirements established by the Commission for section 5(3) applications, the Administrator will be able to comment to a greater degree on the merits of the entire proposed transaction.

(b) If a proponent decides to make a supplemental submission to the Administrator after the original submission and wishes the submission to be considered by the Administrator in the Administrator's findings under section 5(3)(f)(iv) and (v) of the Act, then the proponent and the Administrator will reach agreement on the date on which the proponent will file its application with the Commission. This provision is designed to afford the Administrator sufficient additional time to study the supplemental submission, to conduct any necessary public hearings, and to prepare the Administrator's report.

§ 268.15 Informal public hearings.

(a) Informal public hearings will be conducted with respect to all submissions following acceptance of the initial submission by the Administrator, and may be held with respect to any supplemental submissions made under § 268.13.

(b) Notice of all informal public hearings, together with a basic outline for participation at the informal hearing, will be published in the FEDERAL REGISTER at least 15 days prior to each hearing.

Subpart B—Contents of Submissions

§ 268.17 Form and content of consolidation submissions.

Each submission shall, contain in the order indicated and identified by reference to heading and section numbers, the information required by §§ 268.19 through 268.39. In the event that a full response to the information requirement of one section in Subpart B is contained elsewhere in the submission, the response should reference the portion of the submission where the requested information is contained.

§ 268.19 Front covers.

(a) The front cover shall list—
(1) The full and correct name of the proponent;
(2) The nature of the transaction (e.g., merger, coordination project, trackage rights, etc.); and
(3) If a consolidation or merger is proposed, the proposed name of the resulting company.

(b) An inside front cover shall list—
(1) The business address of the proponent (street and number, city, county, state and zip code);
(2) The name, title, business address and telephone number of the officer or offices to whom correspondence with respect to the submission should be addressed; and
(3) The name, business address and phone number of the proponent's attorney.

§ 268.21 Introductory statement, summary of proposed transaction, and map of proponent.

Each submission shall contain—
(a) A section, written in a narrative form, entitled "Introductory Statement", describing proponent and including the following information concerning proponent:
(1) Whether proponent is an individual, firm, partnership, corporation, company, association, joint-stock company, trustee, receiver, assignee, or other personal representative, and trade name or style, if any, under which proponent is doing business;
(2) Depending upon whether the proponent is a corporation, partnership, or other form of organization or entity, the date and place of incorporation, of partnership formation, of organization, or the name and address of the court, if any, under direction of which proponent is acting, as applicable.
(3) Whether proponent is a railroad;
(4) If proponent is not a railroad, the type of business in which it is engaged, the length of time so engaged, and particulars of its present activities which are or may be related to transportation subject to the Act.
(5) Whether proponent or any subsidiary is affiliated with a motor or water carrier subject to the Act; also the following information with respect to rail, motor or water operations, where applicable. The date of the certificate, permit or temporary authority, and the number of the Commission's docket assigned to the application upon which such certificate, permit, or temporary authority was issued or granted, or if application to engage in interstate or foreign commerce has been made but is still pending the date of the application and the docket number;
(6) Whether proponent is controlled by any other corporation or corporations, and, if so, the name(s) of the controlling corporation(s), the form of control, whether sole or joint, direct or indirect, and its extent.
(7) The measure of control or ownership, if any, now exercised by proponent over any other railroad, or over the properties of a railroad and
(8) Whether there are any intercorporate relationships, not disclosed in responses to prior instructions, through holding companies, ownership of securities, or otherwise, direct or indirect between proponent and any railroad or person affiliated with proponent and any railroad or person affiliated with any railroad, at the time of making the application; if so, the nature and extent of such relationship; and, if proponent owns securities of a railroad corporation or corporations subject to the Act, the name of the corporation, a description of securities, the par value of each class of securities held, and the percentage of total ownership.

(b) The submission shall also contain a narrative summary including—
(1) A brief description of the general nature of the entire proposed transaction;
(2) A brief description of the line or lines of railroads involved in the transaction, the principal points of interchange, city or county and state location, and major terminals and classification points;
(3) A brief description of the terms and conditions of the contract or agreement under which the proposed transaction is to be effected, including the manner in which the parties propose to consummate the transaction;
(4) A brief geographical description (including as applicable, route descriptions) of (i) operations sought to be performed and (ii) other operations presently performed;
(5) The proposed time schedule for consummation of the proposed transaction;
(6) A statement whether any governmental financial assistance involved is in the proposed transaction and, if so, the form, amount, source, and application of such financial assistance;
(7) The state or states in which any part of the properties of the railroads involved in the proposed transaction are situated; and
(8) The public interest factors involved.

(c) At the conclusion of the narrative summary, a general or key map indicating clearly the line or lines of proponent, parts of the line or lines of proponent in their true relation to each other, shortline connections, other rail lines in the territory and the principal geographic points of the region transversed. The map may be drawn using any appropriate scale or key system, so long as it is clear, can be easily reproduced, and effectively presents the required information. Three additional copies of the map shall be furnished, unbound, for the use of the Administrator.

§ 268.23 Needs of rail transportation.

To the extent applicable to the proposed transaction, each submission shall contain—

(a) A discussion and analysis of the present demand for rail transportation, both freight and passenger, in the geographical area affected by the proposed transaction, and how the proposed transaction would better meet such demands or would result in improved rail freight or passenger service, including estimates of trends in growth, direction, and volume of rail traffic in such areas.

(b) A description and analysis of future rail freight and passenger transportation needs that the proposed transaction is designed to meet (such as freight transportation presently handled by other modes, new industries likely to locate in the geographical area affected, new mineral traffic, etc.). If the future rail freight traffic is anticipated to result from anything other than continued growth in existing rail traffic, provide—
(1) A description of the type and amount of such traffic and its true origin/destination patterns; and
(2) Preliminary estimates of revenue gains and losses which will result from the proposed transaction, including those which will be suffered or enjoyed by other rail carriers. Supporting documents shall include an operating plan, a description of employees affected (this may be used in connection with section 268.31), improvements in service, and an estimate of savings to be affected (this may be used in connection with section 268.27).

(c) An analysis of financial strengths and weaknesses of the proponent, including a discussion of the improved financial performance expected to be achieved as a result of the proposed transaction.

(d) Any additional facts tending to establish that the proposed transaction will be consistent with the needs of rail transportation in the geographical area affected.

(e) The discussion and analysis required by this section shall be accompanied by a full explanation of the methodology and reasoning used in making estimates and projections called for by this section.

§ 268.25 Retention and promotion of competition.

To the extent applicable to the proposed transaction, each submission shall contain—

(a) A discussion and analysis of the present intermodal competition for the traffic originated and terminated on the lines affected by the proposed transaction, from true origin station or city to final destination station or city of the shipments. Among other factors, this discussion shall include—
(1) The extent and scope of motor and water carrier ability to meet the service needs, as compared to the existing railroad network;
(2) The identification of the motor and water carriers that compete with the proponent and the proponent's best estimate of the motor and water carriers' tonnage, ton-miles and freight revenues; and
(3) The extent of rail competition for the traffic originated and terminated on the lines affected by the proposed transaction, from true origin station or city to final destination station or city of the shipments.

(b) For all transactions involving railroads serving substantially the same geographical area, a listing of all of the communities on all lines included in the proposed transaction which are served by more than one railroad and an estimate of the share of the rail traffic possessed by each railroad. Include an indication of those points served by more than one railroad that can receive better service by only one railroad, if any.

(c) Proponent's best estimate of the percentage of traffic handled by competitors, if any, which proponent would reasonably expect to attract as a result of the proposed transaction, and a projection of the total rail market share before and after the proposed transaction would take effect, describing the relative market shares of competing modes.

(d) A discussion of any overhead traffic, that is, traffic which neither originates nor terminates on the lines affected by the proposed transaction but which passes over the lines affected by the proposed transaction, if any, including—
(1) The extent and scope of intermodal competition for this traffic;
(2) A discussion of existing and anticipated post-consolidation railroad competition for this traffic; and
(3) An explanation of what steps could and are planned to be taken, if any, to enable proponent to originate or terminate such overhead traffic.

V 42 N 165 AUG 25 77 UM

(e) Any additional facts tending to show the effect of the proposed transaction on the retention and promotion of competition in the provision of rail and other transportation services in the geographical areas affected.

(f) The discussion and analysis required by this section shall be accompanied by a full explanation of the methodology and reasoning used in making estimates and projections called for by this section.

§ 268.27 Rationalization of the rail system.

To the extent applicable to the proposed transaction, each submission shall contain—

(a) A discussion and analysis of the proposed transaction in the context of the findings or facts contained in the reports prepared by the Secretary under sections 503, 504, and 901 of the RRRRA, as those reports are issued.

(b) To the extent altered by the proposed transaction, a description of service presently performed. All significant service improvements and downgradings (e.g., changes in scheduling, service frequency, blocking plans, etc.) are to be listed.

(c) A description of the effect the proposed transaction will have on the total funding needs (Federal, state, and local) of the proponent, examining all programs including those for rail line rehabilitation and improvements, grade crossing needs, highway bridge construction plans, passenger or commuter lines, etc.

(d) An identification of all lines of the proponent in the geographical area affected by the proposed transaction which serve no rail patrons except at junctions with other carriers. A discussion of the practicality of serving all such rail patrons at such points by only one railroad, and a recommendation as to which railroad this should be is required.

(e) An analysis and discussion of the operating savings expected from any service or route changes, following consummation of the proposed transaction, including a breakdown of the significant componets of these savings and a discussion of the quantitative effect of these savings on present operating costs.

(f) An estimate of the additional net revenue to be derived as a result of any longer hauls and increased single-line service.

(g) Any additional information tending to show the effect of the proposed transaction on the achievement of a more efficient or adequate rail system.

(h) The discussion and analysis required by this section shall be accompanied by a full explanation of the methodology and reasoning used in making estimates and projects called for by this section.

§ 268.29 Cost of rehabilitation and modernization compared to alternative choices.

To the extent applicable to the proposed transaction, each submission shall contain—

(a) For those lines affected by the proposed transaction, a description and analysis of the maintenance and rehabilitation needs, slow orders in effect, class of track, rail facilities subject to deferred maintenance, and equipment and other facilities involved in the proposed transaction, in the context of the informational findings or facts contained in the reports prepared by the Secretary under sections 504 and 901 of the RRRRA, when issued.

(b) A discussion of the means by which accelerated maintenance and rehabilitation needs for any lines identified and discussed in subsection (a) are to be met, including—

(1) The amount and availability of private sources of funds, including internally generated fund;

(2) If public funds are desired, the availability of public sources of funds from all levels of governments, describing in detail the amounts and timing of any public funds anticipated;

(3) Identification and discussion of possible alternative courses of action available if such maintenance and rehabilitation needs are not met in the amount or time frame proposed, and a projection of the costs of such alternative courses of action; and

(4) A description of those lines or those portions of lines scheduled for maintenance and rehabilitation, if any, on which shippers with service options from connecting or intersecting railroads are located.

(c) If the proponent has applied or intends to apply for financial assistance under Title V of the RRRRA, full details should be provided regarding the relationship of the request for financial assistance to the proposed transaction, including the nature, amount, timing and purpose of the financial assistance, and the steps which have been taken to secure the financial assistance. Any application filed in the last three (3) years or to be filed for state or local assistance should be similarly discussed, to the extent it relates to the proposed transaction including tax relief, grade crossing programs, etc.

(d) Any additional facts tending to show the cost of rehabilitation and modernization of track, equipment, and other facilities associated with the proposed transaction, with a comparison of the potential savings or losses from other possible choices of action.

(e) The discussion and analysis required by this section shall be accompanied by a full explanation of the methodology and reasoning used in making estimates and projections called for by this section.

§ 268.31 Impact on shippers, consumers, and railroad employees.

To the extent applicable to the proposed transaction, each submission shall contain—

(a) A description of any service, cost, or rate improvements which would result from the proposed transaction including identification of shippers, consumers, and rail employees benefitted, together with a description of the benefit.

(b) A description of any reductions in service quality including identification of shippers, consumers, and rail employees affected together with a quantification of the effect and means of ameliorating the effect.

(c) With regard to rail employees of the proponent—

(1) A description of all projected changes in employment as a result of the proposed transaction;

(2) A list of any increases in rail employment resulting from the creation of any service improvements (e.g., single-line service);

(3) For any projected employment decreases, an explanation of how they will be handled and an estimate of the total costs of labor protection associated with the proposed transaction;

(4) A copy of any contract or agreement with employee organizations entered into as a result of, or as part of, the proposed transaction, and/or a description of any contract or agreement with employee organizations which proponent anticipates entering into as a result of, or as a part of, the proposed transaction; and

(5) A discussion regarding the effect, if any, any consolidation of management and personnel that would result from the proposed transaction would have in improving the present and future rail needs of the geographical area affected.

(d) An analysis which quantifies—

(1) The effect of rehabilitation programs, as discussed under section 268.29 on individual shippers;

(2) The amount of rail employment to be derived directly from the proposed rehabilitation program and any secondary rail employment which would result after completion of the proposed rehabilitation program; and

(3) The effect of rationalization efforts, as discussed under section 268.27 on the quality of service on individual lines and shippers, addressing upgrading and improved services as well as downgrading or abandonments.

(e) Any additional facts tending to show the effect of the proposed transaction on shippers, consumers and railroad employees.

(f) The discussion and analysis required by this section shall be accompanied by a full explanation of the methodology and reasoning used in making estimates and projections called for by this section.

§ 268.33 Effect on communities.

To the extent applicable to the proposed transaction, each submission shall contain—

(a) A description of the effect of service improvements, downgradings, or abandonments resulting from the proposed transaction, if any, on the communities served and on areas adjacent to those communities.

(b) A description of any new industrial development opportunities or losses resulting from the proposed transaction.

(c) If commuter or other passenger services, Amtrak, Autotrain or the like intercity passenger service are operated over the lines of the proponent, a detailed discussion of any impact anticipated on such services, such as delays which may be occasioned because a line is scheduled to handle increased traffic due to route consolidation or improvements resulting from the rehabilitation or rationalization program.

(d) An identification and location of any existing shops, repair facilities, yards, or other major installations or facilities, whenever such operations are or would become significant employers in the community where they are or would be located as a result of the proposed transaction.

(e) Any additional facts tending to show the effect of the proposed transaction on the communities in the geographical areas affected and on the geographical areas contiguous to such areas.

(f) The discussion and analysis required by this section shall be accompanied by a full explanation of the methodology and reasoning used in making estimates and projections called for by this section.

§ 268.35 Improvement of rail service.

To the extent applicable to the proposed transaction, each submission shall contain—

(a) A narrative discussion of all the factors noted in sections 268.23 through 268.33, quantifying all of the benefits and costs of, and assessing the tradeoffs related to, the proposed transaction, to the extent rail service improvements are anticipated. The discussion will include coverage of the following issues:

(1) Single-line service opportunities met;

(2) Competitive gains and losses;

(3) Rehabilitation and rationalization that would be achieved;

(4) Rail employment gains and losses;

(5) Effect on shippers and communities;

(6) Effect on passenger services; and

(7) Other services improved or lost.

(b) Any additional facts tending to show whether the proposed transaction will improve rail services.

(c) The discussion and analysis required by the section shall be accompanied by a full explanation of the methodology and reasoning used in making estimates and projections called for by this section.

§ 268.37 Effect on employment.

To the extent applicable to the proposed transaction, each submission shall contain—

(a) A narrative discussion of all the factors discussed in §§ 268.23 through 268.33, estimating the amount of employment (other than rail employment), both direct and secondary, to be gained or lost as a result of the proposed transaction, and estimating the value to the economy of the geographical area affected by the proposed transaction, of the consummation and implementation of the proposed transaction.

(b) Any additional facts tending to show the effect of the proposed transaction on employment in the geographical areas effected by the proposed transaction.

(c) The discussion and analysis required by this section shall be accompanied by a full explanation of the methodology and reasoning used in making estimates and projections called for by this section.

§ 268.39 Environmental impact.

To the extent applicable to the proposed transaction, each submission shall contain—

(a) A narrative discussion of all the factors discussed in §§ 268.23 through 268.33, estimating the environmental impact, both direct and secondary, reasonably believed to follow from the effectuation of proponent's operating plan, and from effectuation of alternative choices of action.

(b) A description of mitigation measures which may be necessary to assure compatability between rail operations following the effectuation of the proposed transaction, and the surrounding areas and resources.

(c) Any additional facts tending to show the environmental impact of the proposed transaction and of alternative choices of action.

(d) The discussion and analysis required by this section shall be accompanied by a full explanation of the methodology and reasoning used in making estimates and projections called for by this section.

§ 268.41 Administrator's request for additional information.

Proponent shall submit any additional information which the Administrator determines is necessary concerning a submission filed under this part.

Subpart C—Miscellaneous Provisions

§ 268.43 Access to information.

If a proponent wishes any information filed in a submission or in a supplemental submission not be released by the Administrator upon request from a member of the public, the proponent must so state and must set forth the reasons why such information should not be released, including particulars as to any competitive harm which should result from release of such information. The Administrator will keep such information confidential as permitted by law.

§ 268.45 Waiver or modification.

The Administrator, upon good cause shown, may waive or modify any requirement of this part, or make any additional requirements considered necessary.

Dated: August 18, 1977.

JOHN M. SULLIVAN,
Administrator, Federal Railroad Administration.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

[32A CFR Part 671]

MATERIALS AND EQUIPMENT ALLOCATION AND PRIORITY PERFORMANCE UNDER CONTRACTS OR ORDERS TO MAXIMIZE DOMESTIC ENERGY SUPPLIES

AGENCY: Department of Commerce (DOC), Domestic and International Business Administration (DIBA), Office of Industrial Mobilization (OIM).

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The proposed regulation describes the procedure for implementing DIBA functions with regard to the allocation of, or the priority performance under contracts or orders relating to, supplies of materials and equipment in order to maximize domestic energy supplies. Written comments are requested with respect to the proposed regulation.

DATES: Comments by September 15, 1977.

ADDRESS: Any written communications in connection with this proposed regulation should be addressed to: Deputy Assistant Secretary for Domestic Commerce, U.S. Department of Commerce, Washington, D.C. 20230, and marked "Priority and Allocation Regulations".

FOR FURTHER INFORMATION CONTACT:

Richard Smith, Acting Director, Mobilization Operations and Plans Division, Office of Industrial Mobilization, Bureau of Domestic Commerce, Domestic and International Business Administration, Room 4110, U.S. Department of Commerce, Washington, D.C. 20230, 202-377-2233.

Wallace E. Brown, Deputy Assistant General Counsel for Domestic Commerce, Office of the General Counsel, Room 3845, U.S. Department of Commerce, Washington, D.C. 20230, 202-377-5303.

SUPPLEMENTARY INFORMATION:

I. Background;
II. Purpose and description of the regulations;
III. Procedures for processing an application for Use of DPA Section 101(c) authority;
IV. Comments requested;
V. Comment procedures;
VI. Miscellaneous.

I. Background

The regulation is the result of Section 104 of the Energy Policy and Conservation Act (EPCA), Public Law No. 94-163, 89 Stat. 878. This Section added a new subsection (c) to Section 101 of the Defense Production Act of 1950, as amended, (DPA), 50 U.S.C. App. 2071(c). DPA Section 101(c)(1) authorizes the President to require the allocation of, or the priority performance under contracts or orders relating to, supplies of materials and equipment in order to maximize domestic energy supplies. This authority may be used only if the President finds, as stated in DPA Section 101(c)(3), that:

(a) Such supplies [of materials and equipment] are scarce, critical, and essential to maintain or further (i) exploration, production, refining, transportation, or (ii) the conservation of energy supplies, or (iii) for the construction and maintenance of energy facilities; and

(b) Maintenance or furtherance of exploration, production, refining, transportation, or conservation of energy supplies or the construction and maintenance of energy facilities cannot reasonably be accomplished without exercising the authority specified in Section 101(c).

Section 7 of Executive Order No. 11912, 3 CFR, 1976 Comp., P. 114, designates and empowers the Administrator of General Services to perform the functions vested in the President by DPA Section 101(c), with a requirement for a redelegation of such functions by the Administrator of General Services to the Secretary of Commerce. The Administrator of General Services provides for the overall coordination and direction of DPA Section 101(c) functions. The Secretary of Commerce is responsible for administering priorities and allocations of supplies of materials and equipment by issuing appropriate rules and orders pursuant to DPA Section 101(c)(1), if the specified statutory findings of DPA Section 101(c)(3) have been made. With respect to these statutory findings, the Secretary of Commerce has, as required by the Executive Order 11912, redelegated to the Administrator of the Federal Energy Administration (FEA) the function of determining which supplies of materials and equipment are critical and essential to maintain or further exploration, production, refining, transportation or conservation of energy supplies or for the construction and maintenance of energy facilities. The Secretary of Commerce retains the functions of finding whether the supplies of materials and equipment are scarce and whether maintenance or furtherance of exploration, production, refining, transportation, or conservation of energy supplies or the construction and maintenance of energy facilities cannot reasonably be accomplished without exercising the authority contained in DPA Section 101(c)(1).

II. Purpose and Description of the Regulation

The purpose of the regulation is to describe how OIM/DIBA will discharge the functions delegated to it pursuant to DPA Section 101(c). It describes the procedures OIM/DIBA will follow in considering requests that the findings delegated to it be made.

If findings are made OIM/DIBA will report them to the FEA and authorize the assignment of a priority rating for the required supplies of materials and equipment.

III. Processing an Application for Use of DPA Section 101(c) Authority

The regulation provides that persons who consider work they are performing an appropriate situation for use of the authority contained in DPA Section 101(c) may submit an application to FEA. 10 CFR Part 216.3(a) describes the minimum contents of such an application. FEA will examine this application and make two determinations: (1) Whether or not the program or project on which the applicant is working (and in connection with which the request for assistance is submitted) maximizes domestic energy supplies, and (2) whether or not the supplies of materials and equipment for which assistance is requested are critical and essential to the energy program or project.

Upon the receipt of an application from FEA, OIM/DIBA will determine whether or not (1) the specific supplies of materials and equipment for which priorities/allocations authority has been requested are scarce and (2) the specific energy program or project for which the requested supplies of materials and equipment supports, cannot reasonably be accomplished without exercising the authority specified in DPA Section 101(c)(1).

For the purpose of making the scarcity determination the term "scarcity" implies unusual difficulty for the purchaser in obtaining the materials and equipment from a source of supply in appropriate specification, quality, and quantity, and in a time span consistent with the purposes of the eligible energy program for which the requested material is required. Sources of supply considered for the purpose of the scarcity determination include all persons capable of meeting required product specifications, quality and quantity within the required time frame.

For purposes of determining whether or not the energy program cannot reasonably be accomplished without exercising the authority specified in DPA Section 101(c)(1), DOC will consider such factors as: (1) alternative solutions to the supply problem, (2) impact of exercising the authority on the delivery status of the required material on other national programs, including and specifically, on the other defense and energy programs, and (3) benefits derived from using the authority.

If these two findings are made, the DOC will notify the FEA, and the FEA will inform the applicant that it has been granted the right to use priority ratings as prescribed by OIM/DIBA. If OIM/DIBA is unable to make either of the required findings, FEA and the applicant will be so informed and may petition for reconsideration.

IV. Comments Requested

Persons interested in the procedures to be followed by OIM/DIBA in discharging DPA Section 101(c) functions delegated to it are invited to submit data, views, or arguments with respect to the proposed regulation.

V. Comment Procedures

A. Written Comments

Written comments should be submitted to the address specified in the Address Section of this preamble and identified on the outside of the envelope with the designation "Energy Regulation 1" Allocation Regulations." Three copies should be submitted. All comments received by September 15, 1977 will be considered by the OIM/DIBA before final action is taken on the proposed regulation.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing. Such information will be handled in accordance with the provision of Section 705(e) of the DPA.

VI. Miscellaneous

In providing for implementation of DPA Section 101(c) authority, the involved Federal agencies have worked to avoid duplication of existing procedures implementing DPA Section 101(a) authority. This proposed regulation does not create separate priorities and allocations systems. It is designed to supplement the current DPA materials and equipment allocation and priorities systems operated by the OIM/DIBA by providing the energy related information and evaluation necessary for the implementation of DPA Section 101(c). Regulations concerning performance by the OIM/DIBA of functions pursuant to the DPA may be found in Volume 32A of the Code of Federal Regulations. They are identified as Defense Materials System (DMS) Reg. 1 and Defense Priorities System (DPS) Reg. 1 and will be modified to provide the mechanism for administering the priorities and allocations authority under Section 101(c) of the DPA.

Note.—It is hereby certified that the economic impacts of this proposed regulation have been carefully evaluated in accordance with Executive Order 11821, as amended by Executive Order 11949, and have been determined not to be of a nature that requires an evaluation of economic impact.

Section 1. Introduction.

(a) This part describes and establishes the procedures to be used by the Office of Industrial Mobilization (OIM), Domestic and International Business Administration (DIBA) in considering and making certain findings required by Section 101(c) of the Defense Production Act of 1950, as amended, 50 U.S.C. App. 2061 et seq (DPA). Section 101(c) authorizes the allocation of, or priority performance under contracts or orders (other than contracts of employment) relating to, supplies of materials and equipment in order to maximize domestic energy supplies if the findings described in Section 101(c)(3) are made. These findings are that such supplies of materials and equipment are scarce, critical, and essential to maintain or further exploration, production, refining, transportation or the conservation of energy supplies or for the construction and maintenance of energy facilities; and that the maintenance or furtherance of exploration, production, refining, transportation, or the conservation of energy supplies, or the construction and maintenance of energy facilities cannot reasonably be accomplished without exercising Section 101(c) authority. The function of determining if such supplies are critical and essential has been delegated to the Administrator of the Federal Energy Administration (FEA) pursuant to Executive Order 11912 of April 13, 1976, 41 FR 15825 (1976), Defense Mobilization Order (DMO) No. 13 dated September 22, 1976, 41 FR 43720, and Department of Commerce, Bureau of Domestic Commerce, Delegation No. 4, effective date December 1, 1976, 41 FR 52331. The function of determining if such supplies are scarce and whether the energy program or project cannot reasonably be accomplished without exercising the authority contained in DPA Section 101(c)(1) has been retained by Commerce and assigned to DIBA:

(b) The purpose of this regulation is to establish the procedures and criteria to be used by the OIM/DIBA in processing applications under authority of DPA Section 101(c) and in making those findings required by DPA Section 101(c)(3) retained in DOC. The finding of scarcity and determination of necessity to exercise the authority of Section 101(c)(1) will be made only for supplies of materials and equipment related to those programs or projects determined by FEA to maximize domestic energy supplies, and found by FEA to be both critical and essential:

(c) If the FEA determines that a program or project maximizes domestic energy supplies and finds that supplies of materials and equipment are critical and essential to maintain or further the exploration, production, refining, transportation or conservation of energy supplies or for the construction and maintenance of energy facilities, such determination and finding will be communicated to the Department of Commerce. If the determination and finding described above are made, OIM/DIBA will determine whether or not (1) the supplies of materials and equipment in question are scarce and (2) maintenance or furtherance of exploration, production, refining, transportation, or conservation of energy supplies or the construction and maintenance of energy facilities cannot be reasonably accomplished without exercising the authority specified in Section 101(c) of the DPA. If these two findings are made, OIM/DIBA will notify the FEA, and the FEA will inform the applicant that it has been granted the right to use priority ratings established by the Department of Commerce. If OIM/DIBA is unable to make either of the two (2) required findings, both FEA and the applicant will be so notified and may petition for reconsideration.

Sec. 2. Definitions.

As used in these regulations:

(a) "Administrator" means the Administrator of the Federal Energy Administration;

(b) "Applicant" means a person requesting priorities or allocation assistance in connection with an energy program or project;

(c) "Application" means the written request of an applicant for assistance;

(d) "Assistance" means use of the discretionary authority vested in the President by DPA Section 101(c) and delegated to DIBA to implement priorities and allocations support;

(e) "Eligible energy program or project" means a designated activity, as determined by the FEA, which maximizes domestic energy supplies by furthering the domestic exploration, production, refining, transportation or conservation of energy supplies or construction and maintenance of energy facilities;

(f) "Energy contractor" means a person using materials or equipment determined by the FEA to be critical and essential to the furtherance or completion of an eligible energy program or project;

(g) "Materials and equipment" means any raw, in-process, or manufactured commodity, equipment, component, accessory, part, assembly or product of any kind, but excludes those listed in Schedule II to Defense Priorities System Reg. 1 (32A CFR Part 651);

(h) "Person" means an individual, corporation, partnership, association, or any other organized group of persons (or legal successor or representative thereof), and includes the United States or any other government and any political subdivisions (or any agency) thereof;

(i) "'Scarcity" means unusual difficulty for a purchaser in obtaining the materials or equipment in appropriate specification, quality, quantity and in a time span consistent with the purposes of the eligible energy program or project;

V 4216 5 AUG 25 77 UM

(j) "Sources of supply" means all persons capable of meeting required product specifications, quality and quantity within the required time frame.

Sec. 3. Requests for Assistance.

(a) Persons who believe that they may qualify as energy contractors, by virtue of performing work associated with a program or project which may qualify as an eligible energy program or project, and wishing to receive assistance as authorized by DPA Section 101(c), may submit an application to the FEA pursuant to 10 CFR Part 216, and this Part, requesting (1) the FEA to determine whether or not the program or project maximizes domestic energy supplies, (2) the FEA to find whether or not specific supplies of materials or equipment identified in the application are critical and essential for a purpose identified in Section 101(c), (3) the OIM/DIBA to find whether or not specific supplies of materials or equipment identified in the application are scarce, and (4) the OIM/DIBA to find whether or not the specific energy program or project identified in the application cannot reasonably be accomplished without exercising the authority of Section 101(c). Such application shall contain the following information:

(1) The name and address of the applicant and that of a duly authorized representative thereof;

(2) A description of the energy program or project for which assistance is requested and an assessment of its impact on the maximization of domestic energy supplies;

(3) The amount of energy to be produced by the program or project which is directly affected by the supplies of the materials or equipment in question;

(4) A statement explaining why the materials or equipment for which assistance is requested are critical and essential to the construction or operation of the energy project or program;

(5) A detailed description of the specific supplies of materials or equipment in connection with which assistance is requested, including: components, performance data (capacity, life duration, etc.), standards, acceptable tolerance in dimensions and specifications, current inventory, present and expected rates of use, anticipated deliveries and substitution possibilities (feasibility of using other materials or equipment);

(6) A detailed description of the sources of supply, including: name of the regular supplying company or companies, other companies capable of supplying the materials and equipment, location of supplying plants or plants capable of supplying the needed materials and equipment, and possible foreign sources of supply;

(7) A detailed description of the delivery situation, including: normal delivery times, promised delivery time without priorities assistance, and delivery time required for timely delivery or completion of the program or project;

(8) Evidence of the applicant's unsuccessful efforts to obtain on a timely basis the materials or equipment in question through normal business channels from regular or other known suppliers;

(9) A detailed estimate of the delay in fulfilling or completing the energy program or project which will be caused by inability to obtain the specified materials and equipment in the usual course of business;

(10) Any known conflicts with rating or allocation orders already issued pursuant to the DPA for supplies of the described materials and equipment.

(b) The OIM/DIBA and FEA may prescribe standard forms of application for use by all persons seeking assistance;

(c) In addition to the information described above, OIM/DIBA or FEA may from time to time request whatever additional information it reasonably believes is relevant to the discharge of its functions pursuant to DPA Section 101(c).

Sec. 4. Evaluation by OIM/DIBA of Applications.

(a) FEA will forward to OIM/DIBA an application for assistance when it has (1) determined the energy program or project specified in the application to be an eligible energy program or project, and (2) found the materials and equipment specified in the application to be both critical and essential to the eligible energy program or project;

(b) Based on the information provided by the applicant and other available information, OIM/DIBA will assess the application and determine (1) whether or not the described supplies of materials and/or equipment are scarce, and (2) whether or not the eligible energy program or project cannot reasonably be accomplished without exercising the authority of DPA Section 101(c);

(c) In determining the scarcity of the supplies of the material and/or equipment referred to in the application, the OIM DIBA will consider all factors which it considers relevant quantitative measures of product availability, including the following: (1) Shipments; (2) consumption; (3) imports and exports; (4) sources of supply; (5) inventories of producers, users, and traders; (6) rates of capacity utilization; (7) volume of new orders; and (8) average lead time for filling orders.

(d) In determining whether the maintenance or furtherance of the eligible energy program or project cannot reasonably be accomplished without exercising the authority specified in DPA Section 101(c)(1), the OIM DIBA will consider all factors which it considers relevant, including:

(1) Alternative solutions to the supply problem; and

(2) To the extent practicable, an assessment of the effects of using the authority for the project in question on other significantly impacted projects.

(e) Increased costs which may be associated with obtaining materials or equipment without assistance shall not be considered a valid reason for finding the materials and equipment to be scarce or determining the necessity of using the authority of DPA Section 101(c).

Sec. 5. Notification of Findings.

(a) The OIM/DIBA will notify the FEA whether or not it has determined that supplies of materials or equipment for which an applicant requested assistance are scarce and that the related eligible energy program or project cannot reasonably be accomplished without exercising the authority specified in DPA Section 101(c)(1) together with whatever information or comments OIM/DIBA believes appropriate.

(b) If the OIM/DIBA notifies FEA that the OIM/DIBA has found that supplies of materials and equipment, for which the applicant requested assistance, are scarce and that the related eligible energy program or project cannot reasonably be accomplished without exercising the authority specified in DPA Section 101(c)(1), the FEA will notify the applicant that the applicant is authorized to place rated orders and/or authorized controlled material orders for specific supplies of materials and equipment pursuant to the provisions of Defense Priorities System Reg. 1 and Defense Materials System Reg. 1, as promulgated by the Department of Commerce;

(c) If the OIM/DIBA has been unable to find that supplies of materials and equipment, for which the applicant requested assistance, are scarce or that the related eligible energy program or project cannot reasonably be accomplished without exercising the authority specified in DPA Section 101(c)(1), the FEA and the applicant will so be notified and may petition for reconsideration.

Sec. 6. Requests for Reconsideration or Appeals.

(a) If the OIM/DIBA concludes that it is unable to make either of the two findings required by DPA Section 101(c)(3), for which it has responsibility, the applicant or FEA may submit a request for reconsideration of the applicant's request for assistance;

(b) Each request for reconsideration shall be in writing, by letter in triplicate, addressed as provided in Section 8(a) of this regulation, and shall set forth all pertinent facts and the nature of the relief sought and shall state the justification thereof;

(c) The OIM/DIBA will consider the petition for reconsideration and either grant or deny the relief requested therein. Written notice of the decision and the reasons therefore will be provided to the applicant;

(d) Any person may appeal to the Appeals Board for Department of Commerce from an adverse decision against him by OIM/DIBA pursuant to this regulation. Each appeal shall be submitted to the Appeals Board not later than 45 days after receipt by the appellant of an adverse decision and shall be in writing, by letter in triplicate, addressed as provided in Section 8(b) of this regulation, and shall set forth all pertinent facts and the nature of the relief sought, and shall state the justification thereof. In addition, one copy of such letter shall be furnished to OIM/DIBA by the appellant, addressed as provided in Section 8(a) of this regulation. The decision of the Appeals Board shall be final within the Department and will be provided in writing to the appellant and to OIM/DIBA.

Sec. 7. Violations.

(a) Any person who willfully violates any provision of this regulation, or who willfully furnishes false information or conceals any material fact in the course of operation under this regulation is guilty of a crime and upon conviction may be punished by fine or imprisonment or both;

(b) Violation of any provisions of this regulation may subject any person committing or participating in such violation to administrative action to suspend such person's privilege of receiving priority deliveries of materials and equipment under DPA Section 101(c). In addition, to such administrative action, an injunction and order may be obtained prohibiting any such violation and enforcing compliance with the provisions thereof.

Sec. 8. Communications.

(a) All written communications concerning this regulation or requests for reconsideration pursuant to Section 7(a) of this regulation will be addressed to the Office of Industrial Mobilization, Domestic and International Business Administration, U.S. Department of Commerce, Room 4104, 14th Street and Constitution Ave. NW., Washington, D.C. 20230.

(b) All appeals pursuant to Section 7(b) of this regulation will be addressed to the Appeals Board, U.S. Department of Commerce, Washington, D.C. 20230.

STANLEY J. MARCUSS,
Deputy Assistant Secretary for Domestic Commerce.

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

[43 CFR Part 426]

ACREAGE LIMITATION

Reclamation Rules and Regulations

AGENCY: Bureau of Reclamation, Interior

ACTION: Proposed rule

SUMMARY: The Bureau of Reclamation, Department of the Interior, proposes to issue rules and regulations establishing policies and procedures to meet the Secretary's responsibilities in administering the acreage limitation and other provisions of reclamation law. These proposed rules are issued in response to the order of the United States District Court for the District of Columbia in the case of National Land for People, Inc. v. The Bureau of Reclamation, et al., Civil Action No. 76–928. The Department believes that these new regulations will enable the Department to meet fully the mandates of reclamation law.

DATES: Comment Period: November 23, 1977.

ADDRESS: Comments should be submitted to the Commissioner, Bureau of Reclamation, Department of the Interior, 18th and C Streets NW., Washington, D.C. 20240, Attention: Code 410.

FOR FURTHER INFORMATION CONTACT:

Mr. Vernon S. Cooper, Special Projects Officer, Division of Water and Land, Bureau of Reclamation (202) 343–5104.

SUPPLEMENTAL INFORMATION: It is the policy of the Department of the Interior to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions, or objections regarding the proposed regulations to the Bureau of Reclamation. Comments must be received on or before November 23, 1977. Public hearings on the proposed regulations will be scheduled as demand warrants. The Department requests that those interested in public hearings immediately notify in writing the Commissioner of the Bureau of Reclamation or the nearest Bureau of Reclamation office with suggestions for hearing places. The hearings will then be scheduled, and the public notified, in a later edition of the FEDERAL REGISTER.

On August 13, 1976, the United States District Court for the District of Columbia in the case of "National Land for People, Inc. v. The Bureau of Reclamation, et al.," Civil Action No. 76–928, ordered the Department of the Interior to "forthwith initiate public rulemaking proceedings * * * respecting the criteria and procedures to be used by the Bureau of Reclamation, Department of the Interior, to approve 'excess lands' sales under the Federal Reclamation Laws." These proposed rules are in response to this court order.

The proposed regulations embody several important changes in current practices to enforce the excess land (160 acre limitation) and other reclamation laws. They define more specifically the procedures by which excess lands should be sold and who can qualify as purchasers, to fulfill the purpose of reclamation law that low-priced federal water be used as a means of encouraging the establishment of genuine small family farms. The principal changes are as follows:

(1) All new purchasers of excess land benefiting from low-priced federal water must live on or in the neighborhood of the land benefited. Because the regulations address only excess lands, they do not make residency a general requirement for any land served with low-cost federal water pursuant to the reclamation laws. Residency is, however, believed to be a legally required condition of receiving federally-subsidized water, and regulations spelling out how the residency requirement will be reimplemented across-the-board will be prepared as soon as practicable. These rules will outline the procedure by which those landowners who now benefit from low-cost federal water, but who do not live on or in the neighborhood of their land, will be allowed a period of time to bring themselves into compliance while still receiving the low-cost federal water. Such a period of adjustment is deemed appropriate because of the failure to enforce the requirement for many years.

(2) The criteria for determining qualified purchasers of excess land are tightened, to prohibit multiple ownerships (such as partnerships or thrusts) except where there is a family relationship among the owners.

(3) The regulations discourage speculation by allowing the Department to exercise continuing supervision over the sale price of land after it is sold into non-excess status. This reverses the current practice of allowing an excess land purchaser to realize the windfall profits represented by low-priced federal water in an immediate resale.

(4) The proposed regulations place some limitations on the leasing of both excess and nonexcess lands benefited by low-priced federal water, in order to promote farm operations by the actual owners.

(5) The regulations alter the procedures by which excess lands are sold, to allow a large number of prospective purchasers a better opportunity to participate in the reclamation program. For example, the past practice of allowing an excess land seller to arrange privately for sale is abolished. The Department will announce the availability of such lands, and choose among prospective purchasers by lottery or other impartial means.

In connection with these proposed regulations, it should be noted that, pursuant to Pub. L. 95–46, the Department has created a Task Force to study the San Luis Unit of the Central Valley Project in California. The Task Force's report, due January 1, 1978, will include among the other things a study of the excess land law's operation in that area, and may make recommendations to the Department and to the Congress regarding the excess land and residency portions of the reclamation law.

The Department intends to act promptly to promulgate final regulations once public comment has been received and digested and appropriate modifications made. On June 27, 1977, the Secretary ordered a halt to the processing of all excess land sales and the signing of new recordable contracts until final regulations are promulgated, and the Department is also under a court order to promulgate such regulations "forthwith." Therefore, the Department intends to proceed as expeditiously as possible once full opportunity for public comment has been given. For this reason, the Department does not expect to grant any extensions beyond the already generous 90-day comment period.

The primary authors of this document are: John D. Leshy, Associate Solicitor, Energy and Resources, Washington, D.C. (202) 343–5757; John C. McDowell, Deputy Associate Solicitor, Energy and Resources, Washington, D.C. (202) 343–4325; Nicholas P. Goschy, Attorney, Energy and Resources, Washington, D.C. (202) 343–4444; Vernon S. Cooper, Special Projects Officer, Division of Water and Land, Washington, D.C. (202) 343–5104; and Michael S. Hacskaylo, Realty Specialist (Excess Land), Division of Water and Land, Washington, D.C. (202) 343–5104.

It is hereby determined that the publication of this proposed regulation will not significantly affect the quality of the human environment and that no environment impact statement pursuant to section 102(2)(c) of the National Environmental Policy Act, 42 U.S.C. Section 4332(c) is required.

NOTE: The Department of the Interior has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 as amended by Executive Order 11949 and OMB Circular A–107.

Dated: August 22, 1977.

GUY R. MARTIN,
Assistant Secretary of the Interior.

Pursuant to the authority of the Secretary of the Interior contained in the Administrative Procedure Act, 60 Stat. 237, 5 U.S.C. 552, 553 and in the Reclamation Act of 1902, as amended and supplemented, 32 Stat. 388, 43 U.S.C. 371 et seq., it is hereby proposed to establish a new Part 426 of Title 43 to read as follows:

PART 426—RECLAMATION RULES AND REGULATIONS FOR ACREAGE LIMITATION

Sec.
426.1 Objectives.
426.2 Effective date, applicability.
426.3 Authority.
426.4 Definitions.
426.5 Deliveries of project water to excess land under special circumstances.
426.6 Lands not eligible to receive project benefits.
426.7 Types of land ownership.
426.8 Leases.
426.9 Nonexcess land.
426.10 Disposition of excess lands.
426.11 Commingling.
426.12 Appraisals of excess land.
426.13 Class 1 equivalency.
426.14 Decisions and appeals.

AUTHORITY: Administrative Procedures Act, 60 Stat. 237, (5 U.S.C. 552, 553), Reclamation Act of 1902, as amended and supplemented, 32 U.S.C. 371, et seq.

§ 426.1 Objectives.

The Reclamation Act policies of limiting the area of land for which project water may be supplied and requiring the landowner to reside on or in the neighborhood of the land benefited are designed:

(a) To provide opportunity for a maximum number of farmers on the land.

(b) To distribute widely the benefits from public-supported reclamation because interest-free money and low-priced water are involved.

(c) To promote the family-size owner-operated farm.

(d) To preclude the accrual of speculative gain in the disposition of excess land.

§ 426.2 Effective date, applicability.

(a) These regulations shall become effective upon publication in the FEDERAL REGISTER as final rulemaking.

(b) These regulations apply to all existing excess lands, including those now under recordable contract. Among other things, they define, consistent with but with greater specificity than existing recordable contracts, both those persons qualified to purchase excess lands (as provided in standard recordable contracts) and those procedures to be used in disposing of excess lands. These regulations shall not apply to existing repayment, water service and recordable contracts only to the extent there is a clear, specific and irreconcilable conflict between these regulations and existing valid contracts which are not otherwise inconsistent with the reclamation laws.

(c) Persons who own lands (1) served by more than one Federal project subject to reclamation laws or (2) located in more than one district, the total of which exceeds the acreage limitation, shall have one year from the effective date of these regulations to sign a recordable contract for the sale of excess lands, in order not to interrupt delivery of Federal water to these lands.

§ 426.3 Authority.

These regulations are promulgated pursuant to authority vested in the Secretary by Congress in the Administrative Procedure Act, 60 Stat. 237, 5 U.S.C. 552, 553, and the Reclamation Act of 1902, as amended and supplemented, 32 Stat. 388, 43 U.S.C. 371 et seq. The basic requirement that the Bureau of Reclamation limit the sale of water rights or the delivery of project water to tracts of not more than 160 irrigable acres was initially contained in the Reclamation Act of June 17, 1902, and is, with comparatively few express statutory modifications or exceptions for particular projects, applicable to all reclamation-served lands. The acts pertinent to that basic requirement, as well as to the modifications, waivers, or exemptions, are identified in the following paragraphs.

(a) *Statutory Requirements for Excess Lands.* (1) Section 5, Act of June 17, 1902 (32 Stat. 389, 43 U.S.C. 392, 431, 439).

(2) Act of February 21, 1911 (36 Stat. 925, 43 U.S.C. 523.).

(3) Section 46, Act of May 25, 1926 (44 Stat. 649, 43 U.S.C. 423e).

(b) *Exceptions and modifications*—(1) *Exempt from acreage limitation.* (i) Colorado-Big Thompson Project, Colorado, Act of June 16, 1938 (52 Stat. 764, 43 U.S.C. 386).

(ii) Truckee Storage and Humboldt Projects, Nevada, Act of November 29, 1940 (54 Stat. 1219).

(iii) Owl Creek Unit, Missouri River Basin Project, Act of August 28, 1954 (68 Stat. 890).

(iv) Santa Maria Project, California, Act of September 3, 1954 (68 Stat. 1190).

(v) Beaverhead Valley, Montana, East Bench Unit, Missouri River Basin Project, Act of July 24, 1957 (71 Stat. 309).

(vi) San Felipe Division, Central Valley Project, California (North and South Santa Clara Subareas only), Section 5, Act of August 27, 1967 (81 Stat. 173, 43 U.S.C. 616fff–5).

(vii) Narrows Units, Missouri River Basin Project, Colorado, Act of August 28, 1970 (84 Stat. 830).

(2) *Modifications of acreage limitation.* (i) Projects constructed pursuant to the Water Conservation and Utilization Act of August 11, 1939 (53 Stat. 1418, 16 U.S.C. 5902(2)), as amended by the Act of October 14, 1940 (54 Stat. 1121).

(ii) San Luis Valley Project, Colorado, Act of June 27, 1952 (66 Stat. 282).

(iii) Nonexcess holding set at 480 irrigable acres, Kendrick Project, Wyoming, Act of September 4, 1957 (71 Stat. 608).

(c) *Acreage equivalency*—(1) *Land equivalent to 120 acres of Class 1 land.* (i) Baker Project (Upper Division), Oregon, Act of September 27, 1962 (76 Stat. 634, 43 U.S.C. 616u).

(2) *Land equivalent to 130 acres of Class 1 land.* (i) East Bench Unit (bench lands only), Missouri River Basin Project, Montana, Act of July 24, 1957 (71 Stat. 309).

(3) *Land equivalent to 160 acres of Class 1 land.* (i) Seedskadee Project, Wyoming, Act of August 28, 1958 (72 Stat. 963).

(ii) Savory-Pot Hook Project, Colorado-Wyoming, Act of September 2, 1964 (78 Stat. 852, 43 U.S.C. 616jj).

(iii) Bostwick Park Project, Colorado, Act of September 2, 1964 (78 Stat. 852, 43 U.S.C. 616jj).

(iv) Fruitland Mesa Project, Colorado, Act of September 2, 1964 (78 Stat. 852, 43 U.S.C. 616jj).

(v) Animas-La Plata Project, Colorado-New Mexico, Act of September 30, 1968 (82 Stat. 885).

(vi) Dolores Project, Colorado, Act of September 30, 1968 (82 Stat. 885).

(vii) Dallas Creek Project, Colorado, Act of September 30, 1968 (82 Stat. 885).

(viii) San Miguel Project, Colorado, Act of September 30, 1968 (82 Stat. 885).

(ix) West Divide Project, Colorado, Act of September 30, 1968 (82 Stat. 885).

(x) Riverton Extension Unit, Missouri River Basin Project, Wyoming, Act of September 25, 1970 (84 Stat. 861).

(xi) Polecat Bench Project, Wyoming, Act of March 11, 1976 (90 Stat. 205, 43 U.S.C. 615kkkk).

(xii) Pollock-Herried Project, South Dakota, Act of March 11, 1976 (90 Stat. 208, 43 U.S.C. 615llll).

(xiii) Kanapolis Unit, Pick-Sloan Missouri Basin Project, Kansas, Act of September 28, 1976 (90 Stat. 1324).

(xiv) Oroville-Tonasket Unit Extension, Chief Joseph Dam Project, Washington, Act of September 28, 1976 (90 Stat. 1325).

(xv) Uintah Unit, Central Utah Project, Utah, Act of September 28, 1976 (90 Stat. 1327).

(xvi) Allen Camp Unit, Central Valley Project, California, Act of September 28, 1976 (90 Stat. 1328).

(d) *Use of interest payment for excess lands.* (1) Washoe Project, California-Nevada, Act of August 1, 1956 (70 Stat. 775, 43 U.S.C. 614).

(2) Small Reclamation Projects, Act of August 6, 1956 (70 Stat. 1044, 43 U.S.C. 422a–1), as amended.

(3) Mercedes Division, Lower Rio Grande Rehabilitation Project, Texas, Act of April 7, 1958 (72 Stat. 82).

(4) La Feria Division, Lower Rio Grande Rehabilitation Project, Texas, Act of September 22, 1959 (73 Stat. 641).

(e) *Delivery of project water to certain categories of excess lands.* (1) Involuntary acquisition of excess land

(i) Act of July 11, 1956 (70 Stat. 524, 43 U.S.C. 423e, 544).

(2) Surviving Spouse

(i) Act of September 2, 1860 (74 Stat. 732, 43 U.S.C. 423h).

(3) Columbia Basin Project, Washington, Act of October 1, 1962 (76 Stat. 678, 16 U.S.C. 835–1, 835c).

(4) States, their political subdivisions and agencies thereof, Act of July 7, 1970 (84 Stat. 411, 43 U.S.C. 425).

(5) Naval Air Station, Lemoore, California, Act of August 10, 1972 (86 Stat. 531).

(f) *Excess Land Provisions Modified by Acts of Congress Authorizing Execution of Specific Contracts Negotiated Pursuant to Section 7 of the Reclamation Project Act of 1939 (53 Stat. 1187, 43 U.S.C. 485f).* (1) Kittitas Reclamation District, Kittitas Division, Yakima Project, Washington, Act of May 6, 1949 (63 Stat. 64).

(2) Prosser Irrigation District, Yakima Project, Washington, Act of October 27, 1949 (63 Stat. 943).

(3) Roza Irrigation District, Yakima Project, Washington, Act of June 30, 1954 (68 Stat. 359).

(4) Vale Oregon Irrigation District, Vale Project, Oregon, Act of October 27, 1949 (63 Stat. 943).

(5) Frenchtown Irrigation District, Frenchtown Project, Montana, Act of June 23, 1952 (66 Stat. 153).

(6) Owyhee Irrigation District, Gem Irrigation District, Ridgeview Irrigation District, Advancement Irrigation District, Payette-Oregon Slope Irrigation District, Crystal Irrigation District, Bench Irrigation District, and Slide Irrigation District, Owyhee Project, Idaho-Oregon, Act of June 23, 1952 (66 Stat. 152).

(7) Gering and Ft. Laramie Irrigation District, Goshen Irrigation District, and Pathfinder Irrigation District, North Platte Project, Nebraska-Wyoming, Act of July 17, 1952 (66 Stat. 754).

(8) Hermiston Irrigation District and West Extension Irrigation District, Umatilla Project, Oregon, Act of June 18, 1954 (68 Stat. 254).

(9) North Unit Irrigation District, Deschutes Project, Oregon, Act of August 10, 1954 (62 Stat. 679).

(10) American Falls Reservoir District No. 2, Minidoka Project, Idaho, Act of August 21, 1954 (68 Stat. 762).

(11) Black Canyon Irrigation District, Boise Project, Idaho, Act of August 24, 1954 (68 Stat. 794).

(12) Tulelake Irrigation District, Klamath Project, California-Oregon, Act of August 1, 1956 (70 Stat. 799).

§ 426.4 Definitions.

(a) Irrigable lands, the area to which acreage limitations are applicable, is the net acreage possessing irrigated crop production potential, after excluding areas that are occupied by and currently used for homesites, farmstead buildings, and corollary permanent structures such as feed lots, equipment storage yards, and similar facilities, together with dedicated roads open for general unrestricted use by the public. Areas used for field roads, farm ditches and drains, tail water ponds, temporary equipment storage, and other uses dependent on operational requirements necessary to produce a specific crop, and subject to change at will, are included in the net irrigable acreage.

(b) Nonexcess land is irrigable land beneficially held by one landowner that does not exceed the acreage permitted by statute. Unless otherwise authorized by statute, nonexcess land is 160 irrigable acres in the beneficial ownership of one individual or entity, or 320 acres owned jointly by husband and wife.

(c) Designated nonexcess is the land of an excess landowner which has been selected to be eligible to receive project water as his nonexcess land.

(d) Excess land is irrigable land served with water from any federal project under reclamation laws, exclusive of exempt acreage, beneficially held by one landowner which exceeds the statutory limit of acreage; i.e., which is in excess of that acreage which is nonexcess.

(e) Exempt land is that area of privately owned irrigable land to which the acreage limitation provisions do not apply. Exempt status may be based on the following: (1) Statutory exemptions. (i) Projects are listed in § 426.3(b)(1). (ii) Contracts in § 426.3(f) provide exemption when construction charges are fully paid out. (2) Exemptions based on determination by the Secretary, upon payout of construction charges, that a general pattern of family-size ownership has developed (Sol. Op. M–36634, 68 I.D. 372, 400–401, Note 73 (1961)).

(f) Secretary or contracting officer shall mean the Secretary of the Interior or his duly authorized representative.

(g) District shall mean any entity which has contracted with the United States for a water supply.

(h) Family relationships are persons in a direct lineal descendant relationship (natural or adopted), and their spouses.

(i) Date of initial availability of water shall mean the date that project water becomes available to an irrigation block as determined by the Secretary.

(j) A resident owner is a landowner who has his or her principal place of residence either on land receiving water from a Federal project governed by reclamation law, or in the neighborhood of land receiving water from such a project, as determined by the Secretary.

(k) Neighborhood of the land is an area comprised of a maximum 50-mile radius from the particular tract of land receiving water from a Federal project governed by reclamation law. The Secretary may reduce the maximum radius, depending upon local conditions, where he determines that such reduction is appropriate to encourage family farming and the landowner's occupancy of the land benefited by the project.

(l) Eligible nonexcess owner is an individual who (1) has his or her principal place of residence on or in the neighborhood of the land or who has under oath stated his or her intent to establish such principal place of residence within three years of acquisition of the land; (2) will not, after the acquisition, be the owner of more than 160 acres of land which receives water from any Federal project governed by reclamation law; and (3) has met all other requirements of reclamation law and these rules.

(m) Project water is water that is furnished by or through Federally financed facilities to a District pursuant to a water service or repayment contract with the United States.

(n) Nonproject water is water from any other source to which the District has an appropriative right.

(o) Commingled water is that water comprising project and nonproject water delivered by or through a nonfederally constructed facility. If project and nonproject water is delivered by or through federally financed facilities, the nonproject water shall be considered project water and the acreage limitation and other requirements of Reclamation law shall apply to the users of such water.

(p) Class I equivalency for purposes of applying the class 1 equivalency in determining nonexcess acreage entitlement on those projects for which class 1 equivalency has been authorized, class 1 irrigable land is that arable land which, under a plan of essentially full water supply has the physical capability necessary for sustained long-term irrigation production; and, on the basis of both physical and economic land classification criteria applicable within the climatic limitations of each project, is determined by the Secretary of the Interior to have adequate income potential to support a family and pay water charges when irrigated in farm units of 160 acres or less.

(q) Beneficial owner of land is the entity deriving the benefit of ownership irrespective of the owner of record.

(r) A recordable contract is a document wherein the landowner agrees to sell his designated excess lands upon terms and conditions satisfactory to the Secretary and at prices not to exceed those fixed by the Secretary in order to receive project water for those excess lands. The contract must be recorded in the land records of the county in which the land is situated.

§ 426.5 Deliveries of project water to excess land under special circumstances.

The following circumstances permit delivery of water to excess land.

(a) *Recordable contract.*—(1) Excess land may receive project water only if the owner, under terms and conditions satisfactory to the Secretary, executes a valid recordable contract for the sale of that land to a nonexcess owner. The sale price must not reflect value that can be attributed to the construction of the project. No excess land may become eligible to receive water by the execution of a recordable contract unless such excess land was, on the date of initial availability of water to the district, owned by the landowner requesting execution of the recordable contract. In cases where project water is made available to land through temporary diversion facilities provided by the landowner, the Secretary may establish the date of initial availability of water for that land at the date of such temporary diversion.

(2) Recordable contracts shall provide that: (i) The landowner shall dispose of his excess land at an approved price to an eligible nonexcess owner within 5 years, except that the disposition period of existing recordable contracts or specified in existing water service or repayment contracts shall remain unchanged. Unless otherwise specified in a district's contract entered into prior to the promulgation of these regulations, the recordable contract period shall begin at the date of initial availability of water. (ii) If the disposition of the land is not completed by the end of the required period, irrevocable power of attorney vests in the Secretary as attorney in fact for the landowner to sell the lands under such conditions as are deemed suitable by the Secretary. (iii) Prior to maturity of a recordable contract, excess land may, with approval of the contracting officer, be withdrawn from contract coverage and redesignated nonexcess: *Provided*, That an equal acreage of land theretofore designated nonexcess is substituted and becomes subject to all the terms of the recordable contract as through it were originally included therein. (iv) Recordable contracts shall not terminate until the sale of the land is consummated as approved by the Secretary.

(b) *Involuntary acquisition of excess land.*—Project water may be delivered

to lands which become excess when acquired by foreclosure or other process of law, by conveyance in satisfaction of mortgage, by inheritance, or by devise, subject to the following conditions: (1) Delivery is allowed only for a period of up to 5 years from the date of acquisition. Thereafter, delivery of water shall cease until the land is transferred to an eligible nonexcess owner. (2) The right to such temporary water deliveries is not transferable. (3) During the period of temporary water delivery, the land may be disposed of to nonexcess status without requiring price approval. (4) If the lands are not disposed of during the 5-year period, they become ineligible to receive project water until transferred to an eligible landowner at an approved price. Price approval will be required until one-half of the total construction costs allocated to irrigation have been paid in regular scheduled installments on the total construction obligation to which the lands are subject. (5) Such lands are not eligible to be placed under recordable contract.

(c) *Lands acquired by surviving spouse.*—Nonexcess lands which become excess in the ownership of a surviving spouse upon the death of a husband or wife may receive project water so long as the surviving spouse does not remarry. (1) The right to such temporary water deliveries is not transferable. (2) Prior to remarriage, the surviving spouse may dispose of such land to an eligible buyer without forfeiting the right of the land to receive project water, and without obtaining price approval if such approval is no longer required under § 426.9(b).

(d) *Excess lands owned by States, political subdivisions, and Agencies thereof.*—Such lands are eligible for project water subject to the following conditions: (1) Excess lands are exempt from the acreage limitation provisions so long as they are farmed primarily in the direct furtherance of a non-revenue-producing public function, as determined by the Secretary of the Interior. (2) Excess lands used for a purpose other than that set forth in paragraph (d)(1) of this section may receive project water if a valid recordable contract requiring the sale of such lands within 10 years from the date of such contract has been executed under terms and conditions satisfactory to the Secretary but without limitation upon selling price. (3) Lands not under recordable contract or farmed as a public function as provided in paragraph (d)(1) of this section may be leased until July 7, 1995, to lessees whose fee lands in combination with the leased State lands do not exceed the lessees' nonexcess entitlement. The sale price of such land shall not reflect value that can be attributed to the construction of the project.

(e) *Lands administered or controlled by Federal Agencies.*—If project water is delivered to lessees on Federal lands for farming purposes, the lessee shall be bound by the same acreage limitations as a landowner.

§ 426.6 Lands not eligible to receive project benefits.

(a) Excess lands not covered by a recordable contract shall not be considered eligible to receive water from a project unless exempt from acreage limitation by law.

(b) Land acquired into excess status after the announced date of initial availability of project water thereto is not eligible to be placed under recordable contract.

(c) Excess lands may not be acquired subject to a recordable contract and continue to receive project water by virtue of that contract except that, in the discretion of the Secretary, land involuntarily acquired by inheritance, foreclosure, or other operation of law, may retain the remaining eligibility provided in the recordable contract upon execution of an assumption agreement in a form approved by the Secretary.

§ 426.7 Types of land ownership.

Reclamation law imposes no restriction on the amount of land that may be owned by an individual or group of individuals. The law restricts only the portion of land to which project water may be delivered or which may benefit from project facilities. For purposes of administering the acreage limitation provisions, the eligibility of lands is determined by the status of the owner or owners. After these regulations become effective, the Secretary will approve the sale of excess lands, at a price not reflecting project benefits and established by appraisal as described in §426.12, only to prospective owners who comply with the following forms of ownership.

(a) *Single ownerships.*—(1) A single eligible nonexcess owner holds title to land in a sole and separate ownership. (2) A corporation composed of a single eligible nonexcess owner holds title to land in a sole and separate ownership.

(b) *Multiple ownerships.*—Ownerships, including but not limited to tenancies in common, joint tenancies, and tenancies by the entirety, must comply with the following in order to hold more than 160 acres: (1) A family relationship must exist among all persons having a beneficial interest in the property, and (2) all persons having such beneficial interest must qualify as an eligible nonexcess owner.

(c) *Partnerships.*—A partnership must comply with the following in order to hold more than 160 acres: (1) a family relationship must exist among all the partners, (2) each partner must qualify as an eligible nonexcess owner, and (3) each partner has a right to partition or alienate his share of the property.

(d) *Corporations.*—A corporation must comply with the following in order to hold more than 160 acres: (1) A family relationship must exist among all the shareholders, and (2) each shareholder must qualify as an eligible nonexcess owner.

(e) *Trusts.*—Multiple beneficiary trusts may be utilized to hold up to one nonexcess entitlement of land receiving project water per beneficiary provided: (1) A family relationship exists among all beneficiaries. (2) Each beneficiary qualifies as an eligible nonexcess owner. (3) The trustee is unrelated to the trustor or the beneficiaries and is not an employee of the trustor. (4) The trust is irrevocable and constitutes a grant of all ownership, dominion, and control over a specifically described parcel of land. (5) The trust property consists solely of the land granted. (6) The trust document identifies each person who is a beneficiary and prescribes the undivided interest of each in the trust property, which undivided interest in no event shall represent a share in the total corpus of the trust greater than the ratio of one nonexcess entitlement to the total acreage of the trust. (7) The trustee named receives only compensation for management services, and neither acquires any interest of a beneficiary nor transacts in his individual capacity any business with the trust. Any attempt to do either shall be void. (8) The trustee makes periodic distribution of net returns from operations to beneficiaries in proportion to their undivided interests in the trust property. (9) If at any time the undivided interest of a beneficiary represents an area of land excess to that which he might hold as a nonexcess owner, the trustee shall designate a specific tract of the land in the trust equivalent to such excess. In the absence of such designation all land in the trust shall be deemed excess so long as that situation continues to exist. If a beneficiary acquires other land not in the trust which, together with his beneficial interest, exceeds that which he may hold as a nonexcess owner, the land not in the trust shall to the extent of such excess be deemed excess land. (10) Each beneficiary or guardian has the right, at his option, to a partition within the trust of his interest in the trust.

§ 426.8 Leases.

No person or legal entity shall be entitled to lease more than 160 acres of land served by federal water provided pursuant to the reclamation laws. Each lease of lands served by federal water must be filed with the District, which shall maintain a file for public inspection and report to the Department annually on the outstanding leases of lands within the District served by federal water.

§ 426.9 Nonexcess land.

An owner holding only nonexcess land may receive project water without designating his nonexcess holdings.

(a) *Designation.*—(1) An excess landowner must designate the land that is entitled to receive project water as nonexcess land in accordance with the district contract with the United States. If he or she fails to do so within the specified time, the district shall make the designation and if it fails to do so, the Secretary will make the designation. (2) A landowner may, with the consent of

V 421165 AUG 25 77 UM

the contracting officer, redesignate other lands as nonexcess: *Provided*, That: A like acreage becomes excess under the same terms and conditions as if such land had been excess at the time of the original designation and either (i) the land was acquired from nonexcess status or (ii) the land was acquired from excess status in an approved sale.

(b) *Period for which price approval is required for nonexcess land acquired from excess status.*—Nonexcess land acquired from excess status for an approved price must be sold at a price approved by the Secretary as not reflecting project benefits if resold within 10 years from the date of acquisition into nonexcess status to retain its eligibility to receive project water. For a period after 10 years and until one-half of the total construction costs allocated to irrigation have been paid in regularly scheduled installments on the total construction obligation in which the lands are situated, the Secretary shall monitor any resale to prevent unreasonable profit from accruing to the seller.

§ 426.10 Disposition of excess lands.

(a) Excess lands must be disposed of to an eligible nonexcess owner, at a price approved by the Secretary, based on their bonafide value at date of appraisal without reference to the enhancement attributable to the construction of project works, to become eligible to receive project water in the hands of the purchaser. (1) Price approval for all excess lands will be required until one-half of the total construction costs allocated to irrigation have been paid in regularly scheduled installments on the total construction obligation of the project in which the lands are situated. (2) Price approval will be required for all land under recordable contract, regardless of the status of payment of construction charges.

(b) The excess landowner shall, no later than one year before power of attorney vests in the Secretary, divide his land under recordable contract into parcels of no more than 160 acres. If he or she fails to do so, the District shall, and if it fails to do so, the Secretary shall divide the land. (1) When the excess landowner desires to sell, and in no event less than six months before the power of attorney vests in the Secretary as provided in the recordable contract, the Secretary shall publish widely a notice of availability of such land, which describes the land and its possible uses, and which includes the expiration date of the recordable contract. (2) All prospective eligible nonexcess owners interested in purchasing a particular parcel shall file with the Regional Director a formal expression of interest which will describe their financial and other capacity to own and farm the land. (3) When the owner of the particular parcel under recordable contract desires to sell the land, or when power of attorney vests in the Secretary under the recordable contract, the Bureau shall select, by lottery or other impartial means from those expressing an interest, a purchaser of the land at the approved price; *Provided*, That a person in a family relationship with the excess land seller shall have a preference to buy the land offered. (4) The prospective purchaser shall have ninety days to obtain financing. Extension of this period may be granted upon good cause. Such financing must comply with reasonable terms established by the owner, or, if power of attorney has vested, with the terms of the district contract with the United States.

(c) When several purchasers obtain financing under a single loan instrument, the instrument must provide a partial release upon payment in full on the part of any single landowner.

(d) Lands may not be obligated for the indebtedness of another.

(e) The seller will not be permitted to lease the land back from the purchaser. The seller must not retain any interest in the land sold other than a purchase money mortgage or other equivalent purchase money security instrument.

(f) Personal and nonfixture farm property must be sold separately. The purchaser shall not be required to purchase personal and nonfixture farm property as a condition to purchasing the land.

(g) Appraisals will be made in accordance with the guidelines and principles set forth in the controlling water service or repayment contract or as prescribed in § 426.12.

(h) To be eligible to receive project water, lands disposed of by gift deed must be submitted for approval in the same manner as though the disposition was made in a bona fide sale.

(i) A contract under which the owner of land agrees to sell the land to another person is an acceptable means of transferring the beneficial interest of land only if the contract is recorded and made a part of the official records in the county in which the land lies.

(j) An individual may accumulatively purchase or hold excess lands up to a full entitlement only once.

§ 426.11 Commingling.

(a) Project water may be stored in or transported from, through, or by means of nonfederally constructed facilities used to convey nonproject water if, in the opinion of the Secretary, such mingling is necessary to avoid duplication of facilities. The provisions of Reclamation law and of these regulations shall be applicable only to the quantity of project water thus involved. (1) When mingling of project water with nonproject water is permitted, the contractor shall be required to take such actions, keep such records, and install and maintain such measuring devices as in the opinion of the Secretary are necessary to ensure that at no time is the quantity of water delivered to, or removed as drainage water from, lands ineligible for project irrigation benefits under Reclamation law greater than the quantity introduced from nonproject sources.

(b) The provisions of paragraph (a) of this section shall apply to any irrigation facility constructed jointly by Federal and State interests, unless specifically exempted by Congress.

§ 426.12 Appraisals of excess land.

All appraisals of excess land shall be made consistent with the following provisions:

(a) Such appraisals shall be based on fair market value of the land at the time of appraisal, not including the increment resulting from the construction of a project.

(b) Appraisals of excess land will be made upon request of the landowner or a prospective buyer, or when power of attorney, provided for in a recordable contract, vests in the Secretary.

(c) All appraisals of excess land shall be made by an appraiser or panel of three appraisers designated by the Secretary. The party or parties requesting the appraisal may determine whether the appraisal is to be made by a single appraiser or a panel of appraisers. The cost of the first appraisal, if requested by the landowner or determined necessary by the Secretary, shall be paid by the United States. The cost of all other appraisals shall be paid by the party or parties requesting the appraisal and shall be paid for under terms and conditions determined by the Secretary.

(d) The value of all improvements on excess land such as structures, wells, pumps, permanent plantings and other property that may be included with a sale of excess land consistent with § 426.10(f) shall be appraised on the basis of its fair market value in accordance with standard appraisal procedures.

(e) The Secretary shall determine the amount of nonproject water supply available to the designated property giving consideration to any riparian, adjudicated, or appropriated water rights. If an unadjudicated underground water supply is involved, an allocation will be made of the total available nonproject water in the aquifer as of the date of first water delivery to the district reduced by the quantity that would have been used on the basis of preproject crops and cropping patterns to an amount that would have been available on the date of appraisal, and supplemented by an allocation from the annual nonproject recharge to the aquifer from all locally available sources. The value of the designated property will reflect, among other things, the projected remaining economic life of the nonproject water supply, on the date of appraisal, as determined by the Secretary considering preproject crops and cropping patterns and annual nonproject recharge.

(f) Appraisals of excess lands that are requested after the sale has been consumated will not be approved by the Secretary. Excess lands sold without receiving prior price approval will not be eligible to receive project water until sold in accordance with procedures established by these regulations.

§ 426.13 Class 1 equivalency.

(a) Class I land as defined in § 426.4(p) and irrigable lands in lower land classes will be determined in accordance with established procedures used by the Bureau of Reclamation to classify the irrigable land on a project whereby economic factors such as productive capacity of the land, taking into consideration cropping limitations imposed by latitude and climate, farm production costs and land development costs, are correlated with physical factors such as soil, topography, drainage and quality of water.

(b) Class 1 equivalency factors are determined by comparing the productive potential of class 1 land, under average management, with the productive potential of lower class land so as to quantify the relationship of an acre of class 1 land to an acre of each of the lower classes of land in the project. (1) Class 1 equivalent acreage is determined through the application of factorial equivalents that will approximately equate the farm unit acreage of land of lower economic productivity to the economic productivity potential of class 1 land. Factorial equivalents based on physical and economic criteria shall be determined by the Secretary. For example, class 1=1, class 2=.8, class 3=.6 and class 4=.5, or .8, .6 and .5 acre of class 1 land equals 1 acre of class 2, class 3 and class 4 land respectively.

(c) An individual's nonexcess entitlement using the class 1 equivalency concept, if authorized for a project, will be determined on the basis of his landholding in each land class. Nonexcess acreage of irrigable land classes below class 1 shall be determined through class 1 equivalency factors on the basis of the acres of such lower classes in excess of 160 acres which are necessary in weighted total acres held in single ownership to be equivalent to the acres of class 1 determined by the Secretary as adequate to support a family and pay water charges. The nonexcess entitlement of a landowner will be designated by the landowner, district or the Secretary in accordance with established procedures set forth in standard language used for water service and repayment contracts. The nonexcess entitlement designation may consist of a combination of the acreage of each land class as determined when the designation is made and may not be revised unless prior approval is given by the contracting officer.

(d) Class 1 equivalency can be used by a district only if its repayment or water service contract with the United States is amended to incorporate provision for the use of the class 1 equivalency concept as authorized by law.

(e) Class 1 equivalency factors that are established for a district will be published in the FEDERAL REGISTER at least 60 days prior to their application to lands of the district.

§ 426.14 Decisions and appeals.

The Regional Director acting as designee of the Secretary shall make the determination required under these rules and regulations. A party directly affected by such determination may appeal in writing to the Commissioner of the Bureau of Reclamation within 30 days of receipt of the Regional Director's determination. The affected party shall have an additional 30 days thereafter within which to submit a supporting brief or memorandum to the Commissioner. The Regional Director's determination will be held in abeyance until the Commissioner has reviewed the matter and rendered a decision. Pertinent addresses are shown below:

Commissioner, Bureau of Reclamation, Department of the Interior, 18th and C Street N.W., Washington, D.C. 20240.

would you like to know

if any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the "Cumulative List of CFR Sections Affected," the "Federal Register Index," or both.

Cumulative List of CFR Sections Affected **$10.00** per year

The "Cumulative List of CFR Sections Affected" is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index **$8.00** per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers: FR Indexes and the "Cumulative List of CFR Sections Affected" will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Department of the Treasury

AGENCY: Civil Service Commission.

ACTION: Final Rule.

SUMMARY: This amendment changes the title of Secretary to the Special Assistant to the Secretary (Public Affairs) to Secretary to the Assistant Secretary (Public Affairs) because that title reflects the current title of the superior. Also, the positions of External Affairs Officer (Public Affairs) and Special Assistant to the Special Assistant to the Secretary (Public Affairs) have been revoked under the automatic revocation system.

EFFECTIVE DATE: August 25, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3305 (a) (25), (a) (34), and (a) (69) are amended as set out below:

§ 213.3305 Department of the Treasury.

(a) *Office of the Secretary.* * * *

(25) One Secretary to the Assistant Secretary (Public Affairs).

* * * * *

(34) [Revoked].

* * * * *

(69) [Revoked].

* * * * *

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77–24566 Filed 8–25–77;8:45 am]

PART 213—EXCEPTED SERVICE

Department of the Army

AGENCY: Civil Service Commission.

ACTION: Final Rule.

SUMMARY: The following positions are excepted under Schedule C because they are confidential in nature: One position of Public Affairs Officer to the Chief of Public Affairs, one position of Staff Assistant to the Under Secretary of the Army, and one position of Special Assistant to the Deputy Under Secretary of the Army.

EFFECTIVE DATE: August 25, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3307 (a) (6), (b) (3) and (4) are added as set out below:

§ 213.3307 Department of the Army.

(a) *Office of the Secretary.* * * *

(6) One position of Public Affairs Officer to the Chief of Public Affairs.

(b) *Office of the Under Secretary.* * * *

(3) One Staff Assistant to the Under Secretary.

(4) One Special Assistant to the Deputy Under Secretary.

* * * * * *

(5 U.S.C. 3301, 3302; E.O. 10577, 3 CFR 1954–1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77–24567 Filed 8–25–77;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Commerce

AGENCY: Civil Service Commission.

ACTION: Final Rule.

SUMMARY: The following positions are excepted under Schedule C because they are confidential in nature: One position of Confidential Assistant to the Assistant Secretary for Domestic and International Business; and one position of Confidential Assistant to the Deputy Assistant Secretary for International Economic Policy and Research.

EFFECTIVE DATE: August 25, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3314(m) (1) is amended and (22) is added as set out below:

§ 213.3314 Department of Commerce

* * * * * *

(m) *Office of the Assistant Secretary for Domestic and International Business.*

(1) One Private Secretary and two Confidential Assistants to the Assistant Secretary.

* * * * * *

(22) One Confidential Assistant to the Deputy Assistant Secretary for International Economic Policy and Research.

(5 U.S.C. 3301, 3302; E.O. 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77–24568 Filed 8–25–77;8:45 am]

PART 213—EXCEPTED SERVICE

Veterans Administration

AGENCY: Civil Service Commission.

ACTION: Final Rule.

SUMMARY: This amendment transfers one Confidential Assistant from the Office of the Special Assistant to the Administrator, one Confidential Assistant from the Office of the Executive Assistant to the Administrator, and two Confidential Assistants from the Office of the Assistant Deputy Administrator to the Office of the General Counsel.

EFFECTIVE DATE: August 25, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3327 (a) (1), (a) (7), and (a) (8) are amended and (a) (11) is added as set out below:

§ 213.3327 Veterans Administration.

(a) *Office of the Administrator.* (1) Four Confidential Assistants to the Special Assistant to the Administrator.

* * * * * *

(7) Two Confidential Assistants to the Executive Assistant to the Administrator.

(8) Three Confidential Assistants to the Assistant Deputy Administrator.

* * * * * *

(11) Four Confidential Assistants to the General Counsel.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77–24569 Filed 8–25–77;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Housing and Urban Development

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The position of Special Assistant to the Assistant Secretary for

V 42 166 AUG 26 77 UMI

Administration is excepted under Schedule C because it is confidential in nature.

EFFECTIVE DATE: August 25, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3384(a)(66) is amended as set out below:

§ 213.3384 Department of Housing and Urban Development.

* * * * *

(a) *Office of the Secretary.* * * *

(66) Two Special Assistants and one Secretary to the Assistant Secretary for Administration.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

PART 945—IRISH POTATOES GROWN IN CERTAIN DESIGNATED COUNTIES IN IDAHO AND MALHEUR COUNTY, OREGON

Expenses and Rate of Assessment

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation authorizes expenses of $44,415 and establishes a rate of assessment of twenty-six hundredths ($0.0026) cent per hundredweight of potatoes for the functioning of the Idaho-Eastern Oregon Potato Committee. The regulation enables the committee to collect assessments from first handlers on all assessable potatoes handled and to use the resulting funds for its expenses.

EFFECTIVE DATE: June 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D.C. 20250. Telephone: 202–447–3545.

SUPPLEMENTARY INFORMATION: Marketing Agreement No. 98 and Order No. 945, both as amended, regulate the handling of Irish potatoes grown in designated counties in Idaho and in Malheur County, Oregon. It is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The Idaho-Eastern Oregon Potato Committee, established under the order, is responsible for its local administration.

Notice was published in the August 4 FEDERAL REGISTER (42 FR 39395) regarding the proposals. It afforded interested persons an opportunity to file written comments not later than August 19, 1977. None was filed.

After consideration of all relevant matters, including the proposals in the notice, it is found that the following expenses and rate of assessment should be approved.

It is further found that good cause exists for not postponing the effective date of this section until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) because this part requires that the rate of assessment for a particular fiscal period shall apply to all assessable potatoes from the beginning of such period.

The regulation is as follows:

§ 945.230 Expenses and rate of assessment.

(a) The reasonable expenses that are likely to be incurred during the fiscal period ending May 31, 1978, by the Idaho-Eastern Oregon Potato Committee for its maintenance and functioning and for such other purposes as the Secretary determines to be appropriate will amount to $44,415.

(b) The rate of assessment to be paid by each handler in accordance with this part shall be $0.0026 per hundredweight, or equivalent quantity, of assessable potatoes handled by him as the first handler during the fiscal period.

(c) Unexpended income in excess of expenses for the fiscal period may be carried over as a reserve to the extent authorized in § 945.44(b).

(d) Terms used in this section shall have the same meaning as when used in the marketing agreement and this part.

(Secs. 1–19, 48 Stat. 31, as amended; (7 U.S.C. 601–674).)

Dated: August 23, 1977.

FLOYD F. HEDLUND,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-24793 Filed 8-25-77;8:45 am]

CHAPTER XI—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; MISCELLANEOUS COMMODITIES), DEPARTMENT OF AGRICULTURE

[Docket No. BRIA–1]

PART 1260—BEEF RESEARCH AND INFORMATION

Subpart—Beef Research and Information Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Referendum Results; Termination of Proceeding.

SUMMARY: This document announces that the requisite number of cattle producers voting in a referendum failed to approve the issuance of an order to establish a beef research and information program under the Beef Research and Information Act. Therefore, the order published in the FEDERAL REGISTER on April 15, 1977, adding Subpart—Beef Research and Information Order to 7 CFR Part 1260 will not become effective and this proceeding is terminated.

V 42 166 AUG 26 77 A UMI

DATE: Effective, August 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Ralph L. Tapp, (202) 447-3815.

SUPPLEMENTARY INFORMATION: On April 15, 1977, a decision and order implementing the Beef Research and Information Act (7 U.S.C. 2901 et seq.) were published in the FEDERAL REGISTER (42 FR 19865). As provided in Section 9 of the Act (U.S.C. 2908), the order could become effective only if approved by cattle producers voting in a referendum. Under Procedure for the Conduct of Referendums published in the FEDERAL REGISTER May 17, 1977 (42 FR 25315), producers registered to vote during the period June 6–17, 1977, and voted during the period July 5–15, 1977, to determine whether they approved issuance of the order. Results of the referendum showed that less than the required two-thirds majority of the cattle producers voting favored issuance of the order. Therefore, the order published on April 15 adding 7 CFR Part 1260 shall not become effective and this proceeding is terminated.

Signed at Washington, D.C., on August 22, 1977.

WILLIAM T. MANLEY,
Deputy Administrator
Program Operations.

[FR Doc.77-24852 Filed 8-25-77;8:45 am]

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

PART 212—MANDATORY PETROLEUM PRICE REGULATIONS

Computation of Landed Costs: Transportation

AGENCY: Federal Energy Administration (FEA)

ACTION: Final rule.

SUMMARY: These amendments refine FEA's interim regulations concerning marine transportation of crude oil. FEA is making these amendments as a result of additional comments and experience with the interim regulations. Problems arising under the regulations during the last seven months are discussed, and FEA's treatment thereof is clarified. The new regulation makes minor changes in the deadfreight calculation, requires notification to FEA by new entrants, clarifies issues relating to subchartering, allows smaller firms to recover costs of land based personnel, and makes several other changes in the interim regulations.

EFFECTIVE DATE: September 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Sandra Sherman, Office of General Counsel, (202) 566-9380.

SUPPLEMENTARY INFORMATION:

I. BACKGROUND.

On December 20, 1976, FEA issued interim regulations amending Part 212 of Chapter II of Title 10 of the Code of Federal Regulations, which established standard measures of the cost of marine transportation of crude oil as a component of the landed cost of that crude oil (41 FR 55851, December 23, 1976). Although the revisions to the proposed regulations fell within the scope of the proposal, certain changes were significant, and consequently further public comment was sought before final regulations were promulgated. FEA has now evaluated these comments, which it has supplemented with its experience in administering the regulations, and hereby makes certain revisions in and clarifications to the interim regulations as explained below.

II. EFFECT ON COMPARATIVE DATA SHOWINGS AUTHORIZED UNDER INTERIM REGULATIONS

Companies which utilized the standards in the interim regulations for compiling eighteen-month comparative data justifying their customary accounting procedures, will not be required to adjust such data to reflect the amendments issued today. However, any company denied authority to use its customary procedures, may seek reconsideration of such denial by demonstrating that these final regulations could affect the disposition of its request.

III. REVISIONS AND CLARIFICATIONS

A. GENERAL

1. *Dollar-for-Dollar Passthrough of Costs.*—One comment suggested that to the extent that the proposed regulations provided a notional basis for computing costs, they would deny the dollar-for-dollar passthrough of increased product costs required by the Emergency Petroleum Allocation Act, as amended. The legal basis for the accounting procedures established by FEA was extensively discussed in the preamble to the interim regulations, and FEA believes that they are fully authorized by applicable law.

2. *Customary Accounting Practices in Lieu of Prescribed AFRA or Net Cost Methods.*—In accordance with § 212.85 (b)(2), FEA received a number of requests to use customary accounting practices in lieu of the AFRA or net cost methods prescribed by FEA. In the preamble to the interim regulations, FEA set out the standards which it would apply in considering such requests:

> • • • FEA has strengthened the standards for authorizing firms to retain their customary accounting procedures, so that now a firm may do so only where those procedures result in transportation costs less than or not materially different from costs determined by application of FEA's procedures. To assist in this determination, firms seeking to retain their customary accounting procedures are asked to submit comparative data for an 18-month test period. FEA has included the "materially different" standard to allow for cases in which during the test period costs may exceed the FEA standard but would not be expected to exceed the standard in the future.

Thus, under the 'materially different' standard, customary accounting practices can be allowed, even where costs were unusually excessive during the test period, provided that a demonstrated anomaly unrelated to the operation of those accounting practices (e.g. port diversions due to sudden strikes) was the basis for such cost increase. Moreover, in evaluating whether a firm's historical accounting practices "result in transportation costs less than or not materially different from costs determined by application of FEA's procedures," FEA considered the discretionary features of the firm's practices. If implementation of those practices permitted a significant amount of discretion in calculating transportation costs, FEA's approval to utilize such practices was not granted.

3. *Deadfreight.*—FEA received several comments in this area, including recommendations that the deadfreight limitation be eliminated. For the reasons stated in the preamble to the regulation, FEA believes that a limitation is appropriate. However, in its administration of the deadfreight calculation, FEA has recognized that alternative approaches to the deadfreight issue may be appropriate and is considering issuance of a further proposed amendment to § 212.85(d).

In response to other comments, FEA is revising the manner in which deadfreight is calculated under § 212.85(d)(1)(ii) so that the limitation will apply on a tonnage rather than barrel basis, consistent with the calculation of voyage freight on a cost per long ton basis under § 212.85(d)(1)(i). The deadfreight calculation has been amended to specify the factors in the cost per long ton computation. In order that the cost per long ton of cargo loaded shall not exceed the cost per long ton for the applicable vessel class, the limitation now provides that the cost per long ton is to be derived from the sum of deadfreight and voyage freight divided by long tons for the voyage on which deadfreight is claimed.

FEA considered amending § 212.85(d)(1)(ii) to make explicit the allocation of allowable deadfreight where the crude oil shipped on one vessel in a single voyage is owned by more than one firm. However, the amendment was deemed unnecessary since the allocation of deadfreight cost is required by both § 212.85(c)(1) and (d)(1), which direct that a firm shall establish "its" cost for the shipment of crude oil. That portion of the deadfreight allowable with respect to one party's use of the vessel cannot be a cost of the other party's transportation.

4. *Change from Customary Accounting Practices to AFRA Method.*—One comment suggested that § 212.85(b)(1), which permits firms to change from the Net-Cost Method specified in § 212.85(c) to the AFRA Method in § 212.85(d), be amended so that firms authorized to use customary accounting practices in lieu of the specified Net-Cost Method may also make such change. FEA believes that the purpose of § 212.85(b)(1), to recognize the effect on cost accounting of changes in applicable distribution patterns, would be served by this amendment and has therefore adopted it.

5. *Recomputation of Transportation Element of Landed Cost of May, 1973.*—One comment stated that since it is the purpose of the price rules to measure changes in cost between May, 1973 and the month of measurement, the transportation component of a firm's landed costs must be recalculated in accordance with the accounting procedures required to be adopted under § 212.85. This issue was extensively discussed in the preamble to the interim regulations, and for the reasons given at that time FEA believes that such recomputation is not required.

6. *Active Use.* Section 212.85(e) provides that "In no case shall any transportation cost be allowed for a period when a vessel is not in active use." One comment pointed out that the term 'active use' is unclear, since, for example, lightering vessels legitimately engaged in crude oil transportation may nonetheless spend significant periods awaiting arrival of VLCC's. In response to this comment, FEA wishes to point out that § 212.85(e) is not intended to limit recognition of costs to periods when a ship is actually carrying oil (thereby precluding costs associated with ordinary waiting periods or routine maintenance) but to insure that firms do not abuse § 212.85 by recognizing the full costs of vessels only marginally engaged in crude oil transportation for the firm. The FEA audit staff will, however, carefully scrutinize costs attributable to periods exceeding routine idling or demurrage.

7. *Parity Calculation.* One comment objected to specification in § 212.84(e)(6)(i) of the LR–1 class of vessels for the purpose of calculating the transportation adjustment in connection with FEA's determination of maximum and representative prices for crude oil from a country where there is no reference crude. This issue was discussed in the preamble to the interim regulations, and for the reasons stated therein FEA believes that specification of the LR–1 class of vessel is appropriate.

8. *New Entrants.* Section 212.85(b)(1) as proposed or in its interim form, made no provision for firms first undertaking marine transportation of crude oil after the deadline established by FEA for selection of the AFRA or Net Cost methods. Accordingly, § 212.85(b)(1) has been amended to provide that where a firm first engages in marine transportation of crude oil more than thirty days after the effective date of § 212.85 (i.e. February 1, 1977 or later), it shall notify FEA within thirty days of the first loading as to which method it has selected. Since such new entrants will not have utilized customary accounting procedures for this purpose, they will be ineligible to continue their use in accordance with § 212.85(b)(2).

9. *Phantom Exchanges.*—In the course of administering the interim regulations, FEA has noted a need for clarification with respect to the treatment of transportation costs in the context of "phantom exchanges". (The term is popularly used to designate reciprocal transfers which facilitate the importation of foreign crude oil into the United States. Typically, it involves: (1) A small, inland refiner, the holder of a fee-exempt license, transfers (by passing title, but not physically moving) domestic crude oil to a major firm in return for an equivalent value of that firm's foreign crude oil located outside U.S. customs territory; (2) the foreign crude oil is transported by the major firm to United States customs territory but is imported under the small firm's fee-exempt license; and (3) the domestic and foreign crudes are exchanged back, so that the small firm again has title to its domestic crude, and the major firm again owns its foreign crude.)

Generally, at the conclusion of the phantom exchange, each firm must reflect a cost for the crude oil that it has, which is equivalent to the cost of the crude oil originally transferred (and certain adjustments). Accordingly, the major firm, which began and ended the transaction with foreign oil, should account for the "landed cost" of the foreign oil. These costs include the expense of transporting the crude oil from its country of origin to the United States, established pursuant to § 212.85. Similarly, the small firm, which ultimately receives the domestic crude oil with which it entered the transaction, must account for the cost of its domestic crude in accordance with §§ 212.82 and 212.83. Since the small firm does not determine its costs pursuant to § 212.85, FEA has determined that firms taking the part of the small firm in phantom exchanges should not be subject to that section. In this regard, FEA has amended § 212.85(a) to exempt from § 212.85 transactions in which a person acts as the nominal importer of record, but at no time physically acquires the crude oil so imported.

10. *Subcharters.* — In administering § 212.85, FEA has recognized certain problems associated with subchartering. Primarily, where a firm has chartered vessels which cannot be used economically to transport the firm's crude oil, it may attempt to subcharter such vessels for some or all of the remaining term, increasing the total transportation costs passed through to the consumer by any losses occasioned by the subcharter. While § 212.85 generally permits subchartering costs to be passed through as an element of the landed cost, it is not the purpose of the regulation to permit firms to recognize costs which are incurred primarily in connection with transportation of another firm's crude oil. Accordingly, where a firm recognizes costs associated with the use of vessels by unaffiliated entities, FEA intends to review such costs carefully, and may disallow any costs not incurred principally in connection with transporting the firm's own crude oil.

FEA has also recognized other problems relating to the calculation and allocation of subchartering costs, and intends to issue proposed regulations in this regard in the near future.

11. *Backhauls.*—In the preamble to its interim regulations, FEA stated that it had issued orders to several companies seeking information concerning the amount of backhauling done in connection with crude oil importation, in order to determine whether backhauling was sufficiently important to require that profits therefrom be credited against costs. After analyzing the data submitted, FEA has confirmed its initial judgment that the revenues received from backhauling are insignificant, and therefore no credit will be required.

12. *C.I.F. Purchases.*—FEA has received several requests to exempt from § 212.85 purchases made on a C.I.F. basis. In the near future, FEA intends to propose regulations addressing these requests.

B. AFRA METHOD

1. *Demurrage.* Several comments suggested that the credit against cost for unused laytime in § 212.85(d)(1)(iii) was inconsistent with industry practice, since unused laytime accrues to the vessel owner rather than its charterer. FEA agrees that in light of this practice, the credit would be inappropriate for voyage charter vessels. Although the credit could, theoretically, be applied with respect to equity status vessels, and long-term charters, the "savings" is not actually reflected in accounts. Accordingly, § 212.85(d)(1)(iii) has been amended by deleting the credit for unused laytime for both charter and equity status vessels.

In addition, § 212.85(d)(1)(iii) has been amended to clarify the means of calculating demurrage costs. Since the provision omitted reference to the schedule of demurrage charges contained in Worldscale, but referred only to "the product of the applicable AFRA and Worldscale rates," language was added to make clear that Worldscale demurrage schedule rates should be utilized when performing the calculation.

Finally, § 212.85(d)(1)(iii) was amended to recognize the fact that the charterer is not always the one who incurs demurrage charges. For example, if the ship's pumping system falls below the rate specified in the charter agreement then the charterer is relieved of such charges. Accordingly, § 212.85(d)(1)(iii) now provides for recognition of demurrage costs above allowed laytime, "provided that the charterer is determined to be responsible."

2. *Cargo Loaded.* One comment suggested that § 212.85(d)(1)(i) and (ii) be clarified in order that "gross long tons of cargo loaded" be determined in accordance with the bills of lading furnished the shipper. FEA recognizes that since the regulation requires that calculations be made on a "loaded" basis, the shipper must rely on the bill of lading rather than on subsequent measurements. Accordingly, FEA has adopted this recommendation.

3. *Costs Not Included in Worldscale.* A number of firms suggested that the list in § 212.85(d)(1)(v) of allowed costs other than those in Worldscale, should be enlarged to include certain other costs. FEA recognizes that unusual costs may, from time to time, be incurred.

V 42166 AUG 26 77 UMI

Typically, these will not be on a regular basis. However, the list in § 212.85(d)(1)(v) was very carefully considered in order that it be as inclusive as possible consistent with practicable audit procedures. Therefore, FEA has determined that it should not be further extended. Firms which incur unusual costs may, on hardship grounds, seek an Exception to § 212.85(d)(1)(v) in accordance with Part 205.

4. *Applicable AFRA Rate.* The term "AFRA rate applicable to the month in which readiness to load is tendered," in § 212.85(d)(1)(i)(A), is being amended to read "AFRA rate applicable to the month of first loading of the vessel on each voyage of crude oil imported into the United States." In the course of administering the interim regulations, FEA has encountered problems which have led it to discard, in the final regulations, the concept of readiness to load and to substitute therefor the concept of loading. This is because even though some companies may keep their records on a readiness basis, all companies must keep records of loadings in order to furnish information to FEA on such forms as the F–701–M–0. Accordingly, FEA believes this change will facilitate ease of verification, and eliminate the need for any additional records. In addition, FEA recognizes that some ambiguity remains with respect to multiport loadings. FEA considered amending the regulations to provide specific procedures, but determined that this was unnecessary since Worldscale contains multiport rates.

C. NET COST METHOD

1. *Recovery of Capital Costs.* Some firms objected to the exclusion in the amortization method applicable to equity status vessels under § 212.85(c)(2)(ii)(B), of any provision for recovering the cost of capital. This issue was discussed in the preamble to the interim regulation, and for the reasons stated therein FEA declines to adopt any provision for capital cost recovery.

2. *Land Based Personnel.* Some comments pointed out that small firms do not have employees "solely engaged in marine transportation," and would therefore be unable to consider their salaries as elements of cost. FEA appreciates this concern, and has therefore amended § 212.85(c)(1) to provide that firms with crude oil transportation subsidiaries or departments (or crude oil divisions of general transportation departments) may recognize the salaries of the employees of such subsidiaries, departments, or divisions, while firms without such organizational units may recognize that portion of a person's salary attributable to time spent on crude oil transportation: *Provided,* That such person spends at least one quarter of his time in such activity. Thus, in the case of large firms, which generally have transportation departments, the salaries of those persons who principally facilitate crude oil movements will be recognizable, although the salaries of persons who occasionally consider such issues will not be able to be prorated. In the case of small firms, which generally lack such departments, the salaries of persons who are not solely engaged in crude oil transportation, but who make a significant contribution to such activity, will be able to be recognized to the extent of the contribution. FEA believes that this is an equitable solution, in light of the difficulties of auditing any proration of costs.

One firm also commented that overhead costs in addition to land-based personnel should be recognized. This issue was discussed in the preamble of the interim regulations, and FEA believes that in light of the significant auditing problems that would result from any such allowance, this recommendation cannot be adopted.

3. *Ships' Personnel.* Section 212.85(c)(2)(ii)(B) provides that with respect to the amortization method, allowed transportation costs relating to an equity status vessel shall include, inter alia, "all payments made by the firm to unaffiliated entities incurred in connection with the use and operation of the vessel." One firm pointed out that owners of equity status vessels may also operate their vessels, and that, therefore, the use of the term "unaffiliated" was inappropriate. This term is intended to preclude recognition of costs where one entity merely pays another entity of the same firm. However, FEA agrees that where payment is made not to a shipping subsidiary, but directly to employees, that payment should be recognized. Moreover, with respect to charter status vessels treated under § 212.85(c)(iii)(A) a bareboat charterer may hire employees to operate the vessel, rather than pay another company to supply a crew. Accordingly, FEA has amended paragraphs (c)(2)(ii)(B) and (c)(2)(iii)(A) to provide that the salaries of ships' personnel engaged in crude oil transportation may be recognized to the extent that they participate in the use and operation of a vessel.

(Federal Energy Administration Act of 1974, as amended, Pub. L. 93-275, as amended, Pub. L. 94-385; 39 FR 23185; Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-335; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185)

In consideration of the foregoing, Part 212 of Chapter II of Title 10, Code of Federal Regulations, is amended as set forth below, effective September 1, 1977.

Issued in Washington, D.C., August 18, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

1. Section 212.85 is amended in paragraph (a) by inserting the subparagraph designation (1) after the designation of paragraph (a) and by adding a new subparagraph (2), in subparagraph (1) of paragraph (b), in subpargraphs (1), (2)(ii)(B) and (2)(iii)(A) of paragraph (c), and in subparagraphs (d)(1)(i) through (iii) to read as follows:

§ 212.85 Transportation.

(a)(1) * * *

(2) This section shall not be applicable to transactions in which a person acts as nominal importer of record, but at no time physically acquires the crude oil so imported.

(b)(1) *Selection of Method.* For the purpose of this section, a firm shall utilize either the Net-Cost Method specified in paragraph (c) of this section, or the AFRA Method specified in paragraph (d) of this section, depending on that firm's historical accounting procedures, for the determination of its crude oil transportation costs. A firm shall utilize the Net-Cost Method if those procedures have been based predominantly on actual costs; it shall utilize the AFRA Method if they have been based predominantly on a nominal-cost approach such as AFRA-Worldscale. Each reporting firm shall notify FEA within 30 days of the effective date of this regulation as to which method it is required to utilize, and where applicable shall specify which of the two methods permitted to be utilized under paragraph (c)(2)(ii) it has adopted. Where a firm first engages in marine transportation of crude oil after this period, it shall make such notification within 30 days of the first loading of the vessel, but shall not be eligible to use customary accounting procedures in accordance with subparagraph (2). A firm using the Net-Cost Method, or customary accounting procedures in lieu of the Net-Cost Method in accordance with subparagraph (2), may at any time request permission to make a one-time-only change to the AFRA Method. FEA will allow that change where a firm demonstrates that due to changes in its distribution patterns use of the Net-Cost Method or its customary accounting procedures is no longer practicable. Any change permitted under this section may be conditioned on a recalculation of transportation costs for earlier months pursuant to the new method adopted.

* * * * *

(c)(1) *The Net-Cost Method.* A firm using the Net Cost Method for determination of its transportation costs shall establish its net transportation cost by (i) determining its allowed transportation costs, as specified in paragraph (c)(2) of this section, and (ii) subtracting therefrom the sum of: (A) Any income received by the firm from unaffiliated entities for the use of vessels (other than "equity" status vessels where transportation costs are calculated in accordance with paragraph (c)(2)(ii)(A)) whose costs are included in the total allowed transportation costs, plus (B) the product of that firm's cost per ton mile for the fiscal year, determined according to subparagraph (3) of this paragraph, times the total ton-miles of shipping during the fiscal year which does not produce income from unaffiliated companies, does not involve crude oil imported into the United States, and uses vessels (other than "equity" status vessels where transportation costs are calculated in accordance with paragraph (c)(ii)(A)) whose cost are included in its allowed transportation costs. Transportation costs not otherwise allocated to particular shipments shall be allocated according to subparagraph (3) of this paragraph. The cost of general overhead may not be included. However, where a firm has a subsidiary or department whose purpose is directly and solely to facilitate marine transportation of crude oil from foreign ports to the United States (or such a division of a general transportation department) the salaries of the land-based personnel in such subsidiary, department, or division may be included; where a firm has no such subsidiary or department, it may include that portion of a person's salary directly attributable to the facilitation of marine transportation of crude oil from foreign ports to the United States, provided that such person spends at least twenty-five percent (25%) of his time in such activity.

(2) * * *

(ii) * * *

(B) The sum of (*1*) all payments made by the firm to unaffiliated entities incurred in connection with the use and operation of the vessel, and that portion of the salaries of ships' personnel employed by the firm who are directly engaged in marine transportation of crude oil from foreign ports to the United States, which is attributable to their activity in this regard, (*2*) the cost of bunker fuel which is supplied by the firm to the vessel for the purpose of transporting crude oil to the United States, priced at the current market price at the location where supplied, and (*3*) annual depreciation as determined in accordance with the customary accounting procedures generally accepted and consistently and historically applied by the firm in financial reports to stockholders.

(iii)(A) Allowed transportation costs for a charter status vessel shall be the sum of all payments made by the firm to unaffiliated entities incurred in connection with the use and operation of the vessel, plus that portion of the salaries of ships' personnel employed by the firm who are directly engaged in marine transportation of crude oil from foreign ports to the United States, which is attributable to their activity in this regard, plus the cost of any bunker fuel which is supplied by the firm to the vessel for the purpose of transporting crude oil to the United States, priced at the current market price at the location where supplied.

* * * * *

(d)(1) * * *

(i) Voyage freight, determined by multiplying the AFRA rate applicable (A) to the month of first loading of the vessel on each voyage of crude oil imported into the United States and (B) to the class of vessel, by the World-scale rate for the voyage and by the gross long tons of cargo loaded as specified in the bill of lading;

(ii) Deadfreight, determined by multiplying the product of the AFRA rate and the Worldscale rate determined as in (i) by the difference between the deadweight available to cargo and the gross long tons of cargo loaded as specified in the bill of lading, provided that the cost per long ton, calculated by dividing the sum of the voyage freight and deadfreight by the long tons of crude oil actually loaded, does not exceed the cost per long ton for the vessel class of the largest fully loaded vessel which can make the voyage between the ports of loading and unloading under normal operating conditions;

(iii) Demurrage costs above the laytime allowed in the Worldscale rate: *Provided,* That the charterer is determined to be responsible, calculated as the product of the applicable AFRA and Worldscale demurrage schedule rates;

* * * * *

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Reg. Z; FC–0094 and FC–0102]

PART 226—TRUTH IN LENDING

Official Staff Interpretations

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Official Staff Interpretation(s).

SUMMARY: The Board is publishing the following official staff interpretations of Regulation Z, issued by a duly authorized official of the Division of Consumer Affairs and revoking an official staff interpretation as indicated below.

EFFECTIVE DATE: August 25, 1977.

FOR FURTHER INFORMATION CONTACT:

Glenn E. Loney, Attorney, Fair Credit Practices Section, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202–452–2412.

SUPPLEMENTARY INFORMATION: (1) Identifying details have been deleted to the extent required to prevent a clearly unwarranted invasion of personal privacy. The Board maintains and makes available for public inspection and copying a current index providing identifying information for the public subject to certain limitations stated in 12 CFR 261.6.

(2) Official staff interpretations may be reconsidered upon request of interested parties and in accordance with 12 CFR Part 226.1(d)(2). Every request for reconsideration should clearly identify the number of the official staff interpretation in question, and should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

(3) 15 U.S.C. 1640(f).

(4) Due to a clerical error, an official staff interpretation has been published twice under two different numbers. Since official staff interpretation FC–0094 was published previously as official staff interpretation FC–0085, official staff interpretation FC–0094 is hereby revoked. Official staff interpretation FC–0085 remains in effect.

The official staff interpretations will not be renumbered. Rather, there will not be an official staff interpretation FC–0094.

§ 226.8(b). In connection with guaranteed student loan program, lender must provide disclosures for both interim and repayment period at time interim loan is made.

§ 226.8(d). In connection with guaranteed student loan program, lender must provide disclosures for both interim and repayment period at time interim loan is made.

§ 226.8(b). Use of term "Pro Rata" complies with requirement that creditor identify method of computing unearned portion of finance charge.

Section 226.8(b)(6) applies only to obligations which do not include precomputed finance charges.

Where disclosures fully state method and circumstances under which unearned finance charges will be rebated, circumstances under which there will be no rebate need not be separately disclosed.

AUGUST 3, 1977

This is in response to your letter of * * *, and * * *, raising three questions in regard to the application of Regulation Z to a guaranteed student loan program. By an official staff interpretation of Regulation Z, FC–0010, staff answered a fourth question regarding the loan program but, due to clerical error, inadvertently failed to resolve the three issues discussed below.

Your firm represents several banks which are participating lenders in a student loan program under which a State corporation guarantees repayment of the loan to a bank in return for payment by the student of a loan guarantee premium. The student applies for and receives the loan from the participating bank, and the student's obligation to the bank is evidenced by an original note. The anticipated maturity date of this note is nine months after the student's expected graduation date. However, at the time of the original loan, it is contemplated that the student will, at some point prior to the maturity date, execute a renewal note consolidating all student loans previously made. The renewal note provide for repayment of the loan or loans in instalments over a period of up to 10 years.

At the time the original note is executed, the bank withholds from the loan proceeds the entire guarantee premium, which is remitted to the State corporation. This premium consists of one percent annually of the amount of the loan for the term of the interim period, on the basis of the original maturity date, plus one percent annually of the unpaid principal balance for the repayment period, on the basis of an assumed five-year repayment period. Thus, the first portion of the loan guarantee premium is attributable to the interim period, while the second portion applies to the expected term of the renewal note.

You first ask whether a participating bank is required, at the time the original note is executed, to make Truth in Lending disclosures with regard to the anticipated renewal note. You state that participating banks are currently giving disclosures for both the interim period covered by the original note and the repayment period covered by the renewal note at the time the original note is executed. This approach has been adopted in light of our Public Information Letter 117 stating that a student participating in a guaranteed loan program should be given "a complete disclosure of his annual percentage [rate] for both the inschool and repayment periods."

Public Information Letter 117 relates to Truth in Lending disclosure forms prepared

V 42 166 AUG 26 77 UMI

by [a federal agency], with staff's advice, for use in connection with a federally insured student loan program. One of those forms, given to the student at the time an interim loan is made, provides the requisite disclosures for both the interim and repayment periods. Staff believes that the position taken in Letter 117 is correct and that, in connection with guaranteed student loan programs such as the one which you discuss, the lender must provide disclosures for both the interim and repayment periods prior to consummation of the interim loan. The disclosures required are those prescribed by §§ 226.8 (b) and (d). However, pursuant to footnotes 10 and 11 to Regulation Z, the lender need not disclose the schedule and total of payments or the total amount of the finance charge on the disclosures given at the time of the interim loan. Further, it is staff's opinion that the repayment period disclosures given in connection with a particular interim loan need not reflect any other prior or anticipated interim loans which may eventually be consolidated for repayment purposes.

Your remaining two questions are concerned with the proper method of disclosing the rebate provisions of the loan program. You state that, upon prepayment in full of the loan, rebate of the unearned portion of the interim and/or renewal loan guarantee premiums and interest component of the finance charge will be made as follows:

(a) If the student prepays the loan in full within sixty days of executing the original note, he receives a rebate of the entire interim and renewal premiums.

(b) If the student prepays the loan in full prior to two years before the maturity date, he receives a rebate of the entire renewal premium and a pro rata rebate of the interim premium.

(c) If the student prepays the loan in full within the last two years preceding the maturity date, he receives a rebate of only the renewal premium.

(d) If the student prepays the renewal note within the first three years of the repayment period, he receives a rebate of the unearned portion of the renewal premium calculated in accordance with the Rule of 78's.

(e) In addition, a rebate of the unearned interest component of the finance charge will be made in accordance with the Rule of 78's if the student prepays in full at any time during the repayment period.

You further indicate that the pro rata rebate of the interim premium if the student prepays an interim loan more than two years prior to the maturity date (paragraph (b) above) is calculated by multiplying the premium by a fraction, the numerator of which is the number of months remaining from the date of prepayment to the maturity date, and the denominator of which is the number of months from the date of the original note to the maturity date. You ask whether the participating banks satisfy the disclosure requirements of § 226.8(b)(7) by disclosing that, in the event of such prepayment, the student will receive a rebate of the unearned portion of the interim premium "calculated in accordance with the Pro Rata method." In Public Information Letter 271, staff indicated that use of the term "Pro Rata" would be sufficient to comply with the requirement of § 226.8(b)(7) that the creditor identify "the method of computing any unearned portion of the finance charge in the event of prepayment in full of an obligation which includes precomputed finance charges." Staff's opinion in this regard remains unchanged, and staff continues to believe that use of this term in disclosing the rebate method is sufficient under § 226.8(b)(7). This opinion is further buttressed by reference to Board Interpretation § 226.818.

Finally, you ask whether, under § 226.8(b)(6) or § 226.8(b)(7), participating banks which fully disclose the above described system of rebating the unearned portion of interim and renewal loan guarantee premiums upon prepayment must further specifically enumerate the circumstances when no such rebate will be made (e.g., if the student prepays the original note in full within the last two years preceding the maturity date, there will be a full rebate of the renewal premium but no rebate of the interim premium).

In answer to your question it should first be noted that § 226.8(b)(6), which requires disclosure of any penalty charge that will be imposed for prepayment of an obligation, applies only to obligations which do not involve precomputed finance charges. Therefore, that section is inapplicable to the guaranteed student loan program which is the subject of your inquiry, in which all finance charges are precomputed. Further, with respect to the situation you present, staff is of the opinion that, if the disclosure statement fully informs the customer as to the method (or methods) to be used in rebating unearned finance charges and states the circumstances in which any such method will be used, there is no need under § 226.8(b)(7) to state, conversely, when some portion of the premiums will not be rebated.

This is an official staff interpretation of Regulation Z, issued in accordance with § 226.1(d)(3) of the regulation and limited to the facts and issues discussed herein. I trust that this interpretation is responsive to your inquiry.

Sincerely,

JANET HART,
Director.

Board of Governors of the Federal Reserve System, August 19, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release Nos. 33-5856, 34-13872, 35-20142, IC-9900]

PART 231—INTERPRETATIVE RELEASES RELATING TO THE SECURITIES ACT OF 1933 AND GENERAL RULES AND REGULATIONS THEREUNDER

PART 241—INTERPRETATIVE RELEASES RELATING TO THE SECURITIES EXCHANGE ACT OF 1934 AND GENERAL RULES AND REGULATIONS THEREUNDER

PART 271—INTERPRETATIVE RELEASES RELATING TO THE INVESTMENT COMPANY ACT OF 1940 AND GENERAL RULES AND REGULATIONS THEREUNDER

Disclosure of Management Remuneration

AGENCY: Securities and Exchange Commission.

ACTION: Interpretation.

SUMMARY: The Commission today emphasized its view that existing disclosure provisions of the securities acts require registrants to disclose in registration statements, reports and proxy and information statements all forms of remuneration received by officers and directors. Salaries, fees, bonuses and certain other forms of remuneration must be included within the aggregate remuneration reported. In addition, personal benefits received by management from the corporation, including certain benefits sometimes referred to as "perquisites," may be forms of remuneration which should be included within the remuneration reported. This action is taken because the staff of the Commission has received inquiries relating to whether personal benefits are forms of remuneration and because recent cases brought by the Commission have revealed that some registrants have not disclosed personal benefits as remuneration.

DATE: Effective August 18, 1977.

FOR FURTHER INFORMATION CONTACT:

Linda L. Griggs, Division of Corporation Finance, 202-755-1750, or Glen Payne, 202-755-0230, Division of Investment Management, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: During the last few months, the staff of the Commission has received many inquiries relating to whether or not various personal benefits received by management from corporations should be included within the remuneration disclosure which is required in registration statements, reports and proxy and information statements filed by corporations under the securities laws. Some of these questions were prompted by the publicity given to recent cases brought by the Commission which revealed the failure of such registrants to include within the reported remuneration the value of various personal benefits received by members of management.[1]

It is the view of the Commission that the existing reporting provisions[2] under the securities act require registrants to include within the remuneration reported all forms of remuneration which are received by management from the corporation, including personal benefits sometimes referred to as "perquisites." This does not mean, however, that all benefits received by management are personal benefits which must be reported. Certain incidental benefits which are ordinary and necessary to the conduct of company business, such as ordinary business lunches, and incidental payments made by the company for items which are directly related to the performance of management's functions at the company plant or offices, such as parking places, may not be reportable forms of remuneration. All payments made by the company for personal benefits received by management which are not directly related to job performance, however, are forms of remuneration which should be included within the reported remuneration.

The Commission believes that this release will provide some guidance to registrants in this area. Some questions may remain unanswered, however; registrants unable to determine how to handle a particular benefit are reminded that the staff is available to assist with questions relating to all areas of disclosure, including the disclosure of remuneration information. In addition, the Commission will continue to review its interpretation in light of any specific problems or comments brought to the attention of the staff by registrants and interested persons.

[1] See, e.g., *SEC* v. *Potter Instrument Corp.*, Civil No. 77-0394 (D.D.C., filed March 9, 1977), Litigation Release No. 7816 (March 9, 1977); *SEC* v. *Kneapler, et al.*, Civil No. 77-969 (D.C. Fla., filed March 25, 1977), Litigation Release No. 7854 (April 4, 1977); *SEC* v. *Ormand Industries, Inc.*, Civil No. 7910 (May 10, 1977), Litigation Release No. 7910 (May 10, 1977)3. Earlier cases involving undisclosed corporate benefits or perquisites include: *SEC* v. *Emersons, Ltd. et al.*, Civil No. 76-0808 (D.D.C., filed May 11, 1976, Litigation Release No. 7392 (May 11 1976); *SEC* v. *Medic-Home Enterprises, Inc. et al.*, Civil No. 75-6627 (S.D.N.Y., filed Dec. 11, 1975), Litigation Release No. 7207 (Dec. 12, 1975). In general, the cases instituted by the Commission have suggested misappropriation of the company's assets in addition to noncompliance with the disclosure provisions.

[2] See discussion at text accompanying footnotes 3-14.

BACKGROUND

The Securities Act of 1933[3] ("Securities Act") (15 U.S.C. 77a et seq., as amended by Pub. L. No. 94-29 (June 4, 1975)), the Securities Exchange Act of 1934[4] ("Exchange Act") (15 U.S.C. 78a et seq., as amended by Pub. L. No. 94-29 (June 4, 1975)) and the Investment Company Act of 1940 ("Investment Act") (15 U.S.C. 80a-1 et seq.)[5] provide that the Commission may require disclosure in registration statements filed pursuant to their provisions of the remuneration received by directors and officers. The Exchange Act and the Investment Act further provide that the Commission may prescribe the type of information to be included in annual reports and proxy and information statements filed by companies subject to their provisions.[6]

The Commission has exercised its legislatively granted rulemaking authority under these acts to require registrants to report in various registration statements,[7] annual reports[8] and proxy and information statements[9] the amount of remuneration paid or to be paid by the registrant and its subsidiaries[10] to each of the registrant's directors, each of its three highest paid officers and other persons specified in the provisions[11] whose aggregate direct remuneration exceeded a certain amount[12] and to all officers and directors (and to certain specified persons in filings made by investment companies) as a group.[13]

In general the disclosure items of the Securities Act, the Exchange Act and the Investment Act require separate disclosure of three forms of remuneration: (1) Direct remuneration; (2) annuity, pension and retirement benefits; and (3) direct and indirect remuneration payments proposed to be made in the future which have not already been reported.[14]

DISCUSSION

The remuneration disclosure provisions require registrants to disclose the

[3] Schedule A to the Securities Act (15 U.S.C. 77aa) lists the type of information which should be included in registration statements unless the Commission shall otherwise provide. Item 14 thereto calls for disclosure of the "remuneration, paid or estimated to be paid, by the issuer or its predecessor, directly or indirectly, during the past year and ensuing year, to (a) the directors or persons performing similar functions, and (b) its officers and other persons, naming them whenever such remuneration exceeded $25,000 during such year." Sections 7 and 19 of this Act (15 U.S.C. 77g, 77q) authorize the Commission to require by rules or regulations disclosure of information in addition to that specified in Schedule A.

[4] Subparagraphs (h)(1)(D) and (g)(1) of Section 12(b) of the Exchange Act (15 U.S.C. 78*l*(h)(1)(D), (g)(1)) state that a security may be registered under the Exchange Act by filing with the Commission a registration statement with respect to the security containing such information as the Commission may specify relating to remuneration of directors, officers, underwriters, and security holders holding more than 10 percent of any class of issuer's equity securities. Section 23 of the Exchange Act authorizes the Commission to "make such rules and regulations as may be necessary or appropriate to implement the provisions of this title * * * " (15 U.S.C. 78w).

[5] Investment Act § 8(b), 15 U.S.C. § 80a-8(b).

[6] Exchange Act §§ 13(b), 14(a), 14(c), 15 U.S.C. 78 1(b), m(a), m(c); Investment Act Sections 20(a), 30(a), 15 U.S.C. 80a-20(a), 80a-29(a) (the Investment Act provisions are applicable to proxy and not information statements).

[7] Disclosure is required in registration statements by the following items of certain forms: Item 17 of the Form S-1 (17 CFR 239.11); Item 5 of the Form S-4 (17 CFR 239.14); Item 1 of the Form S-5 (17 CFR 239.15); Instruction 1 of the Form S-6 (17 CFR 239.16); Item 20 of the Form S-11 (17 CFR 239.18); Item 7 of the Form 10 (17 CFR 249.210); Item 12 of the Form 20 (17 CFR 249.220); Items 18 and 25 of Form N-8B-1 (17 CFR 274.11); Items 10 and 18 of Form N-5 (17 CFR 274.5); Items 36, 37 and 38 of the Form N-8B-4 (17 CFR 274.14); Items 31, 32, 33 and 34 of the Form N-8B-2 (17 CFR 274.12); and Items 29, 30, 31, and 32 of the Form N-8B-3 (17 CFR 274.13).

[8] Disclosure is required in annual reports by the following items of certain forms: Item 16 of the Form 10-K (17 CFR 240.310); Item 10 of the Form 20-K (17 CFR 240.320); Items 1.12 and 1.13 of the Form N-1R (17 CFR 274.101) and Items 1.12 and 1.13 to the EDP attachement of this form (17 CFR 274.101a-1, a-2); Items 10 and 18 of the Form N-5R (17 CFR 274.105); Items 22, 23, 24 and 25 of the Form N-30A-2 (17 CFR 274.102); and Items 20, 21, 22 and 23 of the Form N-30A-3 (17 CFR 274.103).

[9] Disclosure is required in proxy and information statements by Item 7 of Schedule 14A (17 CFR 240.14a-101). (Rule 20a-1 under the Investment Act (17 CFR 270.20a-1) provides that proxy statements of registered investment companies should include the information required in proxy statements filed under the Exchange Act.)

[10] In Securities Act Release No. 5758 (Nov. 2, 1976) (41 FR 49495 (Nov 9, 1976)), the Commission published for comment proposed amendments which would require disclosure of the remuneration paid by the registrant and its affiliates to these persons. Final action on the amendments proposed therein is expected in the near future.

[11] The forms promulgated under the Investment Act require disclosure of the remuneration paid to advisory board members and/or certain other affiliated persons, as that term is defined in the Investment Act.

[12] See the items of the forms listed in footnotes 7, 8 and 9 above for the stated amounts.

[13] Disclosure of remuneration paid to all officers and directors as a group is all that is required in registration statements on Form 20 and annual reports on Form 20-K.

[14] The appropriate disclosure relating to options granted to certain officers or directors and to benefits received by officers, directors and various other persons as a result of certain transactions to which the registrant is a party is prescribed by separate provisions, e.g., subparagraphs (d) and (f) of Item 7 of Schedule 14A.

V42166 AUG 26 77 UMI

total amount of remuneration paid or to be paid by the company and its subsidiaries to officers, directors and other persons specified in the disclosure requirements (hereinafter "management personnel") for their services,[15] whether such remuneration be in the form of cash, property or personal benefits. Full disclosure of remuneration is necessary to informed voting and investment decisions regardless of whether the company's board of directors or its security holders have approved the remuneration package received by management [16] because of the substantial influence of management in determining its remuneration. In addition, a determination of the value of any new securities being offered [17] and of any securities already owned,[18] an analysis of the use of corporate funds and assets and an assessment of the value of management to a corporation [19] necessitate the presentation of complete remuneration information.

Therefore, the aggregate remuneration paid to management should include the amount of salaries, fees, bonuses, and other payments made to them and the value of certain personal benefits received by management from the registrant and its subsidiaries.[20] Among the benefits received by management which the Commission believes should be reported as remuneration are payments made by registrants for the following purposes: (1) Home repairs and improvements; (2) housing and other living expenses (including domestic service) provided at principal and/or vacation residences of management personnel; (3) the personal use of company property such as automobiles, planes, yachts, apartments, hunting lodges or company vacation houses; (4) personal travel expenses; (5) personal entertainment and related expenses; and (6) legal, accounting and other professional fees for matters unrelated to the business of the registrant. Other personal benefits which may be forms of remuneration are the following: the ability of management to obtain benefits from third parties, such as favorable bank loans and benefits from suppliers, because the corporation compensates, directly or indirectly, the bank or supplier for providing the loan or services to management; [21] and the use of the corporate staff for personal purposes.

Certain incidental personal benefits which are directly related to job performance may be omitted from aggregate reported remuneration provided they are authorized and properly accounted for by the company. Parking places, meals at company facilities and office space and furnishings at company-maintained offices are a few examples of personal benefits directly related to job performance.

In addition, certain incidental benefits received by management which are ordinary and necessary to the conduct of company business may not be forms of remuneration. These job-related benefits are benefits which are available to management employees generally, which do not relieve the individual of expenditures normally considered to be of a personal nature and which are extended to management solely for the purposes of attracting and maintaining qualified personnel, facilitating their conduct of company business or improving their efficiency in job performance. While itemized expense accounts may be considered job-related benefits whose value would be excluded from the aggregate remuneration reported, some may be forms of remuneration if they are excessive in amount or conferred too frequently. In any case, management is usually in the best position to determine whether a certain benefit should be viewed as a form of remuneration based on the facts and circumstances involved in each situation.

The value [22] of all forms of remuneration should be included within the appropriate item(s) [23] of disclosure. Nonmonetary forms of remuneration must be valued as accurately as possible. The appropriate valuation may be based upon appraisals, the value of the benefit to the recipient, the valuation assigned for tax purposes,[24] or some other appropriate standard.[25]

The Commission expects that this release will help registrants assure that the aggregate remuneration reported in registration statements, reports, and proxy and information statements contains all forms of remuneration, including salary, fees, bonuses and other personal benefits received by management. The Commission notes with approval that, as a step toward improving the data upon which such disclosures are based, some corporations have established procedures by which independent auditors review management remuneration and report to the audit committee of the board of directors; in other corporations, the board of directors may even be responsible for approving or disapproving the aggregate remuneration of all or certain members of management. In view of the all-inclusive nature of the required disclosure, the Commission urges all registrants to analyze thoroughly the internal controls and procedures by which management remuneration is identified and disclosed in order to assure that all required disclosures are made.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 18, 1977.

[FR Doc.77-24805 Filed 8-25-77;8:45 am]

---

[15] This position is consistent with the existing case law relating to the appropriate disclosure of remuneration. See, e.g., *SEC* v. *Kalvex, Inc.*, 425 F. Supp. 310 (S.D.N.Y. 1977); *Lewis* v. *Dansker*, 357 F. Supp. 636 (S.D.N.Y. 1973). In *Kalvex*, the Court held, inter alia, that personal expenses for which Robert Ingis, a director and executive officer of the corporation, was reimbursed should have been disclosed in accordance with Item 7 of Schedule 14A. In Lewis, the Court said that "Items 7(a) through 7(e) of Schedule 14A, title 'Remuneration and Other Transactions with Management and Others,' all require disclosure of remuneration or something of value affirmatively passing from the corporation to the officers or directors." *Lewis* v. *Dansker* at 642. Cf. *U.S.* v. *Dixon*, 536 F. 2d 1388, at 1395 (2d Cir. 1976). In *Dixon*, the Court stated that "the failure to include a statement of Dixon's indebtedness in the proxy statement and a Schedule II of the 10-K report were 'clear violations [of the first clause of Section 32(a) of the Securities Exchange Act of 1934].'" Finding the requisite willful intent, the Court affirmed Dixon's conviction for which he was sentenced to one year's imprisonment and fines of $10,000 each on three counts. Further, the Commission has focused previously on disclosure in registration statements and proxy and information statements of benefits to management. See, e.g., "Atlantic Research Corporation," 41 SEC Decisions and Reports 732, 757 (Dec. 6, 1963) (stop order by the Commission suspending the effectiveness of a registration statement because of, inter alia, the nondisclosure as loans of payments made by the registrant for construction costs relating to improvements on the estate of one of its cofounders, principal officers and stockholders).

[16] *Tannenbaum* v. *Zeller*, 552 F. 2d 402, 433 (2nd Cir. 1977) (holding that the proxy statement of a mutual fund should have disclosed the decision reached by its board of directors to forego recapture of brokerage commissions in favor of using those commissions to reward broker-dealers who furnished sales and research services to the fund "in order for the shareholders to make an informed decision on whether or not to approve the new management contracts or whether or not to continue or renegotiate the current ones"). Cf. *U.S.* v. *Dixon* concurring opinion.

[17] See, e.g., Securities Act Preamble, sections 7, 10, 15 U.S.C. 77a, 77g, 77j. President F. D. Roosevelt said in an address to Congress, "There is, however, an obligation upon us to insist that every issue of securities to be sold in interstate commerce shall be accompanied by full publicity and information, and that no essentially important element attending the issue shall be concealed from the buying public." President Roosevelt's March 29, 1933 message to Congress, H.R. Rep. No. 85, 73rd Cong., 1st Sess. 1, 2 (1933).

[18] Exchange Act section 13(a)(1), 15 U.S.C. 781(a)(1) states that the "Commission may prescribe as necessary or appropriate for the proper protection of investors and to ensure fair dealing in the security, (1) such information and documents as the Commission shall require to keep reasonably current the information and documents required to be included in or filed with an application or registration statement * * *" See also Investment Act section 30(b)(1), 15 U.S.C. 80a-29(b)(1).

The Majority Report of the Commission on Interstate and Foreign Commerce written to accompany H.R. 9323 (the bill proposing the Securities Exchange Act of 1934) emphasized the importance of disclosure to prevent unfair practices on the exchanges. The Committee stated:

> "As a complex society so diffuses and differentiates the financial interests of the ordinary citizen that he has to trust others and cannot personally watch the managers of all his interests as one horse trader watches another, it becomes a condition of the very stability of that society that its rules of law and of business practice recognize and protect that ordinary citizen's dependent position." H.R. Rep. No. 1383, 73d Cong., 2d Sess 5 (1934).

The report states further: "No investor, no speculator, can safely buy and sell securities upon the exchange without having an intelligent basis for forming his judgment as to the value of the securities he buys or sells." Id. at 11.

[19] Some security holders have instigated lawsuits alleging excessive compensation has been paid to management. See, e.g., "Wietschner v. Rapid-American Corporation," Civil No. 4603 (Ch. Del., filed Sept. 30, 1974). Cf. "Levin v. Atkin," Civil No. 75-0095-L(B) (W.D. Ky., filed April 4, 1975) (relating to improper diversion of assets of Ashland Oil, Inc. by certain directors).

[20] Registrants should be aware that the determination of reportable forms of remuneration is not necessarily based upon what has been included by an officer or director in gross income computed for tax purposes

[21] See, e.g., "SEC. v. Sunshine Mining Company," Civil No. 74-4492 (S.D.N.Y., filed Oct. 11, 1974), Litigation Release No. 6544 (October 11, 1974) (consent judgment entered after charge by Commission that compensating loan balances maintained by Sunshine Mining should have been reported in the company's proxy statement because they constituted direct or indirect benefits to the officers and directors who thereby were able to obtain personal bank loans).

[22] A separate description including the valuation of each form of remuneration is not required by the present disclosure provisions. But see Securities Act Release No. 5758 (Nov. 2, 1976) in which the Commission requested comments on whether additional disclosure should be required as to the remuneration of corporate officers and directors and specifically whether "disclosure should be required of the numerous emerging forms of indirect compensation or 'perquisites' now given to management personnel." In response to this particular request, a number of commentators argued that valuation and identification of these indirect forms of compensation are difficult or impossible tasks. See also Securities Exchange Act Release No. 13482 (April 28, 1977) (42 FR 23901) in which the Commission announced a broad re-examination of the proxy rules and requested comments on various matters including whether the proxy rules should provide for "more detailed or comprehensive disclosure of management remuneration."

[23] In some cases, the reporting provisions may require registrants to report the same compensation more than once. For example, a loan extended to an officer at a favorable interest rate may be deemed to be a form of direct remuneration paid him and would also have to be reported on the appropriate schedule and described because it was a loan made to such officer. Disclosure would be required, therefore, in a proxy or an information statement by subparagraphs (a) and (e) of Item 7 of Schedule 14A. Item 7(e) would require a description of the loan, including the amount outstanding and the interest charged; Item 7(a) would require the inclusion within aggregate remuneration reported of the benefit received by the officer or director as a result of the favorable interest rate. Generally, however, no objection would be raised if the value of certain benefits is omitted from the reported aggregate remuneration paid or to be paid provided the omission is clearly noted by cross reference or otherwise.

[24] The valuation of nonmonetary forms of remuneration which must be reported for tax purposes is not clearly defined. The discussion draft of the proposed regulations on the taxation of employee fringe benefits was withdrawn by the Department of the Treasury on December 17, 1976. The release which announced this action quoted Secretary of the Department of the Treasury William Simon as saying: "The comments [received on the draft] demonstrated the problems associated with establishing rules of general applicability with respect to fringe benefits. The myriad forms in which fringe benefits are provided and the difficulty of valuing those benefits, together with the undesirability of mandating the keeping of additional detailed records by employers and employees in certain cases, with the attendant costs and complexities involved, have caused me to conclude that the discussion draft should be withdrawn." Nevertheless, Secretary Simon stated that the "question of whether fringe benefits result in taxable compensation to employees should continue to depend, as it presently does, on the facts and circumstances that exist in individual situations." Department of the Treasury, News Release (December 17, 1976).

[25] If, in the opinion of management, a benefit is impossible to value, the Commission generally would accept a description of the benefit in a note to the remuneration table so long as it is stated clearly that the value of the benefit was not included in the reported aggregate remuneration.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER A—GENERAL

[Docket No. 77C-0153]

PART 73—LISTING OF COLOR ADDITIVES EXEMPT FROM CERTIFICATION

PART 81—GENERAL SPECIFICATIONS AND GENERAL RESTRICTIONS FOR PROVISIONAL COLOR ADDITIVES FOR USE IN FOODS, DRUGS, AND COSMETICS

Chromium Oxide Greens and Chromium Hydroxide Green

Correction

In FR Doc. 77-20197 appearing at page 36451 in the issue for Friday, July 15, 1977, make the following corrections:

(1) The Docket Number should have read as set forth in the heading above.

(2) The effective date given throughout the document as "August 15, 1977" should have read "August 16, 1977".

SUBCHAPTER D—DRUGS FOR HUMAN USE

[Docket No. 76N-0028]

PART 310—NEW DRUGS

Requirements for Inhalation Anesthetic Drug Products; Studies for Carcinogenic and Teratogenic Potential

Correction

In FR Doc. 77-20781, appearing at page 37538 in the issue of Friday, July 22, 1977, make the following changes:

1. On page 37538, second column, the date in the next to the last line of the last paragraph should read, "February 17".

2. On page 37542, first column, the date in the next to the last line of the second full paragraph should read, "February 17".

3. On page 37543, first column, the date in the line immediately preceding the first full paragraph should read "February 17".

[Docket No. 77N-0246]

PART 450—ANTITUMOR ANTIBIOTIC DRUGS

Toxicity Tests and Release of Batches

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This rule provides that, for an interim period, and subject to specific conditions, certain tests for toxicity (LD_{50} test) normally conducted by the Food and Drug Administration (FDA) to substantiate manufacturers' tests need not be considered as a definitive criterion for the release of batches of the antitumor antibiotics dactinomycin, mithramycin, and doxorubicin hydrochloride. This rule is required in order to continue the supply of these life-sustaining products.

EFFECTIVE DATE: August 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Frederic J. Geissel, Bureau of Drugs (HFD-332), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4340.

SUPPLEMENTARY INFORMATION: Agency regulations in Part 450 (21 CFR Part 450) specify standards of identity, strength, quality, and purity required for certification of batches of antitumor antibiotic drugs. The standards for doxorubicin hydrochloride, dactinomycin, and mithramycin require that manufacturers conduct an "LD_{50}" test and that the results of this test be submitted to FDA as a part of the request for batch certification of these drugs. It is part of FDA certification procedure that the agency substantiate, through its own testing, manufacturers' LD_{50} test results.

The "LD_{50}" test is a measure of drug toxicity. The term "LD_{50}" refers to the dosage of the drug that should be expected to kill 50 percent of the test animals (in this case a specified strain of mice) that receive the drug. LD_{50} values are established by regulations, and the antibiotic drugs subject to the tests must meet the established limitations to be eligible for certification under section 507(a) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357(a)). The three antitumor antibiotic drugs subject to this notice are, because of their inherent toxicity, the only antibiotic drugs presently required to undergo an LD_{50} determination.

Doxorubicin hydrochloride. Since the approval of the antibiotic application (Form 5) for doxorubicin hydrochloride in 1974, FDA has used an LD_{50} testing procedure that was subsequently codified in a final regulation in the FEDERAL REGISTER of April 2, 1976 (41 FR 14182), to substantiate the LD_{50} test results of the single manufacturer producing the drug.

V 42 166 AUG 26 77 A UMI

The test animals used by FDA for the LD_{50} determination are a specific strain of mice, known as the Flanders Research Farms ICR/FRF–2. The strain of mice is incorrectly identified in § 450.24(b)(4)(ii) (21 CFR 450.24(b)(4)(ii)) as Charles River FRF–2 strain; however, the values stated in the regulations are those for the Flanders strain. Because not all strains of mice are readily available in all parts of the world, the applicant, a foreign drug manufacturer, has used a different strain and different LD_{50} testing procedures and limits from those specified by the regulation. These differences from the method specified in the regulation are approved as part of the manufacturer's approved antibiotic application (Form 5). Early testing by FDA during the antibiotic application approval process established a satisfactory relationship between the two LD_{50} testing methods. Moreover, the Commissioner advises that the use of alternative testing is common and that § 436.2 (21 CFR 436.2) provides for such use when results obtained are of equivalent accuracy to those obtained from the method specified in the regulations.

Until recently, the manufacturer's results of LD_{50} testing of batches of doxorubicin hydrochloride and FDA substantiation of those results have been comparable. During the fall of 1976 a downward trend in the FDA LD_{50} test results began to be observed and in February 1977 the National Center for Antibiotic Analysis, FDA's own testing laboratory for antibiotic drugs, began to find that a number of batches of doxorubicin hydrochloride from the one manufacturer of the product failed the LD_{50} test established by § 450.24(a)(1)(iv) (21 CFR 450.24(a)(1)(iv)). Data from the antibiotic drug manufacturer, however, showed these same batches to meet the LD_{50} limits set for this antibiotic drug as part of the approved antibiotic application (Form 5).

At this point, the Commissioner is not certain of the reason for the disparity in test results.

Dactinomycin. As regards dactinomycin, the agency's LD_{50} tests on one batch of the drug have not been within specified limits in two repeated tests. The test results were slightly below the minimum LD_{50} limit set in the regulations, §§ 450.20a and 450.220 (21 CFR 450.20a and 450.220), although the manufacturer obtained LD_{50} values slightly above the minimum LD_{50} established for this batch. These findings prompted an FDA review of previous LD_{50} test results for this drug. This review shows a gradual decline (but still within the limits specified in the regulations) of the LD_{50} values for both manufacturer and FDA. Here, FDA and the manufacturer use test animals of the same strain and essentially the same testing procedures for LD_{50} determinations.

As with doxorubicin hydrochloride, the cause and significance of the demonstrated test disparity are not yet known, and the Commissioner advises that the agency is working to discover the cause of both the lack of agreement between the manufacturer's and FDA's LD_{50} test results and the gradual decline of the LD_{50} values for dactinomycin.

Mithramycin. During the last 9 months only one batch of mithramycin has been submitted for certification, and that batch has been certified. Although no inconsistent results between FDA's and the manufacturer's LD_{50} test for this one batch were noted, the Commissioner finds that the same factors that may have caused inconsistent results for LD_{50} tests in dactinomycin and doxorubicin hydrochloride could possibly influence LD_{50} testing of any antitumor antibiotic. Therefore, the Commissioner concludes that it is appropriate to consider under this regulation all antitumor antibiotic drugs for which LD_{50} determination is required.

Because of the mode of action of these three drugs, the potency, as determined by microbiological assay described under "Tests and method of assay" in each applicable monograph in Part 450 for these drugs, is directly related to the toxicity as determined by the LD_{50} test. The conduct of these two tests contributes to assuring consistency in the action of these drugs, with each test (LD_{50} and microbiological assay) serving to corroborate the other. In this context it should be noted that microbiological potency assays of the batches that failed the LD_{50} tests, while having slightly greater values than those values obtained in earlier tests, have still been consistently within the specified individual monograph limits, except that one batch of dactinomycin had a microbiological potency above the upper limit.

These three antitumor antibiotic drug products are used in the treatment and management of extremely serious, life-threatening disease conditions and, to be of any therapeutic benefit, must be available to chronically ill patients without interruption. Each of these antitumor antibiotics is available only from one manufacturer so there is no alternative source of supply. It is clear that to refuse release of these products during the time needed to resolve the problems being experienced with the LD_{50} test would seriously disrupt the very limited supply of these drug products to patients. The Commissioner has, accordingly, determined that, pending resolution of these testing problems, it is necessary to the public health to release, under section 507(a) of the act, batches of doxorubicin hydrochloride, dactinomycin, and mithramycin, notwithstanding the results of FDA substantiation tests for LD_{50}.

The Commissioner has not yet determined the reasons for the discrepancies in the LD_{50} tests. Those problems may lie with the test and testing procedure, or may accurately reflect a trend toward increasing toxicity of the drug. Nonetheless, the Commissioner believes it consistent with the best interests of the public health to continue to release batches of these drugs pending resolution of the LD_{50} test discrepancies. During the interim period the Commissioner is imposing, by this notice, certain conditions for release. Primarily, all released batches must still meet all the applicable monograph requirements, as tested by the manufacturer, including the LD_{50} test and, except for the latter, must also be submitted to and pass appropriate substantiation testing by FDA. The agency will, during this temporary period, continue to conduct LD_{50} tests, but will not necessarily view the results of its own LD_{50} tests as dispositive. Moreover, this notice authorizes the Commissioner to require, as conditions of release, that manufacturers (1) ensure that batches of antitumor antibiotics that are released be readily identifiable once in the channels of commerce, and (2) notify physicians, pharmacists, and other health professionals, as directed by the Commissioner, that the toxicity of the drugs has not been substantiated by the FDA LD_{50} tests, and they may accordingly exhibit higher potency than previously certified batches, and therefore may have a higher than usual possibility of producing toxic reactions.

The Commissioner advises that he has, prior to publication of this notice, released certain batches of doxorubicin hydrochloride and dactinomycin in order to avoid interruption of supplies to patients while this document was in preparation. That release was conditional upon the manufacturer's notification to physicians, in the form of a "Dear Doctor" letter of "Important Drug Information" regarding results of LD_{50} testing. (Copies are on file and are available for public review in the office of the Hearing Clerk, Food and Drug Administration, address given below.)

The Commissioner recognizes a number of factors that may affect the reliability and reproducibility of the testing procedures used in LD_{50} determination. Such factors include the genetic reliability of the strain of test animals, conditioning of the test animal population, environmental and nutritional needs, and purity of feed and water supplies. Some of these factors are not within direct control of laboratories being supplied with specific strains of test animals. Other factors, such as conditioning of the test animal population, vary with each laboratory. Since the LD_{50} limits have been established on the basis of testing relatively few batches of the drugs during the development of the particular drug at the time the drug is initially submitted for certification, and as a result of a request received from the manufacturer of doxorubicin hydrochloride that the LD_{50} limits in the regulation be changed from 8 to 20 milligrams per kilogram of body weight (mg/kg) to 6 to 15 mg/kg, FDA is reviewing data and information to determine whether the LD_{50} limits in the regulations are appropriate. A copy of the request has been placed on file in the office of the Hearing Clerk, Food and Drug Administration.

During this interim period of release, FDA will continue to conduct LD_{50} tests on batches of these drugs submitted for release. Both FDA and the manufacturer will conduct the research necessary to determine, as expeditiously as possible, the reasons for disparity between LD_{50} test results.

Documents regarding the LD_{50} test results and other information used as a basis for the Commissioner's determination that the supply of these drugs would be interrupted unless batches were released under the conditions of this notice have been placed on file, for public review, in the office of the Hearing Clerk, Food and Drug Administration, address given below.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463 as amended (21 U.S.C. 357)) and under authority delegated to the Commissioner (21 CFR 5.1), Part 450 is amended as follows:

1. By adding new § 450.1, to read as follows:

§ 450.1 Interim requirements for LD_{50} testing.

(a) The Commissioner of Food and Drugs has determined that it is necessary for reasons of the public health to temporarily alter certain prerequisites for certification of certain antitumor antibiotic drugs. These drugs, dactinomycin, mithramycin, and doxorubicin hydrochloride, are considered to be essential for treatment and management of extremely serious, life-threatening disease conditions and must be available to chronically ill patients without interruption.

(b) Results of recent Food and Drug Administration tests to determine the LD_{50}[1] values for doxorubicin hydrochloride and dactinomycin have not been consistent with the comparable tests performed by the manufacturers. At present, the reason for the disparity is unknown. The problem may lie with the test animals and testing procedure, or may accurately reflect a trend toward increasing toxicity of the drugs. Although no inconsistent results for LD_{50} testing have occurred with mithramycin, the same factors that may have caused inconsistent results for LD_{50} tests in doxorubicin hydrochloride and dactinomycin could influence LD_{50} testing for any antitumor antibiotic. Therefore, mithramycin is included in this regulation.

(c) Because of the need to maintain an adequate supply of these drugs, the Commissioner has determined that he cannot withhold supplies from chronically ill patients pending resolution of the test disparity. He has concluded that supplies of these life-sustaining drugs must continue to be made available subject to conditions that will assure, to the extent humanly possible, that the drugs are both safe and effective, notwithstanding that substantiation by the Food and Drug Administration of certain tests performed by the manufacturer may not be applied as a prerequisite for release.

(d) Accordingly, for a temporary period the Food and Drug Administration will not require, as a prerequisite for release, that there be the Food and Drug Administration substantiation of manufacturers' results of LD_{50} tests conducted in accordance with § 450.20a(a)(1)(iv) for sterile dactinomycin, § 450.220(a)(1) for dactinomycin for injection, § 450.240(a)(1) for mithramycin for injection, and § 450.24(a)(1)(iv) for doxorubicin hydrochloride, and will release such batches pursuant to section 507(a) of the act, provided that the drug otherwise complies with applicable monograph requirements, including substantiation testing by the Food and Drug Administration, and each of the following conditions is met:

(1) The manufacturer has submitted data for certification purposes that demonstrate that, as tested by the manufacturer, the drug meets the requirements for LD_{50} as provided in § 450.20a for sterile dactinomycin, § 450.220 for dactinomycin for injection, § 450.240 for mithramycin for injection, and § 450.24 or an approved antibiotic application (Form 5) for doxorubicin hydrochloride, as appropriate;

(2) The manufacturer complies with such conditions that the Commissioner may impose to ensure that batches of antitumor antibiotics subject to the provisions of this section are readily identifiable once released into the channels of commerce; and

(3) The manufacturer notifies physicians, pharmacists, and other health professionals in a manner prescribed by the Commissioner that these drugs have not passed the Food and Drug Administration LD_{50} batch substantiation tests and may accordingly exhibit higher potency than previously certified batches and therefore may have a higher than usual possibility of producing toxic reactions.

(e) The Food and Drug Administration shall endeavor as quickly as possible to resolve the basis for the current discrepancies between present manufacturer and agency LD_{50} testing and thereby remove the interim requirements imposed by this section.

2. Section 450.24 is amended by revising the first sentence of paragraph (b)(4)(ii) to read as follows:

§ 450.24 Doxorubicin hydrochloride.

* * * * *

(b) * * *

(4) * * *

(ii) *Procedure.* Select 50 male mice, weighing between 18 and 22 grams, of the Flanders Research Farms ICR/FRF–2 strain. * * *

* * * * *

Because of the need to continue to supply these life-sustaining products to chronically ill patients, the Commissioner finds, for good cause, pursuant to § 10.40 (c)(4) and (e) (21 CFR 10.40 (c)(4) and (e)), that prior notice and public procedure are contrary to the public interest and that the amendment may become effective upon the day of publication. Interested persons may, on or before September 26, 1977, file with the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857, written comments, in four copies. Comments received may be seen in the office of the Hearing Clerk, between 9 a.m. and 4 p.m., Monday through Friday. Any changes in this regulation justified by such comments will be the subject of a further amendment.

Effective date: This amendment becomes effective August 26, 1977.

(Sec. 507, 59 Stat. 463 as amended (21 U.S.C. 357))

Dated: August 19, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

[FR Doc.77-24798 Filed 8-25-77;8:45 am]

[1] The term "LD_{50}" refers to the dosage of the drug that should be expected to kill 50 percent of the animals that receive the drug.

SUBCHAPTER F—BIOLOGICS

[Docket No. 76N–0129]

PART 640—ADDITIONAL STANDARDS FOR HUMAN BLOOD AND BLOOD PRODUCTS

Cryoprecipitated Antihemophilic Factor (Human)

Correction

In FR Doc. 77–20802, appearing at page 37545 in the issue of Friday, July 22, 1977, make the following changes:

1. On page 37546, the fourth and fifth lines of the first column, now reading, "the reference room § 640.60 (f) and (g) to §§ 640.71 and 640.72." should read, "respectively (see the FEDERAL REGISTER of March 12, 1976 (41 FR 10762.".

2. On page 37546, first column, the first word in § 640.53(c), now reading "Manufactures", should read "Manufacturers".

Title 29—Labor

SUBTITLE A—OFFICE OF THE SECRETARY OF LABOR

PART 4—LABOR STANDARDS FOR FEDERAL SERVICE CONTRACTS

Canton Islands and White Collar Workers; Extension

AGENCY: Employment Standards Administration, Labor.

ACTION: Final rule.

SUMMARY: These amendments to the Service Contract Act regulations are made to conform the regulations to recent amendments to that Act. One amendment added coverage of service contracts performed on Canton Island. The other extended coverage to white collar workers, but continued to exclude executive, administrative, and professional employees.

DATES: These amendments are effective on August 26, 1977, as they merely reflect changes made by amendments to the Service Contract Act.

V 42166 A AUG 26 77 UMI

FOR FURTHER INFORMATION CONTACT:

Alvin Bramow, Deputy Associate Solicitor, General Legal Services, Office of the Solicitor, Room N-2464, New Department of Labor Building, 200 Constitution Avenue, NW., Washington, D.C. 20210, telephone 202-523-8293.

SUPPLEMENTARY INFORMATION: Current Service Contract Act regulations issued as Part 4 of Title 29 do not contain changes made in the Service Contract Act by two recent amendments to the Act.

By Pub. L. 93-57, 87 Stat. 140, effective July 6, 1973, the Service Contract Act coverage was extended to Canton Island.

By Pub. L. 94-489, 90 Stat. 2358, approved October 13, 1976, coverage under the Service Contract Act was extended to white collar workers. Accordingly, the minimum wage protection of the Service Contract Act now extends to all workers (both blue collar and white collar) other than persons employed in a bona fide executive, administrative, or professional capacity as these terms are used in the Fair Labor Standards Act and in Part 541 of Title 29. The extension of coverage to white collar workers was accomplished by amending the Act by adding to Section 2(a)(5) thereof a reference to 5 U.S.C. 5332 and by redefining service employee in Section 8(b) of the Act.

The changes in Part 4 of Title 29 made in this document conform Part 4 to the above described changes in the law.

This document was prepared under the direction and control of Warren D. Landis, Deputy Administrator, Wage and Hour Division, Room S-3502, New Department of Labor Building, 200 Constitution Avenue, NW., Washington, D.C. 20210, telephone 202-523-8305.

Accordingly Part 4 of Title 29 is revised as follows:

1. New paragraphs (b) and (c) are added to § 4.1a, and the present paragraph (b), as amended, is designated paragraph (d), as follows:

§ 4.1a The Act as amended.

* * * * *

(b) The provisions of the Act were amended by Pub. L. 93-57, 87 Stat. 140, effective July 6, 1973, to extend the Act's coverage to Canton Island.

(c) The provisions of the Act were amended by Pub. L. 94-489, 90 Stat. 2358, approved October 13, 1976, to extend the Act's coverage to white collar workers. Accordingly, the minimum wage protection of the Act now extends to all workers, both blue collar and white collar, other than persons employed in a bona fide executive, administrative, or professional capacity as those terms are used in the Fair Labor Standards Act and in Part 541 of Title 29. Pub. L. 94-489 accomplished this change by adding to Section 2(a)(5) of the Act a reference to 5 U.S.C. 5332, which deals with white collar workers, and by amending the definition of service contract employee in Section 8(b) of the Act.

(d) Included in this Subpart A and in Part 6 of this subtitle are provisions to give effect to the amendments mentioned in this section. Until editorial revisions of other provisions of this part can be made to conform to the Act as amended, such provisions should be read in conjunction with the statutory amendments referred to in this section.

2. Section 4.1b is amended to read as follows:

§ 4.1b Definitions and use of terms.

(a) * * *

* * * * *

(7) "Act," "Service Contract Act," or "Service Contract Act of 1965" shall mean the Service Contract Act of 1965 as amended by Pub. L. 92-473, 86 Stat. 789, effective October 9, 1972, Pub. L. 93-57, 87 Stat. 140, effective July 6, 1973, and Pub. L. 94-489, 90 Stat. 2358, effective October 13, 1976.

* * * * *

3. Section 4.3(b) is amended to read as follows:

§ 4.3 Register of wage determinations.

* * * * *

(b) Such wage determinations will set forth for the various classes of service employees to be employed in furnishing services under such contracts in the several localities, minimum monetary wage rates to be paid and minimum fringe benefits to be furnished them during the periods when they are engaged in the performance of such contracts, including, where appropriate under the Act, provisions for adjustments in such minimum rates and benefits to be placed in effect under such contracts at specified future times. The wage rates and fringe benefits set forth in such wage determinations shall be determined in accordance with the provisions of sections 2(a)(1), (2), and (5), 4(c) and 4(d) of the Act from those prevailing in the locality for such employees and from pertinent collective bargaining agreements, with due consideration of the rates that would be paid for direct Federal employment of any classes of such employees whose wages, if federally employed, would be determined as provided in 5 U.S.C. 5341 or 5 U.S.C. 5332. Unless otherwise specified in the wage determination, the wage rates and fringe benefits so determined for any class of service employees to be engaged in furnishing covered contract services in a locality shall be made applicable by contract to all service employees of such class employed to perform such services in the locality under any contract subject to section 2(a) of the Act which is entered into thereafter and before such determination has been rendered obsolete by a withdrawal, modification, or supersedure.

* * * * *

4. Section 4.4(b)(2) is amended to read as follows:

§ 4.4 Notice of intention to make a service contract.

* * * * *

(b) * * *

* * * * *

(2) A listing of those classes of service employees expected to be employed under the contract which, if employed by the agency, would be subject to the wage provisions of 5 U.S.C. 5341 or 5 U.S.C. 5332, together with a specification of the rates of wages and fringe benefits that would be paid by the Government to employees of each such class if such statute were applicable to them. (Under section 2(a)(5) of the Act and § 4.6 the inclusion of such a statement in the service contract is also required.)

* * * * *

5. Section 4.6 is amended to read as follows:

§ 4.6 Labor standards clauses for Federal service contracts exceeding $2,500.

The clauses set forth in the following paragraphs shall be included in every contract (and any bid specification therefor) entered into by the United States or the District of Columbia, in excess of $2,500, the principal purpose of which is to furnish services through the use of service employees:

(a) Service Contract Act of 1965: This contract, to the extent that it is of the character to which the Service Contract Act of 1965, as amended 41 U.S.C. 351), applies, is subject to the following provisions and to all other applicable provisions of the Act and regulations of the Secretary of Labor thereunder (this Part 4).

* * * * *

(j)(1) As used in these clauses relating to the Service Contract Act of 1965, as amended, the term "service employee" means any person engaged in the performance of a contract entered into by the United States and not exempted under Section 7, whether negotiated or advertised, the principal purpose of which is to furnish services in the United States (other than any person employed in a bona fide executive, administrative, or professional capacity, as those terms are defined in Part 541 of Title 29, Code of Federal Regulations, as of July 30, 1976, and any subsequent revision of those regulations); and shall include all such persons regardless of any contractual relationship that may be alleged to exist between a contractor or subcontractor and such persons.

(2) The following classes of service employees expected to be employed under the contract with the Government would be subject, if employed by the contracting agency, to the provisions of 5 U.S.C. 5341 or 5 U.S.C. 5332 and would, if so employed, be paid not less than the following rates of wages and fringe benefits:

Employee class	*Monetary wage-fringe benefits*

* * * * *

(m) These clauses relating to the Service Contract Act of 1965 shall not apply to the following:

* * * * *

(8) Any services to be furnished outside the United States. For geographic purposes, the "United States" is defined in section 8(d) of the Service Contract Act to include any State of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, Outer Continental Shelf Lands as defined in the Outer Continental Shelf Lands Act, American Samoa, Guam, Wake Island, Eniwetok Atoll, Kwajalein Atoll, Johnston Island and Canton Island. It does not include any other territory under the jurisdiction of the United States or any U.S. base or possession within a foreign country.

* * * * *

6. Section 4.102 is amended to read as follows:

§ 4.102 The Act.

The McNamara-O'Hara Service Contract Act of 1965 (Pub. L. 89-286, 79 Stat. 1034, 41 U.S.C. 351 et seq.), hereinafter referred to as the Act, was approved by the President on October 22, 1965 (1 Weekly Compilation of Presidential Documents 428). It establishes standards for minimum compensation and safety and health protection of employees performing work for contractors and subcontractors on service contracts entered into with the Federal Government and the District of Columbia. It applies to contracts entered into pursuant to negotiations concluded or invitations for bids issued on or after January 20, 1966. It has been amended by Pub. L. 92-473, 86 Stat. 789; by Pub. L. 93-57, 87 Stat. 140; and by Pub. L. 94-489, 90 Stat. 2358.

7. Section 4.112 is amended to read as follows:

§ 4.112 Contracts to furnish services "in the United States."

(a) The Act covers contract services furnished "in the United States." The geographical area included in the "United States" is defined in section 8(d) as "any State of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, Outer Continental Shelf lands as defined in the Outer Continental Shelf Lands Act, American Samoa, Guam, Wake Islands, Eniwetok Atoll, Kwajalein Atoll, Johnston Island and Canton Island." The definition expressly excludes any other territory under the jurisdiction of the United States (e.g. the Canal Zone) and any United States base or possession within a foreign country. Services to be performed exclusively on a vessel operating in international waters outside the geographic areas named in section 8(d) would not be services furnished "in the United States" within the meaning of the Act.

* * * * *

8. Section 4.113 is amended to read as follows:

§ 4.113 Contracts to furnish services "through the use of service employees".

(a) *Use of "service employees" in contract performance.* (1) As indicated in § 4.110, the Act covers service contracts in which "service employees" will be used in performing the services which it is the purpose of the contract to procure. A service contract otherwise subject to the Act ordinarily will meet this condition if any of the services which it is the principal purpose of the contract to obtain will be furnished through the use of any service employee or employees. Even where it is contemplated that the services (of the kind performed by service employees) will be performed individually by the contractor himself, the contract cannot be considered outside the reach of the Act unless it is known in advance that the contractor will in no event use any service employee during the term of the contract in furnishing the services called for. If the contracting officer knows when advertising for bids or concluding negotiations that no such employee will be used by the contractor in any event in providing the contract services, the Act will not be deemed applicable to the contract and the contract clauses required by § 4.6 or § 4.7 may be omitted. However, in all other cases such clauses must be included in the contract documents, for application in the event service employees are used in furnishing the services. The fact that the required services will be performed by municipal employees or employees of a State would not remove the contract from the purview of the Act, as this Act does not contain any exemption for contracts performed by such employees. Also, where the services the Government wants under the contract are principally of a type that will require the use of service employees as defined in section 8(b) of the Act, the contract is not taken out of the purview of the Act by the fact that the manner in which the services of such employees are performed will be subject to the continuing overall supervision of professional personnel to whose services the Act would not be considered to apply.

* * * * *

(b) *"Service employees" defined.* In determining whether or not any of the contract services will be performed by service employees, the definition of "service employee" in section 8(b) of the Act is controlling. It provides:

"The term 'service employee' means any person engaged in the performance of a contract entered into by the United States and not exempted under section 7, whether negotiated or advertised, the principal purpose of which is to furnish services in the United States (other than any person employed in a bona fide executive, administrative, or professional capacity, as those terms are defined in part 541 of title 29, Code of Federal Regulations, as of July 30, 1976, and any subsequent revision of those regulations); and shall include all such persons regardless of any contractual relationship that may be alleged to exist between a contractor or subcontractor and such persons.".

It will be noted that the definition expressly excludes those employees who are employed in a bona fide executive, administrative, or professional capacity as defined in Part 541 of this title and as discussed further in § 4.156. Some of the specific types of service employees who may be employed on service contracts are noted in subsequent sections which discuss the application of the Act to employees.

9. Section 4.156 is revised to read as follows:

§ 4.156 Employees in bona fide executive, administrative, or professional capacity.

The term "service employee" as defined in Section 8(b) of the Act does not include persons employed in a bona fide executive, administrative, or professional capacity as those terms are defined in 29 CFR Part 541. Employees within the definition of service employee who are employed in an executive, administrative, or professional capacity are not excluded from coverage, however, even though they are highly paid, if they fail to meet the tests set forth in 29 CFR Part 541. Thus, such employees as laboratory technicians, draftsmen, and air ambulance pilots, though they require a high level of skill to perform their duties and may meet the salary requirements of the regulations in Part 541 of this title, are ordinarily covered by the Act's provisions because they do not typically meet the other requirements of those regulations.

Signed at Washington, D.C., on this 19th day of August, 1977.

XAVIER M. VELA,
Administrator.

CHAPTER XXVI—PENSION BENEFIT GUARANTY CORPORATION

PART 2614—RESPONSIBILITY AND ETHICAL CONDUCT OF EMPLOYEES

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This rule prescribes standards of conduct applicable to all employees of the Pension Benefit Guaranty Corporation ("PBGC"). It also requires employees occupying certain positions within the PBGC to submit Statements of Employment and Financial Interests and to update such statements annually by the submission of supplemental statements. The PBGC is required to issue this rule by the Civil Service Commission's regulation on Employee Responsibilities and Conduct and by Executive Order 11222. The effect of this rule is to specify standards governing the conduct of PBGC employees while performing official duties and while involved in nonofficial activities which could reflect adversely upon the PBGC as their employer.

EFFECTIVE DATE: August 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Stephen Schreiber, Office of the General Counsel, Pension Benefit Guaranty Corporation, 2020 K Street NW., Washington, D.C. 20006, 202–254–3010.

SUPPLEMENTARY INFORMATION: This rule relates solely to PBGC personnel practices. Accordingly, opportunity for public participation in the rule making process and delay in effective date are not required. In consideration of the foregoing, Chapter XXVI of Title 29, Code of Federal Regulations, is hereby amended by adding a new Part 2614 to read as follows:

GENERAL

Sec.
2614.1 Purpose and scope.
2614.2 Definitions.
2614.3 Counseling service.
2614.4 General provisions.
2614.5 Criminal sanctions.

STANDARDS OF CONDUCT

2614.6 Proscribed actions.
2614.7. Gifts, entertainment, reimbursement and favors.
2614.8 Outside employment and other activity.
2614.9 Financial interests.
2614.10 Negotiation for private employment.
2614.11 Use of Government property.
2614.12 Use of information.
2614.13 Indebtedness.
2614.14 Gambling, betting and lotteries.
2614.15 General conduct prejudicial to the Government.
2614.16 Political activity.
2614.17 Strikes.
2614.18 Nondiscrimination.
2614.19 Special Government employees.

STATEMENTS OF EMPLOYMENT AND FINANCIAL INTERESTS

2614.20 Regular Government employees.
2614.21 Listing of positions.
2614.22 Time and place for submission of statements.
2614.23 Supplementary statements.
2614.24 Special Government employees.
2614.25 Interests of employee's relatives.
2614.26 Information not known by an employee.
2614.27 Information not required.
2614.28 Forms.
2614.29 Review procedures.
2614.30 Confidentiality.
2614.31 Review of files.
2614.32 Effect of employee's statement on other requirements.

Appendix A.—Identification of Positions the Incumbents of which must file Financial Statements.

AUTHORITY: Section 4002(b)(3), Pub. L. 93-406, 88 Stat. 1004 (29 U.S.C. § 1302(b)(3) (Supp. V, 1975)); EO 11222, 30 FR 6469, 3 CFR 1964–65, Comp., p. 306; 5 CFR 735.104.

GENERAL

§ 2614.1 Purpose and scope.

(a) *Purpose.* The maintenance of unusually high standards of honesty, integrity, impartiality, and conduct by employees and special Government employees is essential to assure the proper performance of the PBGC's business and the maintenance of confidence by citizens in their Government. The avoidance of misconduct and conflicts of interest on the part of employees and special Government employees through informed judgment is indispensable to the maintenance of these standards. To accord with these concepts, this part sets forth the PBGC's regulation prescribing standards of conduct and responsibilities and governing statements of employment and financial interests for employees and special Government employees. It implements the Civil Service Commission regulation (5 CFR Part 735) issued October 1, 1965 in accordance with Executive Order 11222, of May 8, 1965, "Prescribing Standards of Ethical Conduct for Government Officers and Employees."

(b) *Scope.* This part is applicable to all employees of the PBGC.

§ 2614.2 Definitions.

For purposes of this part:

"Employee" means both a regular Government employee and a special Government employee.

"Employing Office" means the office of the PBGC in which an employee is employed.

"Executive Director" means the Executive Director of the PBGC.

"PBGC" or the "Corporation" means the Pension Benefit Guaranty Corporation.

"Regular Government employee" means an officer or employee of the PBGC other than a special Government employee.

"Special Government Employee" means an officer or employee of the PBGC who is retained, designated, appointed or employed by the PBGC or by the President of the United States to perform with or without compensation, for not to exceed 130 days during any period of 365 consecutive days, temporary duties for the PBGC either on a full-time or intermittent basis.

§ 2614.3 Counseling service.

(a) The General Counsel of the PBGC is designated as E'hics Counselor to the Corporation in matters within the scope of this part.

(b) The General Counsel shall designate Deputy Counselors who will be available to counsel employees on questions relating to ethics, standards of conduct and conflicts of interest.

(c) The Branch of Personnel Management, Office of Management Services, PBGC, shall be responsible for:

(1) Advising employees of the times and places where counseling services are available and the names of Deputy Counselors;

(2) Causing employees to be furnished with copies of this part not later than 90 days after it is published in the FEDERAL REGISTER;

(3) Causing each new employee to be furnished with a copy of this part when such employee enters duty;

(4) Annually, and at such other times as circumstances warrant, alerting employees as to the provisions of this part.

§ 2614.4 General provisions.

(a) All employees shall acquaint themselves with the regulations in this part, and the laws and regulations on which these regulations are based, including:

(1) House Concurrent Resolution 175, 85th Congress, 2d session, 72 Stat. B12, the "Code of Ethics for Government Service."

(2) Chapter 11 of title 18, United States Code, relating to bribery, graft and conflicts of interest.

(3) The prohibitions against participating in strikes against the Government (5 U.S.C. 7311, 18 U.S.C. 1918).

(4) The prohibitions against the disclosure of classified information (18 U.S.C. 798, 50 U.S.C. 783) and the disclosure of confidential information (18 U.S.C. 1905).

(5) The provision relating to the excessive and habitual use of intoxicants (5 U.S.C. 7352).

(6) The prohibition against the use of a Government vehicle for non-official purpose (31 U.S.C. 638a(c)).

(7) The prohibition against the use of the franking privilege for private purposes (18 U.S.C. 1719).

(8) The prohibition against interference with the Civil Service Examination and Placement process (18 U.S.C. 1917).

(9) The prohibition against knowingly and willfully making false or fraudulent statements in any matter within the jurisdiction of any department or agency of the United States (18 U.S.C. 1001).

(10) The prohibiton against counterfeiting and forging transportation requests on a form provided for the use of the Government (18 U.S.C. 508).

(11) The prohibition against concealing, removing, obliterating, mutilating or otherwise destroying public records (18 U.S.C. 2071).

(12) The prohibitions against embezzlement of Government money or property (18 U.S.C. 641), failing to account for public money (18 U.S.C. 643) and embezzlement by a Government employee of the money or property of another person in the possession of such employee by reason of his employment (18 U.S.C. 654).

(13) The prohibition against unauthorized taking or use of documents relating to claims from or by the Government (18 U.S.C. 285).

(14) The prohibitions against political activities in subchapter III of chapter 73 of title 5, United States Code and 18 U.S.C. 602, 606, 607 and 608.

(15) The prohibition against a Government employee acting as the agent of a foreign principal registered under the Foreign Agents Registration Act (18 U.S.C. 219).

(16) The prohibition against the receipt of excessive honorariums (2 U.S.C. 441(i)).

(b) An employee who fails to comply with any of the provisions of this part shall be subject both to any penalty prescribed by law and also such other disciplinary or remedial action effected in accordance with applicable laws, Executive orders and regulations as may be appropriate to the particular case, including but not limited to:

(1) Disqualification for a particular assignment;

(2) Changes in assigned duties;

(3) Disciplinary action.

§ 2614.5 Criminal sanctions.

Sections 201 through 209 of title 18, United States Code, prohibit, subject to criminal penalties, certain acts by Government employees involving conflict-of-interest situations. These provisions, which contain limited exceptions for special Government employees, include the following prohibitions:

(a) Section 203, in general, prohibits a Government employee from soliciting, receiving or agreeing to receive compensation for services rendered on behalf of another before a Government department or agency in relation to any particular matter in which the United States is a party or has a direct and substantial interest.

(b) Section 205, in general, prohibits a Government employee from acting as agent or attorney for prosecuting any claim against the United States or acting as agent or attorney for anyone before any Federal courts or agencies in connection with any particular matter in which the United States is a party or has a direct and substantial interest. It also prohibits a Government employee from receiving any gratuity, or any share of or interest in any claim against the United States, in consideration of assistance in the prosecution of such claim.

(c) Section 208, in general, prohibits a Government employee, while acting in his official capacity, from participating personally and substantially through decision, approval, disapproval, recommendation, the rendering of advice or otherwise in any particular matter in which, to his knowledge, he, his spouse, minor child, partner, organization in which he is serving as officer, director, trustee, partner or employee or any person or organization with whom he is negotiating or has any arrangement concerning prospective employment, has a financial interest.

(d) Section 209, in general, prohibits regular Government employees from receiving salary or supplements to salary as compensation for their Government service from any source other than the United States.

The statutory provisions described in this section are intended to direct attention to potential problem areas and are not intended as a comprehensive description or interpretation of those provisions. Employees needing guidance concerning the scope and application of these provisions should consult a Deputy Counselor.

STANDARDS OF CONDUCT

§ 2614.6 Proscribed actions.

An employee shall take reasonable steps to avoid any action which might result in, or create the appearance of:

(a) Using public office for private gain for himself or another person;

(b) Giving unwarranted preferential treatment to any person or organization;

(c) Impeding Government efficiency or economy;

(d) Losing independence or impartiality;

(e) Making a Government decision outside official channels;

(f) Affecting adversely the confidence of the public in the integrity of the Government or the PBGC.

§ 2614.7 Gifts, entertainment, reimbursement and favors.

(a) *General.* An employee shall not solicit or accept, directly or indirectly, any gift, gratuity, favor, entertainment, loan or any other thing of monetary value, from a person who:

(1) Has or is seeking to obtain contractual or other business or financial relations with the PBGC;

(2) Conducts a business enterprise that is subject to the statutory authority of the PBGC;

(3) Has interests that may be substantially affected by the performance or non-performance of the employee's PBGC duties.

(b) *Special rules.* Regular Government employees also shall be subject to the following:

(1) *Contributions and gifts to superiors.* A regular Government employee shall not solicit a contribution from another employee for a gift to an employee who is an official superior, make a donation for a gift to an employee who is an official superior or accept a gift from an employee receiving less pay than himself.

(2) *Payments from non-Government sources.* A regular Government employee shall not receive any salary or supplement to his salary from a non-Government source as compensation for services to the Government.

(c) *Exceptions.* The prohibitions in this section do not apply to the:

(1) Acceptance of unsolicited advertising or promotional material of nominal intrinsic value;

(2) Acceptance of an award for a meritorious public contribution given by a charitable, religious, professional, social, fraternal, non-profit educational, recreational, public service or civic organization;

(3) Acceptance of gifts resulting from obvious family or personal relationships when the circumstances make it clear that it is those relationships rather than the business of the persons concerned which are the motivating factors;

(4) Acceptance of voluntary gifts of nominal value or donations in a nominal amount made on special occasions such as marriage, illness or termination of employment.

(5) Acceptance of loans from banks or other financial institutions on customary terms to finance proper and usual activities;

(6) Acceptance of scholarships, fellowships and similar forms of assistance which are incident to education or training pursued by an employee on his own time and on his own initiative;

(7) Acceptance of food, entertainment, refreshments and gifts of nominal value on infrequent occasions in the ordinary course of a meeting, conference or training situation in which the employee properly is in attendance.

(8) Acceptance, when not otherwise proscribed by law, of bona fide reimbursement (including payments made on behalf of an employee) for those reasonable and necessary travel and accommodation expenses for which no Government payment or reimbursement is made.

(d) *Limitation.* An employee is obligated to avoid any activity which creates the appearance of impropriety. Accordingly, an employee may not accept, directly or indirectly, any gift, gratuity, favor, entertainment, loan or any other thing of monetary value otherwise permitted by this section if such acceptance would conflict or appear to conflict with the provisions of this part, other applicable laws. Executive orders or regulations.

V 42166 A AUG 26 77 UMI

§ 2614.8 Outside employment and other activity.

(a) A regular Government employee shall not engage in outside employment or other outside activity not compatible with the full and proper discharge of the duties and responsibilities of his PBGC employment. Such incompatible activities include but are not limited to:

(1) Acceptance of a fee, compensation, gift, payment of expenses or any other thing of monetary value in circumstances in which acceptance may result in or create the appearance of a conflict-of-interest.

(2) Outside employment which tends to impair his capacity to perform his PBGC duties and responsibilities in an acceptable manner.

(b) The PBGC encourages employees to engage in outside activities such as teaching, lecturing and writing since such activities serve to inform the public concerning the PBGC's activities and programs and to enhance an employee's value to the Government. However, an employee shall not engage in any such activities using information obtained as a result of his PBGC employment unless such information is available to the general public.

(c) This section does not preclude a regular Government employee from:

(1) Participation in the activities of national, state or local political parties when not proscribed by law.

(2) Participation in the affairs of a charitable, religious, professional, social, fraternal, non-profit educational, recreational, public service or civic organization.

(d) An employee who is engaged in or is planning to engage in outside employment, business, professional or other such activities for pay shall obtain clearance:

(1) When such activities raise a question of conflict with this part or any applicable laws, orders, regulations or standards, or

(2) When applicable laws, orders or regulations require clearance of such activities.

(e) A request for clearance shall be in writing and shall include a statement of the nature of and the amount of time to be devoted to the activity. The heads of offices shall receive and review requests for clearance submitted by members of their staff. The Executive Director or his designee shall receive and review requests for clearance submitted by the heads of offices and special Government employees. The employee reviewing the request for clearance may require the employee making the request to furnish such other information as may be appropriate in considering the request and shall consult with the Corporation's Ethics Counselor where appropriate. The request may be granted only if such activity would be consistent with applicable laws, orders and regulations. If the request for clearance is not granted, the employee making the request shall not commence or continue in the activity unless the Executive Director or his designee, upon written request of the employee, determines that such activity would be consistent with applicable laws, orders and regulations.

§ 2614.9 Financial interests.

(a) An employee shall not:

(1) Have a direct or indirect financial interest that conflicts substantially or appears to conflict substantially with his PBGC duties and responsibilities;

(2) Engage in, directly or indirectly, a financial transaction as a result of, or primarily relying on, information obtained through the performance of his PBGC duties; or

(3) Engage in, directly or indirectly, a financial transaction which is prohibited by law, regulation or Executive order.

(b) An employee shall not use or appear to use his position within the Corporation to coerce any person, enterprise, company, association, partnership, society, organization or instrumentality to provide a financial benefit to himself or another person.

(c) An employee who is assigned to a matter relating to a business enterprise in which he, his spouse or a minor child has a financial interest or a personal interest as a result of any current, prior or prospective employment, business or professional association, or which was at the time of his association with a firm, a client of such firm, shall submit immediately a written report detailing the nature of such interest to the head of his employing office. Office heads and special Government employees shall report such interests of their own to the Executive Director or his designee. The employee receiving the report shall determine whether, in view of the provisions of this part and the desirability of avoiding situations that create the appearance of a conflict-of-interest, the reporting employee can continue in that assignment and shall note such determination on the report.

§ 2614.10 Negotiation for private employment.

Except as provided in § 2614.9(c) and subject to the provisions of 18 U.S.C. 208, an employee shall not undertake or continue in an assignment if he knows such assignment may affect, directly or indirectly, any person or business enterprise with whom such employee is discussing, negotiating or entertaining a proposal for future employment.

§ 2614.11 Use of Government property.

(a) An employee shall protect and conserve Government property, including equipment, supplies and other property entrusted to him.

(b) An employee shall not directly or indirectly use, or allow the use of Government property of any kind, including property leased to the Government, for other than officially approved activities.

§ 2614.12 Use of information.

An employee shall not use, or allow the use of, official information obtained through the performance of his PBGC duties to further a private interest if such information is not available to the general public.

§ 2614.13 Indebtedness.

(a) An employee shall pay each just financial obligation in a proper and timely manner.

(b) For purposes of this section:

(1) A "just financial obligation" means one imposed by law such as Federal, State or local taxes, or one acknowledged by the employee or reduced to judgment by a court.

(2) "In a proper and timely manner" means in a manner which, under the circumstances, does not reflect adversely on the Corporation as his employer.

§ 2614.14 Gambling, betting, and lotteries.

An employee shall not participate in the operation of a gambling device, in conducting a lottery or pool, in a game for money or property or in selling or purchasing a numbers slip or ticket while on Government-owned or leased property or while on duty for the Government unless such activities are in connection with activities described in section 3 of Executive Order 10927 (dealing with fund raising by employee organizations for limited purposes).

§ 2614.15 General conduct prejudicial to the Government.

An employee shall not engage in criminal, infamous, dishonest, immoral or notoriously disgraceful conduct.

§ 2614.16 Political activity.

(a) *Permitted activities.* Regular Government employees have the right to vote as they choose and to express their opinions on all political subjects and candidates, to engage in those political activities relating to local elections and referenda on questions not specifically identified with a national or state political party as are permitted pursuant to 5 U.S.C. 7324, 7326 and 7327 and 5 CFR Part 733, and to make financial contributions to a political party or organization to the extent permitted by 18 U.S.C. 608.

(b) *Prohibited activities.* Regular Government employees are generally prohibited from taking an active part in political management or campaigns (5 U.S.C. 7324) and from soliciting, receiving, requiring or being concerned with political assessments, subscriptions or contributions for any political purpose whatever from other employees (18 U.S.C. 602, 606 and 607).

§ 2614.17 Strikes.

Federal law prohibits an employee from striking against the Government (5 U.S.C. 7311).

§ 2614.18 Nondiscrimination.

An employee shall not discriminate against any other employee or applicant for employment because of race, color, religion, national origin, sex or age.

§ 2614.19 Special Government employees.

Unless otherwise specifically provided, special Government employees shall be subject to the provisions of this part.

STATEMENTS OF EMPLOYMENT AND FINANCIAL INTERESTS

§ 2614.20 Regular Government employees.

(a) *General.* Statements of employment and financial interests shall be filed by the following regular Government employees:

(1) Those paid at a level of the Executive Schedule in subchapter II of chapter 53 of title 5, United States Code.

(2) Those classified at GS–13 or above under 5 U.S.C. 5332 who are in positions:

(i) The incumbents of which are responsible for making a PBGC decision or taking a PBGC action in regard to contracting or procurement, administering or monitoring the payment of benefits, regulating or auditing private or other non-Federal enterprises, or other activities where the decision or action has an economic impact on the interests of any non-Federal enterprise; or

(ii) Which the Executive Director has determined have duties and responsibilities which require the incumbent to report employment and financial interests in order to avoid involvement in a possible conflict-of-interest situation and to carry out the purpose of law, Executive order, 5 CFR Part 735 and this part.

(3) Those classified below GS–13 under 5 U.S.C. 5332 who are in positions which otherwise meet the criteria in paragraph (a)(2) of this section, but only when the inclusion of those positions in Appendix A to this part has been specifically justified by the Executive Director in writing to the Civil Service Commission as an exception that is essential to protect the integrity of the PBGC and to avoid employee involvements in possible conflict-of-interest situations.

(b) *Exceptions.* Employees in positions that meet the criteria in paragraph (a) of this section shall not be required to file a statement of employment and financial interest if:

(1) The Executive Director determines that the duties of the position are such that the likelihood of the incumbent's involvement in a conflict-of-interest situation is remote, or the duties of a position are at such a level of responsibility that the submission of such a statement is not necessary because of the degree of supervision and review over the incumbent or the inconsequential effect on the integrity of the PBGC, or

(2) The employee is required to report such information to the Chairman of the Civil Service Commission pursuant to Section 401 of Executive Order 11222.

§ 2614.21 Listing of positions.

(a) *General.* Appendix A to this part contains a list of positions the incumbents of which must file statements of employment and financial interests.

(b) *Amendments.* Appendix A may be amended at any time pursuant to the criteria in § 2614.20. Such amendments shall be effective upon the approval of the Executive Director and actual notification to the affected employee.

(c) *Application for review.* An employee who believes that his position has been included in Appendix A improperly may apply to the Executive Director or his designee to have that inclusion reviewed.

(d) *Publication.* Amendments to Appendix A shall be submitted annually for publication in the FEDERAL REGISTER.

§ 2614.22 Time and place for submission of statements.

An employee required to submit a statement of employment and financial interests pursuant to § 2614.20 shall submit that statement to the employee designated in § 2614.29(a) to review such statements on or before the later of:

(a) November 25, 1977.

(b) Thirty days after the reporting employee's entrance on duty; or

(c) Thirty days after the effective date of an amendment which includes an employee's position in Appendix A to this part.

§ 2614.23 Supplementary statements.

(a) An employee required to submit a statement of employment and financial interests pursuant to § 2614.20 also shall submit on or before Sepetmber 30th of each year a supplementary statement showing either changes in or additions to the information contained in the statement of employment and financial interests or that no changes or additions occurred.

(b) The statement required by this section shall be submitted to the employee designated in § 2614.29(a) to review such statements.

§ 2614.24 Special Government employees.

(a) *General.* Each special Government employee shall submit a statement of:

(1) All other employment, and

(2) All financial interests (including the nature of such interests) deemed relevant by the Executive Director in light of the duties such employees is to perform.

(b) *Exception.* The Executive Director may waive the requirement in paragraph (a) of this section if:

(1) The special Government employee is not a consultant or an expert, as defined in chapter 304 of the Federal Personnel Manual, and the Executive Director determines that the duties of the position are of such a nature and at such a level of responsibility that the submission of the statement by the employee is not necessary to protect the integrity of the Corporation.

(2) The special Government employee is required to report such information to the Chairman of the Civil Service Commission pursuant to Section 401 of Executive Order 11222.

(c) *Submission.* Each special Government employee shall submit to the Executive Director the statement required by this section on or before the later of his entrance on duty, or November 25, 1977, and shall keep that statement current throughout his employment with the Corporation by the submission of supplementary statements.

§ 2614.25 Interests of employee's relatives.

(a) For purposes of completing the statements required by §§ 2614.20, 2614.23 and 2614.24 the interest of a spouse, minor child or other member of the employee's immediate household who is related to such employee by blood or marriage shall be considered an interest of the employee.

(b) For purposes of this section, "members of an employee's immediate household" means those blood or marital relations who reside with the employee.

§ 2614.26 Information not known by an employee.

If any information required to be included on a statement required by §§ 2614.20, 2614.23 or 2614.24, including holdings placed in trust, is not known to the employee but is known to another person, the employee shall request that other person to submit such information in his behalf.

§ 2614.27 Information not required.

(a) An employee required to file a statement pursuant to §§ 2614.20, 2614.23 or 2614.24 shall not be required to include on such statement any information relating to his connection with, or interest in, a professional society or a charitable, religious, social, fraternal, recreational, public service, civic or political organization which is not conducted as a business enterprise.

(b) For purposes of this section, the term "business enterprise" shall include educational and other institutions doing research and development or related work involving grants of money from or contracts with the Government.

§ 2614.28 Forms.

(a) The statement of employment and financial interests required by §§ 2614.20 and 2614.24 for use by regular and special Government employees shall be in the form prescribed for such employees by the Civil Service Commission in the Federal Personnel Manual.

(b) The forms prescribed by this section shall be provided to the incumbents of the positions listed in Appendix A to this part by the employee designated in § 2614.29(a) to review such statements or his designee.

§ 2614.29 Review procedures.

(a) The General Counsel, or his designee, shall review the statements of regular Government employees filed pursuant to §§ 2614.20 and 2614.23. The Executive Director, or his designee, shall review the statements of special Government employees filed pursuant to § 2614.24

(b) If it appears that a statement filed pursuant to §§ 2614.20, 2614.23 or 2614.24 discloses a possible or apparent conflict with the provisions of this part, the employee submitting such statement may submit additional evidence in explanation of the possible or apparent conflict.

(c) An employee whose statement is subject to review pursuant to the provisions of this section shall furnish such

V 42166 AUG 26 77 UMI

additional information as may be appropriate in light of the circumstances of the particular case.

(d) If, in light of information known from other sources, the review of a statement filed pursuant to §§ 2614.20, 2614.23 or § 2614.24 discloses a possible or apparent conflict with the provisions of this part, other applicable laws, Executive orders or regulations, the employee who filed the statement shall be so notified. In an appropriate case, or at the request of such employee, the employee's statement and other pertinent information shall be forwarded to the General Counsel for review. If, after a review of all available evidence, the General Counsel finds that a possible or apparent conflict with the provisions of this part, other applicable laws, Executive orders or regulations may exist, he shall forward all available evidence to the Executive Director. If, after reviewing such evidence, the Executive Director finds that such a conflict exists, he or the head of the employing office shall initiate appropriate remedial action pursuant to § 2614.4(b), other applicable law, Executive orders or regulations.

(e) Pending any final determination with regard to a statement filed pursuant to §§ 2614.20, 2614.23 and 2614.24, the head of the employing office or the Executive Director may relieve the reporting employee of any duties which appear to create a conflict with the provisions of this part, other applicable laws, Executive orders and regulations and assign such employee to other duties.

§ 2614.30 Confidentiality.

(a) The Corporation shall hold statements submitted pursuant to §§ 2614.20, 2614.23 or 2614.24 in confidence. Such statements shall be kept in special files maintained by the employees responsible for review of such statements. Such employees shall be responsible for maintaining the statements in confidence and, except as necessary to carry out the purposes of this part or as provided in paragraph (b) of this section, shall not allow examination of any statement or copy thereof.

(b) Information from a statement shall not be made available to the public except as the Executive Director or the Civil Service Commission may determine for good cause shown.

(c) A statement submitted pursuant to §§ 2614.20, 2614.23 or 2614.24 or a copy thereof shall not be included in an employee's personnel file.

§ 2614.31 Review of files.

The General Counsel or his designee may examine any file containing statements submitted pursuant to §§ 2614.20, 2614.23 and 2614.24. He shall report any possible or apparent conflicts with the provisions of this part, other applicable law, Executive order or regulation discovered thereby to the head of the employing office or the Executive Director, as appropriate.

§ 2614.32 Effect of employees' statements on other requirements.

The statements submitted pursuant to §§ 2614.20, 2614.23 and 2614.24 shall be in addition to, and not in substitution for or in derogation of, any similar requirement imposed by law, Executive order or regulation. The submission of such statements shall not permit an employee or any other person to participate in a matter in which the employee's or the other person's participation is prohibited by this part, other applicable law, Executive order or regulation.

Title 32—National Defense

CHAPTER VI—DEPARTMENT OF THE NAVY

PART 721—STANDARDS OF CONDUCT

Revision

AGENCY: Department of the Navy, DOD.

ACTION: Final rule.

SUMMARY: These regulations are being revised to implement and conform with the revised policies of the Secretary of Defense on standards of conduct as promulgated in Department of Defense Directive 5500.7, Standards of Conduct, dated January 15, 1977. These revised regulations prescribe and describe the standards of conduct required of military and civilian naval personnel.

EFFECTIVE DATE: August 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Lieutenant Commander Robert E. Coyle, Head, Finance Branch (Code 134), Office of the Judge Advocate General, Department of the Navy, Washington, D.C. 20370. Telephone 202–694–5267.

SUPPLEMENTARY INFORMATION: Pursuant to the authority conferred under 5 U.S.C. 301, 10 U.S.C. 133 and 5031, the Secretary of the Navy revises 32 CFR Part 721. This revision reflects the changes made to the underlying Secretary of the Navy instruction, SECNAV INST 5370.2 (series), which delineates the Navy's Standards of Conduct. These Standards of Conduct were reorganized and expanded to increase their value as a normative guide for personnel and to ensure their validity as a legal basis for disciplinary action in appropriate cases. The responsibilities of individuals for observing the Standards of Conduct, and the responsibilities of commands for enforcing the standards, are further delineated. Also, provisions concerning the filing, review, and disposition of confidential statements of affiliations and financial interests (DD Form 1555) are expanded; the Under Secretary of the Navy is now required to file an annual report with DOD regarding the Navy's compliance with the filing requirements; and special filing requirements are included for certain potential flag-officer nominees. Further, accession training in the Standards of Conduct is required for all naval personnel regardless of position or duties; the prohibition on commercial solicitations has been expanded to include certain civilian personnel; and the customary exchange of gifts between naval personnel and family members and friends is now authorized under certain circumstances. Finally, the requirement that retired Regular officers provide information on their post-retirement employment by filing a DD Form 1357 has been modified.

This revision, which was adopted on August 4, 1977, reflects changes to the Department of the Navy's Standards of Conduct issued in implementation of the Department of Defense standards codified at 32 CFR Part 40. To the limited extent that this revision could be deemed to originate any requirements within the Department of the Navy, it has been determined that such requirements relate entirely to internal naval management and personnel practices that can be administered more effectively without public participation in the rule-making process. It has therefore been determined that invitation of public comment on this revision would be impracticable and unnecessary and is therefore not required under the provisions of Parts 296 and 701 of 32 CFR.

Accordingly, 32 CFR Part 721 is revised to provide as follows:

Sec.

721.1 Purpose.
721.2 [Reserved]
721.3 Scope and effect.
721.4 Definitions.
721.5 General policies governing the conduct of naval personnel.
721.6 Regulations governing the conduct of naval personnel.
721.7 Related statutes and directives.
721.8 Responsibilities for action.
721.9 Statements of affiliations and financial interests (DD Form 1555).
721.10 Information to personnel.
721.11 Privacy Act consideration.
721.12 Reporting of post-retirement employment.
721.13 Availability of forms.

AUTHORITY: 5 U.S.C. 301; 10 U.S.C. 133 and 5031; E.O. No. 11222, May 8, 1965; 5 CFR Part 735; 32 CFR Part 40.

§ 721.1 Purpose.

Part 721 implements and supplements Part 40 of this title in prescribing required standards of ethical conduct governing all personnel of the Department of the Navy; related requirements applicable to all personnel of certain categories in the Department of the Navy; amplifying policies for the guidance of personnel in interpreting and executing the standards of conduct and related requirements; and responsibilities and procedures for monitoring and enforcing compliance with the standards of conduct and related requirements within the Department of the Navy.

§ 721.2 [Reserved]

§ 721.3 Scope and effect.

(a) *Applicability.* The provisions of this part apply to all naval personnel as defined in § 721.4(a). The provisions of § 721.6(1)(2) apply to all retired naval personnel and members of Reserve components. The provisions of § 721.12 also apply to all retired Regular officers.

(b) *Violations.* The regulations prescribed in § 721.6 are a general order upon which disciplinary or punitive proceedings may be based in appropriate cases. Noncompliance with other provisions of this part are expected to be corrected by timely and appropriate administrative measures.

§ 721.4 Definitions.

(a) *Naval personnel.* All civilian officers and employees and all active-duty military personnel of the Department of the Navy, including special Government employees and personnel of nonappropriated fund instrumentalities.

(b) *Department of Defense (DOD) components.* The Office of the Secretary of Defense, the Military Departments, the Organization of the Joint Chiefs of Staff, the Unified and Specified Commands, and the Defense Agencies, including nonappropriated fund instrumentalities.

(c) *Special government employee.* A person who is retained, designated, appointed, or employed to perform, with or without compensation, not to exceed 130 days during any period of 365 consecutive days, temporary duties, on either a full-time or intermittent basis. The term also includes a Reserve officer while on active duty solely for training for any length of time, one who is serving on active duty involuntarily for any length of time, and one who is serving voluntarily on extended active duty for 130 days or less. It does not include enlisted personnel.

(d) *Gratuity.* Any gift, favor, entertainment, hospitality, transportation, loan, any other tangible item, and any intangible benefit—for example, discounts, passes, and promotional vendor training—given or extended to, or on behalf of, naval personnel or their spouses, minor children, or households, for which fair market value is not paid by the recipient or the U.S. Government.

(e) *Appropriate supervisor.* That superior within the chain of authority who is acquainted with the duties of the naval personnel concerned and can best determine the existence and effect of any conflict of interests of such personnel. Ordinarily, this will be the immediate superior of the person concerned. Each commanding officer or activity head should ensure that all personnel are aware of the identity of their appropriate supervisor.

§ 721.5 General policies governing the conduct of naval personnel.

(a) *Proper conduct of official activities.*

(1) Naval personnel shall become familiar with the scope of authority for, and the limitations concerning, the activities for which they have responsibilities.

(2) The attention of naval personnel is directed to the appropriate statutory prohibitions which apply to the conduct of naval personnel.

(3) Naval personnel shall not make or recommend any expenditure of funds or take or recommend any action known or believed to be in violation of U.S. laws, Executive Orders, or applicable directives, instructions, or regulations.

(4) In cases of doubt of the propriety of a proposed action or decision in terms of regulation or law, naval personnel shall consult legal counsel or, if appropriate, a Standards of Conduct Counsellor or Deputy Counsellor to ensure the proper and lawful conduct of naval programs and activities.

(b) *Conduct prejudicial to the Government.* Naval personnel shall avoid any action, whether or not specifically prohibited by this part, which might result in or reasonably be expected to create the appearance of:

(1) Using public office for private gain;

(2) Giving preferential treatment to any person or entity;

(3) Impeding Government efficiency or economy;

(4) Losing complete independence or impartiality;

(5) Making a Government decision outside official channels; or

(6) Adversely affecting the confidence of the public in the integrity of the Government.

(c) *Standards of personal judgment.* All naval personnel will adhere strictly to the standards of conduct and related requirements prescribed in this part. In some instances, standards are imposed which require the exercise of personal judgment. Naval personnel must consider each such instance carefully and be prepared to account for the manner in which the judgment is exercised. This is particularly true in situations which involve acceptance of hospitality or favors from persons or entities who do, or seek to do, business with the Department of Defense.

(d) *Dealings with business and industry representatives.* Persons who represent the Government in business dealings with representatives of industry have positions of trust and grave responsibility which require them to observe the highest ethical standards. Practices which may be accepted in the private business world are not necessarily acceptable for naval personnel. No person will allow himself to be placed in a position in which a conflict of interests might arise or might justifiably be suspected. Such a conflict of interests may arise or

V42166 AUG 26 77 UMI

appear to arise by reason of the acceptance of gratuities, or by any other action which could influence or reasonably be interpreted as influencing the strict impartiality that must prevail in all business relationships involving the Government. Strict impartiality is often particularly difficult to maintain when business relationships are allowed to become overly personal. Naval personnel should at all times ensure that persons doing business or attempting to do business with the Department of Defense, or representing such entities, are not permitted to ingratiate themselves to the extent that naval personnel hesitate to deny requests for special treatment made by such persons or otherwise to follow the rule of strict impartiality when dealing with such persons in their official capacities. Acceptance of gratuities (no matter how innocently tendered or received) from those who have or seek business dealings with the Department of the Navy may be a source of embarrassment to the department and to the naval personnel involved, may affect the objective judgment of the recipient, and may impair public confidence in the integrity of business relations between the department and industry. It is emphasized that prohibited conflicts and apparent conflicts of interests can sometimes arise even from relationships and transactions which the personnel concerned perceive as inconsequential. Where there is doubt as to the propriety of accepting gratuities, attending functions, or accepting other invitations of a hospitable nature, naval personnel will refrain therefrom.

(e) *Preferential treatment.* Special treatment must not be accorded to particular individuals or firms unless equivalent treatment is also accorded to other individuals or firms justifiably entitled thereto.

(f) *Acquiring conflicting financial interests.* Notwithstanding the fact that they may have filed confidential statements of affiliations and financial interests (DD Form 1555), naval personnel must at all times avoid acquiring or retaining financial interests which would disqualify them from performing their assigned duties or responsibilities. Some of the more likely situations in which conflicts of interests might arise are where naval personnel have Government duties or responsibilities related to business entities—

(1) With which they, or their spouses, minor children, or household members are associated as employees, officers, owners, directors, members, trustees, partners, advisers, or consultants;

(2) With which they, or their spouses, minor children, or household members are negotiating or have arrangements for prospective employment; or

(3) In which they, or their spouses, minor children, or household members have interests through ownership of stock options, bonds, securities or other financial arrangements, such as trusts, or through participation in pension or retirement plans.

(g) *Membership in associations.* Naval personnel who are members or officers of non-Governmental associations or organizations must avoid activities on behalf of the association or organization that are incompatible with their official Government positions. Secretary of the Navy Instruction (SECNAVINST) 5760.4 (series) sets forth the Department of the Navy policy regarding participation by naval activities and naval personnel in the activities of private associations.

(h) *Equal opportunity.* Naval personnel shall scrupulously adhere to the DoD program of equal opportunity regardless of race, color, religion, sex, age, or national origin, in accordance with equal opportunity directives. See, for example, SECNAVINST 5350.6 (series) and SECNAVINST 5350.10 (series).

(i) *Reporting suspected violations.* Naval personnel who have information which causes them to believe that other DoD personnel have violated a statute or standard of conduct imposed by this part should bring the matter to the attention of the appropriate command authority. The matter thereafter should be brought to the attention of the person concerned, for possible resolution without further command action, unless the command determines that such communication is not likely to remedy the problem or will adversely affect a proper investigation of the matter.

(j) *Resolving violations.* The resolution of standards of conduct violations shall be accomplished promptly by one or more measures, such as divestiture of conflicting interests, disqualification for particular assignments, changes in assigned duties, termination, or other appropriate action, as provided by statute or administrative procedures. Disciplinary actions shall be in accordance with established personnel procedures. See § 721.6(a).

§ 721.6 Regulations governing the conduct of naval personnel.

(a) *Affiliations and financial interests.* Naval personnel shall not engage in any personal, business, or professional activity, or receive or retain any direct or indirect financial interest, which places them in a position of conflict between their private interests and the public interests of the United States related to the duties or responsibilities of their official positions. For the purpose of this prohibition, the private interests of a spouse, minor child, and any household member are treated as private interests of the naval personnel.

(1) Unless otherwise expressly authorized by action taken under 18 U.S.C. 208(b), all naval personnel who have or acquire an affiliation or a financial interest which creates a conflict or appearance of a conflict with their official duties shall report the possibly disqualifying interest to the appropriate supervisor, who shall resolve the matter in accordance with this part. If it is determined that the individual should be disqualified from participation in any official activities that are related to the conflicting interest, a formal disqualification notice must be sent to the concerned individual's appropriate supervisor and immediate subordinates. If the individual cannot adequately perform his official duties after such disqualification, he must divest himself of such involvement or be removed from that position.

(2) Naval personnel need not disqualify themselves under this section, however, for holding shares of a widely held, diversified mutual fund or regulated investment company. Such holdings are exempted as being too remote or inconsequential to affect the integrity of the services of Government personnel.

(b) *Using inside information.* Naval personnel shall not use, directly or indirectly, inside information to further a private gain for themselves or others if that information is not generally available to the public and was obtained by reason of their DoD positions.

(c) *Using naval position.* Naval personnel are prohibited from using their official positions to induce, coerce, or in any manner unlawfully influence any person, including subordinates, to provide any benefit, financial or otherwise, to themselves or others.

(d) *Dealing with present and former military and civilian personnel.* Naval personnel shall not knowingly deal on behalf of the Government with present or former Government personnel, military or civilian, whose participation in the transaction would be in violation of a statute, regulation, or policy set forth in this part. While all applicable prohibitions are within the prohibition established by this paragraph, attention is directed to the prohibition on retired Regular officers selling to the Government through the department in which they hold a retired status, 18 U.S.C. 281; the prohibition on former personnel acting as an agent or attorney for anyone other than the United States in connection with "claims" against the Government, 18 U.S.C. 207; and the prohibition on paying appropriated funds to retired Regular officers who are "selling" to certain Government agencies, 37 U.S.C. 801(c).

(e) *Commercial soliciting by naval personnel.* To eliminate the appearance of coercion, intimidation, or pressure from rank, grade, or position, full-time naval personnel, except special Government employees and Reserve enlisted personnel on active duty for training, are prohibited from making personal commercial solicitations or sales to DoD personnel who are junior in rank or grade, at any time, on or off duty.

(1) This limitation includes, but is not limited to, the solicitation and sale of insurance, stocks, mutual funds, real estate, and any other commodities, goods, or services.

(2) This prohibition is not applicable to the one-time sale by an individual of his own personal property or privately owned dwelling, or to the off-duty employment of naval personnel as employees in retail stores or other situations not including solicited sales.

(3) With regard to solicitation by and of civilian personnel, the limitation applies only to solicitation of personnel under the supervision, at any level, of the solicitor.

(f) *Assignment of Reserve personnel for training.* Naval personnel who are responsible for assigning Reserves for training shall not assign them to duties in which they will obtain information that could be used by them or their private sector employers to gain unfair advantage over civilian competitors.

(g) *Gratuities.* (1) Except as provided in paragraph (g)(2) of this section, naval personnel and their spouses, minor children, and members of their households shall not solicit, accept, or agree to accept any gratuity for themselves, members of their families, or others, either directly or indirectly from, or on behalf of, a defense contractor. A defense contractor is a person or other entity which:

(i) Is engaged in or seeks business or financial relations of any sort with any DoD component;

(ii) Conducts operations or activities that are either regulated by a DoD component or significantly affected by DoD decisions; or

(iii) Has interests that may be substantially affected by the performance or nonperformance of the official duties of DoD personnel.

(2) This general prohibition does not apply to the following:

(i) The continued participation in employee welfare or benefit plans of a former employer when permitted by law and approved by the appropriate Standards of Conduct Counsellor;

(ii) The acceptance of unsolicited advertising or promotional items that are less than $5 in retail value;

(iii) Trophies, entertainment, prizes, or awards for public service or achievement or given in games or contests which are clearly open to the public or which are officially approved for naval personnel participation;

(iv) Things available to the public (such as university scholarships covered by DoD Directive 1322.6 and free exhibitions by Defense contractors at public trade fairs);

(v) Discounts or concessions extended Navy- and Marine Corps-wide and realistically available to all naval personnel;

(vi) Participation by naval personnel in civic and community activities when the involvement of Defense contractors is remote from the business purposes of any contractor who is sponsoring, supporting, or participating in the activity (for example, participation in a little league or Combined Federal Campaign luncheon which is subsidized by a Defense contractor);

(vii) Social activities engaged in by officers in command and other naval officials, or their representatives, with local civic leaders as part of community relations programs of the Department of the Navy in accordance with SECNAVINST 5720.44 (series) (Part 705 of this chapter);

(viii) The participation of naval personnel in widely attended gatherings of mutual interest to Government and industry, sponsored or hosted by industrial, technical, and professional associations (not by individual contractors): *Provided*, That they have been approved in accordance with DoD Instruction 5410.20;

(ix) Situations in which participation by naval personnel at public ceremonial activities of mutual interest to industry or local communities and the Department of the Navy serves the interests of the Government and acceptance of the invitation is approved by the commanding officer or other head of the activity to which the invitee is attached;

(x) Contractor-provided transportation, meals, or overnight accommodations in connection with official business when arrangements for Government or commercial transportation, meals, or accommodations are clearly impracticable and the individual reports the circumstances in writing to his appropriate supervisor as soon as possible;

(xi) Attendance at promotional vendor training sessions when the vendor's products or systems are provided under contract to DoD and the training is to facilitate the utilization of those products or systems by naval personnel;

(xii) Attendance or participation of naval personnel in gatherings, including social events such as receptions, which are hosted by foreign governments or international organizations: *Provided*, That the acceptance of the invitation is approved by the commanding officer or other head of the activity to which the invitee is attached or, when there is doubt as to the propriety of accentance, by higher authority (see SECNAVINST 1650.1 (series) for further information pertaining to gifts from foreign governments);

(xiii) Customary exchanges of gratuities between naval personnel and their friends and relatives or the friends and relatives of their spouses, minor children, or members of their household where the circumstances make it clear that it is that relationship rather than the business of the persons concerned which is the motivating factor for the gratuity and where it is clear that the gratuity is not paid for by any entity described in paragraph (g)(1) of this section; and

(xiv) Situations in which, in the sound judgment of the individual concerned or his superior, the Government's interest will be served by naval personnel participating in activities otherwise prohibited. In any such case, a written report of the circumstances shall be made by the individual or his appropriate superior in advance of acceptance, or, when an advance report is not possible within 48 hours after acceptance, to the appropriate supervisor, if he is not otherwise aware of the acceptance, and to the appropriate Standards of Conduct Counsellor or Deputy Counsellor.

(3) Naval personnel who receive gratuities, or have gratuities received for them, in circumstances not in conformance with the standards of this section, shall promptly report the circumstances to the appropriate supervisor for a determination as to the proper disposition. The appropriate supervisor shall consult with the Standards of Conduct Counsellor or Deputy Counsellor.

(4) Procedures with respect to ROTC staff members are set forth in DoD Directive 1215.8.

(h) *Receipts in connection with official travel.* (1) The acceptance of accommodations, subsistence, or services, furnished in kind, in connection with official travel from sources other than those indicated in paragraph (g)(1) of this section, is authorized only when the individual is to be a speaker, panelist, project officer, or other bona fide participant in the activity attended and when such attendance and acceptance is authorized by the order-issuing authority as being in the overall Government interest.

(2) Except as indicated in paragraph (h)(1) of this section, naval personnel may not accept personal reimbursement from any source for expenses incident to official travel, unless authorized by their commanding officer or the head of their activity, consistent with guidance provided by the appropriate Standards of Conduct Counsellor (pursuant to 5 U.S.C. 4111 or other authority). Rather, reimbursement must be made to the Government by check payable to the Treasurer of the United States. Personnel will be reimbursed by the Government in accordance with regulations relating to reimbursement.

(3) In no case shall naval personnel accept reimbursement, either in kind or in cash, which is extravagant or excessive in nature.

(4) When accommodations, subsistence, or services in kind are furnished to naval personnel by non-Government sources, consistent with this paragraph, appropriate deductions shall be reported and made in the travel, per diem, or other allowances payable.

(i) *Speaking, lecturing, writing, and appearance as expert witness.* (1) Except as provided in paragraph (h) of this section (and further qualified in paragraph (m) of this section), naval personnel are prohibited from accepting fees, reimbursements, or honoraria for speaking, lecturing, or writing, or for appearing as expert witnesses before State agencies, except in instances where all the following conditions exist:

(i) Acceptance of the payment from the person or entity tendering or funding it would not be prohibited under paragraph (g) of this section;

(ii) The individual presents himself as a private citizen and not in an official capacity;

(iii) Such private activities do not interfere with the individual's official duties; and

(iv) The individual's appearance or writing is not part of his official duties, does not involve materials which his official duties require him to prepare or provide, and does not depend on information obtained as a result of Government employment, except when that information has been published or is generally available to the public upon request, or it will be made generally available to the public and the official authorized to release such information for the use of nonpublic information on the basis that the use is in the public interest.

(2) Unless there is a definite Executive Branch, Department of Defense, or De-

V 42166 AUG 26 77 UMI

partment of the Navy position on a matter addressed in the appearance or writing and the individual has been authorized by appropriate superior authorities to present that position officially, he shall expressly present his views on that matter as his own and not as those of the Department of the Navy or Department of Defense.

(j) *Prohibition of contributions or presents to superiors.* Naval personnel shall not solicit a contribution from other DoD personnel for a gift to an official superior, make a donation or a gift to an official superior, or accept a gift from other DoD personnel subordinate to themselves. This section, however, does not prohibit voluntary gifts or contributions of nominal value on special occasions such as marriage, illness, transfer, or retirement, provided any gifts acquired with such contributions shall not exceed a reasonable value.

(k) *Use of Government facilities, property, and manpower.* Naval personnel shall not directly or indirectly use, take, dispose, or allow the use, taking, or disposing of, Government property or facilities of any kind, including property leased to the Government, for other than officially approved purposes. Government facilities, property, and manpower (such as stationery, stenographic and typing assistance, mimeograph and chauffeur services) shall be used only for official Government business. Naval personnel have a positive duty to protect and conserve Government property. These provisions do not preclude the use of Government facilities for approved activities in furtherance of naval community relations, provided they do not interfere with military missions or Government business. See SECNAVINST 5720.44 (series) (Part 705 of this chapter) for community relations guidance.

(l) *Use of civilian and military titles or positions in connection with commercial enterprises.* (1) All naval personnel, except special Government employees, are prohibited from using their grade, rank, title, or position in connection with any commercial enterprise or in endorsing any commercial product. This does not preclude author identification for materials published in accordance with DoD procedures. A commercial enterprise is any entity which engages in activities which produce income as defined in Internal Revenue Code of 1954, section 61, and which has not been exempted from paying income taxes pursuant to Internal Revenue Code of 1954, 501(a).

(2) All retired military personnel and all members of Reserve components, not on active duty, are permitted to use their military titles in connection with commercial enterprises, provided that they indicate their inactive Reserve or retired status. If, however, such use of military titles in any way casts discredit on the Department of the Navy or the Department of Defense or gives the appearance of sponsorship, sanction, endorsement, or approval by the Department of the Navy or the Department of Defense, it is prohibited. In addition, commanders of overseas installations may further restrict the use of titles including use by retired military personnel and members of Reserve components, not on active duty, in overseas areas.

(m) *Outside employment of DoD personnel.* (1) Naval personnel shall not engage in outside employment or other outside activity, with or without compensation, that:

(i) Interferes with, or is not compatible with, the performance of their Government duties;

(ii) May reasonably be expected to bring discredit on the Government or the Department of the Navy; or

(iii) Is otherwise inconsistent with the requirements of this instruction, including the requirements to avoid actions and situations which reasonably can be expected to create the appearance of conflicts of interests.

(2) Enlisted naval personnel on active duty may not be ordered or authorized to leave their post to engage in a civilian pursuit, business, or professional activity if it interferes with the customary or regular employment of local civilians in their art, trade, or profession.

(3) Active duty Regular officers of the Navy or Marine Corps may not be employed by any person furnishing naval supplies or war materials to the United States. If such an officer is so employed, his entitlement to pay ceases for so long as he is so employed.

(4) Off-duty employment of military personnel by an entity involved in a strike is permissible if the person was on the payroll of the entity prior to the commencement of the strike and if the employment is otherwise in conformance with the provisions of this part. After a strike begins and while it continues, no military personnel may accept employment by that involved entity at the strike location.

(5) Naval personnel are encouraged to engage in teaching, lecturing and writing. Naval personnel, however, shall not, either for or without compensation, engage in activities that are dependent on information obtained as a result of their Government employment, except when the information has been published or is generally available to the public, or it will be made generaly available to the public and the official authorized to release such information to the public gives written authorization for the use of nonpublic information on the basis that the use is in the public interest.

(6) Civilian Presidential appointees in the Department of the Navy shall not receive compensation or anything of monetary value for any consultation, lecture, discussion, writing, or appearance, the subject matter of which is devoted substantially to naval responsibilities, programs, or operations or which draws substantially from official material which has not become part of the body of public information.

(n) *Gambling, betting, and lotteries.* While on Government owned, leased, or controlled property, or otherwise while on duty for the Government, naval personnel shall not participate in any gambling activity, including a lottery or pool, a game for money or property, or the sale or purchase of a number slip or ticket. The only exceptions are for activities which have been specifically approved by the Secretary of the Navy.

(o) *Indebtedness.* Naval personnel shall pay their just financial obligations in a timely manner, particularly those imposed by law (such as federal, State, and local taxes), so that their indebtedness does not adversely affect the Government as their employer. The Department of the Navy is not required to determine the validity or amount of disputed debts.

§ 721.7 Related statutes and directives.

Attention is directed to the following related matters governed by other directives:

(a) *Reports of defense related employment.* Certain categories of present naval personnel formerly employed by defense contractors, and of former or retired naval personnel presently employed by defense contractors, are required by statute to report their employment—governmental or private. SECNAVINST 5314.5 (series) (Part 722 of this chapter) implements the statutory requirements, provides a form for making the required report (DD Form 1787), and assigns responsibility for ensuring compliance with the filing requirement with commanding officers and other heads of activities. The reports prescribed in SECNAVINST 5314.5 (series) (Part 722 of this chapter) are distinct from the reports or statements prescribed in this part, and failure to file them when required may subject individuals to criminal penalties.

(b) *Political activities.* Chapter 733 of the Federal Personnel Manual, article 6210240 of the Bureau of Naval Personnel Manual, and paragraph 1742.3 of the Marine Corps Manual discuss restrictions on political activities of naval personnel.

(c) *General responsibilities of naval personnel.* Chapter 11 of Navy Regulations, 1973, (Subpart J of Part 700 of this Chapter), prescribes general regulations governing the rights and responsibilities of naval personnel. If any provisions of this part is found to conflict with a provision of Navy Regulations, the latter shall be controlling.

§ 721.8 Responsibilities for action.

(a) *Under Secretary of the Navy.* The Under Secretary of the Navy is assigned overall responsibility for action relating to standards of conduct of naval personnel. Unless a function is specifically reserved herein to the Secretary, the Under Secretary shall act as the designee of the Secretary, with power to redelegate. Specific matters for action by the Under Secretary or his delegee include: (1) Resolution of conflicts or apparent conflicts found in statements of employment and financial affiliations not resolved at lower echelons; (2) extensions of time in excess of 30 days for the submission of such statements; (3) exclusion of positions from the requirement to file DD Forms 1555, except as delegated to commanding officers and other activity heads in § 721.9(k); and (4) the

notification to the Department of Defense required by § 721.9(b)(2).

(b) *Navy Department officials.* The Chief of Naval Operations, the Commandant of the Marine Corps, and the heads of Navy Department offices not under the control of Chief of Naval Operations or Commandant of the Marine Corps shall provide the Under Secretary of the Navy by December 15 of each year with the information regarding naval personnel within their chain of command required to be included in the report by the Under Secretary pursuant to § 721.9(b)(2).

(c) *Commanding officers and heads of activities.* The basic responsibility for complying with the requirements of this part rests with the individual personnel concerned, but the primary responsibility for ensuring such compliance must rest with officers exercising command or similiar authority over personnel. Each commanding officer or head of a command, bureau, office, or activity is specifically responsible for the following:

(1) The continuing dissemination of the applicable information in this part to all naval personnel within his organization at least semiannually, in a manner which will ensure familiarity and compliance with the pertinent provisions of this part by all personnel (this is a continuing requirement and is in addition to the initial briefing required by § 721.10);

(2) The establishment and continuing execution of the procedures and controls prescribed in § 721.9, to ensure that each position is reviewed as required by § 721.9(j), that all naval personnel within his organization who are required to file confidential statements of affiliations and financial interests (DD Form 1555) do file them in a timely manner, and that such statements are promptly and carefully reviewed;

(3) Making determinations pursuant to this part and 18 U.S.C. 208(b) with respect to disqualification of personnel within his organization from performing duties in which they have conflicts or apparent conflicts of interests;

(4) Ensuring that Reservists detailed to perform active duty for training at his organization are assigned duties which will minimize the possibility that they may obtain information that could be used by them or their employers to gain an unfair advantage over civilian competitors; and

(5) Receiving and taking prompt and appropriate action on reports concerning acceptance of gratuities or other violations of this part, including appropriate statutes, by personnel within his organization.

(d) *Inspectors General.* The Naval Inspector General and the Inspector General of the Marine Corps shall ensure that periodic administrative inspections of organizations under their cognizance routinely include inquiry into the effectiveness of the organization's compliance with the provisions of this part.

(e) *Auditor General.* The Auditor General of the Navy shall ensure that the Naval Audit Service audit program routinely includes inquiry into the effectiveness of the organization's compliance with the provisions of this part.

(f) *Judge Advocate General and General Counsel.* The Judge Advocate General and the General Counsel of the Navy are designated as the Standards of Conduct Counsellors for the Department of the Navy. They shall be responsible for advice and proper review of all standards of conduct problems within their respective areas of jurisdiction. The General Counsel shall be consulted concerning problems pertaining to:

(1) Contracting, procurement, or auditing;

(2) Acquisition, management, or disposition of real or personal property;

(3) Procurement matters in the field of patents, inventions, trademarks, or copyrights;

(4) Military Sealift Command matters; or

(5) Office of the Comptroller of the Navy matters.

In addition, the General Counsel shall perform all standards of conduct functions pertaining to the Secretary of the Navy, his Civilian Executive Assistants, and members of their respective staffs. The Judge Advocate General shall be consulted with regard to all other problems.

(g) *Deputy Standards of Conduct Counsellors.* The following are designated as Deputy Standards of Conduct Counsellors and shall be responsible for providing advice and assistance on matters relating to conduct and conflicts of interests, and for providing legal review of statements of affiliations and financial interests which are referred to them:

(1) Within the cognizance of the General Counsel, and in their respective commands or organizations:

Deputy General Counsels;
Assistant to the General Counsel (Litigation);
Counsel for the Commandant of the Marine Corps;
Counsel for the Systems and Facilities Engineering Commands;
Counsel for the Comptroller of the Navy;
Counsel for the Military Sealift Command;
Counsel for the Office of Naval Research; and
Counsel in charge of OGC field and branch offices; and

(2) Within the cognizance of the Judge Advocate General, and in their respective commands or organizations:

Deputy and Assistant Judge Advocates General;
Director, Judge Advocate Division, Headquarters, U.S. Marine Corps;
Officer and civilian attorneys under the supervision of the Judge Advocate General, and assigned to the commands, bureaus, and offices of the Navy Department, as defined in article 0104.3, U.S. Navy Regulations, 1973, (§ 700.104(c) of this title) other than the Office of the Judge Advocate General;
District judge advocates;
Staff or force judge advocates on the staffs of all other commands having general court-martial convening authority; and
Officers in charge of Naval Legal Service Offices.

Other Deputy Standards of Conduct Counsellors may be designated by the General Counsel or by the Judge Advocate General, as required. Where strict adherence to the division of areas of responsibility under § 721.8(f) is impracticable due to such factors as inaccessibility or uncertainty as to jurisdiction, any Deputy Standards of Conduct Counsellor may be consulted. In such a case, the Deputy Standards of Conduct Counsellor will render all possible assistance and then, if appropriate, direct the inquiry into the proper area of responsibility.

(h) *Director of Civilian Personnel.* The Director of Civilian Personnel shall incorporate the provisions of this part concerning civilian employees in appropriate Civilian Personnel Instructions.

(i) *Additional duties of senior officials.* The Commandant of the Marine Corps and the Chief of Naval Material, as appropriate, are responsible for bringing the contents of this part to the attention of the principal officer of each contractor doing significant business with the Department of the Navy. Chiefs and heads of commands, bureaus, and offices, commanding officers, and other senior officials shall periodically utilize the opportunity afforded by conferences with representatives of industry to direct attention to the regulations and policies set forth in this part.

§ 721.9 Statements of affiliations and financial interests (DD Form 1555).

(a) *Personnel required to file.* The following naval personnel are required to submit initial and annual statements of affiliations and financial interests, DD Form 1555 in accordance with this part unless they are expressly exempted.

(1) All civilian naval personnel paid at a rate equal to or in excess of the minimum rate prescribed for employees holding the grade GS–16, including the Executive Schedule.

(2) Officers of flag or general grade.

(3) Commanding officers or heads, and executive officers or deputy heads, of:

(i) Navy shore installations with 500 or more military and civilian personnel (including foreign national and indirect-hire personnel) regularly attached but excluding personnel attached for duty under instruction; and

(ii) all Marine Corps bases and air stations.

(4) Naval personnel classified at GS–13 or above, or at a comparable pay rate under other authority, and members of the military in the grade of lieutenant colonel, commander, or above, when the responsibilities of such personnel require the exercise of judgment in making a Government decision or in taking Government action in regard to activities in which the final decision or action may have a significant economic impact on the interests of any non-federal entity. Included herein, among others, are persons who, as part of their basic duties, sign, negotiate, recommend, or approve contracts or other procurement actions and those who, as part of their basic duties, are engaged in auditing activities,

V 42 166 AUG 26 77 UMI

including supervising others who are engaged in auditing activities or participating in the development of policies and procedures for performing audits.

(5) Special Government employees other than those in the following categories (who may, in any case, be required to file when specifically requested to do so by their appropriate supervisor):

(i) a special Government employee who is not a "consultant" or "expert" as those terms are defined in Chapter 304 of the Federal Personnel Manual.

(ii) Physicians, dentists, and allied medical specialists engaged only in providing service to patients.

(iii) Veterinarians providing only veterinary services.

(iv) Lecturers participating only in educational activities.

(v) Chaplains performing only religious services.

(vi) Individuals in the motion picture and television fields who are utilized only as narrators or actors in DoD productions.

(vii) Members of selection panels for NROTC candidates.

(6) Other naval personnel who are required, with Civil Service Commission approval, to file such statements.

(b) *Time of filing.*—(1) *Initial filing.* The initial filing must be made sufficiently in advance of appointment (in the case of special Government employees), nomination (in the case of designees to positions requiring the approval of the Secretary of the Navy), or the commencement of service or the assumption of duties (in all other cases), so that review and approval of the filing may be completed in advance of appointment, nomination, or commencement of service or assumption of duties. Each officer or employee required to file a statement shall submit it in the prescribed form directly to his appropriate supervisor. In the case that the appropriate supervisor is not the commanding officer or the head of the activity concerned, the appropriate supervisor will ensure that the commanding officer or other head is made aware of any conflict of interest or other matter of which he must be aware to fulfill his responsibilities under § 721.8 (c). Upon transfer or reassignment from one billet or position to another for which the filing of a statement is required, an officer or employee shall file a current statement promptly with the appropriate supervisor of his new billet or position.

(2) *Annual statements.* DD Form 1555 statements shall be filed by October 31 of each year, with information current as of September 30 of that year. Even though no changes have occurred since the last filing, a complete statement is required. The Under Secretary of the Navy shall notify the Office of the Secretary of Defense Standards of Conduct Counsellor no later than December 31 of each year that all required statements have been filed and reviewed, with all problems appropriately resolved, or he shall explain the details of the outstanding cases. (RCS DD–SECNAV 5370–1.)

(3) *Extension of filing deadline.* When required by reason of duty assignment, infirmity, or other good cause, a superior, with the concurrence of the Standards of Conduct Counsellor or Deputy Counsellor, may grant an extension of the filing deadline, not to exceed 30 days. A superior, with the concurrence of the Standards of Conduct Counsellor or Deputy Counsellor and the Under Secretary of the Navy, may grant an extension of the filing deadline in excess of 30 days. Any annual statement filed after October 31 shall include an appropriate notation as to whether any extension of the filing deadline has been granted hereunder.

(4) Omission by a commanding officer or head of an activity to furnish a written reminder, as prescribed in § 721.9(j), shall not relieve an officer or employee from an applicable filing requirement.

(c) *Place of Submission.* (1) All Department of the Navy civilian Presidential appointees shall submit their statements to the DoD General Counsel.

(2) Commanders of unified commands shall submit their statements directly to the OSD Standards of Conduct Counsellor. Other personnel of the unified commands shall submit their statements through their appropriate supervisor to the Deputy Standards of Conduct Counsellor of the unified command.

(3) Commanders who have a dual responsibility as commanders of both joint and naval commands shall submit their statements through naval channels.

(4) Personnel not serving in a DoD component shall submit their statements to the Under Secretary of the Navy.

(5) Other naval personnel shall submit their statements to their appropriate supervisor for review and forwarding in accordance with § 721.9(f).

(6) Naval personnel who report to more than one reporting senior shall meet the filing requirements of each position independent of the other.

(d) *Content.* (1) All information reported shall be current as of September 30 of the filing year.

(2) Interests of others. The interest of a spouse, minor child, or any member of one's household is to be reported in the same manner as the interest of the individual.

(3) Information not known by naval personnel. Naval personnel shall request submission on their behalf of required information known only to other persons. A request that the information submitted be kept confidential will be honored even if it includes not disclosing the information to the person who requests the submission.

(4) Information not required to be submitted. Naval personnel are not required to submit any information relating to their connection with or interest in a professional society or a charitable, religious, social, fraternal, recreational, public service, civic, or political organization or a similar organization not conducted as a business for profit. For the purpose of this part, educational and other institutions doing research and development or related work involving grants of money from or contracts with the Government are to be included in a person's statement. Additionally, naval personnel are not required to report ownership of personal savings or checking accounts in financial institutions, or life or property insurance policies, even though they provide for dividends or cash value.

(e) *Confidentiality of statements of DoD personnel.* Naval authorities shall hold each statement in confidence. Information from a statement may be disclosed, as a routine use, to federal officials who, as part of their official duties, require access to the information and who are listed in the applicable system of records notice required under the Privacy Act, 5 U.S.C. 552a (Subparts F and G of Part 701 of this chapter), and to such other persons to whom disclosure is required under the Privacy Act, the Freedom of Information Act, 5 U.S.C. 552 (Subparts A–D of Part 701 of this chapter), or other provision of law. Persons designated to review the statements are responsible for maintaining the statements in confidence.

(f) *Review and disposition.*—(1) *Initial filing.* All initial statements shall be reviewed for apparent conflicts of interests by the appropriate Deputy Standards of Conduct Counsellor and the appropriate supervisor prior to appointment (in the case of special Government employees), nomination (in the case of designees to positions requiring the approval of the Secretary of the Navy), or the commencement of service or the assumption of duties (in all other cases).

(2) *Annual filing.* Upon receipt of annual statements, the appropriate supervisor shall evaluate the statement, in accordance with the standards provided in this part, to determine whether a conflict or apparent conflict of interests is disclosed. The appropriate supervisor shall note the results of that evaluation on the statement, and shall forward the statement to the cognizant Deputy Standards of Conduct Counsellor under § 721.8(f) for legal review.

(3) *Disposition.* (i) If the appropriate supervisor and the Deputy Standards of Conduct Counsellor agree that the statement discloses no conflict of interests or apparent conflict of interests, both shall record their determination on the statement, and the statement shall be filed in the office of the appropriate supervisor. In the case of a flag or general officer, however, the appropriate supervisor shall, before filing the statement, forward a copy to the Chief of Naval Personnel (Pers-OF) or the Commandant of the Marine Corps (CS), as appropriate, to be retained for use in connection with a possible nomination for appointment or reassignment to a 3- or 4-star billet.

(ii) When either the appropriate supervisor or the Deputy Standards of Conduct Counsellor believes that a statement discloses a conflict or apparent conflict of interests, the officer or employee concerned shall be afforded an opportunity to terminate the conflict or to explain the conflict or apparent conflict in writing. If, after review of the

written explanation, both the appropriate supervisor and the Deputy Standards of Conduct Counsellor are satisfied that there is no conflict or apparent conflict, they shall record their determination on the statement and explanation, and the record shall be filed as provided above. Otherwise, the appropriate supervisor and Deputy Standards of Conduct Counsellor shall append their views on the record and, retaining a copy in the office of the appropriate supervisor, forward the original record to the commanding officer or head of the activity for resolution. If the commanding officer or activity head is unable to resolve the controversy, he shall append his comments and recommendations to the record and forward it to:

(A) The Chief of Naval Personnel, in the case of a Navy officer;

(B) The Commandant of the Marine Corps, in the case of a Marine Corps officer; or

(C) The Director of Civilian Personnel, in the case of a civilian employee.

The departmental official thus receiving the record shall refer it to a cognizant Deputy Standards of Conduct Counsellor for legal review and advice. Cases which cannot be resolved by the Chief of Naval Personnel, the Commandant of the Marine Corps, or the Director of Civilian Personnel, as appropriate, shall be forwarded to the Under Secretary of the Navy, via the cognizant department Standards of Conduct Counsellor, for final resolution. Cases referred to the Commandant of the Marine Corps, Chief of Naval Personnel, or Director of Civilian Personnel for review shall, when finally resolved, be filed in the Bureau of Naval Personnel, Marine Corps Headquarters, or the Office of Civilian Personnel, as appropriate, with information to the originating activity concerning the ultimate disposition of the case.

(iii) Initial review and local efforts to resolve conflicts or apparent conflicts disclosed in annual statements shall be accomplished by November 30, if possible, and by December 31 in any event unless the Under Secretary of the Navy has granted extension under § 721.9(b)(3). Review and resolution of initial statements submitted prior to appointment or nomination should be accomplished immediately. Initial review and local resolution efforts concerning other initial statements should be accomplished within 30 days after filing.

(g) *Special requirements concerning executive-level and 3- and 4-star flag and general nominees.* (1) As part of the Secretarial approval process for a nominee to any of the positions described in § 721.9(a)(1), above, the documents submitting the nominee for approval must contain the following certification by the selecting official, on Civil Service Commission Form 917, executive selection form, in item 30:

I certify that (nominee's name), whom I am nominating for the executive level position of (title, grade or PL designation, and organizational location of position) has executed a confidential statement of affiliations and financial interests, DD Form 1555, that I have evaluated it and had it reviewed by a Deputy Standards of Conduct Counsellor, and that I have found the requirements of DoD Directive 5500.7 of January 15, 1977 and SECNAV Instruction 6370.2G to be satisfied.

(2) As part of the process for approving nominees for appointment to 3- and 4-star flag or general officer positions, the Secretary of the Navy must ensure that the nominee has a current DD Form 1555 on file and that the form has been reviewed in relation to the position for which he is being considered. Further, the Secretary of the Navy is required to cause a review of all relevant systems of records maintained by the Department of the Navy, including investigative files, to determine if there is any evidence of the nominee having violated the standards of conduct. Each nomination forwarded to the Secretary of Defense must be accompanied by a certification of the Secretary of the Navy that the required review has been conducted and that the review has or has not disclosed a violation of the standards of conduct.

(h) *Personnel detailed to other DoD components and Government agencies.* Agreements with other DoD components and Government agencies involving detailing of naval personnel shall contain a requirement that the other DoD component or Government agency shall, within 60 days of the filing time specified in paragraphs (b)(1), (b)(2), and (b)(3) of § 721.9, forward to the appropriate Navy Standards of Conduct Counsellor a copy of the detailed individual's statement, if required, and notice concerning the disposition of any conflict or apparent conflict of interests indicated.

(i) *Effect of statements on other requirements.* The statements required of naval personnel are in addition to, and not in substitution for, any similar requirement imposed by law, order, or regulations. Submission of statements does not permit naval personnel to participate in matters in which their participation is prohibited by law, order, or regulation.

(j) *Review of positions.* Each commanding officer or other head of an activity shall include in the description of each position indicated in § 721.9 a statement that the incumbent of the position must file a statement of affiliations and financial interests, as required by this part. All positions shall be reviewed at least annually, prior to September 30, to determine those which require statements. Any individual may request a review of the decision requiring him to file a statement through the established complaint procedures of the Department of the Navy. Additionally, each incumbent in such a billet or position shall be reminded in writing, by September 30, of the requirement to file a statement, and shall be furnished a copy of the required form. Check-off lists shall be utilized to ensure that all statements have been returned by October 31, or by later specified dates where extensions of time have been granted.

(k) *Exclusion of positions.* A commanding officer or other head of an activity may determine that the submission of statements is not necessary for certain positions described in § 721.9(a)(4) because of the remoteness of any impairment of the integrity of the Government and the degree of supervision and review of the incumbents' work. The Under Secretary of the Navy shall make this determination as to any personnel described in paragraphs (a)(1), (a)(2), and (a)(3) of § 721.9.

§ 721.10 Information to personnel.

The Chief of Naval Operations and the Commandant of the Marine Corps shall ensure that all military personnel—regardless of the program in which they are participating or their duty status—receive, as part of their initial or accession training or upon the assumption of duties following initial appointment or enlistment, an oral briefing regarding the provisions of this part. The Chief of Naval Operations and the Commandant of the Marine Corps shall also ensure that all military personnel, except enlisted personnel not required to file statements of affiliations and financial interests (DD Form 1555), receive a copy of this part as part of the oral briefing on this part. The Director of Civilian Personnel shall ensure that all civilian personnel receive a copy of and an oral briefing regarding the provisions of this part preceding employment or upon assumption of duties. All personnel shall attest in writing to their attendance at the required briefing, that they have read this part, and that they understand the requirements imposed hereby.

§ 721.11 Privacy Act consideration.

Confidential statements of affiliations and financial interests (DD Form 1555) and statements of employment (DD Form 1357) contain sensitive personal information and care shall be exercised to ensure that they are seen only by personnel on a need-to-know basis in connection with their official duties. In this regard, see § 721.9(e). Adequate safeguards shall be utilized to prevent inadvertent or unauthorized disclosures of the statements during review, transmittal, and storage. In addition, SECNAV INST 5211.5 (series) (Subparts F and G of Part 701 of this chapter) prescribes other general restrictions and requirements applicable to the collection, use, and dissemination of these records, and contains Rules of Conduct Under the Privacy Act which are applicable to all naval personnel.

§ 721.12 Reporting of post-retirement employment.

(a) Each retired Regular officer of the Navy and Marine Corps shall keep the Department of the Navy advised of his post-retirement employment activities. All retired Regular officers whose names have been on the retired list for three years or less shall file a statement of employment (DD Form 1357). All retired Regular officers whose names have been on the retired list for over three years are encouraged to use DD Form 1357 to report their post-retirement employment activities. In any event, officers whose

V 42166 AUG 26 77 UMI

names have been on the retired list for more than three years shall, at a minimum, keep the Department of the Navy advised as to whether they are employed by any agency, instrumentality, or department of the United States and, if so, the position title and employing agency. In the event that reporting the information required would tend to show that the officer concerned was violating or had violated 18 U.S.C. 281 or any other criminal provision, the filing requirement will be satisfied by a written refusal, signed by the officer concerned, to provide the required information on the basis that the information may tend to incriminate the officer. Each Regular officer retiring hereafter shall file this statement within 30 days after retirement. Whenever the information reported changes, each such officer shall make an appropriate report within 30 days of that change. The Comptroller of the Navy (for Regular Navy officers) and the Commandant of the Marine Corps (for Regular Marine Corps officers) shall advise each officer required to file of the continuing need to report their post-retirement employment activities as set forth above.

(b) Reports of post-retirement employment shall be submitted—

(1) In the case of a retired Regular Navy officer—to the Commanding Officer, Navy Finance Center (Retired Pay Division), Cleveland, OH 44199; or

(2) In the case of a retired Regular Marine Corps officer—to the Commanding Officer, Marine Corps Finance Center, Kansas City, MO 64197.

(c) The Chief of Naval Personnel or the Commandant of the Marine Corps, as appropriate, shall provide each Regular officer retiring hereafter, as part of the retirement check-out procedures, with clear instructions concerning the requirement under this part to report post-retirement employment. These instructions should be combined, where applicable, with the instructions prescribed in SECNAVINST 5314.5 (series) (Part 722 of this chapter) concerning the possible additional requirement to file reports of DoD and defense related employment (DD Form 1787).

(d) The Comptroller of the Navy or the Commandant of the Marine Corps, as appropriate, is responsible for the review of all reports of post-retirement employment filed by retired Regular Navy and Marine Corps officers, to ensure compliance with applicable laws and regulations.

(e) If an apparent violation of law or regulation is noted upon review of a report of post-retirement employment, a copy of the report shall be transmitted to the Commander, Navy Accounting and Finance Center, or Commandant of the Marine Corps, as appropriate. If that official determines that a violation may have been committed, a copy of the statement shall be forwarded to the Judge Advocate General (Code 13) for such additional review, inquiry, advice, or further action as may be warranted.

§ 721.13 Availability of forms.

Supplies of DD Form 1555 will be available in the Forms and Publications Segment of the Navy Supply System beginning in September 1977 under stock number 0102-LF-001-5550. Supplies of Civil Service Form 917 are available in the Forms and Publications Segment of the Navy Supply System under stock number 0101-LF-417-0002. Supplies of DD Form 1357 are available from the Commanding Officer, Navy Finance Center, Cleveland, Ohio, and are not stocked in the Navy Supply System.

Dated: August 23, 1977.

K. D. LAWRENCE,
Captain, JAGC, U.S. Navy, Deputy Assistant Judge Advocate General (Administrative Law).

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

[FRL 781-8]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Revision to the New York State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This notice announces that the Environmental Protection Agency (EPA) is approving a revision to the New York State Implementation Plan (SIP). The action approves a "special limitation" granted by the State under the provisions of Part 225.2 of Title 6 of its Official Compilation of Codes, Rules and Regulations (6 NYCRR 225.2). EPA approval has the effect of continuing a relaxation of the sulfur-in-fuel-oil limitation for the Long Island Lighting Co.'s (LILCO's) Northport Generating Facility (Units 1, 2, and 3) and the LILCO Port Jefferson Generating Facility (Units 3 and 4), both located in Suffolk County, N.Y. The "special limitation" for these facilities permits the use, until May 31, 1930, of fuel oil having a maximum sulfur content of 2.8 percent, by weight. Previously, these facilities were limited by State regulation to the use of fuel oil with a maximum sulfur content of 1.0 percent, by weight. Receipt of the revision request from New York State was announced in the FEDERAL REGISTER on April 25, 1977, at 42 FR 21113, where a full description of the proposed revision is contained.

DATE: This action becomes effective August 26, 1977.

FOR FURTHER INFORMATION CONTACT:

William S. Baker, Chief, Air Programs Branch, U.S. Environmental Protection Agency, Region II Office, 26 Federal Plaza, New York, N.Y. 10007 (212-264-2517).

SUPPLEMENTARY INFORMATION: In its April 25, 1977, FEDERAL REGISTER notice, EPA established a 30-day period for receipt of comments from the public on whether or not the proposed revision to the New York State SIP described therein should be approved. In response, EPA received comments from the firm of Hunton & Williams representing the Long Island Lighting Co. (LILCO) and from the State of Connecticut Department of Environmental Protection. The comments from Hunton & Williams included a technical report prepared by LILCO entitled, "Impact of the Proposed Suffolk County Special Limitations on Connecticut."

The report indicates that, at times, the impact of the "special limitation" on Connecticut can be significant; however, the impact is relatively minor under those meteorological conditions when ambient concentrations of sulfur dioxide are elevated. The report concludes that the impact of the proposed revision will not cause or exacerbate contraventions of national ambient air quality standards in Connecticut. EPA concurs with this conclusion.

Besides addressing the impact of the proposed revision on air quality in Connecticut, the comments from Hunton & Williams also discuss the effect on applicable sulfur-in-coal requirements if the Federal Energy Administration (FEA) orders the affected units of the Port Jefferson Generating Facility to convert to coal. FEA has sent LILCO a Notice of Intention to issue Prohibition Orders requiring the use of coal at the Port Jefferson Power Generating Facility, Units 3 and 4. If issued, these orders are not expected to take effect until 1982, after the proposed revision has expired. However, if the proposed revision is in effect at the time of coal conversion, Hunton & Williams stated that, under the approved SIP (6 NYCRR 225.1(b)), LILCO will be permitted to burn coal with a sulfur content related to the allowable sulfur-in-fuel-oil limitation of the "special limitation."

If FEA proceeds to issue Prohibition Orders to the Port Jefferson Generating Facility, pursuant to Section 2 of the Energy Supply and Environmental Coordination Act of 1974 (ESECA), EPA, pursuant to Section 3 of ESECA, must certify to FEA the earliest date Port Jefferson Units 3 and 4 can burn coal and comply with all applicable air pollution requirements. Due to the revocable nature of the "special limitation," EPA interprets "all applicable air pollution requirements" to include the 1.0 percent sulfur-in-fuel limitation contained in 6 NYCRR 225. Although coal burning may proceed when the 2.8 percent sulfur-in-fuel limitation approved herein can be met, LILCO must take the steps necessary to meet the 1.0 percent limitation and FEA cannot make its Prohibition Order effective any earlier than the date this more stringent requirement can be met.

In its comments, the State of Connecticut informed EPA that the use by LILCO of high sulfur fuel oil under the "special limitation" currently in effect has not caused any violations of sulfur dioxide ambient air quality standards in Connecticut. Nevertheless, the State of Connecticut opposes the proposed "special limitation" on the belief that approval will make it more difficult to maintain standards and thus jeopardize growth in Connecticut.

EPA believes that the State of Connecticut has voiced a valid concern over the amount of additional sulfur dioxide emissions available for future growth and development if the "special limitation" is continued. However, the available information does not support the finding that this will be of major concern during the three year period of the "special limitation." Consequently, EPA encourages the State of Connecticut to develop additional information indicating whether or not the continued use of higher sulfur fuel oil by LILCO will preclude normal growth and development in Connecticut and thereby limit the State's ability to maintain ambient air quality standards in the future. If such a demonstration shows the inability to maintain standards in Connecticut, EPA will consider revocation of the "special limitation" or restrict its period of applicability.

The State of Connecticut also commented that the increased emissions resulting from the "special limitation" will impact on areas of New York City within the New Jersey-New York-Connecticut Air Quality Control Region (AQCR) which are currently not attaining ambient air quality standards. The approved air quality dispersion model used to project the impact of these two LILCO power plants on the non-attaining monitoring site in New York City showed no contribution assuming all feasible meteorological conditions. Moreover, the State of New York was notified on July 12, 1976 (41 FR 28618) that its SIP is substantially inadequate for the New Jersey-New York-Connecticut AQCR and, because of the revocable nature of the "special limitation," EPA approval does not preclude the use of lower sulfur fuel oil at the LILCO facilities as a possible control measure.

EPA finds that this revision to the New York State Implementation Plan as it relates to the "special limitation" for the LILCO Northport and Port Jefferson Power Generating Facilities is consistent with current EPA policies and goals set forth in the requirements of Section 110(a)(2) (A)-(H) of the Clean Air Act and EPA regulations contained in 40 CFR Part 51 in that it is not expected to result in the contravention of any applicable ambient air quality standard.

(Secs. 110, 301, Clean Air Act, as amended (42 U.S.C. 1857c-5, 1857g).)

Dated: August 23, 1977.

DOUGLAS M. COSTLE,
Administrator, Environmental Protection Agency.

Part 52 of Chapter I, Title 40 Code of Federal Regulations is amended as follows:

Subpart HH—New York

1. In § 52.1670, paragraph (c) is amended by adding new subparagraph (33) as follows:

§ 52.1670 Identification of plans.

* * * * * *

(c) The plan revisions listed below were submitted on the dates specified.

* * * * * *

(33) Revision submitted on March 17, 1977, by the New York State Department of Environmental Conservation which grants a "special limitation" under Part 225. The "special limitation" relaxes until May 31, 1980, the sulfur-in-fuel-oil limitation to 2.8 percent, by weight, for the Long Island Lighting Co.'s Northport Generating Facility (Units 1, 2, and 3) and Port Jefferson Generating Facility (Units 3 and 4).

[FR Doc.77-24863 Filed 8-25-77;8:45 am]

Title 41—Public Contracts and Property Management

CHAPTER I—FEDERAL PROCUREMENT REGULATIONS

[FPR Amdt. 181]

PART 1-4—SPECIAL TYPES AND METHODS OF PROCUREMENT

Subpart 1-4.11—Procurement and Contracting for Government-Wide Automated Data Processing Equipment, Software, Maintenance Services, and Supplies

ACQUISITION OF ADP SOFTWARE

AGENCY: General Services Administration.

ACTION: Final rule.

SUMMARY: This amendment of the Federal Procurement Regulations (FPR) authorizes agencies to use GSA requirements-type contracts to procure selected commercial software. This action is taken in the interest of efficient operation and utilization of automatic data processing equipment by Federal agencies. The intended effect is to lower costs and to provide convenient ordering procedures for using agencies.

EFFECTIVE DATE: September 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Philip G. Read, Director of Federal Procurement Regulations, 703-557-8947.

1. Section 1-4.1103-2 is revised to read as follows:

§ 1-4.1103-2 Software.

Except for software performance monitoring packages covered by Subpart 101-32.14 of the FPMR and except for software available through the Federal Software Exchange Center (FSEC) covered by Subpart 101-32.16 of the FPMR, agencies may procure software for use with ADPE without prior approval of GSA when:

(a) The procurement will occur by placing a purchase/delivery order against an applicable GSA requirements-type contract; or

(b) The procurement will occur by placing a purchase/delivery order against an applicable ADP Schedule contract under the terms of the contract, provided such action meets the requirements for competition set forth in § 1-4.1107-2; or

(c) The total procurement for the specific software package does not exceed $7,500 annual lease cost, excluding maintenance, or $10,000 purchase cost; or

(d) The software is provided by the original equipment manufacturer and is not separately priced from the ADPE.

2. Section 1-4.1107-7 is revised to read as follows:

§ 1-4.1107-7 Use of requirements contracts.

GSA makes selected ADPE and software available to agencies through requirements-type contracts that provide for substantially lower equipment and software costs. Where ADPE and software which will satisfy the user's requirements are available from GSA requirements-type contracts, this source shall be used by all agencies as the primary source of supply in accordance with the provisions of these contracts. Copies of the contracts (not contractor's price lists) are distributed to recipients of the schedule FSC Group 70, Part I. Additional copies are available from the General Services Administration (8BR), Building 41, Denver Federal Center, Denver, CO 80225. Some of these requirements-type contracts specify that GSA is responsible for the allocation of the ADPE or software. In these cases, authorization shall be obtained from the General Services Administration (CDP), Washington, DC 20405, before placing an order against the requirements-type contract. Prior to acquiring ADPE or software that is functionally similar to the ADPE or software on a requirements-type contract from another source, the agency shall (a) document the procurement case file, indicating why the requirements-type contract could not be used, and (b) obtain a delegation of procurement authority from GSA if the procurement falls outside the scope of §§ 1-4.1103-1 or 1-4.1103-2.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).)

NOTE: The General Services Administration has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: August 11, 1977.

JOEL W. SOLOMON,
Administrator of General Services.

[FR Doc.77-24820 Filed 8-25-77;8:45 am]

V42166 AUG 26 77 UMI

[FPR Amdt. 182]

PART 1–8—TERMINATION OF CONTRACTS

Interest Rates

AGENCY: General Services Administration.

ACTION: Final rule.

SUMMARY: This amendment of the Federal Procurement Regulations (FPR) makes changes in procedures and contract clauses regarding interest paid by contractors under terminated contracts. The changes are necessary because currently all provisions of the FPR pertaining to the rate of interest paid by contractors are not consistent. The intended effect of the action is to provide consistency within the FPR on the subject of interest rates.

EFFECTIVE DATE: September 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Philip G. Read, Director of Federal Procurement Regulations, 703–557–8947.

SUPPLEMENTARY INFORMATION: This amendment of the Federal Procurement Regulations provides uniformity in all provisions regarding interest rates charged contractors on amounts owed the Government. Currently, the interest rate prescribed in certain subparts of the FPR is 6 percent. Other provisions of the FPR require contractors to pay interest at the rate established by the Secretary of the Treasury (currently 7⅞ percent) pursuant to Pub. L. 92–41 (50 U.S.C. App. 1215(b)(2)) for the Renegotiation Board. The FPR also provides that the rate of interest established pursuant to Pub. L. 92–41 will be paid by the Government when a contractor's claim is decided in his favor under the Disputes clause.

The FPR further provides that interest owed the Government shall be computed from the date an excess payment was received by the contractor to the date of repayment. However, one FPR provision stipulates that interest shall be computed from the date of the excess payment rather than the date the excess payment was received by the contractor.

In the interest of uniformity, the amendment prescribes the use of interest rates established by the Secretary of the Treasury pursuant to Pub. L. 92–41 whenever a contractor is assessed interest on an excess payment. The amendment also includes a changed procedure which provides that the interest assessment period shall begin on the date the excess payment was received by the contractor.

The changes effected by the amendment appear in procedures (§ 1–8.212–1 (f)), contract clauses (§§ 1–8.701, 1–8.702, 1–8.703, 1–8.704–1, and 1–8.706), and formats (§§ 1–8.804–2(b) and 1–8.806–4 (e)) in the FPR.

Subpart 1–8.2—General Principles Applicable to the Termination for Convenience and Settlement of Fixed-Price and Cost-Reimbursement Type Contracts

Section 1–8.212–1 is amended as follows:

§ 1–8.212–1 Partial payments upon termination.

* * * * *

(f) *Limitation on total amount: effect of overpayment.* The total amount of all partial payments shall not exceed the amount which will, in the opinion of the contracting officer, become due to the contractor by reason of the termination. If the total of partial payments made to the contractor should exceed the amount finally determined to be due on his termination claim, the overpayment shall be repayable to the Government on demand, together with interest computed at the rate established by the Secretary of the Treasury pursuant to Pub. L. 92–41 (50 U.S.C. App. 1215(b)(2)) for the Renegotiation Board, from the date such overpayment was received by the contractor to the date of repayment. However, no interest shall be charged for any such overpayment attributable to a reduction in the contract termination inventory until 10 days after the date of such retention or disposition, or such later date as is set by the contracting officer because of the circumstances; and no interest shall be charged for overpayment under cost-reimbursement research and development contracts (without profit or fee to the contractor) if the overpayments are repaid to the Government within 30 days after demand.

* * * * *

Subpart 1–8.7—Clauses

1. Section 1–8.701 is amended to revise paragraph (j) of fthe clause prescribed by the section. As amended, the clause reads as follows:

§ 1–8.701 Termination clause for fixed-price contracts.

* * * * *

(j) The Government may from time to time, under such terms and conditions as it may prescribe, make partial payments and payments on account against costs incurred by the Contractor in connection with the terminated portion of this contract whenever in the opinion of the Contracting Officer the aggregate of such payments shall be within the amount to which the Contractor will be entitled hereunder. If the total of such payments is in excess of the amount finally agreed or determined to be due under this clause, such excess shall be payable by the Contractor to the Government upon demand, together with interest computed at the rate established by the Secretary of the Treasury pursuant to Pub. L. 92–41 (50 U.S.C. App. 1215(b)(2)) for the Renegotiation Board, for the period from the date such excess payment is received by the Contractor to the date on which such excess is repaid to the Government: *Provided, however,* That no interest shall be charged with respect to any such excess payment attributable to a reduction in the Contractor's claim by reason of retention or other disposition of termination inventory until 10 days after the date of such retention or disposition, or such later date as determined by the Contracting Officer by reason of the circumstances.

* * * * *

2. Section 1–8.702 is amended to revise paragraph (j) of the clause prescribed by the section. As amended, the clause reads as follows:

§ 1–8.702 Termination clause for cost-reimbursement type contracts.

* * * * *

(j) The Government may from time to time, under such terms and conditions as it may prescribe, make partial payments and payments on account against costs incurred by the Contractor in connection with the terminated portion of the contract whenever in the opinion of the Contracting Officer the aggregate of such payments shall be within the amount to which the Contractor will be entitled hereunder. If the total of such payments is in excess of the amount finally determined to be due under this clause, such excess shall be payable by the Contractor to the Government upon demand together with interest computed at the rate established by the Secretary of the Treasury pursuant to Pub. L. 92–41 (50 U.S.C. App. 1215(b)(2)) for the Renegotiation Board, for the period from the date such excess payment is received by the Contractor to the date on which such excess is repaid to the Government: *Provided, however,* That no interest shall be charged with respect to any such excess payment attributable to a reduction in the Contractor's claim by reason of retention or other disposition of termination inventory until 10 days after the date of such retention or disposition, or such later date as determined by the Contracting Officer by reason of the circumstances.

* * * * *

3. Section 1–8.703 is amended to revise paragraph (j) of the clause prescribed by the section. As amended, the clause reads as follows:

§ 1–8.703 Termination clause for fixed-price construction contracts.

* * * * *

(j) The Government may from time to time, under such terms and conditions as it may prescribe, make partial payments and payments on account against costs incurred by the Contractor in connection with the terminated portion of this contract whenever in the opinion of the Contracting Officer the aggregate of such payments shall be within the amount to which the contractor will be entitled hereunder. If the total of such payments is in excess of the amount finally agreed or determined to be due under this clause, such excess shall be payable by the Contractor to the Government upon demand, together with interest, computed at the rate established by the Secretary of the Treasury pursuant to Pub. L. 92–41 (50 U.S.C. App. 1215(b)(2)) for the Renegotiation Board, for the period from the date such excess payment is received by the Contractor to the date on which such excess is repaid to the Government: *Provided, however,* That no interest shall be charged with respect to any such excess payment attributable to a reduction in the Contractor's claim by reason of retention or other disposition of termination inventory until 10 days after the date of such retention or disposition, or such later date as determined by the Contracting Officer by reason of the circumstances.

* * * * *

4. Section 1–8.704–1 is amended to revise paragraph (f) of the clause prescribed by the section. As amended, the clause reads as follows:

§ 1–8.704–1 Termination clause.

* * * * *

(f) The Government may from time to time, under such terms and conditions as it may prescribe, make partial payments against costs incurred by the Contractor in connection with the terminated portion of this contract whenever, in the opinion of the Contracting Officer, the aggregate of such payments is within the amount to which the Contractor will be entitled hereunder. If the total of such payments is in excess of the amount finally agreed or determined to be due under this clause, such excess shall be payable by the Contractor to the Government upon demand: *Provided,* That if such excess is not so paid upon demand, interest thereon shall be payable by the Contractor to the Government at the rate established by the Secretary of the Treasury pursuant to Pub. L. 92–41 (50 U.S.C. App. 1215(b)(2)) for the Renegotiation Board, beginning 30 days from the date of such demand.

* * * * *

5. Section 1–8.706 is amended to revise paragraph (h) of the clause prescribed by the section. As amended, the clause reads as follows:

§ 1–8.706 Subcontract termination clause.

* * * * *

(h) The buyer may, from time to time, under such terms and conditions as he may prescribe, make partial payments and payments on account against costs incurred by the seller with respect to the terminated portion of the contract whenever in the opinion of the buyer the aggregate of such payments shall be within the amount to which the seller will be entitled hereunder. If the total of such payments is in excess of the amount finally agreed upon or determined to be due under this clause, such excess shall be payable by the seller to the buyer upon demand, together with interest computed at the rate established by the Secretary of the Treasury pursuant to Public Law 92–41 (50 U.S.C. App. 1215(b)(2)) for the Renegotiation Board, for the period from the date such excess payment is received by the seller to the date on which such excess is repaid: *Provided, however,* That no interest shall be charged with respect to any such excess payment attributable to a reduction in the seller's claim by reason of retention or other disposition of termination inventory until 10 days after the date of such retention or disposition, or such later date as determined by the buyer by reason of the circumstances.

* * * * *

Subpart 1–8.8—Formats of Notices, Forms, Warranties, and Agreements

1. Section 1–8.804–2(b) is revised to illustrate the revised Format 804–2 as follows:

§ 1–8.804–2 Format 804–2, Application for Partial Payment.

* * * * *

(b) Page 2 of Format 804–2

SECTION III.—AGREEMENT OF APPLICANT

IN CONSIDERATION OF ANY PARTIAL PAYMENT WHICH MAY BE MADE, THE APPLICANT AGREES AS FOLLOWS:

(1) REPAYMENT OF EXCESS.—If any partial payment made to the contractor is in excess of the amount finally determined to be due on his termination claim, the excess shall be repaid to the Government upon demand, with interest at the rate established by the Secretary of the Treasury pursuant to Public Law 92–41 (50 U.S.C. App. 1215(b)(2)) for the Renegotiation Board. Interest shall be computed for the period from the date the excess payment was received by the contractor to the date of repayment, except that (i) no interest shall be charged for any such excess payment attributable to a reduction in the contract termination claim by reason of retention or other disposition of termination inventory, until 10 days after the date of such retention or disposition, or such later date as determined by the contracting officer by reason of the circumstances, and (ii) no interest shall be charged for overpayment under cost-reimbursement type research and development contracts *(without profit or fee to the contractor)* if the overpayments are repaid to the Government within 30 days after demand.

(2) PROMPT SETTLEMENT OF CLAIM.—The applicant will make every reasonable effort to expedite final settlement of the termination claim and the claims of his subcontractors, if any.

(3) DISPOSAL AND RETENTION OF INVENTORY.—Whenever the amount of any proceeds hereafter received by the applicant on the disposal of termination inventory, plus the cost or agreed value, as the case may be, of any termination inventory which the applicant hereafter elects to retain, exceeds the amount stated by the applicant in this application as the amount of his charges *(Section II, Line 9)* and the amount of such credits has not been included on Section II, Line b *(Disposal and Other Credits)*, the applicant within 10 days will notify the contracting agency of the amount of credits on account of such inventory disposal or retention.

SPECIMEN

SECTION IV.—CERTIFICATE OF APPLICANT

The undersigned certifies that the amount of his own charges *(exclusive of subcontractors' charges)* due as of the date of this application and allocable to the terminated portion of its contract Number _____, dated _____, with _____, is not less than $_____ *(From Sec. II, Line 9)*; that, to the best of applicant's knowledge, the amounts received are as set forth above; and that the applicant has not assigned any moneys payable under this contract, except as set forth above.

NAME OF APPLICANT	BY *(Signature of authorized officials*

* * * * *

2. Section 1–8.806–4 is amended to revise paragraph (e) of Article 6 as follows:

§ 1–8.806–4 Settlement agreement for use in settling cost-reimbursement type prime contracts after complete termination where settlement includes costs.

* * * * *

Article 6. * * *

(e) Claims by the Government against the Contractor which are based upon refunds, rebates, credits, or other accounts not now known to the Government, together with interest thereon, now due or which may become due the Contractor from third parties to the extent that such amounts arise out of transactions for which reimbursement has been made to the Contractor under the contract. Any such amounts which may hereafter become due to the Contractor from any third party or other source shall be paid to the Government within 30 days after receipt by the Contractor. Interest at the rate established by the Secretary of the Treasury pursuant to Public Law 92–41 (50 U.S.C. App. 1215(b)(2)) for the Re-

V 42166 A AUG 26 77 UMI

negotiation Board, shall accrue and shall be paid to the Government on any such accounts as remain unpaid after the 30-day period.

CHAPTER 101—FEDERAL PROPERTY MANAGEMENT REGULATIONS

[FPMR Amdt. B-36]

PART 101-11—RECORDS MANAGEMENT

Subpart 101-11.9—Word Processing

WORD PROCESSING PROGRAM—CLARIFICATIONS AND ADDITIONS

AGENCY: General Services Administration, National Archives and Records Service (NARS).

ACTION: Final rule.

SUMMARY: The increasing use of word processing equipment in the Federal Government has made apparent the need for better management control in acquiring and using this equipment. This revised rule clarifies Federal agencies' program responsibilities and is intended to assist the agencies in improving services and achieving cost savings in managing their internal word processing programs.

EFFECTIVE DATE: August 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Dale Stouder, Deputy Assistant Archivist for Records Management, Office of Records Management, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, 202-376-8851.

SUPPLEMENTARY INFORMATION: On March 31, 1977, NARS published a proposed rule (42 FR 17147) to clarify its requirements for managing word processing in the Federal agencies. The primary purpose of the change was to put word processing in the proper perspective of a technology to be considered when seeking improvements in any of the records management program elements.

Most of the 10 comments received in response to the proposed change were favorable. Several respondents, while agreeing in principle, made constructive suggestions for changes which have been adopted in this regulation.

DISCUSSION OF MAJOR COMMENT

DEFINITION OF WORD PROCESSING

Several respondents wished to retain the word processing definition that was in the FPMR being amended. NARS feels that the original definition and those offered are too broad and they include organizational and personnel considerations not inherently part of word processing. The primary purpose of the proposed change was to put word processing in the proper perspective of a technology to be considered when seeking improvements in correspondence management, directives management, or any other records management program element.

Accordingly, 41 CFR Part 101-11 is amended as follows:

1. By revising §§ 101-11.900, 101-11.901, and 101-11.902 as follows:

§ 101-11.900 Scope.

This subpart sets forth the policies and procedures for managing word processing in the Federal Government.

§ 101-11.901 Word processing.

As used in this subpart, "word processing" is the manipulation of textual material through the use of a keyboarding device capable of controlled storage, retrieval, and automated typing.

§ 101-11.902 Equipment.

Equipment used in word processing applications may include but is not limited to the following:

(a) Dictation recording and transcription equipment;

(b) Automatic repetitive typewriters;

(c) Stand-alone text-editing typewriters;

(d) Stand-alone video-display text-editing typewriters;

(e) Shared-logic systems comprised of keyboard terminals, video-display units, minicomputers, and associated printing devices used primarily for word processing; and

(f) Keyboard terminals and associated printing devices (dedicated primarily to word processing) used to access Government or commercial computer services. Word processing proposals involving remote terminal operations or data systems applications must also comply with Subparts 101-32 and 101-35.

2. By amending §§ 101-11.903 and 101-11.904 as follows:

§ 101-11.903 Federal agency program responsibilities.

Each agency shall:

(a) Assign responsibility for the review and approval of all word processing applications to a specific official or office that will:

(1) Establish and issue procedures for submitting, reviewing, and approving or disapproving all proposals for the installation of word processing systems and equipment; those approval procedures should be reviewed periodically to keep abreast of current technology and records management practices;

(2) Review each proposed installation to:

(i) Ensure that an objective need for increased efficiency and effectiveness has been established and that all reasonable alternatives to the use of word processing equipment have been considered, including such measures as training to improve typing skills, improving correspondence

management practices, work simplification, functional specialization, and using or improving the use of dictation equipment;

(ii) Determine the feasibility of reassigning underutilized word processing equipment within the organization or agency;

(iii) Ensure that a comparative cost analysis of the existing and proposed systems has been made;

(iv) Assess the potential for future expansion within the agency;

(v) Ascertain the feasibility of standardizing equipment in applications involving shared workload; and

(vi) Ensure selection of the appropriate category of equipment for the specific application;

(3) Establish and issue procedures for evaluating the productivity of word processing applications;

(4) Periodically audit word processing installations for conformance with established policies and procedures; and

(5) Develop and maintain a complete inventory of the owned, rented, and leased equipment dedicated to or used primarily for word processing applications within the agency (Agency inventories should be maintained at an organizational level sufficient to ensure optimum use of the equipment. The inventory should include such items as name of manufacturer; model number or designation; location; purchase, rental, or lease cost; date of acquisition; and category as defined in § 101-11.902.);

* * * * *

§ 101-11.904 NARS responsibilities.

* * * * *

(a) * * *

(2) Methods and procedures for conducting word processing feasibility studies;

(3) Cost estimating criteria and guidelines for comparing existing and proposed applications with alternative approaches;

(4) Standards and guidelines necessary to evaluate the productivity of word processing installations; and

(5) Guidelines for selecting appropriate categories of equipment for specific applications;

* * * * *

(c) Conduct periodic reviews of agencies' word processing programs as part of the NARS evaluations prescribed in § 101-11.103, Agency program evaluation; and

* * * * *

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486 (c))

NOTE.—The General Services Administration has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: August 17, 1977.

Title 42—Public Health

CHAPTER I—PUBLIC HEALTH SERVICE, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 101—PROFESSIONAL STANDARDS REVIEW

Professional Standards Review Areas

NOTE.—This document originally appeared at page 42857 in the FEDERAL REGISTER for August 25, 1977. It is reprinted in this issue to meet the assigned day-of-the-week publication schedule.

AGENCY: Health Care Financing Administration (HCFA), HEW.

ACTION: Final Regulation.

SUMMARY: This regulation redesignates Professional Standards Review Areas in Ohio. Area VI is redesignated to include only the counties of Summit and Portage, and a new Area XIII is established to include the counties of Stark, Trumbull, Mahoning, and Columbiana. As a result of the redesignation, Area VI will be congruent with Health Service Area VIII and both Areas VI and XIII will better coincide with the local medical service areas in northeastern Ohio.

EFFECTIVE DATE: These regulations are effective August 25, 1977.

FOR FURTHER INFORMATION CONTACT:

Al Salazar, Room 13A-19, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852, (301) 443-6477.

SUPPLEMENTARY INFORMATION: On March 30, 1977, the Department published a Notice of Proposed Rulemaking in the FEDERAL REGISTER (42 FR 16839) to redesignate PSRO Area VI in Ohio to include only the counties of Summit and Portage and to establish a new PSRO Area XIII composed of Stark, Trumbull, Mahoning, and Columbiana Counties. Interested persons were invited to submit written comments, suggestions, or objections on or before May 15, 1977.

One comment was received. It suggested that Ashtabula County be added and Stark County deleted from the proposed new Area XIII. The inclusion of Ashtabula in Area XIII would not, in our view, result in a PSRO Area which better coincides with the local medical service areas. Neither the Ohio State Medical Association medical service areas, nor the Standard Metropolitan Statistical areas for northeastern Ohio combine Ashtabula County with the counties of Trumbull, Mahoning, and Columbiana. Furthermore, residents of the counties of Trumbull, Mahoning, and Columbiana generally seek their secondary medical care in Youngstown located in Mahoning County. Finally, although the suggested change would make the new Area XIII congruent with the Ohio Health Service Area X, established under the National Health Planning and Resources Development Act of 1974 (Pub. L. 93-641), it would also, by adding Stark County to Area VI, make the proposed Area VI less congruent with Health Service Area VIII.

V 42166 AUG 26 77 UMI

For these reasons, the suggestion was rejected, and the proposed redesignation is adopted.

Accordingly, 42 CFR 101.39 is amended to read as follows:

§ 101.39 Ohio.

Thirteen Professional Standards Review Organization Areas are designated in Ohio composed of the following counties:

Area I	
Butler	Clermont
Warren	Brown
Clinton	Highland
Hamilton	Adams
Area II	
Darke	Clark
Shelby	Preble
Champaign	Montgomery
Miami	Green
Area III	
Van Wert	Hardin
Allen	Logan
Hancock	Wyandot
Seneca	Crawford
Mercer	Marion
Auglaize	
Area IV	
Williams	Henry
Fulton	Wood
Lucas	Sandusky
Ottawa	Paulding
Defiance	Putnam
Area V	
Lake	Ashtabula
Geauga	
Area VI	
Summit	Portage
Area VII	
Coshocton	Harrison
Tuscarawas	Belmont
Carroll	Monroe
Jefferson	
Area VIII	
Licking	Morgan
Muskingum	Noble
Guernsey	Athens
Fairfield	Washington
Perry	
Area IX	
Hocking	Jackson
Vinton	Gallia
Meigs	Scioto
Pike	Lawrence
Area X	
Morrow	Franklin
Knox	Fayette
Union	Pickaway
Delaware	Ross
Madison	
Area XI	
Erie	Richland
Lorain	Ashland
Huron	Wayne
Medina	Holmes
Area XII	
Cuyahoga	
Area XIII	
Stark	Mahoning
Trumbull	Columbiana

(Sec. 1102, Social Security Act, 49 Stat. 647 (42 U.S.C. 1302); sec. 1152, Social Security Act, 86 Stat. 1430 (42 U.S.C. 1320c–1).)

NOTE.—The Department of Health, Education, and Welfare has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 as amended by Executive Order 11949 and OMB Circular A–107.

Dated: July 21, 1977.

ROBERT A. DERZON,
Administrator, Health Care Financing Administration.

Approved: August 19, 1977.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

Editorial Amendments Concerning Amateur Radio Service Call Signs

AGENCY: Federal Communications Commission.

ACTION: Editorial Order.

SUMMARY: The FCC is amending § 2.302 of its rules, concerning the composition of Amateur Radio Service call signs, to restore a footnote which was inadvertently omitted in a previous Order. The omitted footnote reserves to the Commission the right to require identifying information from Amateur Radio Service operators in addition to their FCC-assigned call signs. We are restoring this footnote because we did not intend to omit it in the previous Order.

EFFECTIVE DATE: September 2, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Erika M. Ziebarth, Personal Radio Division, 202–634–6620.

SUPPLEMENTARY INFORMATION:

Adopted: August 17, 1977.

Released: August 19, 1977.

Order. In the matter of Editorial amendent of § 2.302 of the Commission's rules.

1. On July 13, 1977, the Commission adopted an Order (FCC 77–482, 42 FR 37978) which, among other things, amended § 2.302 of the FCC's rules to permit the letter "X" to appear as the first letter in the suffix of some Amateur Radio Service call signs.

2. In that Order, the footnote to each Amateur Radio Service call sign entry in § 2.302 was inadvertently omitted. The footnote reserved to the Commission the right to require additional identifying data to accompany the transmission of an Amateur call sign. The Commission has relied on the authority contained in the omitted footnote to require additional identifying data from some Amateur Radio Service licensees, such as those operating with interim Amateur permits. The omission of the footnote was unintentional. This Order is issued to correct this error and to amend § 2.302 of the FCC's rules.

3. This amendment is an editorial revision to correct a previous error; therefore, the prior notice and public procedure provisions of the Administrative Procedure Act, 5 U.S.C. 553, are unnecessary. Authority for this amendment is contained in sections 4(i), 5(d) and 303 of the Communications Act of 1934, as amended, and in § 0.231(d) of the Commission's rules.

4. *Accordingly, we order,* That § 2.302 of the FCC's Rules is amended as set forth below, effective September 2, 1977.

FEDERAL COMMUNICATIONS COMMISSION,
R. D. LICHWARDT,
Executive Director.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; (47 U.S.C. 154, 155, 303).)

Part 2 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

1. In § 2.302, the table re Amateur Radio Service call signs is amended to read as follows:

§ 2.302 Call signs.

* * * * * * *

Class of station	Composition of call sign	Call sign blocks
* * *	* * *	* * *
Experimental (letter "X" follows the digit).	2 letters, 1 digit, 3 letters	KA2XAA through KZ9XZZ. WA2XAA through WZ9XZZ.
Amateur (letter "X" may not follow digit).	1 letter, 1 digit, 1 letter [4]	K1A through K0Z. N1A through N0Z. W1A through W0Z.
Amateur	1 letter, 1 digit, 2 letters [4]	K1AA through K0ZZ. N1AA through N0ZZ. W1AA through W0ZZ.
Do	1 letter, 1 digit, 3 letters [4]	K1AAA through K0ZZZ. N1AAA through N0ZZZ. W1AAA through W0ZZZ.
Do	2 letters, 1 digit, 1 letter [4]	AA1A through AL0Z. KA1A through KZ0Z. NA1A through NZ0Z. WA1A through WZ0Z.
Do	2 letters, 1 digit, 2 letters [4]	AA1AA through AL0ZZ. KA1AA through KZ0ZZ. NA1AA through NZ0ZZ. WA1AA through WZ0ZZ.
Amateur (letter "X" may not follow digit).	2 letters, 1 digit, 3 letters [4]	AA1AAA through AL0ZZZ. KA1AAA through KZ0ZZZ. NA1AAA through NZ0ZZZ. WA1AAA through WZ0ZZZ.
Standard frequency		WWV, WWVB through WWVJ, WWVL, WWVS.

[Docket No. 21238; RM–2632]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Station in McRae, Ga.; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Report and Order.

SUMMARY: This action assigns Channel 237A as a first FM assignment to McRae, Ga., after Notice and request by John Davidson. The assignment was based on showings of need and first service at McRae and the petitioner's intention to construct an FM station on the channel.

EFFECTIVE DATE: September 30, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

James J. Gross, Broadcast Bureau, 202–632–7792.

SUPPLEMENTARY INFORMATION:

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (McRae, Ga.); Docket No. 21238, RM–2632.

REPORT AND ORDER—PROCEEDING TERMINATED

Adopted: August 16, 1977; released: August 22, 1977.

1. The Commission herein considers the Notice of Proposed Rule Making, adopted May 10, 1977, 42 FR 26665, in the above-captioned proceeding, which proposed Channel 237A as a first FM assignment to McRae, Georgia. The proposal originated in a petition by John W. Davidson, licensee of daytime-only AM Station WDAX at McRae.

2. McRae (1970 pop. 3,061), seat of Telfair County (1970 pop. 11,381), is located in south central Georgia some 113 kilometers (70 miles) southeast of Macon and 145 kilometers (90 miles) east of Savannah.

3. In support of his proposal, Davidson submitted comments with respect to McRae and its need for a first FM channel assignment, and reaffirmed his intent to file an application and to promptly construct a station if authorized.

4. Based on the need shown for a first local FM service and first local nighttime service at McRae and Telfair County, and the absence of opposition, we find that the public interest would be served by such an assignment. The Commission's FM assignment policies place high priority on first FM assignments to small, rural communities like McRae.

5. Authority for the adoption of the amendment contained herein appears in section 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's rules and regulations.

§ 73.202 [Amended]

6. In view of the foregoing, it is ordered, that effective September 30, 1977, § 73.202(b) of the Commission's Rules, the FM Table of Assignments, as regards McRae, Ga., is amended, to read as follows:

City:	*Channel No.*
McRae, Ga	237A

7. *It is further ordered,* That this proceeding is terminated.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; (47 U.S.C. 154, 155, 303).)

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Opening of Hillside National Wildlife Refuge, Miss., to the Hunting of Migratory Game Birds and Big Game

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: This rule adds Hillside National Wildlife Refuge to the lists of refuge areas open for the hunting of migratory game birds and big game. The Director has determined that this action is compatible with the major purposes for which this refuge was established and is in the public interest. Hunting will provide for additional public recreational opportunity subject to annual special regulations.

EFFECTIVE DATE: October 1, 1977.

FOR FURTHER INFORMATION CONTACT:

V 42 166 AUG 26 77 UMI

Ralph H. Town, Division of National Wildlife Refuges, U.S. Fish and Wildlife Service, Washington, D.C. 20250, telephone 202–343–4305.

SUPPLEMENTARY INFORMATION: Ralph H. Town is the principal author of this final rule. On July 15, 1977, there was published (42 FR 36495) a notice of proposed rulemaking adding Hillside National Wildlife Refuge, Miss., to the list of refuge areas which are open for the hunting of migratory game birds and big game. As a general rule, most areas within the National Wildlife Refuge System are closed to hunting until officially opened by regulation.

The public was provided a 30-day comment period and was advised that an environmental assessment has been prepared on the proposal and was available for public inspection. One favorable comment was received on the proposed rulemaking.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107. Accordingly, 50 CFR Part 32 is amended by the addition of Hillside National Wildlife Refuge as follows:

§ 32.11 List of open areas; migratory game birds.

MISSISSIPPI

Hillside National Wildlife Refuge

§ 32.31 List of open areas; big game.

MISSISSIPPI

Hillside National Wildlife Refuge

Dated: August 23, 1977.

LYNN A. GREENWALT,
Director, U.S. Fish and Wildlife Service.

[FR Doc.77–24807 Filed 8–25–77;8:45 am]

PART 32—HUNTING

Opening of Benton Lake National Wildlife Refuge, Mont., to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special Regulation.

SUMMARY: The Director has determined that the opening to hunting of Benton Lake National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 1, 1977 through November 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert L. Pearson, P.O. Box 450, Black Eagle, Mont. 59414, 406–716–5266.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Public hunting of geese, ducks, coots, mergansers and Wilson's snipe on the Benton Lake National Wildlife Refuge, Montana, is permitted only on areas designated by signs as open to public hunting. These areas comprising 2,570 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, P.O. Box 25486, Denver, Colo. 80225.

Hunting shall be in accordance with all applicable state and federal regulations governing the hunting of the aforementioned species subject to the following special conditions:

1. The refuge will be open to hunting from one-half hour before sunrise to 12:00 Noon on October 1 and 2, 1977, only. On October 3 and thereafter hunting hours will be from one-half hour before sunrise to sunset each day.

2. Refuge roads and dikes are closed to hunting.

3. Vehicle use and parking shall be confined to gravelled roads and designated parking areas.

4. Hunters are prohibited from constructing blinds on the refuge. Hunting blinds are provided by the refuge. Daily occupancy of blinds will be on a first come-first served basis.

5. Boats without motors may be used in conjunction with waterfowl hunting activities.

6. Hunters are granted access to the area opened to hunting on and after September 15, 1977, for purposes of selecting hunting sites and training retrievers. Boats without motors may be used.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

ELIZABETH A. BENWAY,
Acting Refuge Manager.

AUGUST 17, 1977.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Lemon Reg. 107]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of California-Arizona lemons that may be shipped to fresh market during the weekly regulation period August 28–September 3, 1977. This regulation is needed to provide for orderly marketing of fresh lemons for the regulation period because of the production and marketing situation confronting the lemon industry.

EFFECTIVE DATE: August 28, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202–447–3545).

SUPPLEMENTARY INFORMATION: (a) *Findings.* (1) Pursuant to the amended marketing agreement and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee established under the amended marketing agreement and order, and upon other available information, it is found that the limitation of handling of such lemons, as provided in this regulation will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the quantity of lemons that may be marketed during the specified week stems from the production and marketing situation confronting the lemon industry.

(i) The committee has submitted its recommendation for the quantity of lemons it considers advisable to be handled during the specified week. The recommendation resulted from consideration of the factors covered in the order. The committee further reports the demand for lemons is good on size 140's and smaller, but poorer on larger sizes. Average f.o.b. price was $6.65 per carton the week ended August 20, 1977, compared to $6.63 per carton the previous week. Track and rolling supplies at 150 cars were down 20 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the quantity of lemons which may be handled should be established as provided in this regulation.

(3) It is further found that it is impracticable and is contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because the time intervening between the date when information upon which this regulation is based became available and the time when it must become effective to effectuate the declared policy of the act is insufficient. A reasonable time is permitted, for preparation for the effective time; and good cause exists for making the regulation effective as specified. The committee held an open meeting during the current week, after giving due notice, to consider supply and market conditions for lemons and the need for regulation. Interested persons were afforded an opportunity to submit information and views at this meeting. The recommendation and supporting information for regulation during the period specified were promptly submitted to the Secretary after the meeting was held, and information concerning the provisions and effective time has been provided to handlers of lemons. It is necessary, to effectuate the declared policy of the act, to make this regulation effective as specified. The committee meeting was held on August 23, 1977.

§ 910.407 Lemon Regulation 107.

* * * * *

(b) *Order.* (1) The quantity of lemons grown in California and Arizona which may be handled during the period August 28, 1977, through September 3, 1977, is established at 230,000 cartons.

(2) As used in this section, "handled" and "carton(s)" have the same meaning as when used in the amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; (7 U.S.C. 601–674).)

Dated: August 24, 1977.

FLOYD F. HEDLUND,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77–25085 Filed 8–25–77;11:29 am]

V 42 166 AUG 26 77 UMI

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 27]

COTTON CLASSIFICATION UNDER COTTON FUTURES LEGISLATION

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rulemaking.

SUMMARY: This notice proposes the removal of Augusta, Georgia from the list of bona fide spot cotton markets in § 27.93 of the Regulations for Cotton Classification under Cotton Futures Legislation (7 CFR Part 27). Cotton is no longer traded in such volume and under such conditions in Augusta to qualify this market as a bona fide spot market under the criteria contained in the U.S. Cotton Futures Act (90 Stat. 1841–46; 7 U.S.C. 15b).

DATE: Comments must be received on or before September 26, 1977.

ADDRESS: Comments should be filed in quadruplicate with the Hearing Clerk, U.S. Department of Agriculture, Room 1077 South Building, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT:

Alvin Deck, Marketing Programs Branch, Cotton Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202–447–2072).

SUPPLEMENTARY INFORMATION: Spot cotton market prices are used by the New York Cotton Exchange to establish settlement differences (premiums and discounts) for cotton delivered on futures contracts whenever the quality delivered deviates from the base quality. The U.S. Cotton Futures Act requires the Secretary of Agriculture to designate cotton markets which may be used to establish such settlement differences. The Act directs the Secretary to designate only those markets in which spot cotton is sold in such volume and under such conditions as customarily to reflect accurately the value of Middling cotton and the differences between the prices or values of Middling cotton and of other grades for which standards have been established.

There are 10 markets so designated by the Secretary at the present time. Prices from only eight of these markets are used for New York Cotton Exchange Futures settlement purposes. The other two, Augusta, Georgia and Fresno, California, are carried as extra or reserve markets.

Factors supporting the proposal that Augusta be removed from the list of bona fide spot markets are as follows:

1. Although Augusta was one of the original bona fide markets designated on August 10, 1915, its importance as a cotton market has declined in recent years. There are only four active marketing firms in Augusta and representatives from only two of these actively participate in price quotations work in the market. Spot purchases reported by the Augusta Cotton Exchange accounted for less than one percent of total purchases during the past five years in all bona fide spot markets.

2. The removal of Augusta as a bona fide spot market was one of the recommendations made by the National Cotton Marketing Study Committee in August 1975. This committee was appointed from industry and government by the Secretary of Agriculture to study and appraise the U.S. cotton marketing system and related foreign trade problems.

3. August has not been used as a settlement market for cotton futures purposes since 1968. There is no legal requirement that reserve markets, such as Augusta and Fresno, be carried as designated bona fide markets for use should the occasion arise. In any event, one reserve market is considered ample and Fresno is a much larger market than Augusta.

§ 27.93 [Amended]

Accordingly, it is proposed that § 27.93 of the regulations (7 CFR 27.93) governing cotton classification under cotton futures legislation be amended by deleting Augusta, Georgia from the list of bona fide spot cotton markets.

Dated: August 23, 1977.

WILLIAM T. MANLEY,
Deputy Administrator,
Program Operations.

[FR Doc.77-24794 Filed 8-25-77;8:45 am]

Animal and Plant Health Inspection Service

[9 CFR Part 77]

CATTLE

Tuberculosis Regulations

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: This document proposes to revise regulations which apply to tuberculosis in cattle to bring these regulations into conformity with the current guidelines of Uniform Methods and Rules—Bovine Tuberculosis Eradication, and to include changes made necessary by the issuance of revised regulations under which indemnity may be paid for cattle destroyed because of tuberculosis. This action is required to expedite the eradication of bovine tuberculosis from the United States. The intended effect of this action is to eliminate the last foci of infection from the country at the earliest possible time and to prevent spread of the disease until it can be eradicated.

DATE: Comments on or before October 7, 1977.

ADDRESS: Written comments to Deputy Administrator, USDA, APHIS, VS, Room 824, Federal Building, Hyattsville, Md. 20782.

FOR FURTHER INFORMATION CONTACT:

Dr. Ralph W. Bennett, Chief Staff Veterinarian, Tuberculosis Eradication, Cattle Diseases Staff, Animal and Plant Health Inspection Service, Veterinary Services, U.S. Department of Agriculture, Room 802, Federal Building, Hyattsville, Md. 20782, Area code 301–436–8715.

SUPPLEMENTARY INFORMATION: As the goal of complete eradication of tuberculosis in cattle is approached, it is essential that the last foci of infection be eliminated and that all possible means of preventing the spread of the disease be employed.

The proposed revision of Part 77 would adopt recommendations made by the Tuberculosis Committee of the United States Animal Health Association (USAHA) and would: Prohibit the interstate movement of cattle other than in compliance with proposed restrictions; incorporate the Uniform Methods and Rules—Bovine Tuberculosis Eradication for the establishment and maintenance of tuberculosis-free accredited herds of cattle, modified accredited areas, and areas accredited free of bovine tuberculosis in the domestic bovine, as adopted by the USAHA on October 17, 1974, and approved by Veterinary Services, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, on January 6, 1975; provide definitions pertinent to this Part; make provision for designating and removing the designations of Accredited-Free States, Modified Accredited Areas and Non-Modified Accredited Areas, respectively, based on determinations by the Deputy Administrator as to compliance with applicable provisions of the current Uniform Methods and Rules—Bovine Tuberculosis Eradication; designate specific areas as Accredited-Free States, Modified Accredited Areas, and Non-Modified Accredited Areas; provide for the movement of cattle from Accredited-Free States, Modified Accredited Areas, and Non-Modified Accredited Areas; require three negative tuberculin tests of cattle in affected herds before such herds may be released from quarantine; provide for the identification and interstate movement of tuberculosis exposed and tuberculosis reactor cattle; require that suspect cattle be moved under those conditions applicable to cattle exposed to tuberculosis; and provide for movements of cattle not specifically provided for in this Part under specific conditions prescribed by the Deputy Administrator, Veterinary Services.

The principal changes being made by this proposal from the present requirements are as follows: (1) Current regulations provide for the designation of Modified Accredited Areas and Non-Modified Accredited Areas only. The addition of an Accredited-Free State status which may be achieved by States qualifying under the provisions of Part XI of the Uniform Methods and Rules—Bovine Tuberculosis Eradication is deemed necessary to recognize a State that has achieved a degree of eradication of tuberculosis higher than that shown by the category of Modified Accredited Area status. (2) The present requirement for designation as a Modified Accredited Area status, that the Deputy Administrator determine that less than one-half of one percent of the cattle in the area is affected with tuberculosis, would be changed to a requirement that he determine that the area is in compliance with all of the requirements of Part X of the Uniform Methods and Rules—Bovine Tuberculosis Eradication. This change is deemed necessary since the requirements as set forth in Part X of the Uniform Methods and Rules—Bovine Tuberculosis Eradication would provide a better indication of the exact tuberculosis status of the cattle in the Modified Accredited Area. (3) Present regulations permit the interstate movement of cattle from herds under State quarantine or from previously infected herds following two negative tuberculin tests conducted at 60 day intervals, whereas the proposed regulations would require a third negative test to be conducted six months following the second negative test as a condition for movement. Experience indicates that two negative tests at 60 day intervals are inadequate to prevent the interstate spread of tuberculosis and it appears that the additional negative test should be required to provide greater assurance that the affected herd will not serve as a reservoir of infection and spread the disease through such movements. (4) Current regulations do not require that tuberculosis exposed cattle from Modified Accredited Areas be identified to qualify for movement interstate, while tuberculosis exposed cattle from Non-Modified Accredited Areas only have to be identified by registration name and number or metal eartag. Further, only exposed cattle moving interstate from Non-Modified Accredited Areas must be moved to slaughter. As a requirement for all interstate movements of tuberculosis exposed cattle, the proposed regulations would mandate that such cattle be moved only to slaughter and be identified by branding with the letter "E" on the left jaw and the tagging of such cattle with a metal eartag in either ear, or in lieu of branding and tagging, that the shipment be accompanied by a Veterinary Services or State representative or moved in vehicles closed with official seals. The identification of tuberculosis exposed cattle, or their escort by a Veterinary Services or State representative, or their movement in sealed vehicles would be required to insure that such animals are moved for slaughter only and to minimize the possibility of their getting into channels of trade and spreading disease. (5) No provisions are made in the current regulations for the interstate movement of cattle which are classified as "suspect" on an official tuberculin test or for the interstate movement of other cattle which have been in contact with "suspect" cattle. The proposed regulations would provide that cattle classified as "suspect" and other cattle in contact with "suspect" cattle shall only be moved interstate directly for immediate slaughter because it is believed that such cattle present a risk of disseminating tuberculosis. In order to minimize the possibility that such disease might be spread, the movement of such cattle should be strictly regulated.

Notice is hereby given in accordance with the administrative procedure provisions in 5 U.S.C. 553, that, pursuant to the provisions of the Act of May 29, 1884, as amended, the Act of February 2, 1903, as amended, the Act of May 31, 1920, and the Act of July 2, 1962 (21 U.S.C. 111–114, 114a, 115–117, 120, 121, 134b, 134f), the Animal and Plant Health Inspection Service is considering revising Part 77, Title 9, Code of Federal Regulations, for the above stated purpose.

Accordingly, Part 77, Title 9, Code of Federal Regulations, would be revised as follows:

PART 77—TUBERCULOSIS IN CATTLE

Subpart A—General Provisions

Sec.

77.1 Definitions.
77.2 General restrictions.
77.3 Designation of States or areas.
77.4 Accredited-free States.
77.5 Modified accredited areas.
77.6 Non-modified accredited areas.

Subpart B—Interstate Movement of Cattle Not Known To Be Affected With or Exposed to Tuberculosis

77.7 Movement from accredited-free States and modified accredited areas.
77.8 Movement from non-modified accredited areas.

Subpart C—Interstate Movement of Cattle Affected With or Exposed to Tuberculosis

77.9 Movement from accredited-free States, modified accredited areas, and non-modified accredited areas.
77.10 Other movements.

AUTHORITY: Secs. 3-7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791-792, as amended; 41 Stat. 699, sec. 1, 65 Stat. 693, as amended; secs. 3 and 7, 76 Stat. 130, 132 (21 U.S.C. 111, 114, 114a, 115-117, 120, 121, 134b, 134f); 37 FR 28464, 28477; 38 FR 19141).

Subpart A—General Provisions

§ 77.1 Definitions.

As used in this part, the following terms shall have the meanings set forth in this section except as otherwise specified.

(a) *Animal.* All species of animals except man, birds, or reptiles.

(b) *Cattle.* Domestic bovine animals of all ages.

(c) *Tuberculosis.* The contagious, infectious, and communicable disease of cattle caused by *Mycobacterium bovis.*

(d) *Uniform methods and rules—Bovine tuberculosis eradication.* Uniform methods and Rules for the Establishment and Maintenance of Tuberculosis-Free Accredited Herds of Cattle, Modified Accredited Areas, and Areas Accredited-Free of Bovine Tuberculosis in the Domestic Bovine, as adopted by the United States Animal Health Association on October 17, 1974, and approved by Veterinary Services in its publication of January 6, 1975. The provisions of the Uniform Methods and Rules—Bovine Tuberculosis Eradication are hereby incorporated by reference [1] and are the minimum standards for achieving and maintaining herd and area status.

(e) *Official tuberculin test.* Any intradermal test for tuberculosis conducted in accordance with the Uniform Methods and Rules—Bovine Tuberculosis Eradication.

(f) *Negative cattle.* Cattle classified negative to an official tuberculin test in accordance with the guidelines established in Part II, F., 3., b., of the Uniform Methods and Rules—Bovine Tuberculosis Eradication.

(g) *Suspect cattle.* Cattle responding to an official tuberculin test and classified suspect in accordance with the guidelines established in Part II, F., 2., of the Uniform Methods and Rules—Bovine Tuberculosis Eradication.

(h) *Reactor cattle.* Cattle responding to an official tuberculin test and classified reactor in accordance with the guidelines established in Part II, F., 1., of the Uniform Methods and Rules—Bovine Tuberculosis Eradication.

(i) *Herd.* Any group of cattle maintained on common ground for any purpose, or two or more groups of cattle under common ownership or supervision, which are geographically separated, but among which there is an interchange or

---

[1] Copies of the Uniform Methods and Rules—Bovine Tuberculosis Eradication are available upon request from Veterinary Services, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Federal Building, Hyattsville, Md. 20782, and were filed as part of this original document.

[2] NOTE.—Incorporation by reference provisions approved by the Director, Office of the Federal Register on August 19, 1977.

V 42166 AUG 26 77 UMI

movement of cattle without regard to health status.

(j) *Affected herd.* A herd of cattle in which tuberculosis has been disclosed in any such cattle by an official tuberculin test or by postmortem examination.

(k) *Cattle not known to be affected.* All cattle except those originating from tuberculosis affected herds or from herds containing tuberculosis suspect cattle.

(l) *Exposed cattle.* Cattle, except reactor cattle, which are part of a known affected herd.

(m) *Department.* The United States Department of Agriculture (USDA).

(n) *Veterinary Services.* The Veterinary Services, Animal and Plant Health Inspection Service, United States Department of Agriculture.

(o) *Deputy Administrator.* The Deputy Administrator, Veterinary Services, or any other Veterinary Services official to whom authority has heretofore been delegated or may hereafter be delegated to act in his stead.

(p) *State.* Any State, Territory, the District of Columbia, or Puerto Rico.

(q) *Interstate.* From one State into or through any other State.

(r) *Moved.* Shipped, transported, or otherwise moved, or delivered or received for movement.

(s) *Person.* Any individual, corporation, company, association, firm, partnership, society, or joint stock company, or other legal entity.

(t) *Veterinary Services representative.* A veterinarian or other person employed by Veterinary Services who is authorized to perform the function involved.

(u) *State representative.* A veterinarian or other person employed in livestock sanitary work of a State or political subdivision thereof and who is authorized by such State or political subdivision thereof to perform the function involved under a Memorandum of Understanding with the Department.

(v) *Accredited veterinarian.* An accredited veterinarian as defined in Part 160 of this chapter.

(w) *Modified accredited area.* A State or portion thereof which complies with all of the procedures in Part X of the Uniform Methods and Rules—Bovine Tuberculosis Eradication.

(x) *Non-modified accredited area.* A State or any portion thereof which has not received Accredited-Free State or Modified Accredited Area status.

(y) *Accredited-free State.* A State which complies with all of the procedures of Part XI of the Uniform Methods and Rules—Bovine Tuberculosis Eradication.

(z) *Accredited herd.* A cattle herd which meets the reoiirements of Part IX of the Uniform Methods and Rules—Bovine Tuberculosis Eradication.

(aa) *Certificate.* An official document issued by a Veterinary Services representative, a State representative, or an accredited veterinarian at the point of origin of a shipment of cattle to be moved under this Part, which shows the identification tag, tattoo, or registration number or similar identification of each animal to be moved, the number, breed, sex, and approximate age of the animals covered by the document, the purpose for which the animals are to be moved, the date and place of issuance, the points of origin and destination, the consignor, and the consignee, and which states that the animal or animals identified on the certificate meet the requirements of this part.

(bb) *Permit.* An official document issued for movement of animals under this Part by a Veterinary Services representative. State representative, or an accredited veterinarian at the point of origin of a shipment of cattle to be moved directly to slaughter, which shows the tuberculosis status of each animal (reactor, suspect, or exposed), the ear tag number of each animal and the name of the owner of such animal, the establishment to which the animals are to be moved, the purpose for which the animals are to be moved, and that they are eligible for such movement under the applicable provisions of §§ 77.9 and 77.10.

(cc) *Transportation document.* Any document accompanying the interstate movement, such as an owner's statement, manifest, switch order, or vehicle record, on which is stated: (1) The point from which the animals are moved interstate; (2) the destination of the animals; (3) the number of animals covered by the document; and (4) the name and address of the owner or shipper.

(dd) *Official seal.* A seal issued by a State or Veterinary Services representative.

§ 77.2 General restrictions.

Cattle may not be moved interstate except in compliance with the regulations in this Part.

§ 77.3 Designation of States or areas.

The Deputy Administrator is authorized to designate States or portions thereof as Modified Accredited Areas, Accredited-Free States, or Non-Modified Accredited Areas, respectively, when he determines that these States or portions thereof come within the appropriate definitions in §§ 77.1 (w), (x), or (y) and to delete any State or portion thereof from any such list at any time when he determines that they no longer come within the appropriate definition.

§ 77.4 Accredited-free States.

(a) Accredited-Free State status shall have a duration of one year. In order to qualify for reaccreditation, such States shall annually, between September 1 and October 30, submit a report to Veterinary Services certifying that the State is in compliance with all the requirements of Part XI of the Uniform Methods and Rules—Bovine Tuberculosis Eradication regarding Accredited-Free States.

(b) The following States are hereby designated Accredited-Free States: North Dakota, Minnesota, Connecticut, Maine, Rhode Island, New Hampshire, New Mexico, Colorado, Utah, and Wyoming.

§ 77.5 Modified accredited areas.

(a) Modified Accredited Area status shall have a duration of one year. In order to qualify for reaccreditation, such States shall annually, between September 1 and October 30, submit a report to Veterinary Services certifying that the State is in compliance with all the requirements of Part X of the Uniform Methods and Rules—Bovine Tuberculosis Eradication regarding Modified Accredited Areas.

(b) The following States or portions thereof are hereby designated as Modified Accredited Areas: All States or portions thereof except those otherwise designated in § 77.4 or § 77.6.

§ 77.6 Non-modified accredited areas.

The following States or portions thereof are hereby designated as Non-Modified Accredited Areas:

Subpart B—Interstate Movement of Cattle Not Known to be Affected With or Exposed to Tuberculosis

§ 77.7 Movement from Accredited-Free States and Modified Accredited Areas.[3]

Cattle not known to be affected with or exposed to tuberculosis, originating in an Accredited-Free State or a Modified Accredited Area, may be moved interstate without restriction.

§ 77.8 Movement from Non-modified Accredited Areas.

Cattle not known to be affected with or exposed to tuberculosis, originating in a Non-modified Accredited Area, shall only be moved interstate if:

(a) Such cattle are accompanied by a certificate stating that such cattle have been classified negative to an official tuberculin test, which was conducted within 30 days prior to the date of movement, however, if such cattle are part of a herd in which any animal has been classified as a reactor animal, such cattle shall be moved interstate only in accordance with § 77.9 or § 77.10. All cattle not individually identified by a registration name and number shall be individually identified by a Veterinary Services approved metal eartag or tattoo; or

(b) Such cattle are from an accredited herd and they are accompanied by a certificate showing the cattle to be from such a herd; or

(c) Such cattle are moved interstate directly to slaughter to an establishment operating under the provisions of the Federal Meat Inspection Act (21 U.S.C. 601 et seq.) or to a State inspected slaughtering establishment which has inspection by a State inspector at the time of slaughter.

Subpart C—Interstate Movement of Cattle Affected With or Exposed to Tuberculosis

§ 77.9 Movement from Accredited-Free States, Modified Accredited Areas, and Non-modified Accredited Areas.

(a) *Reactor cattle.* Cattle which have been classified as reactor cattle may be moved interstate only if they are moved directly to slaughter at an establishment operating under the provisions of the Federal Meat Inspection Act (21 U.S.C. 601 et seq.) or to a State-inspected slaughtering establishment which has inspection by a State inspector at the time of slaughter, and only upon compliance with the following conditions:

(1) The reactor cattle shall be individually identified by branding the letter "T" not less than 2 nor more than 3 inches high on the left jaw and by a Veterinary Services approved metal eartag bearing a serial number and the inscription "U.S. Reactor" or a similar State reactor tag bearing such number and similar description attached to the left ear of each animal; and

(2) The reactor cattle shall be accompanied by a permit; and

(3) The reactor cattle shall not be moved interstate in a means of conveyance containing any animals susceptible to tuberculosis unless all of the animals are being moved directly to slaughter; and

(4) Any person who moves reactor cattle interstate shall plainly write or stamp upon the face of the transportation document the words "Tuberculin Reactor" and the following statement: "This conveyance shall be cleaned and disinfected in accordance with § 77.9(a)(5) of the regulations." and

(5) Each means of conveyance in which reactor cattle have been transported interstate shall be cleaned and disinfected by the carrier, in accordance with the applicable provisions of Part 71 of this subchapter, under the supervision of a Veterinary Services representative or State representative or an accredited veterinarian or other person designated by the Deputy Administrator. If, at the point where the cattle are unloaded, such supervision or proper cleaning and disinfecting facilities are not available, and permission is obtained from a Veterinary Services representative or State representative, the empty means of conveyance may be moved to a location where such supervision and facilities are available for cleaning and disinfecting. Permission shall be granted if such movement does not present a risk of the dissemination of tuberculosis.

(b) *Exposed cattle.* Cattle which have been classified as exposed cattle shall be moved interstate only if they are moved directly to slaughter to an establishment operating under the provisions of the Federal Meat Inspection Act (21 U.S.C. 601 et seq.) or to a State inspected slaughtering establishment which has inspection by a State inspector at the time of slaughter and only in compliance with the following conditions:

(1) Such exposed cattle must be individually identified by branding the letter "E" not less than 2 nor more than 3 inches high on the left jaw and by tagging with a Veterinary Services approved metal eartag bearing a serial number attached to either ear of each animal, except that in lieu of branding, the cattle may be accompanied to slaughter by a Veterinary Services representative or State representative, or may be moved in vehicles closed with official seals. When such cattle are moved in vehicles closed with official seals, said seals shall only be removed by a State or Federal employee specifically designated by the Deputy Administrator; and

(2) Such exposed cattle shall be moved in accordance with the requirements pertaining to reactor cattle contained in paragraphs (a)(2), (a)(3), and (a)(5) of this section.

(c) *Suspect cattle.* Suspect cattle which have not been retested and found negative from herds in which no reactor cattle have been disclosed on an official tuberculin test, and negative cattle from such herds, shall only be moved interstate if they are moved directly to slaughter to an establishment operating under the provisions of the Federal Meat Inspection Act (21 U.S.C. 601 et. seq) or to a State inspected slaughtering establishment which has inspection by a State inspector at the time of slaughter.

§ 77.10 Other movements.

The Deputy Administrator may, with the concurrence of the livestock sanitary officials of the State of destination, upon request in specific cases, permit the movement of cattle not otherwise provided for in this Part which have not been classified as reactor cattle and are not otherwise known to be affected with tuberculosis, under such conditions as he may prescribe in each specific case to prevent the spread of tuberculosis. The Deputy Administrator shall promptly notify the appropriate livestock sanitary officials of the State of destination of any such action.

All written submissions made pursuant to this notice will be made available for public inspection at the Federal Building, 6505 Belcrest Road, Room 804, Hyattsville, Maryland 20782, during regular hours of business (8 a.m. to 4:30 p.m., Monday to Friday, except holidays) in a manner convenient to the public business (7 CFR 1.27(b)).

Comments submitted should bear a reference to the date and page number of this issue in the FEDERAL REGISTER.

Done at Washington, D.C., this 17th day of August 1977.

NOTE: The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

NORVAN L. MEYER,
Acting Deputy Administrator, Veterinary Services.

BROWN AND YELLOW MUSTARD AND THEIR DERIVATIVES

Proposed Affirmation of Gras Status as Direct Human Food Ingredients

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule.

SUMMARY: This is a proposal to affirm as generally recognized as safe (GRAS) brown and yellow mustard and their derivatives as direct human food ingredients. The safety of these ingredients has been evaluated pursuant to the comprehensive safety review being conducted by the agency. This proposal would list the ingredients as direct food substances affirmed as GRAS. In addition this proposal would affirm the GRAS status of allyl isothiocyanate which would be deleted from the list of synthetic substances.

DATES: Comments by October 25, 1977.

ADDRESSES: Written comments to the hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Corbin Miles, Bureau of Foods (HFF-335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204, 202-472-4750.

SUPPLEMENTARY INFORMATION: A comprehensive safety review of direct and indirect human food ingredients classified as generally recognized as safe (GRAS) or subject to a prior sanction is being conducted by the Food and Drug Administration. The Commissioner of Food and Drugs has issued several notices and proposed regulations, published in the FEDERAL REGISTER of July 26, 1973 (38 FR 20040), initiating this review. Pursuant to this review, the safety of allyl isothiocyanate, *p*-hydroxybenzyl isothiocyanate, and brown and yellow mustard has been evaluated. In accordance with the provisions of § 170.35 (formerly § 121.40 prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)), the Commissioner proposes to affirm the GRAS status of these ingredients.

There are various species of mustard seed. The principal sources of black, brown or oriental mustard seed are the species *Brassica nigra* (L.) Koch, *Brassica juncea* (L.) Czerniaew and *Brassica juncea* Cosson. The seeds of *B. nigra* are produced chiefly in Italy and Holland, whereas the *B. juncea* seeds are produced mainly in northern India and southern Russia. The principal sources of white or yellow mustard seed are the species *Brassica alba* (L.) Boiss, *Brassica hirta* Moench, and *Sinapis alba* (L.). White mustard is a native annual of southern Europe but is now grown in many temperate countries, chiefly in Canada.

Mustard seed is used by the food industry in different forms: Whole seed; ground seed meal; mustard cake which is ground seed from which a part of the fixed oil has been expressed; mustard flour which is the cake with the hulls removed; and prepared mustard. Mustard flour and prepared mustard appear to be the forms most commonly used. Both may contain mustard from more than one source.

The volatile or essential oil of brown (black) mustard constitutes between 0.5 to more than 1.0 percent of the seed, and it contains the glucoside sinigrin. Allyl isothiocyanate is the major derivative of sinigrin and is the major flavoring agent of black (brown) mustard. To extract allyl isothiocyanate it is necessary to remove the fixed oil from the seed by expression, allow the resulting seed cake and endogenous enzyme (myrosinase) to ferment, and distill with steam. As prepared, the distillate consists of more than 90 percent allyl isothiocyanate; the remainder is chiefly allyl cyanide and carbon disulfide. However, most of the allyl isothiocyanate used in food is prepared synthetically. It can be prepared by the reaction of allyl iodide with potassium thiocyanate.

The corresponding major flavoring constituent of yellow (white) or benzyl mustard oil is *p*-hydrovybenzyl isothiocyanate, and it exists in the seed as part of the glucoside sinalbin. It is prepared in a manner analogous to that for allyl isothiocyanate, except for steam distillation. Because *p*-hydroxybenzyl isothiocyanate is only sparingly volatile with steam, it is separated by solvent extraction. However, unlike allyl isothiocyanate, there is no evidence which indicates that *p*-hydroxybenzyl isothiocyanate is used in food. Consequently, its importance in this review is based on the fact that it is a chief constituent of yellow (white) mustard.

Black or brown mustard (*B. nigra*), brown or oriental mustard (*B. juncea*), white or yellow mustard (*B. hirta*) are listed in § 182.10 (formerly § 121.101(e)(1), prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)) as GRAS for use in food as spices and other natural seasonings and flavorings, pursuant to a regulation published in the FEDERAL REGISTER of January 19, 1960 (25 FR 404) and subsequently recodified. Mustard is also listed in § 182.20 (formerly § 121.101(e)(2), prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)) as GRAS for use in food as an essential oil, oleoresion or natural extractive, pursuant to a regulation published in the same FEDERAL REGISTER and subsequently recodified. Allyl isothiocyanate is listed in § 172.515(b) (formerly § 121.1164(b) prior to recodification) for use in food as a synthetic flavoring substance, pursuant to a regulation published in the FEDERAL REGISTER of October 27, 1964 (29 FR 14625) and subsequently recodified.

A representative cross-section of food manufacturers was surveyed to determine the specific food in which brown and yellow mustard, and allyl isothiocyanate were used and the levels of usage. Information from surveys of consumer consumption was obtained and combined with the manufacturing information to obtain an estimate of consumer exposure to brown and yellow mustard, and allyl isothiocyanate. The total amount of these substances used in food in 1970 was reported to be about: yellow mustard, 48 million pounds; brown mustard, 3 million pounds; and allyl isothiocyanate, 33 thousand pounds.

Mustard and its derivatives have been the subject of a search of the scientific literature from 1920 to the present. The parameters used in the search were chosen to discover any articles that considered (1) chemical toxicity, (2) occupational hazards, (3) metabolism, (4) reaction products, (5) degradation products, (6) any reported carcinogenicity, teratogenicity, or mutogenicity, (7) dose response, (8) reproductive effects, (9) histology, (10) embryology, (11) behavioral effects, (12) detection and (13) processing. A total of 639 abstracts on mustard (brown and yellow), allyl isothiocyanate, and *p*-hydroxybenzyl isothiocyanate was reviewed and 48 particularly pertinent reports from the literature survey have been summarized in a scientific literature review.

The scientific literature review shows, among other studies, the following information as summarized in the report of the Select Committee on GRAS Substances (hereinafter referred to as the Select Committee), selected by the Life Sciences Research Office of the Federation of American Societies for Experimental Biology:

The oral LD_{50} of allyl isothiocyanate from brown mustard seed for the rat is reported to be 339 mg per kg; the subcutaneous LD_{50} for mice, 80 mg per kg. For rats, the oral LD_{50} of allyl cyanide, reported to be a constituent of the essential oil of brown mustard, is 115 mg per kg; for rabbits an oral lethal dose of carbon disulfide, also reported to be a constituent of the essential oil of brown mustard, appears to be between 0.47 and 3.5 g (about 0.23 to 1.75 g per kg).

Rats fed a diet containing allyl isothiocyanate (0.02 mg per kg body weight) for 70 days showed an increased level of fatty acid esters and cholesterol in the blood serum. Histologically, some fatty degeneration of the liver was noted but this was most marked when the allyl isothiocyanate was fed in combination with ethyl alcohol (15 ml of a 20 percent ethanol solution per kg animal weight). Allyl isothiocyanate is reported to depress rate of growth slightly when fed to young rats at a level of 0.1 percent in the diet (estimated dose level, about 400 mg per kg) for 5 weeks; a more pronounced decrease in the growth rate occurred when the same amount of allyl isothiocyanate was administered by gavage rather than fed for an additional four weeks. In adult rats fed 2 mg of allyl isothiocyanate per kg body weight it was observed that blood clotting time was reduced, liver succinic dehydrogenase activity was increased, and the activity of both xanthine oxidase and kidney D-amino acid oxidase was decreased significantly when measured 4 hours after feeding.

Two groups of weanling Osborne-Mendel rats (5 males and 5 females in each group) received a daily dose (by stomach tube) of 20 mg per kg and 50 mg per kg body weight of allyl isothiocyanate respectively, for 20 days. Organ and tissue examination showed the following histopathology: Slight to moderate epithelial hyperplasia of the nonglandular part of the stomach with acute to subacute ulcers from 2 to 6.5 mm across in all animals at the higher dose and in half of the animals at the lower dose; and minor inflammatory foci in the liver at the higher dose level. However, the same authors reported that no effects were noted after feeding weanling rats for 26 weeks on a diet containing up to 10,000 ppm (about 500 mg per kg per day) of allyl isothiocyanate. The diet was prepared daily owing to the volatility of the cmopound. It is noted that this dosage is significantly higher than the LD_{50} reported from the same laboratory; reasons for the variation are not clear.

The Select Committee was unable to find reports of long term animal studies on brown mustard or its constituents, or of studies on the absorption or excretion of these substances.

Teratologic evaluation was made of a sample of allyl oil of mustard supplied by FDA and known to have been prepared from black mustard seeds (*B. nigra* L.). The oral administration of up to 18.5 mg per kg body weight daily to pregnant rats (6th through 15th days of gestation), up to 23.8 mg per kg to pregnant hamsters (6th through 10th days of gestation), and up to 12.3 mg per kg to pregnant rabbits (6th through 18th days of gestation), and up to 12.3 mg per effect on nidation or on maternal or fetal survival. The number of abnormalities seen in either soft or skeletal tissues of the test groups did not differ from the number occurring spontaneously in the sham-treated controls. The same result was obtained with pregnant mice at dosage levels up to 6.0 mg per kg (administered on the 6th through 15th days of gestation) but at a level of 28.0 mg per kg there were indications (not statistically significant) of increased fetal deaths and resceptions. These investigations concluded that oil of mustard, at this high level may be fetotoxic in the pregnant mouse without being teratogenic.

Studies of the toxicity and teratogenicity of mustard oil (allyl isothiocyanate) in avian embryos revealed that it was not teratogenic under the conditions employed. Doses up to 16 mg per kg were injected into the air cell or the yolk of fertile eggs before incubation or after 96 hours of incubation. The occurrence of abnormal embryos and those showing head; skeletal, visceral and limb abnormalities was not increased with the administration of mustard oil under any of these conditions. In the same series of experiments, mustard oil was found to be toxic to avian embryos when injected into the air cell of unincubated fertile eggs or after 96 hours of incubation, at a level of 0.6 mg per kg, and embryo mortality was increased with doses as low as 0.04 mg per kg when injected into the yolk.

Mutagenicity studies of mustard oil (allyl isothiocyanate) in which several assay procedures were employed, were uniformly negative. The assay procedures and the doses used were as follows: Host-mediated assay using two strains of *Saccharomyces cerevisiae* at oral doses up to 130 mg of mustard oil per kg in mice; cytogenetic assay, *in vivo*, involving observation of aberrations in bone marrow metaphase chromosomes of rats administered up to 100 mg of mustard oil per kg orally; cytogenetic assay, *in vitro*, involving observation of aberrations in anaphase chromosomes of human embryonic lung cells in tissue culture exposed to levels up to 10 μg of mustard oil per ml; dominant lethal assay in rats using dosages of mustard oil up to 100 mg per kg.

No reports have been found on the testing of allyl cyanide or carbon disulfide for teratogenicity.

Allyl isothiocyanate, applied to the skin of female Sutter albino mice as a 50 percent solution in acetone with 2 percent corn oil twice weekly for 24 weeks, produced papillomas in 10 percent of the animals and carcinomas in 1 animal. A 0.003 normal solution of allyl isothiocyanate in acetone painted on the skin of mice twice weekly for 5 months produced no tumors. No skin tumors were found after 11 months in mice painted three times weekly with allyl isothiocyanate. No reports have been found concerning the potential carcinogenicity of orally administered allyl isothiocyanate.

Carbon disulfide in aqueous solution (concentration not reported) administered orally to dogs and rabbits, produced no tumors in three months. No reports have been found in which the carcinogenic potential of allyl cyanide has been studied by any route.

Based on the eating habits of a number of his patients who had experienced coronary attacks, Blair in 1965 expressed the opinion that allyl isothiocyanate is the underlying cause of atheromatous sclerosis in a majority of cases. He has suggested that restriction of the "hot" condiments, e.g., mustard, pepper, and ginger—offers a means for prevention of essential hypertension and coronary disease. The editor of the Ohio State Medical Journal in which this article appeared, noted that the author's conclusions, while not substantiated, "represents a different viewpoint which may, or may not, be borne out in the experience of others."

The subcutaneous LD_{50} of benzyl mustard oil (presumed to consist principally of *p*-hydroxybenzyl isothiocyanate from yellow mustard seed) for mice is stated to be 150 mg per kg. No data have been found on acute studies of orally administered benzyl mustard oil or its isothiocyanate. Acute toxicity studies, by any route of administration, of sinapine, *p*-hydroxybenzyl alcohol, di-(*p*-hydroxybenzyl) disulfide, *p*-hydroxybenzyl cyanide, or *p*-hydroxybenzyl amine, which are reported to occur in yellow mustard or to be present as decomposition productions of *p*-hydroxybenzyl isothiocyanate have not been found in the literature.

The Select Committee was unable to find reports of short or long term studies on yellow mustard or its constituents, or studies on the absorption or excretion of these substances.

Only one experiment has been found that concerns the metabloic fate of mustard. In man, Perry et al. fed 100 g of mustard to a male adult over a 1.5 hours and collected urine 24 hours after the start of consumption. Chromatographic analysis of the urine revealed the presence of *p*-hydroxybenzyl amine and an unidentified amine, metabolites that were not detectable in the urine when mustard was excluded from the diet. The mustard used was "prepared mustard, made from mustard seed, turmeric and other species," but the source of the seed was not indicated. Since the allyl isothiocyanate of brown mustard could not conceivably give rise to a *p*-hydroxybenzyl metabolite, it can be reasoned that the mustard fed in this experiment was probably of the yellow variety and that the source of the *p*-hydroxybenzyl amine excreted could either be a separate constituent of white mustard seed as reported by Larsen, or could arise as a metabolite of *p*-hydroxybenzyl isothiocyanate; *p*-hydroxybenzyl amine has also been found in barley seeds.

No reports have been found on the carcinogenicity, teratogenicity, or mutagenicity of white mustard seed, or of its reported constituents, or of the degredation products of its constituents.

The oral LD_{50} of the volatile oil of mustard (source not indicated) for the rat was reported to be 148 mg per kg; 50 mg per kg per day was tolerated by rats for eight weeks without noticeable injury.

For 30 days rats were fed a basal diet containing 10 percent mustard cake (source not indicated) supplemented with 20 percent of one of a number of vegetable oils including mustard oil (source not indicated). It is evident that the mustard cake used in the basal diet was mustard seed from which the fatty acid glycerides had been expressed, leaving some or all of the essential oil; and that the mustard oil used was the fatty acid glycerides of mustard seed containing some or all of the essential oil. Serum lipid levels decreased in animals receiving the mustard oil during the early part of the feeding, but subsequently the level showed a steady upward trend. Mustard oil also produced consistent and progressive increases in the liver lipid level. Similar effects were noted with some of the other vegetable oils tested, making it appear that the effects noted with mustard oil were not due to its essential oil constituents. No evidence of toxicity to the animals subjected to this regime was reported by the investigators.

In one study, the nutritive contribution of mustard oil (expressed) appeared to be limited to its fat content. The source of the mustard oil was not indicated. Feeding tests with rats showed that this mustard oil (assumed to be the expressed fatty acid glycerides of mustard seed, containing some or all of the essential oil) was entirely devoid of vitamin A activity, and tended to inactivate vitamin A when mixed with other foods. The tests also showed that, as a fat, mustard oil was as nutritious as other fats, provided adequate vitamin A intake was assured from other sources.

The possibility of synergism between mustard oil (source not indicated, but presumed from the context of the report, to be expressed mustard oil containing the fatty acid gylcerides as well as the essential oil) and cholesterol was studied by including 10 percent of mustard oil in the feed of growing chicks, with or without one percent cholesterol for eight weeks. Chicks on the diet containing mustard oil showed an increase in the level of nonesterified fatty acids in the blood plasma but no change in other plasma lipids. Chicks on diets containing both cholesterol and mustard oil showed an increase in total plasma cholesterol, β-lipoprotein cholesterol, triglycerides, and nonesterified fatty acids. The extent of hypercholesterolemia did not seem dependent on the degree of saturation of the mustard oil. A subsequent report from the laboratory of one of these investigators extended these observations to effects on proportions of the aorta by feeding diets containing 10 percent mustard oil or other oils, with or without one percent cholesterol, to growing chicks for eight weeks. When such oils were fed without cholesterol, there was an increase in phospholipids in the aorta but no change in cholesterol; whereas cholesterol, with or without the oils, increased both cholesterol and phospholipids in the aorta. Further, the hexosamine content of the aorta decreased regardless of whether cholesterol was fed, implying a con-

V 42 166 AUG 26 77 UMI

comitant decrease in acid mucopolysaccharides. The hydroxyproline content of the aorta increased when both oils and cholesterol were fed, indicating that arterial collagen had increased. The latter effect seemed to be proportional to the degree of hypercholesterolemia. Severity of changes were found to be unrelated to either the cholesterol level in the plasma or to the degree of unsaturation of the oils fed. In all respects, mustard oil behaved no differently than coconut, sesame, and hydrogenated peanut oils.

Observations were made of the short term physiological effects due to mustard (source not indicated), lemon, curry, paprika, and sugar fed as condiments in test diets of healthy young men. It was noted that increased in salivary flow was of about the same magnitude for all of these substances, while mustard and paprika were least effective in increasing salivary amylase activity.

Bandyopadhyay and Banerjee fed up to 20 percent of various vegetable oils, including what is presumed to be expressed oil of mustard of unspecified source, with and without cholesterol, in the diet of rhesus monkeys for nine months. In the animals fed diets containing the mustard oil, diminished amounts of cholesterol deposits were found at autopsy in the thoracic and abdominal aortas, the brain, and the skin, while increased amounts of cholesterol were found in the liver. In a similar study, also with rhesus monkeys, Banerjee et al. fed cholesterol and various vegetable oils (up to 20 percent of the diet) for six months. Periodic observations showed that the level of plasma cholesterol was raised and fecal cholesterol was reduced to the same degree, indicating that the vegetable oils probably facilitated intestinal absorption of cholesterol.

Twenty human adult volunteers were fed a breakfast containing 17 percent by weight (about one g per kg) of one of six different vegetable or animal fats, including mustard oil (source not identified but evidently the expressed oil containing the fatty acid glycerides as well as some or all of the essential oil). A blood sample, taken four hours after breakfast, was analyzed. The experiments were repeated on each of five successive days. Feeding mustard oil was found to have no effect on platelet content, serum cholesterol, Stypvan[1] time, or the fibrinolysing property of the blood; whole blood clotting time was reduced as it was after feeding any of the fats, and fibrinogen content decreased, as it also did after feeding sesame oil; platelet adhesiveness increased as it also did after feeding groundnut, sesame or coconut oils.

Two mustard oils were tested for carcinogenic activity in XVII x C57 (black) hybrid mice by oral, cutaneous, subcutaneous, and intraperitoneal routes. There was no evidence of malignancy due to either oil at the site of treatment or in the remote organs even though the animals were observed for their complete life span of over two years. One of the oils was obtained from the Indian Agricultural Research Institute; New Delhi, and the other from the Rah Oil Mills, Bombay. Direct inquiry by the Select Committee of the authors and the Indian Agricultural Research Institute provided little additional information concerning the identity of these oils; the IARI sample was of unknown origin and the Raj sample was a market sample and believed to be a mixture. In more recent work the same investigators found no evidence of carcinogenicity in mice administered laboratory expressed refined mustard oil (see source not indicated) by stomach tube five days each week for their life span. Under the same conditions, one of 27 mice fed a market sample of mustard oil (seed source not indicated) developed transplantable gastric carcinoma in 13 months.

[1] Stypvan: a preparation of Russell's viper venum, used as a thromboplastic agent in the one-stage prothrombin time test.

All of the available safety information on brown and yellow mustard and their derivatives has been carefully evaluated by qualified scientists of the Select Committee. It is the opinion of the Select Committee that:

The two mustards (brown and yellow) commonly used in the United States are derived from two *Brassica* species that differ with respect to the major chemical constituents of their essential oils. The available information shows that the characteristic isothiocyanates, other known constituents, and decomposition products of the essential oils of both mustards, have low orders of oral toxicity in experimental animals. Further, there is no reported evidence that orally administered doses of these constituents are carcinogenic, teratogenic, or mutagenic. However, interpretation of the available information suffers from a general lack of specificity on the part of investigators concerning the identity of the particular mustard used in their experiments, and from the fact that the major constituents of the essential oils are either very volatile or unstable, making it speculative how much of each of these substances was actually present in the preparation tested. The industrial practice of using mixtures of mustards to impart desired flavors compounds the problem of relating the results of toxicological studies to conditions that may exist in foods. For the same reasons, the amounts of the essential mustard oil constituents actually present in foods at the time of consumption are unpredictably variable, but must be less than the amounts calculated from the reported daily human intake levels of mustard.

The Select Committee has made an exhaustive search for information relevant to the health aspects of mustard and mustard oils as food ingredients and is confident that the literature evaluated in this report is representative and significant as a basis for judgment. However, because of the long history of use of the mustards in or on foods without apparent adverse effects on man, and because, as a consequence, they have been generally recognized as safe, there have been few well-defined toxicological studies. The Select Committee is of the opinion that the mustards are examples of substances where more definitive toxicological studies on representative samples of the products actually used by food industry would be useful in confirming the apparent absence of adverse health effects when they are used in or on foods. Moreover, in products like the mustards, which consist of variable mixtures of mustard seeds containing several chemical entities, the toxicological study of the products are actually used, at levels that approximate or exceed those now in current use, would be of greater significance and usefulness than the separate study of constituents known or assumed to be present.

It is the conclusion of the Select Committee that there is no evidence in the available information on allyl isothiocyanate, *p*-hydroxybenzyl isothiocyanate, and brown and yellow mustard that demonstrates, or suggests reasonable grounds to suspect, a hazard to the public when they are used at levels that are now current or that might reasonably be expected in the future. Based upon his own evaluation of all available information on brown and yellow mustard, and their derivatives (including reports of teratogenic tests on treated and untreated mustard flour and mutagenic tests on yellow mustard which were not available when the Select Committee formed its conclusion), the Commissioner concurs with this conclusion. The Commissioner therefore concludes that no change in the current GRAS status of brown and yellow mustard and their derivatives is justified. The Commissioner further concludes that the information developed for this safety review forms a sound scientific basis for specifically affirming the GRAS status of allyl isothiocyanate, and he therefore proposes that its use, as described in § 172.515(b), be affirmed as GRAS in Part 184 and deleted from the list of synthetic substances in § 172.515(b).

Copies of the scientific literature review on oil of mustard, and *p*-hydroxybenzyl isothiocyanate, reports of mutagenic tests for yellow mustard and oil of mustard, reports of teratogenic tests for oil of mustard and mustard flour, and the report of the Select Committee are available for review at the office of the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857, and may be purchased from the National Technical Information Service, 5285 Port Royal Road, Springfield, Va. 22151, as follows:

Title	Order No.	Price code	Price [1]
Oil of mustard (scientific literature review)	PB-221-216	A04	$4.50

Mustard, yellow (mutagenic tests)	PB-245-503/AS	A03	4.00
Mustard flour—untreated (teratology tests)	PB-245-523/AS	A03	4.00
Mustard flour—treated (teratology tests)	PB-245-525/AS	A03	4.00
Mustard and oil of mustard (select committee report)	PB-254-528/AS	A03	4.00

[1] Price subject to change.

The proposed action does not affect the present use of brown and yellow mustard and their derivatives for pet food or animal feed.

Therefore, under the Federal Food, Drug and Cosmetic Act (secs. 201(s), 409, 701(a), 52 Stat. 1055; 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes that Parts 172, 182 and 184 be amended as follows:

PART 172—FOOD ADDITIVES PERMITTED FOR DIRECT ADDITION TO FOOD FOR HUMAN CONSUMPTION

§ 172.515 [Amended]

1. In § 172.515: Synthetic flavoring substances and adjuvants, by deleting the entry for "Allyl isothiocyanate; mustard oil" from the list of substances in paragraph (b).

PART 182—SUBSTANCES GENERALLY RECOGNIZED AS SAFE

§ 182.10 [Amended]

2a. In § 182.10: Spices and other natural seasonings and flavorings, by deleting the entries for "Mustard, black or brown", "Mustard, brown", and "Mustard, white or yellow".

§ 182.20 [Amended]

b. In § 182.20: Essential oils, oleoresins (solvent-free), and natural extractives (including distillates), by deleting the entry for "Mustard".

PART 184—DIRECT FOOD SUBSTANCES AFFIRMED AS GENERALLY RECOGNIZED AS SAFE

3. By adding new § 184.1527 to read as follows:

§ 184.1527 Mustard and its derivatives.

(a) Mustard is derived from the seed of certain plants of the family Cruciferae Some of the principal botanical species from which white or yellow (CAS Reg. No. 000057–06–7) mustard is derived are *Brassica hirta* (L.) Moench, *Brassica alba* (L.) *Boiss*, and *Sinapis alba* (L.). Brown (black) or oriental mustard (CAS Reg. No. 977051–38–9 or 977002–01–9) is derived principally from the seeds of *Brassica juncea* (L.) Czerniaew or Cosson, and *Brassica nigra* (L.) Koch. Mustard is used as the whole seed, ground meal or flour with some fixed oil or hulls removed, and as the essential oil which is more than 90 percent allyl isothiocyanate for brown mustard. The essential oil of brown mustard is separated from the macerated seeds by steam distillation after most of the fixed oil has been expressed from the seeds and after the macerated product has undergone endogenous enzymatic activity. Allyl isothiocyanate can be synthesized by reacting allyl iodide with potassium thiocyanate.

(b) Allyl isothiocyanate (C_4H_5NS, CAS Reg. No. 57–06–7) meets the specifications of the Food Chemicals Codex (FCC), 2d Ed. (1972).[2] Brown (black) or oriental, and white or yellow mustard seeds meet the following specifications:

(1) Moisture, not more than 10 percent of total sample weight when determined by drying at 105° C. for 5 hours, and in accordance with the FCC test (p. 931).

(2) Total ash, not more than 5.5 percent on dry weight basis when determined by FCC test (p. 868).

(3) Total heavy metals, not more than 10 ppm on dry weight basis when determined by FCC test (p. 920) as modified by the first supplement to FCC (1974).

(4) Arsenic, not more than 2 ppm on dry weight basis when determined by FCC test (p. 865) as modified by the second supplement to FCC (1975).

(5) Lead, not more than 5 ppm on dry weight basis when determined by FCC test (p. 929).

(6) The allyl isothiocyanate content in *B. nigra* and *B. juncea* should conform to the representation of the vendor when determined by the procedure in the 12th edition of the Official Methods of the Association of Official Analytical Chemists, sections 30.026 and 30.027.[3]

(7) The *p*-hydroxybenzyl isothiocyanate content in *B. alba* should conform to the representation of the vendor when determined by the procedure of Raghavan *et al.*, "Journal of the Science of Food and Agriculture" 22:523–525, 1971.[4]

(c) Mustard and its derivatives are used as flavoring agents and adjuvants as defined in § 170.3(o)(12) of this chapter.

(d) The ingredients are used in foods at levels not to exceed good manufacturing practices. Current good manufacturing practice results in the following maximum levels, as served:

(1) Brown (black) or oriental mustard: 0.3 percent for baked goods as defined in § 170.3(n)(1) of this chapter, 19 percent for condiments and relishes as defined in § 170.3(n)(8) of this chapter, 2 pecent for fats and oils as defined in § 170.3(n)(12) of this chapter, 0.5 percent for gravies and sauces as defined in § 170.3(n)(24) of this chapter, 1.0 percent for nuts and nut products as defined in § 170.3(n)(32) of this chapter, and 1 percent or less for all other food categories;

(2) Yellow (white) mustard: 20 percent for condiments and relishes as defined in § 170.3(n)(8) of this chapter, 1.9 percent for fats and oils as defined in § 170.3(n)(12) of this chapter, 0.2 percent for meat products as defined in § 170.3(n)(29) of this chapter, 1.9 percent for snack foods as defined in § 170.3(n)(37) of this chapter, and 1.7 percent or less for all other food categories; and

(3) Allyl isothiocyanate: 0.05 percent for gravies and sauces as defined in § 170.3(n)(24) of this chapter, and 0.02 percent or less for all other food categories.

The Commissioner hereby gives notice that he is unaware of any prior sanction for the use of these ingredients in foods under conditions different from those proposed herein. Any person who intends to assert or rely on such a sanction shall submit proof of its existence in response to this proposal. The regulation proposed above will constitute a determination that excluded uses would result in adulteration of the food in violation of section 402 of the act, and the failure of any person to come forward with proof of such an applicable prior sanction in response to this proposal constitutes a waiver of the right to assert or rely on such sanction at any later time. This notice also constitutes a proposal to establish a regulation under Part 181 (21 CFR Part 181), incorporating the same provisions, in the event that such a regulation is determined to be appropriate as a result of submission of proof of such an applicable prior sanction in response to this proposal.

Interested persons may, on or before October 25, 1977, submit to the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

NOTE.—The Food and Drug Administration has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11821 and OMB Circular A–107.

Dated: August 12, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

[Docket Nos. 77P–0016 and 77P–0017]

FOOD LABELING

Ingredient Labeling Exemptions

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: This proposal would permit all ingredients that act as leavening agents, as yeast nutrients, or as dough conditioners in a food to be listed together in the ingredient statement by their specific common or usual names in parentheses following the appropriate collective names "leavening", "yeast nutrients", or "dough conditioners". The proposed amendment would also permit individual ingredients that act as dough conditioners, yeast nutrients, or leavening agents to be listed in parentheses in other than descending order of predominance; and it would provide for the label declaration of those ingredients used intermittently in the manufacture of a food as dough conditioners, yeast nutrients, or leavening agents even though they may not always be present in the food bearing such labeling.

This proposal is based on petitions submitted to the Food and Drug Administration (FDA) by the American Bakers

V 42166 AUG 26 77 UMI

Association and is intended to provide a more flexible ingredient labeling format while retaining complete ingredient disclosure to consumers.

DATE: Written comments by October 25, 1977.

ADDRESS: Written comments to the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Howard N. Pippin,
Bureau of Foods (HFF–312), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204, (202–245–3092).

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of January 6, 1976 (41 FR 1156), FDA promulgated regulations amending § 101.4 (21 CFR 101.4, formerly 21 CFR 1.10 prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)), concerning the manner in which ingredients are to be declared on the labels of finished foods. One of the results of the promulgation of these regulations is that Trade Correspondence Number 94 (TC–94) was revoked in its entirety. TC–94 had provided that manufacturers of bakery products using ingredients acting as leavening, yeast nutrients, and dough conditioners could declare these ingredients as such on labels of bakery products in place of the specific common or usual names of these ingredients.

In a final role published in the FEDERAL REGISTER of February 12, 1976 (41 FR 6242), FDA issued amendments to the definitions and standards of identity for bakery products and required label declaration of all optional ingredients. The effective date for the ingredient labeling portions of both the January and February 1976 regulations is January 1, 1978.

As a result of these actions, leavening agents, yeast nutrients, and dough conditioners added to bakery products as of January 1, 1978 would be required to be declared by their specific common or usual names in their descending order of predominance in the finished food, whether or not such food conforms to a definition and standard of identity for bakery products.

The American Bakers Association (ABA), 2020 K St. NW., Washington, DC 20006, has submitted two petitions requesting relief from the requirement that leavening agents, yeast nutrients, and dough conditioners added to bakery products be declared by their common or usual name in their descending order of predominance.

One petition (Docket No. 77P–0017) proposes that the Commissioner of Food and Drugs amend § 101.4 to permit all ingredients that act as leavening agents, yeast nutrients, or dough conditioners in bakery products to be listed together in order of predominance in parentheses following the appropriate collective term that describes the ingredients' function.

The second petition (Docket No. 77P–0016) requests that the Commissioner amend the definition and standard of identity for bread in § 136.110 (21 CFR 136.110) to permit the declaration of dough conditioners (other than potassium iodate or calcium iodate) that may be added to bakery products so that the label declaration would be the same whether or not specific dough conditioners were present in the finished food, provided that such declarations are followed by the statement "used as needed."

In support of the proposals, the petitioner submits that, for many years, FDA has permitted leavening agents, yeast nutrients, and dough conditioners to be declared by these collective names, under TV–94 issued in 1940. The petitioner states that on January 1, 1978, when the requirements of § 101.4 become effective, consumers will see on the labels of bakery foods, for the first time, the precise chemical names for leavening agents, yeast nutrients, and dough conditioners. The petitioner contends that, unless additional descriptive language indicating the function of the particular ingredient is placed in the ingredient declaration, the result will be a label less informative to the consumer than the current one. The petitioner argues that consumers are familiar with the collective terms for these ingredients through decades of experience with such names, but are not likely to know that ammonium phosphate, for example, is a yeast nutrient or that monocalcium phosphate is a leavening agent. Labeling that merely states that ammonium phosphate is present in baked goods does not inform consumers of the purpose for such ingredients.

In its petition to amend the standard of identity for bread, ABA states that bakers have found it necessary to add certain safe and suitable ingredients from time to time, depending on raw material variations. For example, if a wheat crop is "weak," it may be necessary to add additional dough strengtheners to obtain a uniformly high quality product. Although bakers know that these ingredients may be needed to produce an acceptable food, they find it impossible to predict in advance what ingredients will be needed at any particular time. The petitioner contends that no legitimate interest would be harmed by granting bakers the right to disclose such ingredients on an "as needed" basis in the ingredient declaration because each of the ingredients involved has already been determined by FDA to be safe and suitable for its intended purpose and all ingredients present will be disclosed on the label. The petitioner contends that the declaration of dough conditioners on an "as needed" basis will provide necessary flexibility in the labeling of bakery products and avoid higher labeling costs that may result in increased prices to the consuming public.

Accordingly, ABA proposes: (1) That FDA permit leavening agents, yeast nutrients, and dough conditioners to be listed by an appropriate collective name with the specific ingredients used listed in parentheses following the collective name for these ingredients; and (2) that FDA permit certain optional ingredients, permitted in certain standardized bakery products and used intermittently as dough conditioners, to be declared on the label followed by the statement "used as needed". The petitioner concludes that adoption of these proposals would provide more informative labeling by disclosing to consumers the ingredients present and their function, without unduly lengthening the label, and would provide bakers the flexibility needed to produce quality products without the cost of frequent label changes.

The full petitions are on file with the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857 and may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

In addition to these petitions, the agency has received a request for an advisory opinion (Docket No. 77A–0243) concerning the use of the collective names "dough conditioners", "yeast nutrients", and "leavening", when followed by a parenthetical listing of the specific dough conditioners, yeast nutrients, or leavening agents used. The request for this advisory opinion contained arguments similar to those in the petitions.

The agency has responded to this request by issuing an advisory opinion stating that:

> Since the labeling practices suggested do not result in any less ingredient information being provided to the consumer, the agency is of the opinion that for the purposes of § 101.4(b)(2):
>
> (1) Ingredients that act as leavening agents in a food may be declared in the ingredient statement in the order of predominance appropriate for the total of all leavening agents in the food by stating the specific common or usual name of each individual leavening ingredient in descending order of its predominance in parentheses following the collective name "leavening", e.g., "leavening (baking soda, monocalcium phosphate, and calcium carbonate)".
>
> (2) Ingredients that act as yeast nutrients in a food may be declared in the ingredient statement in the order of predominance appropriate for the total of all yeast nutrients by stating the specific common or usual name of each individual yeast nutrient in descending order of predominance in parentheses following the collective name "yeast nutrients", e.g., "yeast nutrients (calcium sulfate and ammonium phosphate)".
>
> (3) Ingredients that act as dough conditioners in a food may be declared in the ingredient statement in the order of predominance appropriate for the total of all dough conditioners in the food by stating the specific common or usual name of each individual dough conditioner in its descending order of predominance in parentheses following the collective name "dough conditioners", e.g., "dough conditioners (L-cysteine, ammonium sulfate)".

A copy of the request for an advisory opinion and the agency's response are also on file in the office of the Hearing Clerk.

The Commissioner has considered both of the petitions submitted by ABA and concludes that the petitions contain sufficient grounds to warrant publication of a proposed regulation. The Commissioner is of the opinion, however, that the requested exemption should not be limited to products conforming to a definition and standard of identity for bakery products. Consequently, the Commissioner is proposing an amendment to § 101.4 to provide that ingredients that act as dough conditioners, yeast nutrients, or leavening agents may be listed by their specific common or usual names in the ingredient statement in parentheses following the appropriate collective names "leavening", "yeast nutrients", or "dough conditioners". The exemption stated in this manner will apply to all foods utilizing these functional ingredients.

The Commsisioner recognizes that there has been widespread use of the collective names "dough conditioners", "yeast nutrients", and "leavening" in describing these functional ingredients of bakery proudcts. The Commissioner also agrees that the listing of these ingredients together following the appropriate collective term will give additional information to consumers and still provide complete ingredient disclosure for consumers.

The Commissioner advises that the collective name "leavening" is understood to mean any safe and suitable food ingredient or combination of ingredients incorporated into a dough or batter for the purpose of producing carbon dioxide in baked goods to impart texture. The collective name "yeast nutrients" is understood to mean any safe and suitable food ingredient or combination of ingredients used solely for the purpose of promoting growth and activity in yeast-leavened dough products. The collective name "dough conditioners" is understood to mean any safe and suitable food ingredient, or combination of ingredients, used to modify the rheological characteristics of a dough either by directly or indirectly acting on the gluten or by modifying the water absorption capacity of the dough.

On the assumption that the manufacturers are unable to predict in advance the specific dough conditioners, yeast nutrients, and leavening agents to be used in a particular food and they are unable to maintain a uniform quantity of these ingredients in a formulation because of raw material variation, the Commissioner is proposing that the specific dough conditioners, yeast nutrients, and leavening agents need not be listed in descending order of predominance.

In addition, the Commissioner is proposing that ingredients that act as dough conditioners, yeast nutrients, or leavening agents in foods, but which are used intermittently in foods, may be declared in the ingredient statement even though they may not be present in the finished food, provided the ingredients are identified by words indicating that they may not be present, such as "dough conditioners (ammonium chloride and/or L-cysteine)" or "dough conditioners (one or more of the following: Ammonium chloride, L-cysteine, potassium bromate)".

Any ingredient that may act as a leavening agent, dough conditioner, or yeast nutrient but which is added for other purposes (e.g., as a preservative or an enrichment) must be listed separately in its own order of predominance because it performs a function other than that implied under the collective names "dough conditioners", "yeast nutrients", or "leavening".

The Commissioner is of the opinion that the proposed exemption from ingredient labeling for foods will provide sufficient flexibility for the baking industry while retaining complete ingredient disclosure for consumers. Furthermore, because the proposed exemption is a general labeling provision applicable to both standardized and nonstandardized foods, there is no need to amend individual standards of identity.

Other petitions have been received concerning the declaration of sweeteners and nutrients (vitamins and minerals), requesting that such ingredients be treated in a similar manner to that proposed here for "dough conditioners", "yeast nutrients", and "leavening". The Commissioner notes that the label declaration of sweeteners and nutrients was not affected by revocation of TC–94 and these ingredients are widely used in foods other than bakery products. These petitions are under active review within the agency but are not dealt with in this proposal. Manufacturers, therefore, will be expected to declare these ingredients by their common or usual names in order of predominance in accordance with § 101.4.

EFFECTIVE DATE

The effective date for compliance with the existing ingredient labeling requirements of § 101.4 is January 1, 1978. However, this proposal may have a bearing on how manufacturers are required to list certain ingredients in bakery products. To impose new labeling requirements on manufacturers while at the same time proposing to amend such requirements would be unreasonable and not in the consumers' best interest. Therefore, the Commissioner advises that, pending the issuance of a final regulation ruling on this proposal, FDA will not initiate regulatory action against any food product on the basis of improper ingredient declaration of dough conditioners, yeast nutrients, or leavening agents, provided such ingredient declarations are in accordance with this proposal.

The Commissioner proposes that the effective date of any final regulation ruling on this proposal be the date of publication of such final regulation in the FEDERAL REGISTER unless the final regulation differs from this proposal, in which case a reasonable period will be provided for labeling revisions.

The Commissioner has carefully considered the environmental effects of the proposed regulation and, because the proposed action will not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. A copy of the environmental impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201, 403, 701(a), 52 Stat. 1040–1042 as amended, 1047–1048 as amended, 1055 (21 U.S.C. 321, 343, 371(a))) and under authority delegated to the Commissioner (21 CFR 5.1), it is proposed that Part 101 be amended in § 101.4 by adding new paragraphs (b) (16), (17), and (18) to read as follows:

§ 101.4 Food; designation of ingredients.

* * * * * * *

(b) * * *

(16) Ingredients that act as leavening agents in food may be declared in the ingredient statement by stating the specific common or usual name of each individual leavening agent in parentheses following the collective name "leavening", e.g., "leavening (baking soda, monocalcium phosphate, and calcium carbonate)". The listing of the common or usual name of each individual leavening agent in parentheses shall be in descending order of predominance: *Except*, That if the manufacturer is unable to adhere to a constant pattern of leavening agents in the product, the listing of individual leavening agents need not be in descending order of predominance. Leavening agents not present in the product may be listed if they are sometimes used in the product. Such ingredients shall be identified by words indicating that they may not be present, such as "or", "and/or", "contains one or more of the following:".

(17) Ingredients that act as yeast nutrients in foods may be declared in the ingredient statement by stating the specific common or usual name of each individual yeast nutrient in parentheses following the collective name "yeast nutrients", e.g., "yeast nutrients (calcium sulfate and ammonium phosphate)". The listing of the common or usual name of each individual yeast nutrient in parentheses shall be in descending order of predominance: *Except*, That if the manufacturer is unable to adhere to a constant pattern of yeast nutrients in the product, the listing of the common or usual names of indivdual yeast nutrients need be in descending order of predominance. Yeast nutrients not present in the product may be listed if they are sometimes used in the product. Such ingredients shall be identified by words indicating that they may not be present, such as "or", "and/or", or "contains one or more of the following:".

(18) Ingredients that act as dough conditioners may be declared in the ingredient statement by stating the specific common or usual name of each individual dough conditioner in parentheses following the collective name "dough conditioner," e.g., "dough conditioners (L-cysteine, ammonium sulfate)". The listing of the common or usual name of each

V 42166 AUG 26 77 UMI

dough conditioner in parentheses shall be in descending order of predominance: *Except*, That if the manufacturer is unable to adhere to a constant pattern of dough conditioners in the product, the listing of the common or usual names of individual dough conditioners need not be in descending order of predominance. Dough conditioners not present in the product may be listed if they are sometimes used in the product. Such ingredients shall be identified by words indicating that they may not be present, such as "or", "and/or", or "contains one or more of the following:".

* * * * *

Interested persons may, on or before October 25, 1977, submit to the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

The Food and Drug Administration has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A–107. A copy of the inflation impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Dated: August 22, 1977.

DONALD KENNEDY,
Commissioner of Food and Drugs.

DEPARTMENT OF LABOR

Office of the Secretary

[29 CFR Part 5]

LABOR STANDARDS PROVISIONS APPLICABLE TO CONTRACTS COVERING FEDERALLY FINANCED AND ASSISTED CONSTRUCTION (ALSO LABOR STANDARDS PROVISIONS APPLICABLE TO NONCONSTRUCTION CONTRACTS SUBJECT TO THE CONTRACT WORK HOURS AND SAFETY STANDARDS ACT)

AGENCY: Wage and Hour Division, Labor.

ACTION: Proposed rule.

SUMMARY: The variation of the Contract Work Hours and Safety Standards Act which now permits 8 hours a day and 48 hours a week work by contractors providing nursing homecare of veterans before overtime is due is proposed to be revised to permit 8 hours a day and 80 hours in a 14-day period to be worked before overtime is due. This change is to resolve the present conflict between an authorized variation of the Contract Work Hours and Safety Standards Act and the provisions of the Fair Labor Standards Act, which arose as a result of the 1974 amendments to the Fair Labor Standards Act.

DATES: Comments will be received on or before September 26, 1977.

ADDRESS: Written comments may be submitted to the Administrator, Wage and Hour Division, Room S–3502, New Department of Labor Building, 200 Constitution Avenue NW., Washington, D.C. 20210, on or before the above date, following which they will be evaluated and appropriate action taken.

FOR FURTHER INFORMATION CONTACT:

William G. Blackburn, Acting Branch Chief, Division of Government Contracts Regulations, Wage and Hour Division, Employment Standards, Administration, Room S–3518, New Department of Labor Building, 200 Constitution Avenue NW., Washington, D.C. 20210, telephone 202–523–7541.

SUPPLEMENTARY INFORMATION: The Contract Work Hours and Safety Standards Act requires payment of overtime for hours worked in excess of 8 in a day and 40 in a week. Section 105 of that Act authorizes the Secretary to prescribe regulations allowing reasonable variations under certain conditions. Pursuant to that authority, 29 CFR 5.14 (d) (3) was issued which permitted contractors providing nursing home care of veterans to be in compliance with the Contract Work Hours and Safety Standards Act by paying overtime for hours worked in excess of 8 in a day and 48 in a week. The Fair Labor Standards Act permitted such overtime and in the interest of consistency between the two Acts, the variation was issued.

In the 1974 amendments to the Fair Labor Standards Act, the applicable provision was changed to require such employers to pay overtime for hours worked in excess of 8 in a day and 80 in a 14-day period. As contractors must comply with the Fair Labor Standards Act (when it is applicable), the present variance may affirmatively mislead contractors who believe that by compliance with the Contract Work Hours and Safety Standards Act variation, they are complying with the Fair Labor Standards Act also. This proposed amendment will resolve the conflict between the variation and the Fair Labor Standards Act as amended.

This document was prepared under the direction and control of Warren D. Landis, Deputy Administrator, Wage and Hour Division, Room S–3502, New Department of Labor Building, 200 Constitution Avenue NW., Washington, D.C. 20210, telephone 202–523–8305.

It is proposed to amend § 5.14(d) (3) of 29 CFR Part 5 as follows:

§ 5.14 Limitations, variations, tolerances, and exemptions under the Contract Work Hours and Safety Standards Act.

* * * * *

(d) Variations * * *.

(3) In the performance of any contract entered into pursuant to the provisions of 38 U.S.C. 620 to provide nursing home care of veterans, no contractor or subcontractor under such contract shall be deemed in violation of Section 102 of the Contract Work Hours and Safety Standards Act by virtue of failure to pay the overtime wages required by such section for work in excess of 8 hours in any calendar day or 40 hours in the workweek to any individual employed by an establishment which is an institution primarily engaged in the care of the sick, the aged, or the mentally ill or defective who reside on the premises if, pursuant to an agreement or understanding arrived at between the employer and the employee before performance of the work, a work period of 14 consecutive days is accepted in lieu of the workweek of 7 consecutive days for the purpose of overtime compensation and if such individual receives compensation for employment in excess of 8 hours in any workday and in excess of 80 hours in such 14-day period at a rate not less than 1½ times the regular rate at which the individual is employed, computed in accordance with the requirements of the Fair Labor Standards Act of 1938, as amended.

This variance is found necessary and proper and in the public interest to avoid serious impairment of the conduct of Government business.

Signed at Washington, D.C., on this 19th day of August 1977.

XAVIER M. VELA,
Administrator.

[29 CFR Part 97]

MIGRANT AND SEASONAL FARMWORKERS

Closeout of Grants Under Title III–B of Economic Opportunity Act

AGENCY: Department of Labor.

ACTION: Proposed Rule.

SUMMARY: The Department of Labor is proposing to close out, as of December 31, 1977, all grants which it administers which were funded under Title III–B of the Economic Opportunity Act of 1964, as amended (Pub. L. 88–452, 78 Stat. 508, as amended), and were transferred to the Department by the Delegation of Authority approved July 6, 1973. The purpose of this proposed regulation is to provide for the closing out of grants which have continued for an extensive period of time.

DATES: Comments on the proposed rule are due by September 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Paul A. Mayrand, Chief, Division of Farmworkers Programs, Employment and Training Administration, Patrick Henry Building, Room 7122, 601 D Street NW., Washington, D.C. 20213.

SUPPLEMENTARY INFORMATION:

WHERE TO SEND COMMENTS

Comments on the proposed rule should be sent to the Assistant Secretary for Employment and Training, Attn: Pierce A. Quinlan, Administrator, Office of Comprehensive Employment Development, Room 6000, 601 D Street NW., Washington, D.C. 20213.

BACKGROUND

Title III–B of the Economic Opportunity Act of 1964, as amended, authorized programs for migrants and seasonal farmworkers. From 1964 until July 1973, these grants were administered by the Office of Economic Opportunity.

In a Delegation of Authority, approved by the President on July 6, 1973, the Director of Office of Economic Opportunity delegated to the Secretary of Labor the authority to administer migrant and seasonal farmworker grants under Title III–B of the Economic Opportunity Act.

Since 1973, when Congress enacted the Comprehensive Employment and Training Act, Congress has not appropriated any funds to the Department of Labor for the administration of migrant and seasonal farmworker programs under Title III–B of the Economic Opportunity Act. The Department has continued funding existing programs under Sec. 303 of the Comprehensive Employment and Training Act.

On January 4, 1975, Congress enacted Pub. L. 93–644, the Headstart, Economic Opportunity, and Community Partnership Act of 1974. That Act amended the Economic Opportunity Act in several ways. The Act created a Community Services Administration as the successor to the Office of Economic Opportunity. Section 9 of Pub. L. 93–644 amended Section 601 of the Economic Opportunity Act to give the Director of the Community Services Administration responsibility for administering Title III–B of the Economic Opportunity Act. Subsection (c) of the amended Section 601 prohibited the Director from delegating any of the responsibilities under Title III–B to any person who was not programmatically and administratively responsible to the Director. Subsection (d) (1) of the amended Section 601, however, stated that:

(d) (1) All official actions taken by the Director of the Office of Economic Opportunity, his designee, or any other person under the authority of the Economic Opportunity Act of 1964 which are in force on the date of the enactment of the Headstart, Economic Opportunity, and Community Partnership Act of 1974, and for which there is continuing authority under the provisions of this Act, shall continue in full force and effect until modified, superseded, or revoked by the Director.

The Department of Labor still retains authority to administer certain migrant and seasonal farmworker program grants initially funded under Title III–B of the Economic Opportunity Act.

A number of grants which were funded in past years under Title III–B of the Economic Opportunity Act have still not been closed out. Several of these grants contain no specific closing dates. Instead, they contain provisions which state that the grants will continue to remain open until the Department establishes a closing date by regulation. The purpose of this document, therefore, is to propose a regulation whereby all grants funded and administered by the Department of Labor under Title III–B of the Economic Opportunity Act will be given a closing date of December 31, 1977.

Accordingly, it is proposed to amend 29 CFR Part 97, Subpart C by adding the following new section:

§ 97.293 Closeout of migrant and seasonal farmworker program grants funded under Title III–B of the Economic Opportunity Act of 1964, as amended.

All programs funded under Title III–B of the Economic Opportunity Act, as amended, which were transferred to the Department of Labor by the Delegation of Authority approved by the President on July 6, 1973, shall terminate as of December 31, 1977. No grant funds shall be expended for such programs after December 31, 1977. At that time, all organizations holding funds under such grants shall close out such grants pursuant to the Department's instructions.

(Title III–B of the Economic Opportunity Act of 1964, as amended, Pub. L. 88–452, 78 Stat. 508, as amended; Delegation of Authority, 38 FR, July 19, 1973.)

Signed at Washington, D.C., this 1st day of August 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

[29 CFR Part 1601]

706 AGENCIES

Proposed Designation

AGENCY: Equal Employment Opportunity Commission.

ACTION: Proposed rule.

SUMMARY: The Equal Employment Opportunity Commission proposes to amend its regulations on designation of certain State and local agencies so that they may handle employment discrimination charges filed with the Commission. Proposed is a Local agency that requested deferral designation as provided under the authority of Title VII of the Civil Rights Act of 1964, as amended. The proposal would authorize the agency listed to process charges deferred to it by the Commission.

DATES: Comments must be received on or before September 9, 1977.

ADDRESS: Comments should be sent to: Equal Employment Opportunity Commission, State and Local Division, Office of Compliance Programs, Washington, D.C. 20506.

FOR FURTHER INFORMATION CONTACT:

Paul K. Lindsay (202) 634–6040, Desk Officer, Equal Employment Opportunity Commission, Office of Compliance Programs, State and Local Division, 2401 E Street, N.W., Room 4050, Washington, D.C. 20506.

V 42 166 AUG 26 77 7 UMI

SUPPLEMENTARY INFORMATION: Pursuant to § 1601.12(i), Title 29, Chapter XIV of the Code of Federal Regulations as revised and published in the FEDERAL REGISTER, 40 FR 3210M, January 20, 1975, the Equal Employment Opportunity Commission (hereinafter referred to as the Commission) proposes that the agency listed below be designated as a "706 Agency", § 1601.12. There are three (3) purposes for such designation: First, that the agency receives charges deferred by the Commission pursuant to Section 706 (c) and (d) of the Title VII of the Civil Rights Act of 1964, as amended; second, that the Commission accord "substantial weight" to the final findings and orders of the agency pursuant to § 1601.19(e); and third, to commence the 15-day period within which any person or organization may file written comments as provided for under § 1601.12(i)(1).

At the expiration of the 15-day period, the Commission may effect designation of the agency by publishing it as an amendment to § 1601.12(m).

The proposed "706 Agency" is as follows:

Sioux Falls (South Dakota) Human Relations Commission.

Written comments pursuant to this notice must be filed with the Commission on or before September 9, 1977.

Signed at Washington, D.C., this 24th day of August 1977.

ELEANOR HOLMES NORTON,
Chairman, Equal Employment Opportunity Commission.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[29 CFR Part 1960]

EVALUATION CRITERIA FOR FEDERAL AGENCY OCCUPATIONAL SAFETY AND HEALTH PROGRAMS

Request for Public Comment

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Cross Reference.

SUMMARY: The purpose of this document is to call attention to a document that is published in the Notices section of this issue and that announces the availability of the Federal Agency Safety Program Evaluation Guide.

That notice also requests comments on the possible need for amending 29 CFR Part 1960 as a result of the issuance of the Guide.

DATES: Comments must be received on or before October 25, 1977.

FOR FURTHER INFORMATION CONTACT:

Gerard F. Scannell, Director, Office of Federal Agency Safety Programs, Occupational Safety and Health Administration, U.S. Department of Labor, 2100 M Street NW., Room 156, Washington, D.C. 20210, Telephone: 202-653-5502.

Copies of the Guide also may be obtained from regional offices listed in FR Doc. 77-24406 published in the Notices section of this issue.

SUPPLEMENTARY INFORMATION: For the text of the notice described above see FR Doc. 77-24406 published in the Notices section of this issue.

Signed at Washington, D.C., this 18th day of August, 1977.

EULA BINGHAM,
Assistant Secretary of Labor.

LEGAL SERVICES CORPORATION

[45 CFR Part 1601]

AMENDMENT OF CORPORATION'S BY-LAWS

AGENCY: Legal Services Corporation.

ACTION: Proposed Amendments to By-Laws.

SUMMARY: Section 1601.44 of the Corporation's By-Laws, 45 CFR 1601.44, provides that the By-Laws may be amended by a vote of a majority of the Directors in office and requires, when feasible, that the proposed amendment shall have been published in the FEDERAL REGISTER at least thirty days before the meeting. Pursuant to this Section, the Legal Services Corporation hereby publishes notice that its Board of Directors will consider certain proposed amendments at the September 14, 1977, meeting.

DATES: Comments should be received by September 9, 1977.

ADDRESSES: Send comments to: Office of General Counsel, Legal Services Corporation, 733 15th Street NW., Suite 700, Washington, D.C. 20005.

FOR FURTHER INFORMATION CONTACT:

Linda Davis, 733 15th Street NW., Suite 700, Washington, D.C. 20005 (202) 376-5113.

SUPPLEMENTARY INFORMATION:

PROPOSED AMENDMENTS

A. The following amendments to the Corporation's By-Laws, Part 1601, will be required if either S. 1303, 95th Cong., 1st Sess. (1976), or H.R. 6666, 95th Cong., 1st Sess. (1976) is enacted. The provisions of Part 1601 dealing with notice of meetings and executive sessions would have to be amended to conform to the requirements of the Government in the Sunshine Act, 5 U.S.C. 552b, which both bills apply to the Corporation. The proposed changes in the By-Laws are contained in the following chart:

CURRENT PROVISION	PROPOSED CHANGES IN BY-LAWS	EXPLANATION
Subpart D—Meetings of Directors **§ 1601.15 Regular meetings.** (a) Regular meetings of the Board shall be held at least four times a year, on the first Friday of March, June, October, and December. If not a legal holiday, then on the next business day following, at 10 a.m., or at such other date and time as shall be determined by a majority of the members of the Board. Such regular meetings shall be held in the District of Columbia unless a majority of the members of the Board otherwise determine. Notice of the place of a regular meeting shall be mailed to each Director at least [five days] before the date of the meeting [or shall be telegraphed or delivered at least five days before such date]. (b) In the event a majority of the members of the Board agree to postpone a regular meeting, notice of such postponement shall be mailed to each Director at least five days before the scheduled date for such meeting or shall be telegraphed or delivered at least three days before such scheduled date. In the event a majority of the members of the Board agree to reschedule a regular meeting to a date in advance of the scheduled date for such meeting, notice of such rescheduling shall be mailed to each Director [at least twenty-one days before the rescheduled date for such meeting or shall be telegraphed or delivered at least fifteen days before such rescheduled date]. Every such notice shall specify the place, day, and hour of the rescheduled meeting.	Delete "five" and add: "seven." Alternative: delete entire phrase enclosed by brackets.	The Sunshine Act requires the Corporation to make "public announcement" at least seven days before the meeting. The change is not required by the Sunshine Act, but it seems reasonable to require that Directors receive notice at approximately the same time as the public announcement.
	Delete matter in brackets and insert in lieu thereof, "at the earliest practical time."	Under the Sunshine Act, the agency may change the time or place of a meeting "only if the agency publicly announces [the] change at the earliest practicable time."
§ 1601.16 Special meetings. Special meetings of the Board may be called by the Chairman of the Board or upon request from five or more members of the Board or from the President of the Corporation and four members of the Board [Notice of any such meeting shall be mailed to each Director at least seven days before the date on which the meeting is to be held or shall be telegraphed or delivered at least three days before such date]. Every such notice shall specify the place, day, and hour of the meeting.	Delete material in brackets. Add: "Unless a majority of the Board determines by a recorded vote that Corporation business requires a meeting to be called at an earlier date, notice of any special meeting shall be mailed to each director at least seven days before the date on which the meeting is to be held."	Under 552b(e)(1), the Corporation would be required to make a public announcement seven days in advance of a special meeting unless a majority of the Board determined by a recorded vote that Corp. business required a meeting to be called at an earlier date.

V 42 N 166 AUG 26 77 UMI

CURRENT PROVISION	PROPOSED CHANGES IN BY-LAWS	EXPLANATION
§ 1601.17 Notice and waiver of notice.	No change.	
§ 1601.18 Agenda. For each regular and special meeting, the Chairman of the Board or the President of the Corporation shall cause to be prepared an agenda of matters to be discussed at the meeting and shall make reasonable effort to mail the agenda to all Directors as far in advance of the meeting as practicable. [When feasible, the agenda shall be posted at the offices of the Corporation, in an area to which the public has access, at least three days before the date on which the meeting is to be held. Any matters appearing on the agenda which the Chairman of the Board or the President of the Corporation believes should be discussed in an executive session in accordance with § 1601.22 shall be so noted.] Matters not appearing on the agenda may also be discussed and acted upon at the meeting[,] but the Chairman of the Board or the President of the Corporation shall endeavor to include as many matters on the agenda as can be reasonably anticipated.	Delete matter in first set of brackets and insert in lieu thereof, "Public notice of the agenda shall be given in the manner prescribed by the Corporation Regulation implementing Section 552b of Title 5 United States Code. Delete matter in second set of brackets and insert in lieu thereof, "Matters not appearing on the agenda may also be discussed and acted upon in the manner prescribed by the Corporation Regulation implementing Section 552b of Title 5, United States Code,"	Before new matters can be added to the agenda, the Sunshine Act requires (1) a recorded vote by a majority of the Board that Corporation business so requires and that no earlier announcement of the change was possible, and (2) that the Corporation publicly announce any such change and the vote of each member upon the change at the earliest practicable time. Notice of changes in the agenda must be published in the Federal Register.
§ 1601.19 General notice. [Concurrently with the giving of notice to the Directors of any meeting of the Board or any rescheduling thereof, such notice shall be filed for publication in the FEDERAL REGISTER and posted at the offices of the Corporation in an area to which the public has access.] Reasonable effort shall be made to communicate such notice, at least three days before the meeting, to the chairman of each state advisory council appointed pursuant to section 1004(f) of the Act and to every recipient. [Failure to provide general notice in accordance with this Section shall] not affect the validity of Board action at such meeting.	Delete matter in brackets and insert in lieu thereof, "Public notice of any meeting of the Board or any rescheduling thereof shall be provided in the manner prescribed by the Corporation Regulation implementing Section 552b of Title 5, United States Code."	Under some circumstances, notice required for directors may not be as great as that required for the public -- some flexibility should be retained here. This makes clear that public notice is governed by the Sunshine Act.
§ 1601.20 Organization of directors meeting.	No change	

CURRENT PROVISION	PROPOSED CHANGES IN BY-LAWS	EXPLANATION
§ 1601.21 Quorum, manner of acting, and adjournment. (b) A majority of the Directors present at a duly convened meeting, whether or not they shall comprise a quorum, may temporarily adjourn the meeting. [Whenever a meeting is temporarily adjourned to a date not more than five business days following such adjournment, it shall not be necessary to give any notice of the adjourned meeting or of the business to be transacted thereat otherwise than by an announcement at the meeting at which such adjournment is taken.]	Delete matter in brackets. Substitute: "When a meeting is temporarily adjourned to a subsequent date, the Corporation shall publicly announce such change at the earliest practicable time."	

UMI

CURRENT PROVISION	PROPOSED CHANGES IN BY-LAWS	EXPLANATION
1601.22 Public meetings; executive sessions. (a) All meetings of the Board shall be open to the public unless two-thirds of the Directors eligible to vote determine that consideration of specific matter on a specific occasion shall be closed to the public. That part of a meeting closed to the public shall be known as an executive session. Agenda and non-agenda items may be considered in an executive session. An executive session shall consider only matter for which the required determination has been made. The chairman of the meeting shall announce the subject of the executive session prior thereto. (b) In determining whether an executive session is required the Board shall be governed by the principle that the public is entitled to the fullest information regarding the decision-making process of the Corporation consistent with the protection of personal privacy or with compelling interests of the Corporation or the public.	Delete in toto. Change heading to "Open Meetings; Closed Meetings" Substitute: "All meetings of the Board shall be open to the public except when closed in accordance with the Corporation Regulation implementing Section 552b of Title 5 of the United States Code.	The current section is superseded by the Sunshine Act. --the change in heading tracks the terminology of the Sunshine Act --under the Sunshine Act a majority of the Board may close a meeting only under specific exemptions.
§ 1601.23 Public participation.	No change.	

CURRENT PROVISION	PROPOSED CHANGES IN BY-LAWS	EXPLANATION
1601.24 Minutes. The minutes of each meeting of the Board, [including an executive session,] shall record the names of the Directors present, the actions taken, and the result of each vote. If there is a division on a vote, the minutes shall record the vote of each Director. [Minutes shall reflect discussions held in executive session, including as much information as possible about such discussions without compromising the purpose for which such meeting was closed to the public.] A copy of the minutes of each meeting shall be supplied to each member of the Board in advance of the next meeting and shall be presented for approval by the Board at such meeting. The minutes of each meeting shall be available for inspection by the public in the form supplied to, and in the form approved by, the Directors.	delete delete Add: "Records of all closed meetings shall be kept and made available to the public in accordance with the Corporation Regulation implementing Section 552b of Title 5, United States Code."	Under 552b(f)(1) of the Sunshine Act, the Corporation will be required to maintain a complete transcript or electronic recording for meetings closed under some of the exemptions. Under others (i.e., meetings relating to adjudicatory proceedings or civil actions) minutes may suffice. The Sunshine Act does not require either a transcript, recording, or minutes for an open meeting.
§ 1601.25 Action by directors without a meeting. Any action which may be taken at a meeting of the Board may be taken without a meeting if a consent in writing, setting forth the action so taken, is signed by all of the Directors and general notice of the proposed action is published in the manner prescribed by § 1601.19 on or before the date when such consents are first solicited. Any such action so taken shall be included on the agenda of the next meeting of the Board for discussion, ratification, or such other action as may be indicated by the circumstances.	Delete matter enclosed in brackets and insert in lieu thereof, "When practicable, public notice of the proposed action shall be given on or before the date when such consents are first solicited.	Notation procedure is permitted by the Sunshine Act. There is no notice requirement. §1601.19 procedures for notice are substantially altered by the Sunshine Act.

UMI

CURRENT PROVISION	PROPOSED CHANGES IN BY-LAWS	EXPLANATION
Subpart E—Committees **§ 1601.26 Establishment and appointment of committees.**	No change.	
§ 1601.27 Committee procedures. (a) Except as otherwise provided in these By-laws or in the resolution establishing the committee, a majority of the voting members thereof, or one-half of such members if their number is even, shall constitute a quorum: *Provided*, That if the Chairman of the Board is present, he may be counted in lieu of any absent voting member for quorum purposes. The vote of a majority of the voting members present at the time of a vote, if a quorum is present at such time, shall be the act of the committee. Meetings of each committee shall be called by the chairman of the committee or any two members of the committee, with notice thereof provided to each committee member including the Chairman of the Board. [An agenda shall not be required for a committee meeting, but shall be furnished with the notice when feasible.]	The requirements of the Sunshine Act will apply also to "subdivisions" of the Board. If we require posting of agenda as part of "public announcements" for regular Board meetings, it would be consistent to apply the same requirement to committees of the Board, in which event the matter enclosed in brackets should be deleted. An alternative would be to delete matter enclosed in brackets and add as the last paragraph of paragraph (b): "When practicable, the agenda for a committee meeting shall be furnished as part of the public notice."	
(b) Notice of a committee meeting shall be provided to members of the committee in the manner required for notice of special meetings of the Board by §§ 1601.16 and 1601.17(a). Notice may be waived in the manner described in § 1601.17(b). [When feasible, general] notice of a committee meeting shall be given in the manner described in [§ 1601.19] but failure to provide general notice shall not affect the validity of action at such committee meeting.	Delete "When feasible, general" and add in lieu thereof, "Public"; and delete "§1601.19" and add in lieu thereof, "the Corporation Regulation implementing Section 552b of Title 5, United States Code."	
(c) All meetings of a committee shall be open to the public unless a majority of the voting members of the committee, or one-half of such members if their number is even, determine that part or all of the meeting shall be in executive session closed to the public; provided that, in the case of a committee to which has been delegated the power of the Board to act on any matter, an executive session shall not be held with respect to such matter unless two-thirds of the committee members eligible to vote make such determination pursuant to the provisions of § 1601.22.	Delete all of paragraph (c) and insert in lieu thereof: "All meetings of a committee shall be open to the public unless a majority of voting members of the committee, or one-half of such members if their number is even, determines that part or all of the meeting may be closed in accordance with the Corporation Regulation implementing Section 552b of Title 5, United States Code."	

CURRENT PROVISION	PROPOSED CHANGES IN BY-LAWS	EXPLANATION
§ 1601.27 Committee procedures. (d) [Minutes] shall be kept of each committee meeting in the manner described in § 1601.24. The minutes shall be available for inspection by the public. (e) Any Director and the President of the Corporation shall have access to the records of any committee irrespective of whether he is a member of the committee.	Delete "Minutes" and Add "Records".	
§ 1601.34 The secretary. The Secretary shall (a) ensure that all notices are duly given in accordance with the Act and these By-laws; (b) be the custodian of the seal of the Corporation and affix such seal to all documents the execution of which is authorized by the Board or by any officer or employee of the Corporation to whom the power to authorize the affixing of such seal shall have been delegated; (c) keep, or cause to be kept, in books provided for the purpose, minutes of the meetings of the Board and of each committee of the Board; (d) ensure that the books, reports, statements, and all other documents and records required by law are properly kept and filed; (e) sign such instruments as require the signature of the Secretary; and (f) in general, perform all the duties incident to the office of the Secretary and such other duties as from time to time may be assigned to him.	Delete ";" at end of paragraph (c) and add: "and all other records of meetings of the Board which may be required by law;".	The Sunshine Act requires transcripts or electronic recordings to be kept of some closed meetings.

UMI

B. The following non-substantive, technical amendments to the By-Laws are proposed in order to remove unnecessary, misleading, or ambiguous provisions:

Section 1601.14, regarding compensation of Directors, should be amended to delete references to rates established for consultants to the Federal Government, since such rates are not uniform. The amended provision would read:

§ 1601.14 **Compensation.**

Directors shall be entitled to receive compensation at appropriate rates prescribed by th Board, not in excess of the per diem equivalent of the rate of level V of the Executive Schedule specified from time to time in section 5316 of title 5, United States Code, for their services as members of the Board or of any committee thereof and reimbursement for travel, subsistance, and other expenses necessarily incurred in connection therewith. * * *

Section 1601.28 should be amended by inserting in the third sentence thereof, between "appointed" and "by", "by the Presidet or".

The amended provision would read:

§ 1601.28 **Officers.**

The officers of the Corporation shall be a President, a Secretary, a Treasurer, a Comptroller, and such other officers as the Board determines to be necessary. The President of the Corporation shall be appointed by a majority of the Directors in office. Other officers shall be appointed by the President or by the Board after consultation with the President of the Corporation. * * *

Section 1601.29, concerning the election, term of office and qualifications for officers, should be amended to eliminate the requirement that officers be appointed annually.

The amended provision would read:

§ 1601.29 **Election, term of office and qualifications.**

The officers of the Corporation shall be appointed whenever a vacancy arises. * * *

Section 1601.30 should be amended by inserting, between "removed" and "by", "by the President or". The amended provision would read:

§ 1601.30 **Removal.**

The President of the Corporation may be removed by a majority of the directors in office, and any other officer may be removed by the President or by the Board pursuant to the quorum and voting provisions of § 1601.21 but such removal shall be without prejudice to the contract rights, if any, of the person so removed.

§ 1601.33 [Amended]

Section 1601.33(c), regarding the authority of the President, should be amended by inserting at the end thereof "The President may delegate whatever duties he deems appropriate for delegation.""

§ 1601.35 [Amended]

Section 1601.35, regarding the authority of the Treasurer, should be amended by inserting at the end thereof "The Treasurer may delegate whatever duties he deems appropriate for delegation."

Section 1601.37, dealing wih the compensation of officers, should be amended by deleting from the first sentence thereof "or a Vice President", and inserting, after "by a committee", "or by the President".

The amended provision would read:

§ 1601.37 **Compensation.**

The compensation of the officers shall be fixed from time to time by the Board or in the case of an officer other than the President, by a committee, or by the President or another officer to whom such authority is delegated, at rates not in excess of amounts permitted by law. * * *

ALICE DANIEL,
General Counsel,
Legal Services Corporation.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 61]

[Docket No. 21005]

INTERNATIONAL TELEX SERVICE WITH DOMESTIC TELEX AND TWX SERVICES

Order Extending Time for Filing Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Extension of time.

SUMMARY: This Order extends, at the request of TRT Telecommunications Corporation and ITT World Communications Inc., the time for filing Replies in Docket No. 21005, the Commission's inquiry into the rate structure for international telex service.

DATE: Reply comments must be received on or before September 12, 1977.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

John F. Copes, International Programs Staff, Common Carrier Bureau, 202-632-3214.

Adopted: August 19, 1977.

Released: August 23, 1977.

Order. In the matter of Interface of the International Telex Service with the Domestic Telex and TWX Service, Docket No. 21005.

1. By order in this proceeding, released August 3, 1977, we set August 22, 1977 as the date for filing replies in the above referenced proceeding. We have before us for consideration Motions for Extension of Time filed by TRT Telecommunications Corp. on August 9, 1977, and by ITT World Communications Inc. on August 12, 1977, in which the petitioners seek extension until September 12 and September 21, 1977, respectively, of the time to file replies. In support of their motions, the petitioners cite the press of other regulatory matters and the absence of key personnel due to the vacation period. The requests were not opposed.

2. We believe that an extension of three weeks will be reasonable and will not unduly delay the resolution of this proceeding. We note that no party has objected to the grant of an extension and it appears that no one will be prejudiced thereby.

3. *Accordingly, it is ordered*, That the time for filing Reply Comments in this proceeding is extended until September 12, 1977.

4. *It is further ordered*, That, pursuant to § 0.303 of the Commission's rules, the above-referenced Motions of ITT World Communications Inc. and TRT Telecommunications Corp. are granted, to the extent provided for herein, but otherwise are denied.

FEDERAL COMMUNICATIONS COMMISSION,
W. RANDOLPH YOUNG,
Acting Chief,
Common Carrier Bureau.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[50 CFR Part 32]

HUNTING

Oxbow National Wildlife Refuge, Massachusetts

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: Notice is hereby given that it is proposed to add Oxbow National Wildlife Refuge, Massachusetts, to the lists of refuge areas open for the hunting of migratory game birds, upland game and big game. The Director has determined that this action is compatable with the major purposes for which this refuge was established and that there is public demand for additional recreational opportunity. Hunting will provide additional public recreational opportunity subject to annual special regulations.

DATES: Comments must be received on or before September 15, 1977.

ADDRESS: Comments may be addressed to the Director (FWS/RF), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

Ralph Town, Division of National Wildlife Refuges, U.S. Fish and Wildlife Service, Washington, D.C. 20240, telephone 202-343-4305.

SUPPLEMENTARY INFORMATION: Ralph H. Town is also the primary author of this proposed rule. Pursuant to the requirements of section 102(2)(C), of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) an environmental assessment has been prepared on this proposal, which is available for public inspection and copying at Room 2340, Department of the Interior, 18th and C Streets NW., Washington, D.C. 20240, or by mail, addressing the Director at the address given above. Based on this assessment, the Director has determined that this rulemaking does not constitute a major Federal action signficantly affecting the human environment.

Special circumstances are involved in the promulgation of this rulemaking which limit the amount of time which the Service can allow for public comment. Specifically, this is a cooperative program with the State which will manage the hunting. Opening dates for State hunting seasons are rapidly approaching and the public interest would not be served by delaying the opening of the refuge unnecessarily. Nevertheless, it is the policy of the Department of the Interior whenever practicable to afford the public an opportunity to participate in the rulemaking process. Therefore, interested persons may submit written comments, suggestions or objections regarding the proposal to the Director by September 15, 1977. All relevant comments received will be considered by the Director prior to the issuance of a final rulemaking.

The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107. Accordingly, it is proposed to amend 50 CFR 32 by the addiiton of Oxbow National Wildlife Refuge to the following sections;

§ 32.11 **List of open areas; migratory game birds.**

MASSACHUSETTS

Oxbow National Wildlife Refuge.

§ 32.21 **List of open areas; upland game.**

MASSACHUSETTS

Oxbow National Wildlife Refuge.

§ 32.31 **List of open areas; big game.**

MASSACHUSETTS

Oxbow National Wildlife Refuge.

Dated: August 23, 1977.

LYNN A. GREENWALT,
Director,
Fish and Wildlife Service.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Public Meeting

Notice is hereby given, pursuant to the Federal Advisory Committee Act, Pub. L. 92-463, that the membership of the Administrative Conference of the United States, which makes recommendations to administrative agencies, to the President, Congress, and the Judicial Conference of the United States regarding the efficiency, adequacy, and fairness of the administrative procedures used by administrative agencies in carrying out their porgrams, will meet in Plenary Session on Thursday, September 15, 1977 at 1:45 p.m. and on Friday, September 16, 1977 at 9:45 a.m. in Hearing Room B of the Interstate Commerce Commission, 12th Street and Constitution Avenue NW., Washington, D.C.

The Conference will consider the following matters:

1. A proposed recommendation regarding legislative veto of administrative regulations.

2. A proposed recommendation regarding judicial review of actions of the U.S. Customs Service.

3. A proposed recommendation regarding ex parte communications in informal rulemaking proceedings.

Plenary Sessions of the Conference are open to the public. Further information on the meeting, including copies of proposed recommendations and supporting reports, may be obtained from the Office of the Chairman, 2120 L Street NW., Suite 500, Washington, D.C. 20037, telephone 202-254-7020.

Dated: August 22, 1977.

JOSEPH B. SCOTT,
Executive Director.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

CASH IN LIEU OF COMMODITIES

Value of Donated Commodities for Fiscal Year 1977

The Department issued a notice (42 FR 14137) on March 15, 1977, to comply with section 6(b) of the National School Lunch Act, as amended (7 U.S.C. 1755 (b)), and the regulations governing Cash In Lieu of Commodities (7 CFR Part 240) which require the Secretary of Agriculture to make an estimate every February 15 of the value of agricultural commodities and other foods that will be delivered during the fiscal year for school food service programs under the provisions of section 6 of the National School Lunch Act, as amended (7 U.S.C. 1755); section 416 of the Agriculture Act of 1949, as amended (7 U.S.C. 1431); and of section 32 of the Act of August 24, 1935, as amended (7 U.S.C. 612c). It was determined at that time that the value of commodities and other foods that were to be delivered to school food service programs during fiscal year 1977 would not be less than 90 per centum of the value of the deliveries initially programmed for this year. Therefore, there was no cash payment under section 6(b) on March 15 for fiscal year 1977.

Section 6(e) of the National School Lunch Act, as amended (7 U.S.C. 1755 (e)), requires a minimum national average value per lunch of donated foods or payment of cash in lieu thereof. For fiscal year 1977, this national average value has been established at 11.75 cents per lunch (41 FR 29893) and, as provided in § 240.3(c) of the regulations, a determination was made as of August 1, 1977, that a cash payment would be necessary to meet this requirement.

The Secretary has determined that a shortfall of $34,848,000 will occur in the value of foods to be delivered during the fiscal year ending September 30, 1977, to States which have been receiving donated commodities for use in schools participating in the National School Lunch Program. Notice is hereby given, therefore, that the Secretary will make cash payments to such States not later than September 1 for the fiscal year ending September 30, 1977, in a total amount of $34,848,000 to compensate for such shortfall. These cash payments will be made upon the terms and conditions contained under the Cash In Lieu of Commodities regulations (7 CFR Part 240). Particular attention is called to the following provisions of the regulations:

(1) The share of the total funds to be paid to any State shall bear the same ratio to the total of such payments to all such States as the total number of lunches reported served meeting the requirements of § 210.10 of the National School Lunch Program regulations (7 CFR Part 210) in participating schools in such State from July 1, 1976 through June 30, 1977, plus the estimated number of lunches to be served the following three months based on the lunches served during July, August, and September 1976, bears to the total of all such lunches served in all such States during that period. *Provided, however*, That in any State in which the Food and Nutrition Service Regional Office, hereinafter referred to as FNSRO, administers school food service programs in the nonprofit private schools, the Secretary shall withhold from the funds so determined an amount that bears the same ratio to the total of such funds as the total number of lunches reported served meeting the requirements of § 210.10 of the National School Lunch Program regulations in participating nonprofit private schools in such State bears to the total of such lunches served in all the schools in such State during that period.

(2) The funds to be made available in accordance with this notice shall be distributed to States by means of a Department of the Treasury check. The total funds to be paid to each State are shown in the table below.

(3) State agencies and FNSROs shall promptly and equitably distribute the funds received under this notice to school food authorities participating in the National School Lunch Program.

(4) On or before disbursing funds to participating schools, State agencies and FNSROs shall notify such schools that such funds shall be expended only for the purchase of agricultural commodities and other foods to be used in their nonprofit school lunch program during the fiscal year in which the funds are made available.

Apportionment of funds for cash payments to State agencies and regional offices in lieu of food commodities programmed for distribution to schools during fiscal year 1977:

Rural Electrification Administration

ARIZONA ELECTRIC POWER COOPERATIVE, INC., BENSON, ARIZONA

Proposed Loan Guarantee

Under the authority of Pub. L. 93-32 (87 Stat. 65) and in conformance with applicable agency policies and procedures as set forth in REA Bulletin 20-22 (Guarantee of Loans for Bulk Power Supply Facilities), notice is hereby given that the Administrator of REA will consider providing a guarantee supported by the full faith and credit of the United States of America for a loan in the approximate amount of $29,000,000 to Arizona Electric Power Cooperative, Inc., Benson, Arizona. These loan funds will provide AEPCO with the necessary financing required to initially develop the Gamerco Coal Properties located near Gallup, New Mexico. The output of this coal facility will be used as the fuel supply for AEPCO's two new coal-fired generating units, which are presently under construction at the cooperative's existing Apache Station.

Legally organized lending agencies capable of making, holding, and servicing the loan proposed to be guaranteed may obtain information on the proposed project, including the engineering and economic feasibility studies and the proposed schedule for the advances to the borrower of the guaranteed loan funds from Mr. Jerry Flanders, Assistant Manager, Arizona Electric Power Cooperative, Inc., P.O. Box 670, Benson, Arizona 85602.

In order to be considered, proposals must be submitted on or before September 26, 1977 to Mr. Flanders. The right is reserved to give such consideration and make such evaluation or other disposition of all proposals received, as AEPCO and REA deem appropriate. Prospective lenders are advised that the guaranteed financing for this project is available from the Federal Financing Bank under a standing agreement with the Rural Electrification Administration.

Copies of REA Bulletin 20-22 are available from the Director, Information Services Division, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250.

Dated at Washington, D.C., this 19th day of August 1977.

DAVID A. HAMIL,
Administrator, Rural Electrification Administration.

[Docket No. S-571]

STATES STEAMSHIP CO.

Application

Notice is hereby given that States Steamship Company, 320 California Street, San Francisco, California 94104, has applied, by letter dated August 5, 1977, for a one-year operating-differential subsidy agreement (ODSA) pursuant to Title VI (46 U.S.C. 1171-1183) of the Merchant Marine Act, 1936, as amended (the Act) to provide the same service on Trade Route No. 29 (U.S. Pacific/Far East) that States is presently providing. If the application is granted, the short-term contract would begin upon the termination of States' present ODSA, Contract No. FMB-62, presently due to expire on December 31, 1977, and run until the earlier of (1) December 31, 1978, including voyages in progress that date, or (2) completion of the administrative processing of States' application for a twenty-year contract (Docket No. S-447), to replace Contract No. FMB-62. The number of vessels, service description and sailing maxima under the proposed one-year contract will be the same as in States' present contract, No. FMB-62, i.e.,

Vessels:

		Sailing maximum
5	C4-S-69b breakbulk vessels.	
4	C7-S-95a Ro/Ro vessels, two of which are currently in service and two are expected to enter service, one in August 1977 and the other at a later date.	
Service, (briefly described):		
Line A, U.S. Pacific Northwest/Far East		16
Line B, U.S. Pacific/Far East		41
Line C, California/Far East		38

Interested parties may inspect this application in the Office of the Secretary, Maritime Subsidy Board, Room 3099B, Department of Commerce Building, 14th and E Streets, NW., Washington, D.C. 20230.

Any person having an interest in such application who desires to offer views and comments thereon for consideration by the Maritime Subsidy Board should submit them in writing, in triplicate, to the Secretary, Maritime Subsidy Board, Washington, D.C. 20230, by the close of business on September 12, 1977.

The Maritime Subsidy Board will consider these views and comments, and take such action with respect thereto as may be deemed appropriate. (Catalog of Federal Domestic Assistance Program No. 11.504, Operating-Differential Subsidies (ODS)).

Dated: August 23, 1977.

By order of the Maritime Subsidy Board.

JAMES S. DAWSON, Jr.,
Secretary.

[FR Doc.77-24799 Filed 8-25-77;8:45 am]

[Docket No. A-118]

DOMESTIC MANUFACTURE OF SLOW SPEED DIESEL ENGINES FOR SHIP PROPULSION

By notice published in the FEDERAL REGISTER of November 9, 1976 (41 FR 49512), the Maritime Administration ("MarAd") announced that it was reconsidering its previously announced policy that for a period of time reasonably required for the development of domestic sources for slow speed marine diesel engines, it would not withhold approval, for purposes of Title V Construction-Differential Subsidy, of vessel designs incorporating slow speed diesels solely on the basis of the presence of foreign components therein. Such policy was announced in the FEDERAL REGISTER on May 7, 1976 (41 FR 18896). The November 9, 1976 publication indicated that comments relevant to reconsideration were invited and that the basis for the Board's final decision on reconsideration would be published in the FEDERAL REGISTER.

On August 9, 1977, the Maritime Subsidy Board rendered its Final Opinion and Order on Reconsideration in this matter, designated Docket No. A-118. The Board made the following findings and conclusions with reference to the Merchant Marine Act, 1936, as amended:

1. The Board has discretionary authority under the "so far as practicable" exception of section 505 of the Act to permit purchase and use of foreign components under the CDS program whenever it finds (a) facts and circumstances which reasonably justify the purchase and use of foreign components, and (b) that such purchase and use would not do violence to the overall intendment of the Act.

2. Facts and circumstances justifying exercise of the "so far as practicable" exception include the lack of an exclusively domestic manufactured slow speed diesel, the difference in design and performance characteristics of the slow speed diesel and other propulsion systems, the advantages of fuel rate consumption and operating costs of the slow speed diesel over other propulsion plants at certain power ranges, and therefore the impracticality of different, less advantageous 100% domestic manufactured power plants in certain power ranges.

3. There is every reasonable expectation that eventually permitting certain limited purchase and use of foreign components in slow speed diesel engines under the CDS program would further and not contravene the purposes, objectives and policy of sections 101, 210, and 505 of the Act.

4. Therefore, the policy contained in the Federal Register Notice of May 7, 1976, entitled Domestic Manufacture of Slow Speed Diesel Engines for Ship Propulsion (41 FR 18896), is reaffirmed, but with two modifications: (i) The words "60 percent" in the third paragraph are modified to read "approximately 60 per cent," but a supplier will be permitted a reasonably higher percentage for initial units if it can be convincingly shown that the higher percentage is essential for its participation and that subsequent units will have a portionately lesser percentage of foreign components. (ii) Any approved manufacturing plan will provide, among other things, that the manufacturer will cooperate in establishing a training course at the federal merchant marine academy for midshipmen and existing sea-going personnel, complete with appropriate training equipment.

Copies of the Board's Final Opinion and Order in Docket No. A-118, served August 12, 1977, may be obtained from the Secretary, Maritime Administration, U.S. Department of Commerce, Room 3099B, 14th Street and Constitution Avenue NW., Washington, D.C. 20230.

Dated: August 23, 1977.

So ordered by the Maritime Subsidy Board/Maritime Administration.

JAMES S. DAWSON, Jr.,
Secretary.

[FR Doc.77-24853 Filed 8-25-77;8:45 am]

National Oceanic and Atmospheric Administration

MYSTIC MARINE LIFE AQUARIUM

Issuance of Permit To Take Marine Mammals

On April 26, 1977, notice was published in the FEDERAL REGISTER (42 FR 21306), that an application had been filed with the National Marine Fisheries Service by Mystic Marinelife Aquarium, P.O. Box 190, Mystic, Conn. 06355, for a Permit to take two (2) Atlantic bottlenosed dolphins (*Tursiops truncatus*); and to maintain one (1) beached/stranded harbor porpoise (*Phocoena phocoena*) for the purpose of public display.

The harbor porpoise was taken, under the provisions of the Act, for humane purposes and maintained at the facility until the animal was rehabilitated. The National Marine Fisheries Service has determined that it would be in the best interest and well-being of the harbor propoise to remain in captivity.

Notice is hereby given that on August 15, 1977, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the National Marine Fisheries Service issued a Permit for both the above taking and maintaining to Mystic Marinellfe Aquarium subject to certain conditions set forth therein. The Permit is available for review by interested persons in the following offices:

Director, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.
Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester, Mass. 01930.
Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Gandy Boulevard St., Petersburg, Fla. 33702.

Dated: August 15, 1977.

JOSEPH W. SLAVIN,
Acting Deputy Director, National Marine Fisheries Service.

[FR Doc.77-24758 Filed 8-25-77;8:45 am]

VIRGINIA INSTITUTE OF MARINE SCIENCE

Issuance of Endangered Species Permits

On May 10, 1977, notice was published in the FEDERAL REGISTER, (42 FR 23775) that applications had been filed with the National Marine Fisheries Service by Virginia Institute of Marine Science (VIMS) Gloucester Point, Va. 23062, and North Carolina Department of Natural and Economic Resources, Division of Marine Fisheries, P.O. Box 769, Morehead City, N.C. 28557, for Scientific Purposes Permits to take and inspecified number of shortnose sturgeon (*Acipenser brevirostrum*), an endangered species of fish.

Notice is hereby given that on August 17, 1977, The National Marine Fisheries Service issued Scientific Purposes Permits, as authorized by the Endangered Species Act of 1973 (16 U.S.C. 1531-1543); to VIMS and North Carolina Department of Natural and Economic Resources, subject to certain conditions set forth therein.

The Permits authorize the Holder to take shortnose sturgeon (*Acipenser brevirostrum*) by conducting the following activities: (1) Capture, weigh, measure, tag, and release sturgeon incidentally taken by commercial fishery operations in the Albemarle Sound area and the Chesapeake Bay and its tributaries; (2) capture, measure, weigh, tag and release sturgeon in the Atlantic Ocean off North Carolina and Virginia; and (3) retain for scientific purposes, of all captured specimens which inadvertently die.

Issuance of these Permits, as required by the Endangered Species Act of 1973, is based on a finding that such Permits; (1) were applied for in good faith; (2) will not operate to the disadvantage of the endangered species which are the subject of the Permits; and (3) will be consistent with the purposes and policies set forth in Section 2 of the Endangered Species Act of 1972. These Permits were also issued in accordance with, and is subject to, Parts 220 and 222 of Title 50 CFR, the National Marine Fisheries Service regulations governing endangered species permits (39 FR 14357, November 27, 1974).

The Permits are available for review by interested persons in the following offices:

Director, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.
Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester, Mass. 01930.
Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Gandy Boulevard, St. Petersburg, Fla. 33702.

Dated: August 17, 1977.

JOSEPH W. SLAVIN,
Acting Deputy Director, National Marine Fisheries Service.

[FR Doc.77-24759 Filed 8-25-77;8:45 am]

GULF WORLD, INC.

Issuance of Permit To Take Marine Mammals

On April 26, 1977, notice was published in the FEDERAL REGISTER (42 FR 21306) that an application had been filed with the National Marine Fisheries Service by Gulf World, Inc., 15412 West Highway 98, Panama City Beach, Fla. 32407, for a permit to take five (5) Atlantic bottlenosed dolphins (*Tursiops truncatus*), five (5) California sea lions (*Zalophus californianus*) and five (5) harbor seals (*Phoca vitulina*).

Notice is hereby given that on August 15, 1977, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the National Marine Fisheries Service issued a Permit for the above taking to Gulf World, Inc., subject to certain conditions set forth therein. The Permit is available for review by interested persons in the following offices:

Director, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.
Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Gandy Boulevard, St. Petersburg, Fla. 33702.
Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, Calif. 90731.
Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester, Mass. 01930.

Dated: August 15, 1977.

JOSEPH W. SLAVIN,
Acting Deputy Director, National Marine Fisheries Service.

NORTH PACIFIC FISHERY MANAGEMENT COUNCIL'S SCIENTIFIC AND STATISTICAL COMMITTEE

Meeting

Notice is hereby given of a meeting of the North Pacific Fishery Management Council's Scientific and Statistical Committee established by section 302(g) of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265).

The North Pacific Fishery Management Council has authority, effective March 1, 1977, over fisheries within the fishery conservation zone adjacent to the State of Alaska. The Council will, among other things, prepare and submit to the Secretary of Commerce fishery management plans with respect to the fisheries within its area of authority, prepare comments on foreign fishing applications, and conduct public hearings.

The Scientific and Statistical Committee assists the Council in the development, collection, and evaluation of such statistical, biological, economic, social and other scientific information as is relevant to the Council's development and amendment of fishery management plans.

The meetings will be Thursday and Friday, September 15 and 16, 1977, in the Juneau Hilton Hotel, Juneau, Alaska. The meetings will convene at 8:30 a.m., and adjourn at approximately 4:30 p.m. The meeting may be extended or shortened depending upon progress on the agenda.

PROPOSED AGENDA

SEPTEMBER 15

1. Review of High Seas Salmon FMP/DEIS.

SEPTEMBER 16

1. Review of High Seas Salmon Troll—FMP/DEIS.
2. Other SSC business.

This meeting is open to the public and there will be seating for a limited number of public members available on a first-come, first-served basis.

Members of the puolic having an interest in specific items for discussion are also advised that agenda changes are, at times, made prior to the meetings. To receive information on changes, if any, made to the agenda, interested members of the public should contact on or about September 5, 197:

Mr. Jim H. Branson, Executive Director, North Pacific Fishery Management Council, P.O. Box 3136 DT, Anchorage, Alaska 99510, telephone 907-274-4563.

At the discretion of the Chairman, interested members of the public may be permitted to speak at times which will allow the orderly conduct of business. Interested members of the public who wish to submit written comments should do so by addressing Mr. Jim H. Branson at the above address. The public is permitted to file written statements at any time before or after the meeting. However, to receive due consideration and to facilitate inclusion in the record of the meeting, typewritten statements which relate to the agenda items should be re-

V 42 166 AUG 26 77 A UMI

ceived no later than 10 days after the close of the meeting.

Dated: August 23, 1977.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

WESTERN PACIFIC FISHERY MANAGEMENT COUNCIL'S SCIENTIFIC AND STATISTICAL COMMITTEE

Public Meeting

Notice is hereby given of a meeting of the Western Pacific Fishery Management Council's Scientific and Statistical Committee established in accordance with Section 302(g)(a) of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265).

The Western Pacific Fishery Management Council has authority over fisheries within the fishery conservation zone seaward of Hawaii, Guam and American Samoa. The Council will, among other things, prepare and submit to the Secretary of Commerce fishery management plans with respect to the fisheries within its area of autohrity, prepare comments on foreign fishing applications, and conduct public hearings.

The Scientific and Statistical Committee assists the Council in the development, collection and evaluation of such statistical, biological, economic, social and other scientific information as is relevant to the Council's development and amendment of fishery management plans.

The meeting of the Scientific and Statistical Committee will be held on September 14 and 15, 1977, in the conference room of the National Marine Fisheries Service laboratory at 2570 Dole Street, Honolulu, Hawaii, from 9:00 a.m. to 4:30 p.m. The meeting may be extended or shortened depending on progress on the agenda.

PROPOSED AGENDA

1. Consideration of the Minutes of the Third Meeting of the SSC Committee.
2. Review of decisions and recommendations of the Sixth Meeting of the Council.
3. Review of progress of the planning teams.
4. Review of recent directives and guidelines on management plan production.
5. Consideration of a draft management plan for the spiny lobster fishery of Hawaii.
6. Test of decision-making methods by application to a draft coral fishery management plan.

This meeting is open to the public, and there will be seating for approximately 15 members of the public on a first-come first-served basis.

Members of the public having an interest in specific items for discussion are advised that changes are at times made prior to the meeting. To receive information on changes, if any, made to the agenda, interested members of the public should contact on or about September 2, 1977:

Mr. W. G. Van Campen, Executive Director, Western Pacific Fishery Management Council, Room 1506, 1164 Bishop Street, Honolulu, Hawaii 96813, telephone: 808-523-1368.

At the discretion of the Committee, interested members of the public may be permitted to speak at times which will allow the orderly conduct of Committee business. Interested members of the public who wish to submit written comments should do so by addressing Mr. Van Campen at the above address. To receive due consideration and to facilitate inclusion of these comments in the record of the meeting, typewritten statements should be received within 10 days after the close of the Committee meeting.

Dated: August 23, 1977.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1977

Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Addition to procurement list.

SUMMARY: This action adds to Procurement List 1977 a commodity to be produced by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: August 26, 1977.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher, 703-557-1145.

SUPPLEMENTARY INFORMATION: On March 11, 1977 the Committee for Purchase from the Blind and Other Severely Handicapped published a notice (42 FR 13576) of proposed additons to Procurement List 1977, November 18, 1976 (41 FR 50975).

After consideration of the relevant matter presented, the Committee has determined that the commodity listed below is suitable for procurement by the Federal Government under 41 U.S.C. 46-48(c), 85 Stat. 77.

Accordingly, the following commodity is hereby added to Procurement List 1977:

CLASS 3990

Pallet, Material Handling (SH), 3990-00-555-0458. (For Sharpe Army Depot, Lathrop, California only).

C. W. FLETCHER,
Executive Director.

FEDERAL COMMUNICATIONS COMMISSION

[FCC 77-573]

AMATEUR EXAMINATION PROCEDURES

Changes

AUGUST 22, 1977.

The Federal Communications Commission has changed its amateur radio operator examination procedures effective August 18, 1977. Those amateur applicants taking FCC supervised examinations will no longer have to take a separate examination in order to demonstrate their ability to send International Morse Code.

It is a generally accepted fact that persons who communicate by Morse Code build their sending ability at a faster rate than they are able to receive. This is confirmed by the FCC's own experience through the years that virtually everyone who passes the code receiving test is able to pass the sending test. For instance, during May 1977 3,201 applicants passed the FCC receiving test. Only 25 of these (less than one percent) were unable to pass the sending test. Thus, the Commission believes that the applicant who has demonstrated his ability to receive code possesses the ability to send code, and little is gained by requiring a separate sending test.

There has been a five-fold increase in amateur examinations during the past three years and this new examination procedure is intended to help meet these new workload demands on the field examination staff.

No change will occur in the examination procedure for commercial radiotelegraph applicants who are licensed to carry out safety communications related to ships at sea. Additionally, this item does not affect the administration of Morse Code examinations handled by volunteer examiners for Novice licenses.

Action by the Commission August 18, 1977. Commissioners Wiley (Chairman), Fogarty and White acting as a Board.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

NORTH COAST COMMUNICATIONS, INC. AND HEALDSBURG BROADCASTERS, INC.

Applications for Construction Permit

Adopted: August 17, 1977.

Released: August 23, 1977.

In re applications of North Coast Communications, Inc., Healdsburg, California; Requests: 92.9 MHz, Channel No. 225; 3.6 kW (H & V); 1660 feet (H & V); Docket No. 21232, File No. BPH-9940; Healdsburg Broadcasters, Inc., Healdsburg, Calif.; Requests: 92.9 MHz, Channel No. 225; 3.5 kW (H & V); 1660 feet (H & V); Docket No. 21233, File No. BPH-10,111.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has before it for consideration the above-captioned mutually exclusive applications of North Coast Communications, Inc. (hereinafter "North Coast") and Healdsburg Broadcasters, Inc. (hereinafter "Healdsburg") for a construction permit for a new FM broadcast station at Healdsburg, Calif.

2. As amended on March 11, 1977, North Coast's financial data reveals that $188,125 will be required to construct and operate the proposed station for one year, without reliance on revenues itemized as follows:

Downpayment on equipment	$16,575
First-year payment on equipment, with interest	13,925
Land	5,000
Miscellaneous	45,750
Principal and interest on bank loan	27,875
Working capital (first year)	79,000
Total	188,125

North Coast plans to finance the above costs with the following funds: Cash on hand or in banks, $1,000; a bank loan of $100,000; and, $60,000 from stock subscriptions. Thus, even if all of these funds were available, North Coast's financial proposal would be $27,125 short of the estimated amount necessary for the station's proposed operation. In addition, we must disregard North Coast's reliance upon $60,000 to be obtained from subscribers for its corporate stock. In this regard, a review of the North Coast application reveals that individuals balance sheets were not submitted for each of the stock subscribers as required by Section III, page 3, paragraph 4(b) of the application (FCC Form 301). Without individual balance sheets we are unable to determine whether each subscriber has the financial ability to comply with the terms of his subscription agreement. Therefore, since North Coast has shown only $101,000 to meet a $188,125 requirement, a financial issue will be specified.

3. Except as indicated above, the applicants are qualified to construct and operate as proposed. However, because the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding.

4. *Accordingly, it is ordered,* That pursuant to Section 309(e) of the Communications Act of 1934, as amended, the above-captioned applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine with respect to North Coast Communications, Inc.: (a) The source and availability of additional funds over and above the $101,000 indicated; and, (b) whether, in light of the evidence adduced pursuant to (a) above, the applicant is financially qualified.

2. To determine which of the proposals would, on a comparable basis, better serve the public interest.

3. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

5. *It is further ordered,* That to avail themselves of the opportunity to be heard, the applicants herein, pursuant to § 1.221(c) of the Commission's rules, in person or by attorney, shall, within twenty (20) days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

6. *It is further ordered,* That the applicants herein shall, pursuant to § 311(a)(2) of the Communications Act of 1934, as amended, and § 1.984 of the Commission's rules, give notice of the hearing, either individually or, if feasible and consistent with the Rules, jointly, within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 1.594(g) of the rules.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

FEDERAL ENERGY ADMINISTRATION

ADVISORY COMMITTEES

Renewal

This notice is published in accordance with the provisions of section 7 of the Office of Management and Budget Circular No. A-63, as amended. Pursuant to section 14(a)(2)(A) of the Federal Advisory Committee Act (FACA) and following consultation with the Office of Management and Budget, notice is hereby given that it is in the public interest, in connection with the performance of the duties imposed on the Federal Energy Administration by law, to renew the following advisory committees: Coal Industry Advisory Committee; Consumer Affairs/Special Impact Advisory Committee; Electric Utilities Advisory Committee; Environmental Advisory Committee; Food Industry Advisory Committee; Fuel Oil Marketing Advisory Committee; Gasoline Marketing Advisory Committee; LP-Gas Industry Advisory Committee; Natural Gas Advisory Committee; and the State Regulatory Advisory Committee. These renewals are effective on the date the charters are filed in accordance with section 14(b) of the FACA.

A description of the nature and purpose of these committees is contained in their charters which are published below.

Issued in Washington, D.C., on August 23, 1977.

JOHN F. O'LEARY,
Administrator.

FEDERAL ENERGY ADMINISTRATION

CHARTER

Coal Industry Advisory Committee

A. *Establishment*

The Administrator, Federal Energy Administration (FEA), having determined, after consultation with the Director, Office of Management and Budget, that the establishment of an advisory committee to provide FEA with advice concerning the matters related to the coal industry and related objectives of FEA is in the public interest in connection with duties imposed on the FEA by law, hereby establishes the Coal Industry Advisory Committee pursuant to the Federal Advisory Committee Act (Pub. L. 92-463).

B. *Duties, Functions, and Administrative Provisions*

1. *Objectives and Scope.*—The objectives of the Coal Industry Advisory Committee are to provide the Administrator, FEA, with assistance in encouraging the expansion of a readily-usable energy source—coal—and maintaining fair and reasonable consumer prices for such supplies. The Committee will also advise on technical and economic factors affecting the coal industry.

2. *Committee Tenure.*—In view of the goals and purposes of the Committee, it will be expected to continue for the duration of FEA.

3. *Official to Whom Committee Reports.*—The Committee will report to the Administrator, FEA.

4. *Committee Duties.*—The duties of the Committee are solely advisory and are stated in Paragraph 1 above.

5. *Support Activities.*—Necessary support shall be furnished by the Federal Energy Administration.

6. *Estimated Annual Operating Costs.*—The estimated annual operating costs for the Committee are $24,700 and will involve approximately ½ man-years of staff support.

7. *Meetings.*—The Committee will meet approximately 4 times a year.

8. *Effective Date and Duration.*—The renewal of this Advisory Committee is effective upon filing the Charter with the standing committees of Congress having jurisdiction of the FEA. The Committee will terminate December 31, 1977.

9. *Subcommittee(s).*—To facilitate functioning of the Committee, subcommittee(s) may be formed by the Administrator. The objectives of the subcommittee(s) are to make recommendations to the parent Committee with respect to matters concerning FEA plans and programs which are related to the responsibilities of the parent Committee. The subcommittee(s) shall be comprised of such members of the parent Committee as may be determined by the Chairman of the parent Committee.

All actions of the subcommittee(s) shall be consistent with the provisions of B-1 through B-11.

10. *Members.*—Committee members shall be appointed by the Administrator of the Agency.

11. *Election of Chairman and/or Vice Chairman.*—The Chairman and/or Vice Chairman shall be appointed by the Administrator or, upon the Administrator's request to the Committee, elected by the Committee members, subject to the approval of the Administrator.

Dated: August 23, 1977.

JOHN F. O'LEARY,
Administrator.

FEDERAL ENERGY ADMINISTRATION

CHARTER

Consumer Affairs/Special Impact Advisory Committee

A. *Establishment*

The Administrator, Federal Energy Administration (FEA), having determined, after consultation with the Director, Office of Management and Budget, that the establishment of an advisory committee to provide FEA with advice concerning the impact of FEA policies and programs on consumers and special impact groups is in the public interest in connection with duties imposed on the FEA by law, hereby establishes the Consumer Affairs/Special Impact Advisory Committee pursuant to the Federal Advisory Committee Act (Pub. L. 92-463).

B. *Duties, Functions, and Administrative Provisions*

1. *Objectives and Scope.*—The objectives of the Consumer Affairs/Special Impact Advisory Committee are to provide the Administrator, FEA, with the diversified expertise possessed by a wide range of highly qualified individuals who have been extensively involved in identifying and evaluating the impact of proposed or existing energy policies on the consumer, the poor, the elderly and the handicapped persons in rural and urban America, and planning, developing, and implementing policies and programs to remedy these problems.

2. *Committee Tenure.*—In view of the goals and purposes of the Committee, it will be expected to continue for the duration of FEA.

3. *Official to Whom Committee Reports.*—The Committee will report to the Administrator, FEA.

4. *Committee Duties.*—The duties of the Committee are solely advisory and are stated in Paragraph 1 above.

5. *Support Activities.*—Necessary support shall be furnished by the Federal Energy Administration.

6. *Estimated Annual Operating Costs.*—The estimated annual operating costs for the Committee are $24,700 and will involve approximately ½ man-years of staff support.

7. *Meetings.*—The Committee will meet approximately 4 times a year.

8. *Effective Date and Duration.*—The renewal of this Advisory Committee is effective upon filing the Charter with the standing committees of Congress having jurisdiction of the FEA. The Committee will terminate December 31, 1977.

9. *Subcommittee(s).*—To facilitate functioning of the Committee, subcommittee(s) may be formed by the Administrator. The objectives of the subcommittee(s) are to make recommendations to the parent Committee with respect to matters concerning FEA plans and programs which are related to the responsibilities of the parent Committee. The subcommittee(s) shall be comprised of such members of the parent Committee as may be determined by the Chairman of the parent Committee.

All actions of the subcommittee(s) shall be consistent with the provisions of B-1 through B-11.

10. *Members.*—Committee members shall be appointed by the Administrator of the Agency.

11. *Election of Chairman and/or Vice Chairman.*—The Chairman and/or Vice Chairman shall be appointed by the Administrator or, upon the Administrator's request to the Committee, elected by the Committee members, subject to the approval of the Administrator.

Dated: August 23, 1977.

JOHN F. O'LEARY,
Administrator.

FEDERAL ENERGY ADMINISTRATION

CHARTER

Electric Utilities Advisory Committee

A. *Establishment*

The Administrator, Federal Energy Administration (FEA), having determined, after consultation with the Director, Office of Management and Budget, that the establishment of an advisory committee to provide FEA with advice concerning electric utility interests is in the public interest in connection with duties imposed on the FEA by law, hereby establishes the Electric Utilities Advisory Committee pursuant to the Federal Advisory Committee Act (Pub. L. 92-463).

B. *Duties, Functions, and Administrative Provisions*

1. *Objectives and Scope.*—The objectives of the Electric Utilities Advisory Committee are to provide the Administrator, FEA, with advice with respect to the general electric utilities' aspects of interests and problems related to the policy and implementation of programs to meet the continuing national energy problem.

2. *Committee Tenure.*—In view of the goals and purposes of the Committee, it will be expected to continue for the duration of FEA.

3. *Official to Whom Committee Reports.*—The Committee will report to the Administrator, FEA.

4. *Committee Duties.*—The duties of the Committee are solely advisory and are stated in Paragraph 1 above.

5. *Support Activities.*—Necessary support shall be furnished by the Federal Energy Administration.

6. *Estimated Annual Operating Costs.*—The estimated annual operating costs for the Committee are $27,000 and will involve approximately 1/4 man-years of staff support.

7. *Meetings.*—The Committee will meet approximately 4 times a year.

8. *Effective Date and Duration.*—The renewal of this Advisory Committee is effective upon filing the Charter with the standing committees of Congress having jurisdiction of the FEA. The Committee will terminate December 31, 1977.

9. *Subcommittees.*—The Electric Utilities Advisory Committee shall have two subcommittees as follows: a. Executive Subcommittee; b. Solar Electric Generation Subcommittee. The objectives of these subcommittees are to make recommendations to the parent Committee with respect to matters concerning FEA plans and programs which are related to the responsibilities of the Electric Utilities Advisory Committee. The Subcommittees shall be comprised of such members of the parent Committee as may be determined by the chairman of the parent Committee. All actions of the Subcommittees shall be consistent with the provisions of B-1 through B-11.

10. *Members.*—Committee members shall be appointed by the Administrator of the Agency.

11. *Election of Chairman and/or Vice Chairman.*—The Chairman and/or the Vice Chairman shall be appointed by the Administrator or, upon the Administrator's request to the Committee, elected by the Committee members, subject to the approval of the Administrator.

Dated: August 23, 1977.

JOHN F. O'LEARY,
Administrator.

FEDERAL ENERGY ADMINISTRATION

CHARTER

Environmental Advisory Committee

A. *Establishment*

The Administrator, Federal Energy Administration (FEA), having determined, after consultation with the Director, Office of Management and Budget, that the establishment of an advisory committee to provide FEA with advice concerning the environmental aspects of FEA policies and programs is in the public interest in connection with duties imposed on the FEA by law, hereby establishes the Environmental Advisory Committee pursuant to the Federal Advisory Committee Act (Pub. L. 92-463).

B. *Duties, Functions, and Administrative Provisions*

1. *Objectives and Scope.*—The objectives of the Environmental Advisory Committee are to provide the Administrator, FEA, with advice and information concerning environmental aspects of FEA policies and programs.

2. *Committee Tenure.*—In view of the goals and purposes of the Committee, it will be expected to continue for the duration of FEA.

3. *Official to Whom Committee Reports.*—The Committee will report to the Administrator, FEA.

4. *Committee Duties.*—The duties of the Committee are solely advisory and are stated in Paragraph 1 above.

5. *Support Activities.*—Necessary support shall be furnished by the Federal Energy Administration.

6. *Estimated Annual Operating Costs.*—The estimated annual operating costs for the Committee are $50,000 and will involve approximately ½ man-years of staff support.

7. *Meetings.*—The Committee will meet approximately 6 times a year.

8. *Effective Date and Duration.*—The renewal of this Advisory Committee is effective upon filing the Charter with the standing committees of Congress having jurisdiction of the FEA. The Committee will terminate December 31, 1977.

9. *Subcommittees.*—The Environmental Advisory Committee shall have subcommittees as follows:

a. Coal Policy Subcommittee
b. Energy Conservation Subcommittee
c. OCS/Energy Facility Siting Subcommittee
d. Nuclear Policy Subcommittee
e. Subcommittee on Regulations for Regions in Violation of Air Quality Standards

The objectives of these subcommittees are to make recommendations to the parent Committee concerning environmental aspects of FEA policies and programs.

The Subcommittees shall be comprised of such members of the parent Committee as may be determined by the Chairman of the parent Committee.

All actions of the Subcommittees shall be consistent with the provisions of B-1 through B-11.

10. *Members.*—Committee members shall be appointed by the Administrator of the Agency.

11. *Election of Chairman and/or Vice Chairman.*—The Chairman and/or Vice Chairman shall be appointed by the Administrator or, upon the Administrator's request to the Committee, elected by the Committee members, subject to the approval of the Administrator.

Dated: August 23, 1977.

JOHN F. O'LEARY,
Administrator.

FEDERAL ENERGY ADMINISTRATION

CHARTER

Food Industry Advisory Committee

A. *Establishment*

The Administrator, Federal Energy Administration (FEA), having determined, after consultation with the Director, Office of Management and Budget, that the establishment of an advisory committee to provide FEA with advice concerning how the Government can promote increased energy efficiency within each sector of the food system and how proposed energy policies and ongoing programs impact on the food system is in the public interest in connection with duties imposed on the FEA by law, hereby establishes the Food Industry Advisory Committee pursuant to the Federal Advisory Committee Act (Pub. L. 92-463).

B. *Duties, Functions, and Administrative Provisions*

1. *Objectives and Scope.*—The objectives of the Food Industry Advisory Committee are to provide the Administrator, FEA, with information and advice concerning food industry interests and problems as these relate to national energy policy and conservation programs.

2. *Committee Tenure.*—In view of the goals and purposes of the Committee, it will be expected to continue for the duration of FEA.

3. *Official to Whom Committee Reports.*—The Committee will report to the Administrator, FEA.

4. *Committee Duties.*—The duties of the Committee are solely advisory and are stated in Paragraph 1 above.

5. *Support Activities.*—Necessary support shall be furnished by the Federal Energy Administration.

6. *Estimated Annual Operating Costs.*—The estimated annual operating costs for the Committee are $36,000 and will involve approximately 1/4 man-years of staff support.

7. *Meetings.*—The Committee will meet approximately 4 times a year.

8. *Effective Date and Duration.*—The renewal of this Advisory Committee is effective upon filing the Charter with the standing committees of Congress having jurisdiction of the FEA. The Committee will terminate December 31, 1977.

9. *Subcommittees.*—The Food Industry Advisory Committee shall have subcommittees as follows:

a. Distribution and Transportation Subcommittee.
b. Equipment Efficiency Subcommittee.
c. Retail Stores Subcommittee.
d. Food Service Operations Subcommittee.
e. Industrial Education Subcommittee.
f. Government Regulations Subcommittee.
g. Future Planning Subcommittee.
h. Access to Sources of Energy Subcommittee.
i. Energy Use Data Subcommittee.
j. Energy Audit Programs Subcommittee.
k. Federal Reporting Program (EPCA) Subcommittee.
l. State Programs/Contingency Plans Subcommittee.
m. Agriculture Subcommittee.
n. Financial Incentives Subcommittee.

The objective of these subcommittees is to make recommendations to the parent committee with respect to matters concerning food industry aspects of FEA policies and programs.

The subcommittees shall be comprised of such members of the parent Committee as may be determined by the Chairman of the parent Committee.

All actions of the subcommittees shall be consistent with the provisions of B-1 through B-11.

10. *Members.*—Committee members shall be appointed by the Administrator of the Agency.

11. *Election of Chairman and/or Vice Chairman.*—The Chairman and/or Vice Chairman shall be appointed by the Administrator or, upon the Administrator's request to the Committee, elected by the Committee members, subject to the approval of the Administrator.

Dated: August 23, 1977.

JOHN F. O'LEARY,
Administrator.

FEDERAL POWER COMMISSION

[Docket No. CP75–96, etc.]

EL PASO ALASKA CO.

Availability of the Environmental Assessment of Taylor Highway-Klondike Highway Realignment

AUGUST 26, 1977.

Notice is hereby given in the above docket that on August 26, 1977, as required by § 2.82(b) of the Commission's General Policy and Interpretations (18 CFR 2.82(b)), copies of the Environmental Assessment of the Taylor Highway-Klondike Highway Realignment (Assessment) are being transmitted pursuant to the requirements of the National Environmental Policy Act of 1969 and § 2.82(b) of the Commission's General Policy and Interpretations.

The Assessment has been prepared by the staff of the Federal Power Commission pursuant to a directive by the Council on Environmental Quality and the White House Alaska Task Force. The directive results from the recent announcement of the National Energy Board of Canada that transport of Alaskan natural gas through Canada to the lower 48 states should be along the route proposed by the Alcan Pipeline Company (Alcan) with a Taylor Highway-Klondike Highway realignment. This realignment would diverge from the proposed Alcan route at Tetlin Junction, Alaska, and then follow the Taylor Highway to the Alaska-Yukon border. From the border, the realignment would proceed to Dawson, Yukon, and then along the Klondike Highway to Whitehorse, Yukon, where it would coincide with the prime route. Such a route would facilitate the future connection of Mackenzie Delta gas to the proposed Alcan project via a pipeline along the Dempster Highway from the Delta to Dawson.

Based on the Assessment, CEQ has informed the FPC staff that it is their conclusion that no final supplement is required prior to the President's decision on the basic system and technology.

This Assessment has been sent to all persons and governmental agencies who received the Supplemental FEIS for the Alcan Pipeline Project. The Assessment is on file with the Commission and is available for public inspection at its Office of Public Iinformation, Room 1000, 825 North Capitol Street, NE., Washington, D.C. 20426. Copies of the Assessment are available in limited quantities from the Federal Power Commission's Office

V 42 166 AUG 26 77 UMI

of Public Information, Washington, D.C. 20426.

KENNETH F. PLUMB,
Secretary.

FEDERAL PREVAILING RATE ADVISORY COMMITTEE

CLOSED COMMITTEE MEETINGS

Pursuant to the provisions of section 10 of the Federal Advisory Committee Act. (Pub. L. 92-463), notice is hereby given that meetings of the Federal Prevailing Rate Advisory Committee will be held on:

Thursday, September 15, 1977, and Thursday, September 22, 1977.

The meetings will convene at 10 a.m.; and will be held in Room 5A06A, Civil Service Commission Building, 1900 E Street, NW., Washington, D.C.

The Federal Prevailing Rate Advisory Committee is composed of a Chairman, representatives of five labor unions holding exclusive bargaining rights for Federal blue-collar employees, and representatives of five Federal agencies. Entitlement to membership on the Committee is provided for in Section 5347 of the Prevailing Rate Act of 1972 (Pub. L. 92-392).

The Committee's primary responsibility is to review the prevailing rate system and from time to time advise the Civil Service Commission thereon.

At these scheduled meetings, the Committee will consider proposed plans for implementation of the Prevailing Rate Act of 1972 (Pub. L. 92-392), which law establishes pay systems for Federal prevailing rate employees.

The meetings will be closed to the public on the basis of a determination made by the Chairman of the Civil Service Commission under Section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463) and 5 U.S.C., section 552b(c)(9)(B), that the closing is necessary in order to provide this labor-management Committee with the opportunity to advance proposals and counterproposals in meaningful debate on issues related solely to the Federal Wage System with the view toward ultimately formulating advisory policy recommendations for the consideration of the Civil Service Commission.

Summary minutes of these meetings will be made available to the public, upon written request to the Committee Secretary, after the pay policy issues discussed at these meetings have been finalized by Civil Service Commission action. Annually, the Committee publishes for the Civil Service Commission, the President, and Congress a comprehensive report of pay issues discussed, concluded recommendations thereon, and related activities. These reports are also available to the public, upon written request to the Committee Secretary.

Members of the public are invited to submit material in writing to the Chairman concerning Federal Wage System pay matters felt to be deserving of the Committee's attention. Additional information concerning these meetings may be obtained by contacting the Secretary, Federal Prevailing Rate Advisory Committee, Room 1338, 1900 E Street, NW., Washington, D.C. 20415 (202-632-9710).

JEROME H. ROSS,
Chairman, Federal Prevailing Rate Advisory Committee.

AUGUST 22, 1977.

FEDERAL RESERVE SYSTEM

JANESVILLE HOLDING CO.

Formation of Bank Holding Company

Janesville Holding Company, Janesville, Minnesota, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 80 per cent or more of the voting shares of Janesville State Bank, Janesville, Minnesota. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Minneapolis. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than September 16, 1977.

Board of Governors of the Federal Reserve System, August 22, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-24787 Filed 8-25-77;8:45 am]

UNITED BANK CORPORATION OF NEW YORK

Order Approving Acquisition of Bank

AUGUST 22, 1977.

United Bank Corporation of New York, Albany, New York, a bank holding company within the meaning of the Bank Holding Company Act, has applied for approval of the Board of Governors of the Federal Reserve System under Section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 100 per cent of the voting shares of the successor by merger to Hempstead Bank, Hempstead, New York ("Bank").[1] The bank into which Bank is to be merged has no significance except as a means to facilitate the acquisition of the voting shares of Bank. Accordingly, the proposed acquisition of the successor organization is treated herein as the proposed acquisition of the shares of Bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with Section 3(b) of the Act. The time for filing comments has expired, and none has been timely received. The application has been considered in light of the factors set forth in Section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the seventeenth[2] largest banking organization in New York State, controls three banks with aggregate deposits of $1.29 billion, representing 1.2 percent of total commercial bank deposits in the State. Acquisition of Bank, deposits of $185 million, will increase Applicant's share of State deposits to 1.3 percent, and will increase Applicant's ranking among New York banking organizations to thirteenth. Accordingly, acquisition of Bank would not result in a significant increase in the concentration of banking resources in New York State.

Bank is located in the Metropolitan New York Market[3] where it has 27 branches and 47 automated, point-of-sale terminals. It is the 34th largest of 120 banking organizations in the Metropolitan New York Market, controlling .2 percent of the market's deposits.

Approval of the proposal would not eliminate a significant amount of existing competition inasmuch as Applicant is not presently represented in the Metropolitan New York Market and its nearest subsidiary, the Valls Gate office of Highland National Bank of Newburgh, Newburgh, New York, is located approximately 80 road miles from Bank. In addition, Applicant's subsidiaries derive only a negligible amount of business from Bank's service area, while Bank derives virtually no business from the service areas of Applicant's subsidiaries. De novo entry by Applicant subsidiaries. De novo entry by Applicant is considered unlikely because of the relatively high density of banking organizations in the relevant market and the trend toward slower population growth in that portion of the market served by Bank. The proposed acquisition would not foreclose a significant amount of potential competition between Applicant and Bank in view of Applicant's unfamiliarity with the Metropolitan New York Market and the lack of concentration in that market. Moreover, numerous small and medium sized banks would continue to be available for acquisition by the few remaining organizations that may be likely entrants. Accordingly, it is concluded that consummation of the proposed acquisition would not have any significant adverse effects on existing or potential competition in any relevant area. Thus, competitive considerations are consistent with approval of the application.

The financial and managerial resources and future prospects of Applicant, its subsidiary banks, and Bank are regarded as satisfactory. Although there is no evidence in the record that the needs of the community to be served are not being adequately met, affiliation with Applicant will permit Bank to offer expanded or improved services in the trust, lease financing and commercial lending areas. Considerations relating to the convenience and needs of the area to be served lend sufficient weight to warrant approval of the application.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this order or (b) later than three months after the date of this order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of New York pursuant to delegated authority.

By order of the Federal Reserve Bank of New York, acting for the Board of Governors pursuant to delegated authority, effective August 18, 1977.

A. MARSHALL PUCKETT,
Vice President,
Federal Reserve Bank of New York.

AUGUST 18, 1977.

[FR Doc.77-24788 Filed 8-25-77; 8:45 am]

[1] By order of August 18, 1977, the Federal Reserve Bank of New York has approved the related application by 40 Main Street Bank, Hempstead, New York for approval to merge with Bank.

[2] Deposit data are as of December 31, 1976 except for data concerning the Metropolitan New York Market which are as of June 30, 1976. Data regarding banking offices are as of June 30, 1977.

[3] The Metropolitan New York Market, defined geographically, consists of the five boroughs of New York City plus Nassau, Westchester, Putnam and Rockland Counties and western Suffolk County in New York State, as well as the northern two-thirds of Bergen County and eastern Hudson County in New Jersey, plus southwestern Fairfield County in Connecticut.

FEDERAL RESERVE BANK OF NEW YORK, 40 MAIN STREET BANK

Order Approving Application for Merger of Banks

The 40 Main Street Bank, Hempstead, N.Y. ("MSB"), a proposed State member bank of the Federal Reserve System, has applied for approval of the Board of Governors of the Federal Reserve System, pursuant to the Bank Merger Act (12 U.S.C. 1828(c)), of the merger of that bank with Hempstead Bank, Hempstead, N.Y. ("Hempstead"), under the charter of MSB and the name of Hempstead, as a means to facilitate the acquisition of the voting shares of Hempstead by United Bank Corporation of New York, Albany, N.Y., a bank holding company.[1]

As required by the Act, notice of the proposed merger, in form approved by the Board, has been published, and reports on competitive factors have been requested from the Attorney General, the Comptroller of the Currency, and the Federal Deposit Insurance Corporation.

This Reserve Bank has considered this application and all comments and views in light of the factors set forth in the Act.

On the basis of the record, the application is approved for the reasons summarized in this Reserve Bank's Order of this date relating to the application of United Bank Corporation of New York to acquire the successor by merger to Hempstead. This transaction shall not be consummated (a) before the thirtieth calendar day following the date of this order, or (b) later than three months after the date of this order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of New York pursuant to delegated authority.

By order of the Federal Reserve Bank of New York, acting pursuant to delegated authority for the Board of Governors of the Federal Reserve System, effective August 18, 1977.

A. MARSHALL PUCKETT,
Vice President, Federal Reserve Bank of New York.

AUGUST 18, 1977.

[FR Doc.77-24789 Filed 8-25-77, 8:45 am]

[1] By order of August 18, 1977, the Federal Reserve Bank of New York has approved the related application by United Bank Corporation of New York for approval to acquire 100 percent of the shares of the successor by merger to Hempstead, and has also approved, by letter, an application by MSB for membership in the Federal Reserve System.

FIRST BANK SYSTEM, INC.

Acquisition of Bank

First Bank System, Inc., Minneapolis, Minn., has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent (less directors' qualifying shares) of the voting shares of Granite City National Bank of St. Cloud, St. Cloud, Minn., a proposed new bank. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Minneapolis. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than September 19, 1977.

Board of Governors of the Federal Reserve System, August 22, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-24825 Filed 8-25-77;8:45 am]

FIRST CITY BANCORPORATION OF TEXAS, INC.

Request for Determination and Notice Providing Opportunity for Hearing

Notice is hereby given that a request has been made to the Board of Governors of the Federal Reserve System, pursuant to the provisions of section 2(g)(3) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(g)(3)) ("the Act"), by First City Bancorporation of Texas, Inc., Houston, Tex. ("First City"), for a determination that with respect to the sale by First City of its stock interest in First Bank and Trust of Richardson, Richardson, Tex. ("Bank"), to Mr. Kenneth L. Terry, as trustee for himself and six other individuals, First City is not nor will be capable of controlling Bank through Kenneth L. Terry or any of the other purchasers, notwithstanding the fact that certain of the purchasers are otherwise indebted to another subsidiary of First City.

Section 2(g)(3) of the Act provides that shares transferred after January 1, 1966, by any bank holding company (or any company which but for such transfer, would be a bank holding company) directly or indirectly to any transferee that is indebted to the transferor or has one or more officers, directors, trustees, or beneficiaries in common with or subject to control by the transferor, shall be deemed to be indirectly owned or controlled by the transferor, unless the Board, after opportunity for hearing, determines that the transferor is not, in fact, capable of controlling the transferee.

Notice is hereby given, that, pursuant to section 2(g)(3) of the Act, an opportunity is provided for filing a request for oral hearing. Any such request or written comments on the application should be submitted in writing (in duplicate) to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received no later than September 19, 1977. If a request for oral hearing is filed, each request should contain a statement of the nature of the requesting person's interest in the matter, his reasons for wishing to appear at an oral hearing, and a summary of the matters concerning which such person wishes to give testimony. The Board subsequently will designate a time and place for any hearing it orders, and will give notice of such hearing to the transferor, the transferee, and all persons that have requested an oral hearing. In the absence of a request for an oral hearing, the Board will consider the requested determination on the basis of documentary evidence filed in connection with the application.

Board of Governors of the Federal Reserve System, August 22, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-24826 Filed 8-25-77;8:45 am]

FIRST OF GRANDFIELD CORP.

Order Approving Formation of Bank Holding Company

First of Grandfield Corporation, Grandfield, Okla., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company by acquiring 100 percent of the voting shares (less directors' qualifying shares) of First State Bank, Grandfield, Okla. ("Bank").

Notice of the application, affording opportunity for interested persons to sub-

V 42 166 AUG 26 77 UMI

mit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the application and all comments received have been considered in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant is a corporation recently formed for the purpose of becoming a bank holding company through the acquisition of Bank. Upon acquisition of Bank (deposits of $4.2 million), Applicant would control the 397th largest of 474 banks in Oklahoma, holding 0.04 percent of total deposits in commercial banks in the State.[1] Bank ranks eleventh among the twelve banking organizations operating in the relevant market,[2] controlling 0.7 percent of the deposits therein.

Three of Applicant's principal shareholders are shareholders in another one-bank holding company located in Tillman County 30 miles from Bank. Inasmuch as this proposal represents the restructuring of the existing ownership of Bank, and since the other bank in which Applicant's principals are involved is not located in the same market as Bank, it appears that consummation of the proposal would not have an adverse effect on existing or potential competition. Accordingly, it is concluded that competitive considerations are consistent with approval of the application.

The financial and managerial resources and future prospects of Applicant, which are largely dependent upon those of Bank, are considered generally satisfactory and consistent with approval. Debt of $600,000 will be incurred by Applicant; however, acquisition of Bank will have no adverse effect on the financial condition of either Applicant or Bank. Therefore, considerations relating to banking factors are regarded as being consistent with approval.

Consummation of the transaction would effect no changes in the banking services offered by Bank, and considerations relating to the convenience and needs of the community to be served are consistent with approval. It has been determined that consummation of the transaction would be consistent with the public interest and the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The acquisition of Bank shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

[1] All banking data are as of December 31, 1976.

[2] The market is approximated by the Wichita Falls SMSA (Wichita and Clay Counties in Texas), the southwest corner of Cotton County, Okla., and the southeast corner of Tillman County, which includes Grandfield.

By order of the Secretary of the Board, acting pursuant to delegated authority for the Board of Governors, effective August 19, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

HARRISON BANCORPORATION

Formation of Bank Holding Company

Harrison Bancorporation, Cynthiana, Ky., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 100 percent of the voting shares of The Harrison Deposit Bank and Trust Company, Cynthiana, Ky. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Cleveland. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received no later than September 20, 1977.

Board of Governors of the Federal Reserve System, August 23, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

KANOPOLIS BANKSHARES, INC.

Formation of Bank Holding Company

Kanopolis Bankshares, Inc., Kanopolis, Kans., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 80 per cent or more of the voting shares of Kanopolis State Bank, Kanopolis, Kans. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than September 20, 1977.

Board of Governors of the Federal Reserve System, August 22, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

NL INDUSTRIES, INC.

Order Granting Determination Under Bank Holding Company Act

NL Industries, Inc., New York, N.Y. ("NL"), a bank holding company within the meaning of section 2(a) of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1841(a)) ("Act"), by virtue of its ownership on January 15, 1969, of over 99 per cent of the issued and outstanding voting shares of Lake View Trust and Savings Bank, Chicago, Ill. ("Bank"), seeks to terminate said status and has requested a Board determination, pursuant to section 2(g)(3) of the Act (12 U.S.C. 1841(g)(3)), that NL is not in fact capable of controlling Mr. Lane or Bank, notwithstanding the indebtedness incurred by Mr. Lane to NL in connection with his purchase of all of NL's shares of Bank.

Under the provisions of section 2(g)(3) of the Act (12 U.S.C. 1841(g)(3)), shares transferred after January 1, 1966, by any bank holding company to a transferee that is indebted to the transferor or has one or more officers, directors, trustees, or beneficiaries in common with or subject to control by the transferor, are deemed to be indirectly owned or controlled by the transferor unless the Board, after opportunity for hearing, determines that the transferor is not in fact capable of controlling the transferee.

Notice of an opportunity for hearing with respect to NL's request for a determination under section 2(g)(3) was published in the FEDERAL REGISTER on January 18, 1977 (42 FR 3357), and the time provided for requesting a hearing has expired. No such request has been received by the Board, nor has any evidence been received to show that NL is in fact capable of controlling or exerting a controlling influence, directly or indirectly, over Mr. Lane or over Bank.

It is hereby determined that NL is not in fact capable of controlling Mr. Lane or Bank. This determination is based upon the evidence of record in this matter, including the following facts. NL is a publicly-owned corporation of substantial size and is not affiliated with Mr. Lane or any business activity in which Mr. Lane has an interest. By letter dated May 1, 1972, NL filed an irrevocable declaration, pursuant to section 4(c)(12) of the Act and § 225.4(d) of Regulation Y (12 CFR 225.4(d)), that it would divest Bank and thus cease to be a bank holding company by 1981. In compliance therewith, NL sold Bank to Mr. Lane on March 25, 1976, in a transaction that appears to have been the result of arms-length negotiations. There are no interlocking director, officer or employee relationships between NL or its direct or indirect subsidiaries and Mr. Lane or the companies with which he has an ownership or management interest. Mr. Lane's personal financial resources are substantial and would appear to support further the conclusion that NL is not in fact capable of controlling him or Bank. The board of directors of NL has submitted a resolution disclaiming its capability of control over Mr. Lane and Bank, and an affidavit was submitted by Mr. Lane stating that NL is not in fact capable of controlling him or Bank.

It is noted that the agreement between NL and Mr. Lane pursuant to which NL sold its shares of Bank affords Mr. Lane the option of converting his debt to NL into nonvoting, cumulative dividend preferred shares of a proposed new bank holding company that would acquire Mr. Lane's shares of Bank. Notwithstanding the nonvoting character of such preferred shares,[1] the conversion of NL's debt into a significant percentage of the equity of a bank holding company could lead the Board to conclude that NL was engaged through Bank in the business of banking and therefore had again become a bank holding company. NL has indicated its willingness, in the event such conversion occurs, to place such shares in an irrevocable trust under an agreement with the Board. The determination herein that NL is not in fact capable of controlling Mr. Lane or Bank is subject to the condition that in the event Mr. Lane's debt to NL is converted into preferred shares of a bank holding company the Board may enter such further order in this matter as it deems appropriate to ensure that NL will not thereby resume status as a bank holding company.

Accordingly, it is ordered, That the request of NL for a determination pursuant to section 2(g)(3) be and hereby is granted, subject to the condition stated above. This determination is based upon the representations made to the Board by NL and Mr. Lane. In the event the Board should hereafter determine that facts material to this determination are otherwise than as represented, or that NL or Mr. Lane failed to disclose to the Board other material facts, this determination may be revoked, and any change in the facts or circumstances relied upon by the Board in making this determination could result in the Board reconsidering the determination made herein.

By order of the Board of Governors, acting through its General Counsel, pursuant to delegated authority (12 CFR 265.2(b)(1)), effective August 22, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc.77-24831 Filed 8-25-77;8:45 am]

SEDALIA ENTERPRISES, INC.

Order Granting Determination Under the Bank Holding Company Act

Sedalia Enterprises, Inc., Sedalia, Missouri ("Sedalia"), which has transferred all of its shareholdings in Sedalia Bank & Trust Company, Sedalia, Mo. ("Bank"), to Mercantile Bancorporation, Inc., St. Louis, Mo. ("Mercantile"), has requested a determination, pursuant to the provisions of section 2(g)(3) of the Bank Holding Company Act (12 U.S.C. 1841(g)(3)) ("the Act"), that Sedalia is not in fact capable of controlling Mercantile, notwithstanding the fact that Mercantile is indebted to Sedalia as a result of its purchase of approximately 82 percent of the voting shares of Bank from Sedalia.

Under the provisions of section 2(g)(3) of the Act, shares transferred after January 1, 1966, by any bank holding company to a transferee that is indebted to the transferor or has one or more officers, directors, trustees or beneficiaries in common with or subject to control by the transferor, are deemed to be indirectly owned or controlled by the transferor unless the Board, after opportunity for hearing, determines that the transferor is not in fact capable of controlling the transferee.

Notice of an opportunity for a hearing with respect to Sedalia's request for a determination has been published in the FEDERAL REGISTER (41 FR 27784 (1976)), and the time provided for requesting a hearing has expired. No such request has been received by the Board, nor has any evidence been received suggesting that Sedalia is in fact capable of controlling Mercantile.

By Order dated October 12, 1973, the Board approved an application by Mercantile, filed pursuant to section 3(a)(3) of the Act, to acquire 90 percent or more of Bank's voting shares. On November 16, 1973, Sedalia exchanged all of its shares of Bank for a series of notes of Mercantile aggregating $2,396,700 at 6.5 per cent interest, maturing annually, the last of which is due November 8, 1994. The notes of Mercantile held by Sedalia do not have any voting rights. Furthermore, default on Mercantile's notes to Sedalia would not necessarily result in the return of shares of Bank to Sedalia because such shares are not pledged as collateral for such notes.

Mercantile, the largest banking organization in Missouri, controls 28 subsidiary banks with aggregate deposits of more than $2.1 billion. Mercantile has total assets in excess of $3.1 billion. In comparison, Sedalia has total assets of approximately $2.7 million, almost all of which are represented by the notes of Mercantile. Currently, Mercantile has total long term debt of approximately $63.5 million, of which slightly more than $2 million is owed to Sedalia. With the exception of the above-described notes of Mercantile, Sedalia does not hold any securities of Mercantile. No officer, director or employee with policy-making functions of Sedalia serves in any such capacity with Mercantile or any of its subsidiaries.

Based upon all of the facts of record, including the disparate sizes of Mercantile and Sedalia, the relatively small debt owing Sedalia in comparison to Mercantile's total long term debt, Sedalia's lack of any voting interest in Mercantile, the absence of a security interest in the shares of Bank transferred to Mercantile and the absence of any director, officer or employee interlocking relationships between the two companies, it is hereby determined that Sedalia is not in fact capable of controlling Mercantile.

Accordingly, it is ordered, That the request of Sedalia for a determination pursuant to section 2(g)(3) be and hereby is granted. This determination is based upon the representations made to the Board by Sedalia and Mercantile. In the event the Board should hereafter determine that facts material to this determination are otherwise than as represented, or that Sedalia or Mercantile has failed to disclose to the Board other material facts, this determination could result in the Board reconsidering the determination made herein.

By order of the Board of Governors, acting through its General Counsel, pursuant to delegated authority (12 CFR 265.2(b)(1)), effective August 22, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-24830 Filed 8-25-77;8:45 am]

FEDERAL OPEN MARKET COMMITTEE

Domestic Policy Directive of July 19, 1977

In accordance with § 271.5 of its rules regarding availability of information, there is set forth below the Committee's Domestic Policy Directive issued at its meeting held on July 19, 1977.[1]

The information reviewed at this meeting suggests that real output of goods and services grew in the second quarter at about the rapid rate of the first quarter. In June industrial output continued to expand at a substantial pace. The rise in employment moderated, and the unemployment rate edged up from 6.9 to 7.1 percent. Total retail sales remained at about the level reached in March; for the second quarter as a whole, however, sales were moderately above the first-quarter level. The wholesale price index for all commodities declined in June, owing to sharp decreases among farm products and foods; as in May, average prices of industrial commodities rose appreciably less than in earlier months of 1977. The index of average hourly earnings rose over the first half of the year at about the same pace that it had on the average during 1976.

The average value of the dollar against leading foreign currencies has declined more than 1 percent over the past month; the declines were especially marked against the Japanese, German, and Swiss currencies. In May the U.S. foreign trade deficit diminished somewhat from the high rate in the first 4 months of the year.

M-1, after rising at an exceptionally rapid rate in April, increased little in May and grew at a moderate pace in June. Growth in M-2 and M-3 also was moderate in June. Inflows to banks of the time and savings deposits included in M-2 picked up somewhat, after having slackened for a number of months, and inflows to nonbank thrift institutions remained sizable. Business short-term borrowing expanded sharply in June. Market interest rates in general have changed little in recent weeks.

In light of the foregoing developments, it is the policy of the Federal Open Market Committee to foster bank reserve and other financial conditions that will encourage continued economic expansion and help resist inflationary pressures, while contributing to a sustainable pattern of international transactions.

Growth in M-1, M-2, and M-3 within ranges of 4 to 6½ percent, 7 to 9½ percent, and

[1] The Record of Policy Actions of the Committee for the meeting of July 19, 1977, is filed as part of the original document. Copies are available on request to the Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

[1] Although such shares may not have voting rights under the articles of incorporation, it appears that applicable state law would permit such shares to vote as a class on certain types of corporate action.

V 42 166 AUG 26 77 UMI

8½ to 11 percent, respectively, from the second quarter of 1977 to the second quarter of 1978 appears to be consistent with these objectives. These ranges are subject to reconsideration at any time as conditions warrant.

The Committee seeks to encourage near-term rates of growth in M–1 and M–2 on a path believed to be reasonably consistent with the longer-run ranges for monetary aggregates cited in the preceding paragraph. Specifically, at present, it expects the annual growth rates over the July–August period to be within the ranges of 3½ to 7½ percent for M–1 and 6½ to 10½ percent for M–2. In the judgment of the Committee such growth rates are likely to be associated with a weekly-average Federal funds rate of about 5⅞ percent. If, giving approximately equal weight to M–1 and M–2, it appears that growth rates over the 2-month period will deviate significantly from the midpoints of the indicated ranges, the operational objective for the Federal funds rate shall be modified in an orderly fashion within a range of 5¼ to 5¾ percent.

If it appears during the period before the next meeting that the operating constraints specified above are proving to be significantly inconsistent, the Manager is promptly to notify the Chairman who will then decide whether the situation calls for supplementary instructions from the Committee.

NOTE.—On August 5, 1977, the Committee modified the intermeeting range for the Federal funds rate specified in the next-to-last paragraph of the domestic policy directive issued on July 19, 1977, by increasing the upper limit from 5¾ to 6 per cent.

By order of the Fedral Open Market Committee, August 19, 1977 .

ARTHUR L. BROIDA,
Secretary.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Recepit of Report Proposal

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on August 22, 1977. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed FEA request are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed requests, comments (in triplicate) must be received on or before September 13, 1977, and should be addressed to Mr. John M. Lovelady, Acting Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5033, 441 G Street NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202–275–3532.

FEDERAL ENERGY ADMINISTRATION

The FEA requests clearance of a new Form FEA–P–336–M–0 entitled "Retail Motor Fuels Service Station Survey." The FEA–P336–M–0 is designed to provide the data needed by the FEA to monitor prices, margins and volumes to motor fuels. In addition, the FEA–P336–M–0 has been designed to collect market shares data currently collected on other FEA forms. Those forms will at some point in the future be phased out of the FEA system. FEA estimates potential respondents to the FEA–P336–M–0 number approximately 18,000 service stations, a sample selected from some 240,000 service stations, and that the reporting burden on the FEA–P336–M–0 which will be filed monthly averages 45 minutes per response.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

GENERAL SERVICES ADMINISTRATION

[Intervention Notice No. 36]

DISTRICT OF COLUMBIA PUBLIC SERVICE COMMISSION, POTOMAC ELECTRIC POWER CO. FORMAL CASE 685

Proposed Intervention in Electric Rate Increase Proceeding

The General Services Administration seeks to intervene in a proceeding before the District of Columbia Public Service Commission concerning an application by the Potomac Electric Power Company for an increase in its tariffed rates for intrastate electric service. The GSA represents the interests of the executive agencies of the United States Government, as users of utility services.

Persons desiring to make inquiries concerning this case to GSA should submit them, is writing, to Mr. Spence W. Perry, Assistant General Counsel, Regulatory Law Division, General Services Administration, 18th & F Streets, NW., Washington, DC 20405, telephone 202–566–0726, on or before September 26, 1977, and refer to this notice number .

Persons making inquiries are put on notice that the making of an inquiry shall not serve to make any persons parties of record in the proceeding.

(Sec. 201(a)(4), Federal Property and Administrative Services Act (40 U.S.C. 481(a)(4)))

Dated: August 11, 1977.

JOEL W. SOLOMON,
Administrator of General Services.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

ADVISORY COMMITTEE

Renewals

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (5 U.S.C. Appendix I), the Alcohol, Drug Abuse, and Mental Health Administration announces the renewal by the Secretary, Department of Health, Education, and Welfare, with the concurrence of the Office of Management and Budget Committee Management Secretariat, of the following advisory committees:

Drug Abuse Demonstration Review Committee
Drug Abuse Prevention Review Committee
Drug Abuse Training Review Committee

Authority for these committees will expire September 30, 1977, unless the Secretary formerly determines that continuance is in the public interest.

Dated: August 17, 1977.

FRANCIS N. WALDROP,
Deputy Administrator, Alcohol, Drug Abuse, and Mental Health Administration.

Food and Drug Administration

[Docket No. 76N–0300; DESI 6002]

CERTAIN ANTI-INFECTIVE DRUGS

Drugs for Human Use; Drug Efficacy Study Implementation; Followup Notice and Opportunity for Hearing

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice sets forth the conditions for marketing the anti-infective drug products described below for the indications for which they continue to be regarded as effective and offers an opportunity for a hearing concerning those indications regarded as lacking substantial evidence of effectiveness.

DATES: Hearing requests due on or before September 26, 1977. Supplements to approved NDA's due on or before October 25, 1977.

ADDRESSES: Communications forwarded in response to this notice should be identified with the reference number DESI 6002 directed to the attention of the appropriate office named below, and addressed to the Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

Supplements (identify with NDA number): Division of Anti-Infective Drug Products (HFD–140), Rm. 12B–45, Bureau of Drugs.

Abbreviated new drug applications and supplements thereto (identify as such): Division of Generic Drug Monographs (HFD–530), Bureau of Drugs.

Requests for Hearing (identifying with Docket number appearing in the heading of this notice): Hearing Clerk, Food and Drug Administration (HFC–20), Rm. 4–65.

Requests for the report of the National Academy of Sciences-National Research Council: Public Records and Document Center (HFC–18), Rm. 4–62.

Requests for opinion of the applicability of this notice to a specific product: Division of Drug Labeling Compliance (HFD–310), Bureau of Drugs.

Other communications regarding this notice: Drug Efficacy Study Implementation Project Manager (HFD–501), Bureau of Drugs.

FOR FURTHER INFORMATION CONTACT:

Ronald L. Wilson, Bureau of Drugs (HFD–32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3650.

SUPPLEMENTARY INFORMATION: In a notice (DESI 6002; Docket No. FDC–D–309 (now Docket No. 76N–0300)) published in the FEDERAL REGISTER of August 7, 1971 (36 FR 14662), the Food and Drug Administration announced its conclusions that certain anti-infective drug products are effective for the treatment of various infections and less than effective (probably effective or possibly effective) for certain other indications. In response to the August 7, 1971 notice, no person submitted data in support of the possibly effective or probably effective indications of the drug products described below. This notice offers an opportunity for hearing concerning those indications, which are now reclassified as lacking substantial evidence of effectiveness, and states the conditions for marketing the drugs for the indications for which they continue to be regarded as effective. Other products named in the August 7, 1971 notice are not affected by this notice. Bryrel with Superinone Syrup containing piperazine hexahydrate with tyloxapol, which was included in the August 7, 1971 notice, will be the subject of a future FEDERAL REGISTER notice.

1. NDA 6–441: Camoquin Hydrochloride Tablets containing amodiaquine hydrochloride; Parke, Davis & Co., Joseph Campau at the River, Detroit, MI 48232.

2. NDA 6–459; Hetrazan Tablets and Syrup containing diethylcarbamazine citrate; Lederle Laboratories Division, American Cyanamid Co., Pearl River, NY 10965.

3. NDA 6–903; Milibis Tablets containing glycobiarsol; Winthrop Laboratories, 90 Park Ave., New York, NY 10016.

4. NDA 9–166; Sterile Hydroxystilbamidine Isethionate; Merrell-National Laboratories, Division Richardson-Merrell, Inc., 110 E. Amity Rd., Cincinnati, OH 45215.

5. NDA 9–768; Plaquenil Sulfate Tablets containing hydroxychloroquine sulfate; Winthrop Laboratories.

6. NDA–943; Plaquinol Tablets containing hydroxychloroquine sulfate; Winthrop Products, 90 Park Ave., New York, NY 10016.

In a notice published in the FEDERAL REGISTER of February 8, 1972 (37 FR 2852), the approval of NDA 9–943 for Plaquinol Tablets was withdrawn on the ground of failure to submit required reports under section 505(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(j)). At the time that notice was published, no final conclusions concerning its less-than-effective (probably effective) indication had been reached. Those conclusions have now been reached and the purpose of including Plaquinol (hydroxychloroquine sulfate) Tablets (NDA 9–943) in this notice is to inform all interested persons of the conclusions and offer them the opportunity to request a hearing concerning all issues relating to its legal status.

Such drugs are regarded as new drugs (21 U.S.C. 321(p)). Supplemental new drug applications are required to revise the labeling in and to update approved applications providing for such drugs. An approved new drug application is a requirement for marketing such drug products.

In addition to the holder(s) of the new drug application(s) specifically named above, the notice applies to all persons who manufacture or distribute a drug product, not the subject of an approved new drug application, that is identical, related, or similar to a drug product named above, as defined in 21 CFR 310.6. It is the responsibility of every drug manufacturer or distributor to review this notice to determine whether it covers any drug product he manufactures or distributes. Any person may request an opinion of the applicability of this notice to a specific drug product he manufactures or distributes that may be identical, related, or similar to a drug product named in this notice by writing to the Division of Drug Labeling Compliance (address given above).

A. *Effectiveness classification.* The Food and Drug Administration has reviewed all available evidence and concludes that the drugs are effective for the indications listed in the labeling conditions below. The drugs now lack substantial evidence of effectiveness for the other indications evaluated as probably or possibly effective in the August 7, 1971 notice.

B. *Conditions for approval and marketing.* The Food and Drug Administration is prepared to approve abbreviated new drug applications and abbreviated supplements to previously approved new drug applications under conditions described herein.

1. *Form of drug.* a. Diethylcarbamazine citrate is in tablet or syrup form.

b. Hydroxystilbamidine isethionate is in sterile powder form suitable, after

V 42 166 AUG 26 77 UMI

reconstitution, for intravenous administration.

c. The remainder of the drugs are in tablet form suitable for oral administration.

2. *Labeling conditions.* a. The label bears the statement,

Caution: Federal law prohibits dispensing without prescription.

b. The drug is labeled to comply with all requirements of the act and regulations, and the labeling bears adequate information for safe and effective use of the drug. The Indications are as follows:

Amodiaquine hydrochloride: For the suppressive treatment and for the treatment of acute attacks of malaria due to *P. vivax, P. malariae, P. ovale,* and susceptible strains of *P. falciparum.*

Hydroxychloroquine sulfate: For the suppressive treatment and treatment of acute attacks of malaria due to *P. vivax, P. malariae, P. ovale,* and susceptible strains of *P. falciparum.* It is also indicated for the treatment of discoid and systemic lupus erythematosus, and rheumatoid arthritis.

Glycobiarsol: For the treatment of intestinal amebiasis in adults and children weighing over 80 pounds, but it is not considered to be the drug of choice.

Diethylcarbamazine citrate: For the treatment of Bancroft's filariasis, onchocerciasis, ascariasis, tropical eosinophilia, and loiasis.

Hydroxystilbamidine isethionate: For the treatment of visceral leishmaniosis (kala azar) and American mucocutaneous leishmaniasis. It is also indicated for the treatment of North American blastomycosis, but it is not considered to be the drug of choice.

3. *Marketing status.* a. Marketing of such drug products that are now the subject of an approved or effective new drug application may be continued provided that, on or before October 25, 1977, the holder of the application submits, if he has not previously done so, (i) a supplement for revised labeling as needed to be in accord with the labeling conditions described in this notice, and complete container labeling if current container labeling has not been submitted, and (ii) a supplement to provide updating information with respect to items 6 (components), 7 (composition), and 8 (methods, facilities, and controls) of new drug application form FD-356H (21 CFR 314.1 (c)) to the extent required in abbreviated applications (21 CFR 314.1(f)).

b. Approval of an abbreviated new drug application (21 CFR 314.1(f)) must be obtained prior to marketing such product. Marketing prior to approval of a new drug application will subject such products, and those persons who caused the products to be marketed, to regulatory action.

C. Notice of opportunity for hearing. On the basis of all the data and information available to him, the Director of the Bureau of Drugs is unaware of any adequate and well-controlled clinical investigation, conducted by experts qualified by scientific training and experience, meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and 21 CFR 314.111 (a)(5), demonstrating the effectiveness of the drug(s) for the indication(s) lacking substantial evidence of effectiveness referred to in paragraph A. of this notice.

Notice is given to the holder(s) of the new drug application(s), and to all other interested persons, that the Director of the Bureau of Drugs proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), withdrawing approval of the new drug application(s) and all amendments and supplements thereto providing for the indication(s) lacking substantial evidence of effectiveness referred to in paragraph A. of this notice, on the ground that new information before him with respect to the drug product(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug product(s) will have all the effects it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling. An order withdrawing approval will not issue with respect to any application(s) supplemented, in accord with this notice, to delete the claim(s) lacking substantial evidence of effectiveness.

In addition to the ground for the proposed withdrawal of approval stated above, this notice of opportunity for hearing encompasses all issues relating to the legal status of the drug products subject to it (including identical, related, or similar drug products as defined in 21 CFR 310.6), e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act pursuant to the exemption for products marketed prior to June 25, 1938, contained in section 201(p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962; or for any other reason.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Parts 310, 314), the applicant(s) and all other persons who manufacture or distribute a drug product which is identical, related, or similar to a drug product named above (21 CFR 310.6), are hereby given an opportunity for a hearing to show why approval of the new drug application(s) providing for the claim(s) involved should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of a drug product named above and all identical, related, or similar drug products.

If an applicant or any person subject to this notice pursuant to 21 CFR 310.6 elects to avail himself of the opportunity for a hearing, he shall file (1) on or before September 26, 1977, a written notice of appearance and request for hearing, and (2) on or before October 25, 1977, the data, information, and analyses on which he relies to justify a hearing, as specified in 21 CFR 314.200. Any other interested person may also submit comments on this proposal to withdraw approval. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.200.

The failure of an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 to file timely written appearance and request for hearing as required by 21 CFR 314.200 constitutes an election by such person not to avail himself of the opportunity for a hearing concerning the action proposed with respect to such drug product and a waiver of any contentions concerning the legal status of such drug product. Any such drug product labeled for the indication(s) lacking substantial evidence of effectiveness referred to in paragraph A. of this notice may not thereafter lawfully be marketed, and the Food and Drug Administration will initiate appropriate regulatory action to remove such drug products from the market. Any new drug product marketed without an approved NDA is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of approval of the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person(s) who requests the hearing making findings and conclusions, denying a hearing.

All submissions pursuant to this notice of opportunity for hearing shall be filed in quintuplicate. Such submissions, except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk between the hours of 9 a.m. and 4 p.m. Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050–1053, as amended (21 U.S.C. 352, 355)) and under the authority delegated to the Director of the Bureau of Drugs (21 CFR 5.82).

Dated: August 18, 1977.

J. RICHARD CROUT,
Director, Bureau of Drugs.

[Docket No. 77N-0226; DESI 7358]

COMBINATION PRODUCT CONTAINING FURAZOLIDONE WITH KAOLIN AND PECTIN

Withdrawal of Approval of Part of New Drug Application

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice withdraws approval of that part of NDA 11-323 pertaining to Furoxone Liquid containing furazolidone with kaolin and pectin. The product has been used as an antibacterial agent.

DATE: Effective September 6, 1977.

ADDRESSES: Requests for opinion of the applicability of this notice to a specific product should be directed to: Division of Drug Labeling Compliance (HFD-310), Bureau of Drugs, Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Ronald L. Wilson, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3650.

SUPPLEMENTARY INFORMATION: In a notice of opportunity for hearing (DESI 7358; Docket No. FDC-D-520 (now Docket No. 77N-0226) published in the FEDERAL REGISTER of March 29, 1973 (38 FR 8186), the Commissioner of Food and Drugs proposed to issue an order withdrawing approval of the new drug application (NDA) for Furoxone Liquid containing furazolidone with kaolin and pectin. The basis of the proposed order was that the drug lacks substantial evidence of effectiveness and is not shown to be safe for use. The holder of the NDA, Norwich Pharmacal Co., filed a request for hearing for the combination product. A notice published in the FEDERAL REGISTER of May 30, 1975 (40 FR 23501) amended March 29, 1973 notice to cite the policy for fixed combination prescription drugs for humans (21 CFR 300.50) because that policy had not been specifically referred to in the March 29, 1973 notice. No data were submitted in response to either notice in support of a hearing for the combination product Furoxone Liquid. By letter of April 28, 1977, Norwich Pharmacal Co. withdrew its hearing request, and approval of the part of the following new drug application pertaining to the product is now being withdrawn:

That part of NDA 11-323 pertaining to Furoxone Liquid containing furazolidone with kaolin and pectin; Norwich Pharmacal Co., division of Morton Norwich, Inc., 17 Eaton Ave., Norwich, NY 13815.

Other products that were included in the March 29, 1973 notice are not affected by this notice, nor is the singleentity Furoxone Liquid containing furazolidone, which was the subject of a FEDERAL REGISTER notice of August 16, 1976 (41 FR 34662).

Any drug product that is identical, related, or similar to the drug product named above, and not the subject of an approved new drug application, is covered by that part of the new drug application reviewed and is subject to this notice (21 CFR 310.6). Any person who wishes to determine whether a specific product is covered by this notice should write to the Division of Drug Labeling Compliance (HFD-210), (address given above).

No other person filed a written appearance of election with respect to a combination of furazolidone, kaolin, and pectin, as provided by said notice. The failure to file such an appearance constitutes election by such persons not to avail themselves of the opportunity for a hearing.

The Director of the Bureau of Drugs, under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat 1052-1053, as amended (21 U.S.C. 355)), and under authority delegated to him (21 CFR 5.82), finds that (1) new information before him with respect to the drug product, evaluated together with the evidence available to him at the time of approval of the application, shows there is a lack of substantial evidence that the drug product will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in its labeling; and (2) tests by methods not deemed reasonably applicable when the application was approved, evaluated together with the evidence available when the application was approved, reveal that the drug is not shown to be safe for use under the conditions of use on the basis of which the application was approved.

Therefore, pursuant to the foregoing finding, approval of that part of new drug application 11-323 pertaining to the combination product Furoxone Liquid, and all amendments and supplements applying thereto, is withdrawn effective September 6, 1977.

Shipment in interstate comerce of the above product or of any identical, related, or similar product, not the subject of an approved new drug application, will then be unlawful.

Dated: August 18, 1977.

J. RICHARD CROUT,
Director, Bureau of Drugs.

[Docket No. 77N-0030]

GRAS AND PRIOR-SANCTIONED HUMAN FOOD INGREDIENTS

Availability of Information; Correction

AGENCY: Food and Drug Administration.

ACTION: Correction.

SUMMARY: In FR Doc. 77-16637, appearing on page 30431 in the FEDERAL REGISTER of Tuesday, June 14, 1977, the following correction is made in the table on page 30432: In the table labeled "Reports of the select committee," the ordering number for the substance "Agaragar" should read, "PB-265-502/AS."

[Docket No. 77N-0240]

SINGLE-ENTITY CORONARY VASODILATORS

Drugs for Human Use; Drug Efficacy Study Implementation; Permission for Drugs To Remain on the Market; Amendment

AGENCY: Food and Drug Administration (FDA).

ACTION: Notice.

SUMMARY: This notice announces (1) the availability of guidelines and methods for evaluating the bioavailability and effectiveness of coronary vasodilators, and (2) the specific conditions under which these products may be marketed while such studies are in progress.

DATES: Notices of intent to conduct bioavailability studies are due on or before September 26, 1977.

Bioavailability studies must be initiated on or before November 25, 1977.

Clinical studies of effectiveness must be completed and submitted by FDA by August 27, 1979.

ADDRESSES: Communications in response to this notice should be identified with the NDA or ANDA number (if any) and the following in a box in the upper portion of the cover letter: "Paragraph XIV Drug—Category I; Coronary Vasodilator" directed to the attention of the office named below, and addressed to the Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857.

Supplements (identify with NDA number): Division of Cardio-Renal Drug Products (HFD-110), Rm. 16B-30, Bureau of Drugs.

Abbreviated New Drug Applications: Division of Generic Drug Monographs (HFD-530), Bureau of Drugs.

Requests for guidelines for bioavailability studies: Division of Biopharmaceutics (HFD-520), Rm. 16-62, Bureau of Drugs.

Requests for guidelines for clinical studies: Division of Cardio-Renal Drug Products (HFD-110), Rm. 16B-30, Bureau of Drugs.

Requests for opinion of the applicability of this notice to a specific product: Division of Drug Labeling Compliance (HFD-310), Bureau of Drugs.

All other submissions required by this notice: Division of Cardio-Renal Drug Products (HFD-110), Rm. 16B-30, Bureau of Drugs.

FOR FURTHER INFORMATION CONTACT:

Robert H. Hahn, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Educa-

V 42166 AUG 26 77 UMI

tion, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301–443–3650.

SUPPLEMENTARY INFORMATION: In notices published in the FEDERAL REGISTER on February 17, 1971 (36 FR 3078) (DESI 12836) and February 25, 1972 (37 FR 4001 (DESI 1786), FDA published its conclusions pursuant to evaluation of reports from the National Academy of Sciences-National Research Council (NAS/NRC), Drug Efficacy Study Group concerning conventional and controlled release dosage forms of certain coronary vasodilators, stating that the drugs are possibly and probably effective and lacking substantial evidence of effectiveness for their labeled indications.

A notice was published in the FEDERAL REGISTER of December 14, 1972, informing manufacturers and distributors of prescription drugs for human use of the order entered October 11, 1972, by Judge William B. Bryant of the U.S. District Court for the District of Columbia, directing the future schedule for implementation of the Drug Efficacy Study. Paragraph XIV of the court order provided that a limited number of drugs, for which there is compelling justification of medical need, may remain on the market pending completion of scientific studies to determine their effectiveness, and it provided for future additions to or deletions from that list. These drugs are referred to as "paragraph XIV drugs." The drugs listed in Category I in that notice are conventional dosage forms of certain coronary vasodilators containing a single active drug entity. A notice was published in the FEDERAL REGISTER of July 11, 1973 (38 FR 18477), and corrected on July 25, 1973 (38 FR 19920), adding other such drugs to the list. Pursuant to petitions to permit controlled release forms of the drugs also to remain on the market pending clinical studies to determine effectiveness, the July 11, 1973 notice provided that controlled release forms could remain on the market on a product-by-product basis pending completion of scientific studies showing that the product is released in a defined manner, which would permit qualified products to be added to the list of drugs allowed to remain on the market pending completion of clinical trials to determine effectiveness. The notice required that data from such studies be submitted to the Food and Drug Administration no later than November 1, 1973. For reasons set forth below, this proved impossible. By this notice, the Commissioner is formally adding controlled release dosage forms of certain of these drugs to Category I under paragraph XIV. These are now being included on the same basic justification as the conventional forms, together with several additional factors relevant to their medical need. Given the prophylactic purpose of these drugs in treatment of angina, a prolonged duration of action can provide a significant advantage. While there is an effective drug for prophylaxis of angina that can be taken as little as three times per day (propranolol), some patients cannot tolerate this alternative longer acting drug and must turn to a drug of the organic nitrate class. Although certain conventional release products in this class are labeled for four times daily dosage, it is not at all certain and appears unlikely, that they will prove to have a 6 hour duration of action. It is therefore important to determine whether the controlled release formulations can provide a reasonably prolonged action and it is appropriate for these products to remain available for patients while this is determined. As evidenced by current usage patterns, many angina patients prefer a dosage form that may have a longer effect and thus be taken less frequently than conventional forms. Methods not available when the July 11, 1973 notice was published are now available and are suitable for evaluating controlled release as well as conventional forms. If controlled release forms are ultimately shown to be effective, their prolonged activity would be of significant benefit to angina patients.

Also now being included are certain dosage forms of nitroglycerin and of erythrityl tetranitrate. Although they were not included in the Drug Efficacy Study, they are regarded as related drugs which should be studied for bioavailability and effectiveness.

Therefore, Category I published in the December 14, 1972 notice, as amended by the July 11, 1973 notice, is amended to read as follows:

I. CORONARY VASODILATORS (ANTIANGINAL DRUGS) (SINGLE ACTIVE DRUG ENTITY)

Isosorbide dinitrate (sublingual, chewable, and conventional oral forms and controlled release forms).

Mannitol hexanitrate (conventional, oral and controlled release forms).

Trolnitrate phosphate (conventional oral and controlled release forms).

Pentaerythritol tetranitrate (conventional oral and controlled release forms).

Nitroglycerin (topical ointment forms, conventional oral forms, and controlled release forms).

Dipyridamole (conventional oral form).

Erythrityl tetranitrate (sublingual, conventional oral, and chewable forms, and controlled release forms).

It has been difficult to determine the bioavailability and effectiveness of the organic nitrate class of antianginal drugs. Effectiveness has been difficult to measure because of the relative insensitivity and variability of the clinical measures used in the evaluation of these drugs. Bioavailability has also been difficult to determine because these drugs are extensively metabolized and conventional blood or urine assay methods are not applicable. Suitably sensitive chemical assay methods for routine use with this class of drugs do not exist at present. Even if it were possible to meaure these drugs and their metabolites in biological fluids, the clinical and pharmacological significance of the blood level of any given metabolite would still be unclear. Although several sponsors submitted physiologic studies to support bioavailability, only one of these studies was found adequate to even suggest that an orally administered organic nitrate may be sufficiently bioavailable to possibly have some clinical effectiveness. The development of appropriate physiologic methods, however, had not been adequately addressed by investigators. For these reasons the requirements set forth in the December 14, 1972 and July 11, 1973 notices have not been met by manufacturers of coronary vasodilator drug products. The possible medical importance of these drugs, including controlled release dosage forms, remains, however, and FDA has sought to overcome some of the methodological deficiencies impeding evaluation of this drug class.

Under FDA sponsorship, research was conducted in an effort to develop methods for evaluating the bioavailability of the antianginal drug products that do not depend on blood level measurements of nitrates. Guidelines and methods for the evaluation of the physiological effects and comparative bioavailability of organic nitrate antianginal drug products were developed by Victor F. Smolen, Ph. D. and Edward J. Williams, Ph. D., School of Pharmacy and Pharmacal Sciences, Purdue University, West Lafayette, Indiana 47907. (The project was entitled "A Study of Drug Bioavailability as Related to Physiological Respone." Food and Drug Administration Contract No. 223–73–3023). This work clearly indicates that physiologic response monitoring can provide reliable, sensitive, convenient, and meaningful measures of the drugs' bioavailability, although at this time this method cannot be used to assess clinical effectiveness. Demonstration of such effectiveness requires the performance of clinical trials. If physiologic responses can be shown to correlate well with clinical effectiveness, then it may be possible in the future to rely upon physiologic response studies to assess the effectiveness of newly formulated organic nitrate drug products.

The FDA-sponsored studies indicate that response variables derived from digital plethysmography (DPG) and electrocardiographic recordings are useful measures of the bioavailability of organic nitrate drugs, i.e., can demonstrate that sufficient drug has been absorbed to elicit a positive measurable indication of pharmacologic activity. Although many response variables appear to show some association with bioavailability, including: (1) Diastolic amplitude, (2) systolic amplitude, (3) cardiac output computed as the products of systolic pulse pressure and heart rate, (4) heart rate, (5) DPG, (6) apparent left ventricular ejection time, and (7) systolic time interval, heart rate and diastolic amplitude appear to correlate best. While Dr. Smolen, the original investigator, acquired his data in a form which could be and was computerized, all of these measurements, except for cardiac output, can readily be manually obtained directly from DPG strip chart recordings without the need for expensive and sophisticated recording and computational equipment. Copies of the detailed guidelines and methods developed by Dr. Smolen for the evaluation of the physiologic responses and comparative bioavailability of organic nitrate antianginal drug products are available on request from the Division of Biopharmaceutics.

As a result of the availability of new and adequate methods for determining the bioavailability of not only the conventional and controlled release forms of coronary vasodilators, but of the sublingual, chewable, and topical forms as well, the Commissioner is now able to state definitively the conditions for their marketing. Those conditions are set forth in this notice and include requirements for both bioavailability and clinical testing. The demonstration of bioavailability had not previously been a prerequisite to conducting clinical trials of the conventional dosage forms. The time required to conduct and analyze clinical trials, however, is often great, and there is no valid reason to permit continued marketing of a drug product during this period if there is little likelihood that the drug will prove effective. It is thus appropriate to require demonstration of bioavailability as an indication of the possibility of effectiveness before permitting a drug to be marketed during clinical testing. Bioavailability testing may also aid in choosing proper dosages and dose intervals for the clinical trials.

As stated in the DESI notices cited above, such products are regarded as new drugs (21 U.S.C. 321(p)). Continued marketing, will, therefore, only be permitted for coronary vasodilator products whose sponsors first perform adequate studies that demonstrate the bioavailability of their products, and subsequently conduct well-controlled studies to demonstrate clinical effectiveness; in addition, an abbreviated new drug application (ANDA) will be required for any product now on the market without an approved new drug application. The Food and Drug Administration intends to act at the earliest possible date to remove from the market products not fulfilling the conditions of this notice.

Following is a list of new drug applications providing for single entity coronary vasodilators. Not all of these were specifically reviewed by the NAS/NRC or named in a DESI notice. Those which were reviewed by the Academy and named in DESI notices are identified by DESI numbers.

DESI 1786

a. Metamine Tablets containing trolnitrate phosphate; Pfizer Laboratories, Division Charles Pfizer & Co., Inc., 235 East 42nd St., New York, NY 10017 (NDA 8–294).

b. Metamine Sustained Tablets containing trolnitrate phosphate; Pfizer, Inc. (NDA 10–131).

c. Nitretamine and Nitretamine-10 Tablets containing trolnitrate phosphate; Squibb Pharmaceutical Co., Division of E. R. Squibb & Sons, Inc., P.O. Box 4000, Princeton, NJ 08540 (NDA 9–196).

d. Penta-Erythritol Tetranitrate Nyscaps containing pentaerythritol tetranitrate; USV Laboratories, Division USV Pharmaceutical Corp., 1 Scarsdale Rd., Tuckahoe, NY 10707 (NDA 12–317).

e. Peritrate Tablets containing pentaerythritol tetranitrate; Warner-Chilcott Laboratories, Division of Warner-Lambert Pharmaceutical Co., 201 Tabor Rd., Morris Plains, NJ 07950 (NDA 8–072).

f. Peritrate SA Tablets containing pentaerythritol tetranitrate; Warner-Chilcott Laboratories (NDA 11–109).

g. Pencard and Pencard No. 2 Tablets containing pentaerythritol tetranitrate; Cole Pharmacal Co., P.O. Box 14404, St. Louis, MO 63108 (NDA 8–852).

h. Maxitate Tablets containing mannitol hexanitrate; Pennwalt Prescription Products Division, P.O. Box 1766, Rochester, NY 14603 (NDA 1–786).

i. Nitranitol Tablets containing mannitol hexanitrate; Merrell-National Laboratories, Division of Richardson-Merrell, Inc., P.O. Box 15260, Cincinnatti, OH 45215 (NDA 3–193).

j. Mannitol Hexanitrate Tablets; S. F. Durst and Co., Inc., Division of O'Neal, Jones, and Feldman, Inc., 1683 Winchester Rd., Philadelphia, PA 19020 (NDA 4–730).

k. Isordil Tablets containing isosorbide dinitrate; Ives Laboratories, Inc., 685 Third Ave., New York, NY 10017 (NDA 12–093).

l. Isodril Sublingual Tablets containing isosorbide dinitrate; Ives Laboratories, Inc. (NDA 12–940).

m. Timed Pentryate Stronger Capsules containing pentaerythritol tetranitrate; Fellows-Testagar, Subdivision of Chromalloy Pharmaceuticals, Inc., 12741 Capital Ave., Oak Park, MI 48237 (NDA 12–646).

n. Pentestan-80 Stancaps containing pentaerythritol tetranitrate; Standex Laboratories, 585 West Second Ave., Columbus, OH 43215 (NDA 12–488).

o. Pentritol Tempules containing pentaerythritol tetranitrate; Armour Pharmaceutical Co., Greyhound Tower, Phoenix, AZ 85077 (NDA 12–311).

p. Duotrate-45 Plateau Caps containing pentacrythritol tetranitrate; Marion Laboratories, Inc., 10236 Bunker Ridge Rd., Kansas City, MO 64137 (NDA 12–748).

q. Metranil Duracaps containing pentaerythritol tetranitrate; Meyer Laboratories, Inc., 1900 W. Commercial Blvd., Ft. Lauderdale, FL 33309 (NDA 12–529).

r. Tetrasule-80 Timesules containing pentaerythritol tetranitrate; Storck Pharmaceuticals, Inc., Division Arnar-Stone Laboratories, Inc., 601 East Kensington Rd., Mount Prospect, IL 60056 (NDA 12–450).

s. Nitroglyn Sustained Action Tablets containing nitroglycerin; Key Pharmaceuticals, Inc., P.O. Box 3670, Miami, FL 33169 (NDA 9–599).

t. Isordil Tembids containing isosorbide dinitrate; Ives Laboratories, Inc. (NDA 12–882).

DESI 12836

Persantine Tablets containing dipyridamole; Geigy Pharmaceuticals, Division of Ciba-Geigy Corp., Ardsley, NY 10502 (NDA 12–836).

THE FOLLOWING NDA'S WERE NOT REVIEWED BY THE NAS/NRC

1. Metamine Tablets containing trolnitrate phosphate; Leeming/Paquin, Division Charles Pfizer & Co., Inc., 235 East 42nd St., New York, NY 10017 (NDA 8–798).

2. Sorbitrate (Sublingual and Oral) Tablets containing isosorbide dinitrate; Stuart Pharmaceuticals, Division of I.C.I. United States, Inc., P.O. Box 751, Wilmington, DE 19899 (NDA's 16–191 and 16–192 respectively).

3. Pentaerythritol Tetranitrate Tablets; Philips Roxane Laboratories, Division of Philips Roxane, Inc., P.O. Box 1738, Columbus OH 43216 (NDA 16–425).

4. Vasitol Tablets containing pentaerythritol tetranitrate; Rowell Laboratories, Inc., 210 Main St., West Baudette, MN 56623 (NDA 16–436).

5. Tranite Tablets containing pentaerythritol tetranitrate; Westfield Laboratories, Inc., Division of O'Neal, Jones, & Feldman, Inc., 3941 Brotherton Rd., Cincinnati, OH 45209 (NDA 16–445).

6. Dipentrate Tablets containing pentaerythritol tetranitrate; Invenex Pharmaceuticals, Division of The Mogul Corp., 2303 Schultz Rd., St. Louis, MO 63141 (NDA 16–449).

7. Pentaerythritol Tetranitrate Tablets; Kirkman Laboratories, Inc., P.O. Box 3929, Portland, OR 97208 (NDA 16–459).

8. Nitrin Tablets containing pentaerythritol tetranitrate; The Vale Chemical Co., Inc., 1201 Liberty St., Allentown, PA 18102 (NDA 16–502).

9. Pentaerythritol Tetranitrate Tablets; Davis-Edwards Pharmacal Corp., Backus Ave., Danbury, CN 06810 (NDA 16–537).

10. Pentaerythritol Tetranitrate Tablets; Lit Drug Co., 2530 Polk St., Union, NJ 07083 (NDA 16–545).

11. Pentran Tablets containing pentaerythritol tetranitrate; Halsey Drug Co., Inc., 1827 Pacific St., Brooklyn, NY 11233 (NDA 16–553).

12. Pentaerythritol Tetranitrate Tablets; Zenith Laboratories, Inc., 140 LeGrand Ave., Northvale, NJ 07647 (NDA 16–555).

13. Pentaerythritol Tetranitrate Tablets; West-Ward, Inc., 745 Eagle Ave., Bronx, NY 10456 (NDA 16–558).

14. Pentaerythritol Tetranitrate Tablets; Stanlabs, Inc., Box 3108, Portland, OR 97208 (NDA 16–561).

15. Pentaerythritol Tetranitrate Tablets; Tutag Pharmaceuticals, Inc., 2599 W. Midway Blvd., Broomfield, CO 80020 (NDA 16–567).

16. Pentaerythritol Tetranitrate Tablets; American Pharmaceutical Co., Inc., P.O. Box 448, Passaic, NJ 07055 (NDA 16–593).

17. Pentaerythritol Tetranitrate Tablets; Bolar Pharmaceutical Co., Inc., 130 Lincoln St., Copiague, Long Island, NY 11726 (NDA 16–625).

18. Dilivas Tablets containing pentaerythritol tetranitrate; Ferndale Laboratories, Inc., 780 West Eight Mile Rd., Ferndale, MI 48220 (NDA 16–661).

19. Sorbitrate Chewable Tablets containing isosorbide dinitrate; Stuart Pharmaceuticals, Division of I.C.I. United States, Inc. (NDA 16–776).

20. Hydronal Oral Solution containing isosorbide; Stuart Pharmaceuticals, Division of I.C.I. United States, Inc. (NDA 17–063).

21. Corodyl Forte Sustained Release Tablets containing pentaerythritol tetranitrate; Bock Pharmacal Co., 5435 Highland Park Dr., St. Louis, MO 63110 (NDA 12–519).

22. Pent-T–80 Sustained Release Capsules containing pentaerythritol tetranitrate; Merlcon Industries, Inc., 420 S.W. Washington St., Peoria, IL 61602 (NDA 12–613).

23. Tetrate-80 Time Disintegrating Capsules containing pentaerythritol tetranitrate; Pasadena Research Laboratories, Inc., 2107 E. Villa St., Pasadena, CA 91107 (NDA 13–303).

24. Tranite D-Lay Sustained Release Capsules containing pentaerythritol tetranitrate; Westerfield Laboratories, Inc., (NDA 16–499[1]).

25. Pentitrol Tempules (Sustained Release Capsules) containing pentaerythritol tetra-

nitrate; Armour Pharmaceutical Co., (NDA 16-457[1]).

26. Duotrate-30 Plateau Capsules containing pentaerythritol tetranitrate; Marion Laboratories, Inc., (NDA 16-470[1]).

27. Nitroglyn Sustained Action Tablets; Key Pharmaceuticals, Inc., (NDA 9-599).

28. Nitro-Bid (controlled release) Capsules; Marion Laboratories, Inc., (NDA's 16-518 and 16-975).

29. Nitrong (controlled release) Tablets; Wharton Laboratories, Inc., Division U.S. Ethicals, Inc., 37-02 48th Ave., Long Island City, NY 11101 (NDA 17-384).

30. Nitrospan (controlled release) Capsules; USV Laboratories, Division USV Pharmaceutical Corp., (NDA 16-447).

31. Perispan Timed Disintegration Capsules containing pentaerythritol tetranitrate; USV Laboratories (NDA 12-317).

32. Duotrate-45 Plateau Capsules (sustained release) containing pentaerythritol tetranitrate; Marion Laboratories, Inc. (NDA 12-748).

This notice applies not only to present holders of new drug applications covering the drugs listed but to all persons who manufacture or distribute any drug product that is identical, related, or similar to these, as set forth in 21 CFR 310.6, including erythrityl tetranitrate and nitroglycerin ointment, not the subject of an approved new drug application, except that it does not apply to nitroglycerin in sublingual form. Reference sources such as "American Drug Index" and "Drug Topics Red Book" indicate that numerous firms supply such products. It is the responsibility of every drug manufacturer or distributor to review this notice to determine whether it covers any drug product he manufactures or distributes. Any person may request an opinion of the applicability of this notice to a specific drug product he manufactures or distributes that may be identical, related, or similar to a drug product named in this notice by writing to the Division of Drug Labeling Compliance (address given above).

The Commissioner concludes that any such product, whether or not it is now marketed and whether or not it is now the subject of an approved new drug application, may be marketed in order to fulfill the critical medical need for antianginal preparations with more prolonged activity than sublingual nitroglycerin only if it meets the requirements of this notice. The Commissioner emphasizes that FDA will take regulatory action to terminate marketing of any product not in compliance with this notice.

REQUIREMENTS FOR PRODUCTS NOW SUBJECTS OF APPROVED NDA'S

Proceedings to withdraw approval of new drug applications which are in approved status on August 26, 1977, will not be taken provided that each of the following conditions is met:

1. On or before September 26, 1977, an applicant who intends to conduct bioavailability studies for one or more dosage forms notifies the Division of Cardio-Renal Drug Products.

Bioavailability studies are begun by November 25, 1977, and the Division of Cardio-Renal Drug Products is notified within 10 days after studies are begun.

3. Bioavailability studies are completed and submitted to the Division of Cardio-Renal Drug Products within 30 days after their completion or 6 months after their initiation, whichever is earlier.

4. Clinical trials are begun not later than 4 months after notification by FDA that the bioavailability data are satisfactory. They may, of course, be begun earlier than this. (If FDA determines that the bioavailability data do not indicate the product is bioavailable, proceedings will be initiated to withdraw approval of the application and future clinical trials would necessitate an IND.)

5. An analyzed progress report of the clinical trials is submitted annually to the Division of Cardio-Renal Drug Products and a brief progress report is submitted at 6-month intervals.

6. Clinical trials are completed and the results submitted to the Division of Cardio-Renal Drug Products by August 27, 1979. If the studies are completed before that time, the results shall be submitted within 30 days after their completion.

REQUIREMENTS FOR PRODUCTS NOT NOW SUBJECTS OF APPROVED NDA'S

Regulatory proceedings to remove from the market such products that were marketed commercially on August 26, 1977, will not be taken provided that each of the following conditions is met:

1. On or before September 26, 1977, the sponsor notifies the Division of Cardio-Renal Drug Products of his intent to conduct bioavailability studies for one or more dosage forms.

2. By November 25, 1977, the sponsor submits an abbreviated new drug application (ANDA) (21 CFR 314.1(f)) for the product(s) to the Division of Generic Drug Monograph (HFD-530), Bureau of Drugs. If the information in the ANDA is complete and satisfactory, it will be conditionally approved, pending results of bioavailability and clinical studies. Such conditionally approved products will have the same legal status as products that are subjects of "deemed approved" applications reviewed in the Drug Efficacy Study; that is, as products for which safety is not in question but for which effectiveness has not been proven.

3. Bioavailability studies are begun by November 25, 1977, and the Division of Cardio-Renal Drug Products is notified within 10 days after studies are begun.

4. Bioavailability studies are completed and submitted to the Division of Cardio-Renal Drug Products within 30 days of their completion or 6 months after their initiation whichever is earlier.

5. FDA has not issued a non-approvable letter to the applicant concerning the ANDA.

6. The ANDA is conditionally approved by May 23, 1978.

7. Clinical trials are begun no later than 4 months after notification by the Division of Cardio-Renal Drug Products that the bioavailability data are satisfactory. They may, of course, be begun earlier than this. (If FDA determines that the bioavailability data do not indicate the product is bioavailable, proceedings will be commenced to withdraw or refuse approval of the application and future clinical trials would necessitate an IND).

8. An analyzed progress report of the clinical trials is submitted annually to the Division of Cardio-Renal Drug Products and a brief progress report is submitted at 6-month intervals.

9. Clinical trials are completed and the results submitted to the Division of Cardio-Renal Drug Products by August 27, 1979. If the studies are completed before that time, the results shall be submitted within 30 days after their completion.

REQUIREMENTS FOR PRODUCTS ENTERING THE MARKET AFTER AUGUST 26, 1977

Regulatory action will not be taken against a product that enters the market after August 26, 1977 provided that each of the following conditions is met:

1. Prior to marketing the product, the sponsor submits an ANDA (21 CFR 314.-1(f)) and his commitment to conduct bioavailability and clinical studies. If the information in the ANDA is complete and satisfactory, it will be conditionally approved pending results of bioavailability and clinical studies. Such conditionally approved products will have the same legal status as products that are subject of "deemed approved" applications reviewed in the Drug Efficacy Study; that is, as products for which safety is not in question but for which effectiveness has not been proven.

2. The FDA does not issue a non-approvable letter regarding such application.

3. The ANDA is conditionally approved within 180 days after it is submitted.

4. Bioavailability studies are begun within 10 days after submitting the application.

5. Bioavailability studies are completed and submitted to the Division of Cardio-Renal Drug Products within 30 days after their completion or 6 months after their initiation, whichever is earlier.

6. Clinical studies are begun no later than 4 months after notification by the Division of Cardio-Renal Drug Products that bioavailability data are satisfactory. They may, of course, be begun earlier than this. (If FDA determines that the bioavailability data do not indicate the product is bioavailable, proceedings will be initiated to withdraw or refuse approval of the application and future clinical trials would necessitate an IND.)

7. An analyzed progress report of the clinical trials is submitted annually to the Division of Cardio-Renal Drug Products and a brief progress report is submitted at 6-month intervals.

8. Clinical trials are completed and the results submitted to the Division of Cardio-Renal Drug Products by August 27, 1979. If the studies are completed before that time, the results shall be submitted within 30 days after their completion.

The Commissioner points out that the time limit for completion and submission of clinical studies is the same as for products already on the market on August 26, 1977. To extend the time simply because a product entered the market after that date is regarded as inconsistent with the FDA policy to resolve effectiveness questions on paragraph XIV drugs at the earliest possible time and to require all marketed products to be subject to testing requirements. Thus, persons desiring to market new products in this category significantly late in the timetable set forth in this notice will probably have to join a collaborative study (discussed below) in order to meet this condition.

BIOAVAILABILITY STUDIES

All products in this category must be tested using either the guidelines that were developed under the FDA (Smolen) contract or another well-documented method. Other methods can be used only if the sponsor submits evidence, in advance, that they are equally applicable and maintains compliance with the schedule described below.

Bioavailability studies must be performed for each dosage form marketed (including controlled release products), but not each strength, provided the formulations involve the same inactive ingredients in approximately the same ratios. It will not be necessary to perform clinical trials with each dosage form provided those dosage forms not subjected to clinical trials are similar in their bioavailability characteristics to the drug products which are tested clinically. If a product with a controlled release claim is tested in clinical trials, it must be compared with a conventional dosage form in such a manner to enable FDA to determine that the prolonged effect of the controlled release product is not due merely to its greater drug content (i.e., dose dumping) and that it is comparable in effect to the immediate release product given at appropriate intervals. If any product is administered at levels which exceed the largest dose recommended for that drug by any of its manufacturers in currently approved or permitted labeling, a Notice of Claimed Investigational Exemption for a New Drug (IND) will be needed for the study.

Guidelines for bioavailability studies are available from the Division of Biopharmaceutics. Sponsors who elect to use alternative methods must obtain advance approval from the Division of Biopharmaceutics, but the times for starting and completing such studies will not be extended beyond those stated above. Upon notification that the submitted bioavailability data are satisfactory, the sponsor must then go on to clinical trials for effectiveness as outlined below. If the bioavailability data are not satisfactory, regulatory action will be taken to remove the drug from the market.

Bioavailability data will be considered satisfactory to permit entry into clinical trials only if the dosage for which a pharmacologic effect is demonstrated does not exceed the largest dose recommended for that drug by any of its manufacturers in currently approved or permitted labeling.

If a firm elects to study clinically a dosage higher than in its current labeling, but no higher than in another firm's labeling, it must do a pilot safety study. While larger doses than this may be studied under an IND, failure to demonstrate that the currently recommended dosage is acceptably bioavailable will be considered grounds for revoking its paragraph XIV exemption, and regulatory action will be taken to remove the drug from the market.

To be considered bioavailable, the product must be tested using an approved protocol and shown to be different, according to criteria set forth in FDA's guidelines for bioavailability, from placebo with respect to its effect on the physiologic measurement during an interval appropriate to the recommended dosing intervals.

CLINICAL STUDIES

After bioavailability data are submitted and FDA determines that they are adequate, clinical trials for effectiveness must be conducted for each coronary vasodilator drug product, except that (1) manufacturers of drugs with the same active ingredient and acceptable bioavailability characteristics may elect to conduct collaborative studies, and (2) manufacturers of several dosage forms of the same drug may choose one of those dosage forms for clinical trials provided that those dosage forms not subjected to clinical trials have bioavailability characteristics similar to those of the selected products. The choice of dosage and dosage interval to be studied may be influenced by the results of bioavailability studies; as noted above, however, the dosage used in studies conducted under the provisions of this notice may not exceed the largest dose recommended for that drug by any of its manufacturers in current permitted or approved labeling.

If a firm elects to study clinically a dosage higher than in its current labeling, but no higher than in another firm's labeling, it must do a small pilot safety study.

Guidelines for the clinical study of coronary vasodilators are available on request from the Division of Cardio-Renal Drug Products as follows:

a. *Sublingual Isosorbide Dinitrate, Sublingual Erythrityl Tetranitrate.* Final guidelines have been developed for the study of a drug in acute angina pectoris by the FDA Cardiovascular-Renal Advisory Committee. These guidelines involve treatment of an acute attack only. Because claims are also being made for prophylaxis of an acute attack, sponsors will also need to develop and submit protocols for study of sublingual isosorbide dinitrate or sublingual erythrityl tetranitrate given prior to an exercise tolerance test.

b. *Oral Organic Nitrates, Controlled Release and Topical Nitroglycerin and Conventional Oral Dipyridamole.* Guidelines that have similarly been developed by the FDA Cardiovascular-Renal Advisory Committee for assessment of oral antianginal investigational new drugs may be utilized for the Phase III clinical studies required to demonstrate effectiveness for the oral organic nitrates, controlled release and topical nitroglycerin and dipyridamole. Bioavailability studies should also be conducted in some patients undergoing clinical trials to attempt to show a correlation between physiologic and clinical effects. It is recommended that such physiologic effects be measured once in the placebo baseline period, at the onset of the drug (or placebo) treatment period, and midway through the treatment period.

All submissions (e.g., notice of intent, protocol, progress report, study results) pursuant to this notice shall be identified by including the NDA or ANDA number and the following in a box in the upper portion of the cover letter:

"Paragraph XIV Drug– Category I: Coronary Vasodilator."

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 505, 701, 52 Stat. 1052–1053, as amended, 1055–1056, as amended (21 U.S.C. 355, 371)), the Administrative Procedure Act (U.S.C. 553, 554), and under authority delegated to the Commissioner (21 CFR 5.1).

Dated: August 22, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

National Institute of Education

PANEL FOR THE REVIEW OF LABORATORY AND CENTER OPERATIONS

Meeting

AGENCY: National Institute of Education.

ACTION: Notice of public meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of the first meeting of the Panel for the Review of Laboratory and Center Operations. It also describes the function of the Panel. Notice of these meetings is required under the Federal Advisory Committee Act (5 U.S.C., Appendix 1, 10(a)). This document is intended to notify the general public of its opportunity to attend.

DATES: The Panel will meet Sunday, September 11 from 7 p.m. to 10 p.m. and Monday, September 12 from 9 a.m. to 5 p.m.

ADDRESS: National Institute of Education, Room 823, 1200 19th Street NW., Washington, D.C. 20208.

FOR FURTHER INFORMATION CONTACT:

Mr. John O'Brien, Laboratory and Center, Task Force, National Institute of Education, 1200 19th Street NW., Washington, D.C. 20208.

The Panel for the Review of Laboratory and Center Operations was established under the provisions of Section 403 of the Education Amendments of 1976. The Panel is directed to:

(A) Review and prepare recommendations on initial long-range plans of the laboratories and centers.

(B) Review the operations of the laboratories and centers receiving assistance and make recommendations for the

V 42 166 AUG 26 77 7 UMI

improvement and continuation of individual laboratories and centers and for the support of new laboratories and centers.

(C) Not later than January 1, 1979 submit a final report to the Director and to the Congress containing such recommendations as the Panel considers appropriate and such interim reports as the Panel considers appropriate.

The proposed agenda for the September 11–12 meeting includes the following:

SEPTEMBER 11

Review of Laboratory and Center Panel Charter.
Charge to the Panel.

SEPTEMBER 12

Historical Review of NIE's Relationship with the Laboratories and Centers.
Discussion of the Panel's Operating Style.
Discussion of Tasks and Workplans.

Records shall be kept of all Panel proceedings and shall be available 14 days after the meeting for public inspection at the National Institute of Education located at 1200 19th Street NW., Washington, D.C. 20208.

Signed at Washington, D.C., on August 24, 1977.

JOHN CHRISTENSEN,
Acting Director.

National Institutes of Health

REPORT ON BIOASSAY OF DICHLORVOS FOR POSSIBLE CARCINOGENICITY

Availability

Dichlorvos has been tested for cancer-causing activity with rats and mice in the Carcinogenesis Program, Division of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary: A bioassay for the possible carcinogenicity of technical-grade dichlorvos was conducted using Osborne-Mendel rats and B6C3F1 mice. The test material was administered in the diet at two concentrations for 80 weeks to groups of 50 animals of each species and sex. The test animals were held for observation, and surviving rats were killed at 110–111 weeks and surviving mice at 92–94 weeks from initiation of the study. Initial doses in both species were not well tolerated and they were lowered after a few weeks. Time-weighted average doses for both males and females were 150 and 326 ppm for rats and 318 and 635 ppm for mice. The matched controls consisted of 10 rats of each sex and 10 mice of each sex; the pooled controls consisted of 60 rats of each sex, 100 male mice, and 80 female mice. All surviving rats were killed at 106 to 109 weeks; surviving mice, at 92 to 94 weeks.

After the doses were reduced, no toxic signs directly attributable to the compound were observed. However, average weights of high-dose animals were slightly depressed. Survival was not dose-related in either species. Microscopic study of the tissues of treated animals and matched and pooled controls revealed no statistically significant increase in the incidence of tumors attributable to exposure to dichlorvos in either animal species. The significance of the three esophageal tumors in male and female mice and of malignant fibrous histiocytomas in male mice is unclear and there is insufficient evidence to indicate they were associated with dichlorvos treatment. Thus under the conditions of this study, dichlorvos was not demonstrated to be carcinogenic.

Single copies of the 98-page report are available from the Office of Cancer Communications, National Cancer Institute, Building 31, Room 10A21, National Institutes of Health, Bethesda, Md. 20014.

(Catalogue of Federal Domestic Assistance Program Number 13.393, Cancer Cause and Prevention Research.)

Dated: August 5, 1977.

THOMAS E. MALONE,
Acting Director,
National Institutes of Health.

Office of the Assistant Secretary for Health

NATIONAL PROFESSIONAL STANDARDS REVIEW COUNCIL

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Council meeting:

NAME: National Professional Standards Review Council.

DATE AND TIME: September 12, 1977 (10:00 a.m. to 5:00 p.m.); September 13, 1977 (9:00 a.m. to 1:00 p.m.).

PLACE: Auditorium (first floor), DHEW North Building, 330 Independence Avenue SW., Washington, D.C.

PURPOSE OF MEETING: The Council was established to advise the Secretary of Health, Education, and Welfare on the administration of Professional Standards Review (Title XI, Part B, Social Security Act). Professional Standards Review is the procedure to assure that the services for which payment may be made under the Social Security Act are medically necessary and conform to appropriate professional standards for the provision of quality health care. The Council's agenda will include discussion of a variety of issues relevant to the implementation of the PSRO program.

Meeting of the Council is open to the public. Public attendance is limited to space available.

Any member of the public may file a written statement with the Council before, during, or after the meeting. To the extent that time permits, the Council Chairman will allow public presentation of oral statements at the meeting.

All communications regarding this Council should be addressed to William D. Coughlan, Staff Director, National Professional Standards Review Council, Office of Quality Standards, Room 16A-09, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857, 301–443–4990.

Dated: August 16, 1977.

WILLIAM B. MUNIER,
Executive Secretary, National Professional Standards Review Council.

[FR Doc.77-24955 Filed 8-25-77;8:45 am]

Public Health Service

HEALTH SERVICES ADMINISTRATION

Statement of Organization, Functions, and Delegations of Authority

Part H, Chapter HS, Health Services Administration, of the Statement of Organizations, Functions, and Delegations of Authority for the Department of Health, Education, and Welfare (41 FR 6788, February 13, 1976) is amended to reflect the establishment in the Indian Health Service (HSN) of the California Program Office (HSNFQ).

"Section HS–B, Organization and Functions," is amended by adding the California Program Office (HSNFQ). No change is made in the current function statement for the Indian Health Service Area and Program Offices.

Dated: August 15, 1977.

JOHN D. YOUNG,
Assistant Secretary for Management and Budget.

[FR Doc.77-14459 Filed 8-25-77;8:45 am]

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[M 21435]

MONTANA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

AUGUST 16, 1977.

The Department of Agriculture filed application, Serial No. M 21435, on May 3, 1972, for a withdrawal in relation to the following described lands:

PRINCIPAL MERIDIAN, MONTANA

DEERLODGE NATIONAL FOREST

Spire Rock Spike Camp

T. 2 N., R. 5 W.,
Sec. 6, SE¼ of Lot 4, Lot 5.
Total area—53.89 acres.

Rock Creek Spike Camp

T. 6 N., R. 7 W.,
Sec. 20, Lot 4 and NE¼NW¼SE¼.
Total area—47.54 acres.

Douglas Creek Administrative Site

T. 9 N., R. 12 W.,
Sec. 28, N½N½SW¼SW¼ and S½S½-NW¼SW¼.
Total area—20 acres.

East Fork of Rock Creek Trail Head Facilities

T. 4 N., R. 14 W.,
Sec. 17, W½SW¼NE¼ and E½SE¼NW¼.
Total area—40 acres.

Carp Lakes Trail Head Facilities

T. 3 N., R. 15 W.,
Sec. 11, N½NW¼NW¼.
Total area—20 acres.

Fuse Lake Recreation Area

T. 6 N., R. 17 W.,
Sec. 27, S½NW¼NW¼ and N½SW¼NW¼; and
Sec. 28, SE¼NE¼NE¼ and NE¼SE¼NE¼
Total area—60 acres.

Rock Creek Trail End Facility

T. 2 S., R. 3 W.,
Sec. 6, SE¼ of Lot 6 and NE¼ of Lot 8.
Total area—15 acres.

The areas described aggregate 256.43 acres in Jefferson, Granite, and Madison Counties, Mont.

The applicant desires that the lands be reserved for administrative sites and recreation areas.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on June 1, 1972, Volume No. 37, Page No. 10964, Doc. No. 72–8263.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, P.O. Box 30157, Billings, Mont. 59107, on or before September 27, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 27, 1977.

The above-described lands are temporarily segregated from the operation of the public land laws, including the mining laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, P.O. Box 30157, Billings, Mont. 59107.

ROLAND F. LEE,
Chief, Branch of Lands and Minerals Operations.

[FR Doc.77-24753 Filed 8-25-77;8:45 am]

[NM 31410]

NEW MEXICO

Application

AUGUST 18, 1977.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Company has applied for two 4½-inch natural gas pipeline rights-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 22 S., R. 21 E.,
Sec. 1, lot, 2, SW¼NE¼, N½SE¼ and SE¼SE¼.
T. 22 S., R. 22 E.,
Sec. 6, lot 7 and SE¼SW¼;
Sec. 7, W½NW¼ and NE¼NW¼.

These pipelines will convey natural gas across 1.791 miles of public lands in Eddy County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, N. Mex. 88201.

FRED E. PADILLA,
Chief, Branch of Lands and Minerals Operations.

[FR Doc.77-24752 Filed 8-25-77;8:45 am]

[M 37275]

MONTANA

Proposed Withdrawal and Reservations of Lands

AUGUST 16, 1977.

The Bureau of Reclamation, Department of the Interior, on May 19, 1977, filed application, No. M 37275, for the withdrawal of the following described public lands from settlement, sale, location, or entry under all the general land laws, including the mining laws but excluding the mineral leasing laws, subject to valid existing rights:

PRINCIPAL MERIDIAN, MONTANA

T. 30 N., R. 1 W.,
Sec. 2, Lot 4.
T. 30 N., R. 1 E.,
Sec. 17, SE¼NE¼.
T. 30 N., R. 2 E.,
Sec. 26, NE¼NE¼.
T. 30 N., R. 3 E.,
Sec. 19, Lot 13 and SE¼SW¼; and
Sec. 30, Lot 1.
T. 30 N., R. 4 E.,
Sec. 13, NW¼NE¼; and
Sec. 28, N½NW¼.

The areas described aggregate 338.72 acres in Liberty and Toole Counties.

The applicant desires the lands for multipurpose development in accordance with the Tiber Reservoir Management plans of the Pick-Sloan Missouri Basin Program.

On or before September 27, 1977, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, notice is hereby given that an opportunity for a public hearing is afforded. All interested persons who desire to be heard on the proposed withdrawal must submit a written request for a hearing to the State Director, Bureau of Land Management, at the address shown below by September 27, 1977. Upon determination by the State Director that a public hearing will be held, the time and place will be announced.

The Department of the Interior's regulations provide that the authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demands for the lands and their resources. He will also undertake negotiations with the applicant agency with the view of adjusting the application to reduce the area to the minimum essential to meet the applicant's needs, to provide for the maximum concurrent utilization of the lands for purposes other than the applicant's, and to reach agreement on the concurrent management of the lands and their resources.

The authorized officer will also prepare a report consideration by the Secretary of the Interior who will determine whether or not the lands will be withdrawn as requested by the applicant agency. The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

For a period of two years from the date of publication of this notice in the FEDERAL REGISTER, the lands will be segregated from entry as specified above unless the application is rejected or the withdrawal is approved prior to that date. If the withdrawal is approved by the Secretary, the lands will remain segregated for the term of the withdrawal.

All communications in connection with this withdrawal (except public hearing requests) should be addressed to the undersigned, Bureau of Land Management, Department of the Interior, Montana State Office, P.O. Box 30157, Billings, Mont. 59107.

ROLAND F. LEE,
Chief, Branch of Lands and Minerals Operations.

NEW MEXICO

Applications

AUGUST 18, 1977.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Company has applied for one 8⅝-inch, one 4½-inch natural gas pipelines and two underground cable rights-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 28 N., R. 5 W.,
Sec. 21, W½NE¼ and E½NW¼.
T. 29 N., R. 8 W.,
Sec. 1, lots 1, 2 and SW¼NE¼;
Sec. 12, W½W½.
T. 30 N., R. 8 W.,
Sec. 8, S½NE¼ and NE¼SE¼.
T. 31 N., R. 11 W.,
Sec. 2, SW¼SW¼.

The pipelines and cables will be used in connection with natural gas operations and will cross 2.420 miles of public lands in Rio Arriba and San Juan Counties, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, New Mexico 87107.

FRED E. PADILLA,
Chief, Branch of Lands and Minerals Operations.

INTERIM MANAGEMENT SUBCOMMITTEE OF CALIFORNIA DESERT CONSERVATION AREA ADVISORY COMMITTEE

Meeting

Notice is hereby given that the Interim Management Subcommittee of the California Desert Conservation Area Advisory Committee (CDCAAC) will meet at 10 a.m. on September 12, 1977. The meeting will be in the Garden Room of the Host of Sacramento Hotel at the Sacramento airport.

The purpose of the meeting is to discuss, review and provide guidance to BLM officials on interim management items and proposals in advance of the CDCAAC meeting scheduled for September 23–24, 1977. The Subcommittee will also address its future role so as to prepare a recommendation to BLM officials and the CDCAAC.

Specific interim management items to be reviewed and assessed for their desert-wide implications or irreversibility will be the Yuha, Red Mountain, and El Paso MFP implementation plans; Cadiz and East Mesa ORV event environmental assessments; and the East Mojave MFP. These same items will be presented indepth to the CDCAAC on September 23–24. Subcommittee review will consist of advising District Managers on approach, presentation, prioritization, and to provide advance briefing so the Subcommittee may present recommendations to the full committee.

Dated: August 18, 1977.

ED HASTEY,
State Director.

National Park Service

LAKE MOHAVE RESORT, INC.

Intention To Extend Concession Contract

Pursuant to the provisions of Section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that on or before September 26, 1977, the Department of the Interior, through the Director of the National Park Service, proposes to extend the concession contract with Lake Mohave Resort, Inc., authorizing it to continue to provide concession facilities and services for the public at Lake Mead National Recreation Area for a period of two (2) years from January 1, 1977, through December 31, 1978.

It has been determined that the proposed extension of this contract does not have potential for causing significant environmental impact and therefore preparation of an environmental assessment is not required.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which expired by limitation of time on December 31, 1976, and therefore, pursuant to the Act of October 9, 1965, as cited above, is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract. This provision, in effect, grants Lake Mohave Resort, Inc., as the present satisfactory concessioner, the right to meet the terms of responsive offers for the proposed new contract and a preference in the award of the contract, if the offer of Lake Mohave Resort, Inc., is substantially equal to others received. The Secretary is also required to consider and evaluate all proposals received as a result of this notice. Any proposal to be considered and evaluated must be submitted on or before September 26, 1977.

Interested parties should contact the Assistant Director, Special Services, National Park Service, Washington, D.C. 20240, for information as to the requirements of the proposed contract.

Dated: August 16, 1977.

DANIEL J. TOBIN, JR.,
Acting Associate Director, National Park Service.

OLYMPIC NATIONAL PARK

Public Workshops

Notice is hereby given that six public workshops will be held regarding backcountry shelter management in Olympic National Park. The purpose of the workshops is to determine the most suitable policy for managing park shelters in the park.

The first two workshops will be in the Huntley Cafeteria at the Aberdeen High School in Aberdeen, Wash., on Tuesday, September 20, 1977. Times for the two workshops are 2:00 p.m. to 5:00 p.m. and 7:00 p.m. to 10:30 p.m. The second two workshops will be held in room 19 at Peninsula College, Port Angeles, Washington on Wednesday, September 21, 1977. The times for these two workshops are 1:30 p.m. to 5:00 p.m. and 7:00 p.m. to 10:30 p.m.

The third two workshops will be held in The Blakely Room at the Seattle Center in Seattle, Washington on Thursday, September 29, 1977 Times for these two workshops are 1:30 p.m. to 5:00 p.m. and 7:00 p.m. to 10:30 p.m.

Written statements may be submitted to the Superintendent up to 30 days following the final workshop. The address is: Superintendent Olympic National Park, 600 East Park Avenue, Port Angeles, Washington 98362.

EDWARD J. KURTZ,
Acting Regional Director, Pacific Northwest Region.

ENVIRONMENTAL IMPACT STATEMENT, EAGLE BUTTE MINE, CAMPBELL COUNTY, WYOMING

Availability of Final Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a final environmental impact statement on the Eagle Butte coal strip mining operation proposed by Amax Coal Company in Campbell County, Wyoming. The final statement assesses the environmental impacts of the lessee's plan for the strip mining of the federally and State owned coal and the concurrent reclamation and revegetation of surface lands. The proposed action is on Federal coal lease W-0313773 and State coal lease O-27078, T. 51 N., R. 72 W., 6th Prin. Mer.

Comments received on the draft environmental statement during the comment period were considered in the preparation of the final environmental statement and are reproduced in its appendix.

The proposed mining and reclamation plan assessed in this statement was one of the mining proposals identified in the preparation of the regional analysis (Part I) of the Department's final environmental statement, FES 74-55, entitled "Proposed Development of Coal Resources in the Eastern Powder River Coal Basin of Wyoming," which was filed with the Council on Environmental Quality on October 18, 1974.

The final environmental statement is available for public review in the U.S. Geological Survey Public Inquiries Office, Room 1012, Federal Building, Denver, Colorado 80202; the U.S. Geological Survey Library, Building 25, Denver Federal Center, Denver, Colorado 80225; the U.S. Geological Survey Library, Room 4A100, USGS National Center, Reston, Virginia 22092; the Converse County Library, 300 Walnut Street, Douglas, Wyoming 82633; the George Amos Memorial Library, 412 South Gillette Avenue, Gillette, Wyoming 82716; the Library of Natrona County, 307 East Second, Casper, Wyoming 82601; and the State Library, State of Wyoming, Supreme Court Building, Cheyenne, Wyoming 82002.

A limited number of copies are available from the U.S. Geological Survey, Land Information and Analysis Office, Environmental Impact Analysis Program, Denver Federal Center, Box 25046, Denver, Colorado 80-225; and, over the counter only, from the U.S. Geological Survey Public Inquiries Office, Room 1012, Federal Building, Denver, Colorado.

Dated: August 19, 1977.

JOAN M. DAVENPORT,
Assistant Secretary of the Interior.

NORTHWEST ALLOYS MAGNESIUM PLANT, WASHINGTON

Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Bonneville Power Administration has prepared an Environmental Statement on Electrical Service to the Northwest Alloys Magnesium Plant in Addy, Wash. The proposal addressed in this statement involves the provision of full electrical service to the Northwest Alloys plant located in Stevens County, Wash. now scheduled to occur during the fall of 1977.

Copies of the Final Environmental Statement are available for inspection in the library of the headquarters office of Bonneville Power Administration, 1002 Northeast Holladay Street, Portland, Ore. 97232; the Washington, D.C., Office in the Interior Building, Room 5600; and at the BPA's Spokane Area Office, Room 561, U.S. Court House, W. 920 Riverside Avenue, Spokane, Wash. 99201.

Copies are also available at Government Depository Libraries (see attached list below).

A limited number of single copies are available and may be obtained by writing to the Environmental Manager, Bonneville Power Administration, P.O. Box 3621, Portland, Ore. 97208.

Dated: August 22, 1977.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 76-7]

WAYNE E. ELLISON, d.b.a. WAYNE'S PHARMACY AND NORTH STRINGTOWN PLAZA, INC., d.b.a. WAYNE'S PHARMACY

Final Order

On February 25, 1976, the Administrator of the Drug Enforcement Administration (DEA) issued to Wayne E. Ellison, doing business as Wayne's Pharmacy, Evansville, Ind., an Order to Show Cause proposing to revoke Respondent Ellison's DEA Certificate of Registration, AE4124284, for reason that on February 6, 1976, in the United States District Court for the Southern District of Indiana, Mr. Ellison was convicted in several counts of distributing, and conspiring to distribute, controlled substances. Simultaneously with service of the Order to Show Cause upon Mr. Ellison, the Administrator suspended the registration of Wayne's Pharmacy and seized all controlled substances acquired under and possessed pursuant to that registration. Subsequently, through counsel, Respondent Ellison requested a hearing on the issues raised by the Order to Show Cause.

As proceedings preliminary to the requested hearing progressed, the Drug Enforcement Administration received an application for registration of a newly formed corporate entity, North Stringtown Plaza, Inc., doing business as Wayne's Pharmacy. On September 24, 1976, the Administrator issued an Order to Show Cause proposing to deny Respondent North Stringtown Plaza's application based upon information that "Wayne E. Ellison remain[ed] associated with and, for all intents and purposes, in control of Wayne's Pharmacy." On October 7, 1976, counsel for North Stringtown Plaza, Inc., requested a hearing on the second Order to Show Cause. Subsequently, on October 22, 1976, the Honorable Francis L. Young, Administrative Law Judge, ordered that the two matters be consolidated under Docket No. 76-7. After further preliminary proceedings, including a prehearing conference held in Washington, D.C., in January, 1977, the consolidated matters were set for hearing to commence on June 14, 1977, in Indianapolis, Ind.

On June 13, 1977, counsel for the Government and the Respondents agreed upon a stipulation of settlement which was intended to dispose of all of the issues in these matters. On June 14, 1977, the stipulation of settlement was presented to the Administrative Law Judge who accepted the agreement and entered judgment by consent. On June 20, 1977, Judge Young certified and transmitted to the Administrator his report of these proceedings, including the Administrative Law Judge exhibits, the docket, the transcript, the Stipulation of Settlement dated June 13, 1977, and the Judgement by Consent dated June 14, 1977.

Judge Young recommended, inter alia, that a final order be issued revoking the registration of Wayne E. Ellison, d.b.a. Wayne's Pharmacy, pursuant to the Order to Show Cause of February 25, 1976.

On August 17, 1977, the Administrative Law Judge transmitted to the Administrator an amendment to the original stipulation of settlement filed in this case. Judge Young noted that the amendment was apparently necessitated by the Respondent's inability to obtain certain licenses from the State of Indiana. The Administrator hereby accepts and endorses the stipulated settlement of these matters, as amended, and as recommended by the Administrative Law Judge.

Therefore, pursuant to the authority granted to the Attorney General by the Controlled Substances Act, Title 21, United States Code, Section 801, et seq., and redelegated to the Administrator of the Drug Enforcement Administration, the Administrator hereby finds that there is a lawful basis for the revocation of the registration previously issued to Wayne E. Ellison, d.b.a. Wayne's Pharmacy, number AE4124284, based upon Mr. Ellison's having been convicted of felony offenses related to controlled substances.[1] The Administrator hereby orders that the aforementioned registration be, and it hereby is, revoked, effective immediately. The application for registration of North Stringtown Plaza, Inc., d.b.a. Wayne's Pharmacy, executed July 15, 1977, is hereby granted upon conditions as set forth in the stipulation of settlement, as amended, these conditions including, inter alia, the total exclusion of Mr. Ellison from the ownership, management and operation of Wayne's Pharmacy. All prior applications submitted by, or on behalf of, North Stringtown Plaza, Inc., will be considered as withdrawn by the Respondents pursuant to their agreement with the Government. The Administrator further orders that all controlled substances seized from the premises of Wayne's Pharmacy pursuant to Title 21 United States Code, section 824(f) be, and they hereby are, declared forfeit to the United States. Mitigation of forfeiture, in accordance with the terms of the stipulation of settlement will take place as soon as appropriate arrangements are made.

Dated: August 23, 1977.

PETER B. BENSINGER,
Administrator, Drug Enforcement Administration.

[FR Doc.77-24860 Filed 8-25-77;8:45 am]

[1] The Administrator takes official notice of the fact that on June 29, 1977, the U.S. Court of Appeals for the Seventh Circuit affirmed Mr. Ellison's convictions.

EMPLOYMENT TRANSFER AND BUSINESS COMPETITION DETERMINATIONS UNDER THE RURAL DEVELOPMENT ACT

Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 U.S.C. 1924(b), 1932, or 1942(b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.

2. Employment trends in the same industry in the local area.

3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.

4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).

5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within two weeks of publication of this notice to:

Deputy Assistant Secretary for Employment and Training, 601 D St. NW., Washington, D.C. 20213.

Signed at Washington, D.C., this 22d day of August 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

FEDERAL SUPPLEMENTAL BENEFITS (EMERGENCY UNEMPLOYMENT COMPENSATION)

Ending of Federal Supplemental Benefit Period in Illinois

This notice announces the ending of the Federal Supplemental Benefit Period in the State of Illinois, effective on August 27, 1977.

BACKGROUND

The Emergency Unemployment Compensation Act of 1974 (Pub. L. 93-572, enacted December 31, 1974) created a temporary program of supplementary unemployment benefits (referred to as Federal Supplemental Benefits) for unemployed individuals who have exhausted their rights to regular and extended benefits under State and Federal unemployment compensation laws. Federal Supplemental Benefits are payable during a Federal Supplemental Benefit Period in a State which has entered into an Agreement under the Act with the United States Secretary of Labor. A Federal Supplemental Benefit Period is triggered on in a State when unemployment in the State or in the State and the nation reaches the high levels set in the Act. During a Federal Supplemental Benefit Period the maximum amount of Federal Supplemental Benefits which are payable to eligible individuals is up to 13 weeks. A Federal Supplemental Benefit Period commenced in the State of Illinois on January 5, 1975.

The Act also provides that a Federal Supplemental Benefit Period in a State will trigger off when the rate of insured unemployment in the State averages less than 5.0 percent over a period of thirteen consecutive calendar weeks. The benefit period actually terminates at the end of the third week after the week for which there is an "off" indicator, if the benefit period will have been in effect for a minimum duration of 13 weeks.

DETERMINATION OF "OFF" INDICATOR

The employment security agency of the State of Illinois has determined under the Act and 20 CFR 618.19(b) (published in the FEDERAL REGISTER on March 23, 1976, at 41 FR 12151, 12157) that the average rate of insured unemployment in the State for the period consisting of the week ending on August 6, 1977, and the immediately preceding twelve weeks, was less than 5.0 percent.

Therefore, I have determined in accordance with the Act and 20 CFR 618.19 (b), and as authorized by the Secretary of Labor's Order 4-75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was a Federal Supplemental Benefit "off" indicator in the State of Illinois for the week ending August 6, 1977, and that the Federal Supplemental Benefit Period in that State terminates on August 27, 1977.

INFORMATION FOR CLAIMANTS

Any individual to whom Federal Supplemental Benefits or Federal-State Extended Benefits were payable in the State (whether or not any payment actually was made), for any portion of the last week of the Federal Supplemental Benefit Period, will have an additional eligibility period beginning immediately following the end of the Federal Supplemental Benefit Period. During the additional eligibility period the individual will be entitled to Federal Supplemental Benefits to the same extent as if the Federal Supplemental Benefit Period continued to be in effect. The additional eligibility period will have a duration of 13 weeks, unless it is terminated sooner by reason of the beginning of a new Federal Supplemental Benefit Period in the State.

Individuals currently filing claims for Federal Supplemental Benefits will receive written notices from the Illinois Department of Labor of the end of the Federal Supplemental Benefit Period in that State and its effect on their entitlement to Federal Supplemental Benefits. The notice to any individual who will have an additional eligibility period following the Federal Supplemental Benefit Period will include information concerning potential entitlement to Federal Supplemental Benefits during the additional eligibility period.

Persons who wish information about their rights to Federal Supplemental Benefits in the State of Illinois should contact the nearest Employment Office of the Illinois Department of Labor in their locality.

Signed at Washington, D.C., on August 23, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

MIGRANT AND SEASONAL FARMWORKER PROGRAMS

Submission of Preapplications for Federal Asssitance for Fiscal Year 1978

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: Pursuant to 29 CFR 97.211, the Employment and Training Administration announces the list of applicants intending to apply for Fiscal Year 1978 funds for Migrant and Other Seasonally Employed Farmworker Programs authorized by Section 303 of the Comprehensive Employment and Training Act (CETA) of 1973.

FOR FURTHER INFORMATION CONTACT:

Mr. Paul A. Mayrand, Director, Office of Farmworker Programs, Room 7122, 601 D Street NW., Washington, D.C. 20213.

SUPPLEMENTARY INFORMATION: The list contains the names and addresses of all applicants which have submitted the Preapplication for Federal Assistance Form, Part I, OMB, No. 29-RO218 by August 1, 1977. No funding requests received for those areas to be renewed without competition as listed in the July 8, 1977, FEDERAL REGISTER, Volume 42, Number 131, page 35330 shall be considered for funding.

Organizations listed below may submit funding requests as described in 29 CFR 97.214. However, no determination has been made as to the legal eligibility of applicants listed to receive CETA Section 303 funds. The final determination of eligibility to receive funds will be made during the funding request review (29 CFR 97.215).

Applicants which have submitted a Preapplication for Federal Assistance Form Part I, by August 1, 1977, and are not listed below, should contact the U.S. Department of Labor at the address provided in 29 CFR 97.214(a) immediately. Pursuant to 29 CFR 97.211, applicants wishing to comment on the funding request of other applicants in the same State, must request a copy of the funding request from the applicant concerned. The following is the list of applicants exclusive of the noncompetitive sponsors which have submitted Preapplications for Federal Assistance Forms, Part I, by State for areas open to competition this year:

Preapplicants for CETA Section 303 Funds:

REGION I

CONNECTICUT

New England Farmworkers Council, 3562 Main Street, Springfield, Mass. 01107.

MAINE

Penobscot Consortium, Training and Employment Administration, 166 Union Street, Bangor, Maine 04401.

MASSACHUSETTS

New England Farmworkers Council, Inc., 3502 Main Street, Springfield, Mass. 01107.

RHODE ISLAND

New England Farmworkers Council, Inc., 3502 Main Street, Springfield, Mass. 01107.

VERMONT

State of Vermont, Comprehensive Employment and Training, 79 River Street, Montpelier, Vt. 05602.

NEW HAMPSHIRE

No applications received.

REGION II

NEW JERSEY

Farmworker's Corporation of New Jersey, 36 West Landis Avenue, Vineland, N.J. 08360.

NEW YORK

Program Funding, Inc., Suite 730, Powers Building, Rochester, N.Y. 14614.
State University of New York, College at Fredonia, Fredonia, N.Y. 14063.
Orange County, 168 Main Street, Goshen, N.Y. 10924.

PUERTO RICO

Center of Development Opportunities of Puerto Rico, Inc., Las Violetas 2007, Apt. 6A, Santurce, Puerto Rico 00915.
Commonwealth of Puerto Rico, Department of Labor, 414 Barbosa Avenue, Hato Rey, Puerto Rico 00917.

REGION III

DELAWARE

Delmarva Ecumenical Agency, Rural Ministries, Blue Hen Mall, Dover, Del. 19901.
Migrant and Seasonal Farmworkers Association, 3929 Western Blvd., POB 33315, Raleigh, N.C. 27606.

DISCRETIONARY ECONOMIC STIMULUS PACKAGE ALLOCATIONS UNDER TITLE VI OF COMPREHENSIVE EMPLOYMENT AND TRAINING ACT ("CETA")

Allocations for FY 1977 and 1978

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: This notice lists the proposed allocation of discretionary funds under Title VI of the Comprehensive Employment and Training Act pursuant to the regulations of 29 CFR 99.2 and 29 CFR 96.2. The purpose of this notice is to afford the public the opportunity to comment on the discretionary portion of that distribution before the discretionary distribution is finalized.

FOR FURTHER INFORMATION CONTACT:

Albert J. Angebranndt, Administrator for Administration and Management, Room 4000, 601 D Street NW., Washington, D.C. 20213, telephone No. 202-376-7563.

DATES: Pursuant to section 14 of Pub. L. 94-444, the proposed distribution which follows is published for the purpose of receiving public comment for 30 days from the date of this publication. You are asked to address your comments in writing to Albert J. Angebranndt, Administrator for Administration and Management, Room 4000, 601 D Street NW., Washington, D.C. 20213.

SUPPLEMENTARY INFORMATION: This notice has been prepared under the direction and control of Albert J. Angebranndt, Administrator for Administration and Management, Employment and Training Administration. This notice lists proposed allocations for Title VI discretionary funds under the Economic Stimulus Appropriation. Concern has been raised that the method by which the Department distributed the Title VI discretionary allocation under the Economic Stimulus Appropriation did not first provide funds to those prime sponsors who, during the period the continuing resolution was in effect, received insufficient funds to sustain June 30, 1976, enrollment levels through September 1977. As a result, the Department is allocating additional discretionary funds in such a manner that, had the Department first distributed $125 million for sustainment and the remainder ($310M) by the 3-part formula contained in Section 603(a) of CETA, those prime sponsors which would have received more funds by this method will now receive additional resources from the Secretary. The increased funding by this method will be $73 million. The following list contains these allocations:

After preparing the distribution of the $73 million, the Department found that there are 9 prime sponsors which still lack sufficient funds to maintain their sustainment enrollment levels through FY 1978. For these prime sponsors only the Department has allocated additional discretionary funds to make up these shortfalls. The 9 prime sponsors and the dollar distribution of these additional funds is as follows:

Shawnee Consortium, Ill	$62,539
Elkhart County, Ind	407,673
St. Clair County, Mich	1,159,394
Ann Arbor, Mich	84,722
Minnesota rural cep	299,662

Occupational Safety and Health Administration

EVALUATION CRITERIA FOR FEDERAL AGENCY OCCUPATIONAL SAFETY AND HEALTH PROGRAMS

Request for Public Comment

The Williams-Steiger Occupational Safety and Health Act of 1970 (84 Stat. 1590 et seq., 29 U.S.C. 651 et seq.) (OSHA) requires, in part, that the head of each Federal agency establish and maintain an effective and comprehensive occupational safety and health program covering the employment and places of employment of the agency's employees. This obligation, created by section 19 of OSHA (29 U.S.C. 668), is further defined in Executive Order 11807 of September 28, 1974, and in regulatory guidelines promulgated by the Secretary of Labor (the Secretary) at Title 29, Code of Federal Regulations Part 1960. Pursuant to section 19 of OSHA, the Executive Order, and the regulatory guidelines, the Secretary is required to monitor, evaluate, and report upon the progress of the agencies in developing and implementing their safety and health programs; while the agencies are required to cooperate with and to assist the Secretary in the performance of these duties by, for example, submitting reports to the Secretary, making records accessible to the Secretary, and observing the guidelines promulgated by the Secretary. Sections 19 (a) (3), (4), and (5), 19(b) and 19(d) of OSHA; sections 2 (2), (5), (6), and (7) and 3 (1), (5), and (6) of the Executive Order; 29 CFR Part 1960, Subpart B. The key provisions setting forth the duties of the Secretary in this regard are sections 3 (5) and (6) of the Executive Order, which require the Secretary to "[e]valuate the occupational safety and health programs of agencies, and submit to the President reports of such evaluations, together with agency responses thereto" and to "[s]ubmit to the President each year a summary report of the status of the Federal agency occupational safety and health program, as well as analyses of individual agency progress and problems in correcting unsafe and unhealthful working conditions, together with recommendations for improving their performance."

DEVELOPMENT OF THE PROGRAM EVALUATION GUIDE

Primary responsibility for implementation of the Secretary's responsibilities under the Federal agency occupational safety and health program has been delegated to the Department of Labor's Occupational Safety and Health Administration, Office of Federal Agency Safety Programs (OFASP). In order to effectively carry out the Secretary's duties with respect to program evaluation and in response to suggestions of Federal agency representatives, OFASP's Division of Agency Evaluation developed a draft standardized form (program evaluation guide) for use by its personnel in evaluating the occupational safety and health programs of the Federal agencies. This staff document was subsequently reviewed by a subcommittee of of the Federal Advisory Council on Occupational Safety and Health (FACOSH). The subcommittee recommended various changes that were incorporated into the draft of the program evaluation guide. On November 3, 1976, at a previously announced public meeting, the subcommittee reported to FACOSH its recommendation that the program evaluation guile be promulgated as a new subpart to Title 29, Code of Federal Regulations, Part 1960—Safety and Health Provisions for Federal Employees. In response, FACOSH adopted a resolution approving in concept the draft of the proposed new subpart and urging publication of the document in the Federal Register for public comment. In adopting this resolution, FACOSH clearly indicated that it would conduct a subsequent, more detailed review of the contents of the program evaluation guide after public comments were received.

RESPONSE TO FACOSH RECOMMENDATION

After fully considering the FACOSH recommendation, we have concluded that the draft of the program evaluation guide should not be published at this time as a proposed new subpart of 29 CFR Part 1960. The purpose of the program evaluation guide is to standardize the evaluations conducted by the OFASP of the safety and health programs of the various Federal agencies. The guide divides each agency program into ten basic component elements: Employee involvement, executive support and duties, safety and health staff and functions, operating management and supervisory duties, safety and health standards adoption, safety and health training activities, inspection and hazard abatement procedures, recordkeeping and reporting procedures, promotional and inter-agency activities, and intra-agency evaluation procedures. Each element is further subdivided into more detailed categories (referred to as "program element activities") that are listed in conjunction with references to relevant provisions of OSHA, the Executive Order, and 29 CFR Part 1960 defining the agencys' responsibilities with regard to the activity. In some instances, a brief statement is included as to the determination to be made by the evaluator in connection with the listed activity. In other instances, instructions are given to the evaluator to obtain official documentation by the agency of the manner in which it has carried out the listed activity.

It is clear from the foregoing description of the program evaluation guide that the guide is an internal staff working document and not a regulatory guideline. The guide simply reflects existing obligations of the Federal agen-

V 42166 AUG 26 77 UMI

cies and, thus, it does not alter an agency's duty to comply with section 19 of OSHA; nor does it alter the provision of the Executive Order requiring agency heads to "[o]bserve the guidelines published by the Secretary" at 29 CFR Part 1960. Moreover, the basis of the determination to be made by the OFASP evaluators remains the same, that is, whether and to what extent the agency safety and health program complies with section 19 of OSHA, the Executive Order, and the regulatory guidelines. The program evaluation guide is nothing more than an aid to the evaluator in making this determination.

In particular, it should be noted that the program evaluation guide is not intended as a regulatory guideline defining the manner in which the agencies should implement their responsibilities under 29 CFR 1960.16(b)(4) to establish "plans and procedures for evaluating the agency's occupational safety and health program effectiveness at all operational levels." In view of the variations in the mission, size, and scope of the different Federal agencies and the corresponding flexibility granted to the agencies under the Federal agency occupational safety and health program, a tentative conclusion has been reached that it is impractical to develop a single document that would be applicable to all agencies in performing their internal evaluations. We further note that, while OFASP is primarily concerned with evaluating the overall operation of the Federal agency's occupational safety and health program, the Federal agency itself, in developing its internal evaluation program, should be primarily concerned with the effectiveness of the actions taken by the agency's component offices and administrations and other subdivisions. However, even though the program evaluation guide was not developed for use by the Federal agencies in the internal evaluation of their own safety and health programs, it may be used as a general model by the agencies in developing their own internal evaluation guides; and agencies are encouraged to utilize the document in this manner.

Furthermore, the program evaluation guide does not represent an undertaking by the Secretary of any new obligations toward the Federal agencies. The Secretary's duty to evaluate and report upon each agency's occupational safety and health program is established in section 19 of OSHA and the Executive Order, whereas the provisions (criteria) to be considered by him in making these evaluatinos are contained in the above referenced documents and in the Regulations and Guidelines, 29 CFR Part 1960. In this regard, it should be noted that FACOSH recommended inclusion in the proposed subpart of the following language: "Changes to the Program Evaluation Guide can be made only with the review of FACOSH and approval of the Secretary of Labor." This recommendation has tentatively been rejected. Since the program evaluation guide is merely an internal staff working document, which does not impose any obligations upon the Federal agencies, this proposed limitation upon OFASP's authority to revise the guide is unnecessarily and unduly rigid, particularly in view of the fact that it will be necessary from time to time to revise the guide whenever any amendment is made to 29 CFR Part 1960.

In sum, since the program evaluation guide is not a document in which the Secretary either imposes an obligation upon the Federal agencies or undertakes any new obligation toward the Federal agencies, it is not a regulatory guideline within the meaning of sections 2(7) and 3(1) of the Executive Order and it should therefore not be promulgated as a new subpart to 29 CFR Part 1960.

Public Comment Invited

On the other hand, FACOSH's recommendation that public comment on the draft be invited is meritorious. Accordingly, interested persons are invited to comment on the contents of the program evaluation guide and upon the following questions: (1) Is there a need to amend 29 CFR Part 1960 to reflect OFASP's final adoption of a uniform program evaluation guide; (2) If so, what should be contained within the new regulatory guidelines; and (3) If not, what means should be utilized by the Secretary to disseminate to the Federal agencies and Federal employees the information that a standardized program evaluation guide has been adopted. Interested persons can obtain copies of the draft of the program evaluation guide from Gerard F. Scannell, Director, Office of Federal Agency Safety Programs, Occupational Safety and Health Administration, U.S. Department of Labor, 2100 M Street NW., Room 156, Washington, D.C. 20210. Copies can also be obtained from the following field personnel:

Region X—Seattle

ALASKA, IDAHO, OREGON, AND WASHINGTON

Jack R. Jones, Department of Labor, OSHA, Room 6048, Federal Office Bldg., 909 First Avenue, Seattle, Washington, 98174.

In addition, OFASP has mailed a copy of the draft program evaluation guide to the designated safety and health official of each Federal agency that has over 1,000 employees.

Written data, views, and arguments concerning the program evaluation guide and the issues raised above must be submitted to Gerald F. Scannell, Director, OFASP, at the address given above no later than October 25, 1977. Upon the closing of this comment period, the program evaluation guide will be reviewed again by OFASP and revised, if such revision is deemed necessary and appropriate, in accordance with the comments received. It will then be submitted to FACOSH for further review and approval. If the comments reveal a need for revision of 29 CFR Part 1960 in connection with the adoption of a standardized guide, that revision will be effectuated through further rule-making proceedings.

Signed at Washington, D.C., this 18th day of August 1977.

EULA BINGHAM,
Assistant Secretary of Labor.

Office of the Secretary

[TA-W-1637]

GREAT WESTERN SUGAR CO., JOHNSTOWN MOLASSES FACTORY JOHNSTOWN, COLO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1637: investigation regarding certification of eligibility to apply for adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on February 7, 1977 in response to a worker petition received on January 31, 1977 which was filed by the International Brotherhood of Teamsters, Chauffers, Warehousemen and Helpers on behalf of workers and former workers producing sugar at the Johnstown Molasses Factory, Johnstown, Colo., a facility of the Great Western Sugar Company, Denver, Colo.

The notice of investigation was published in the FEDERAL REGISTER on March 4, 1977 (42 FR 12496). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials and publications of Great Western Sugar Company, the U.S. Department of Commerce, the U.S. Department of Agriculture, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation revealed that all four of the above criteria have been met.

Significant Total or Partial Separations

Average employment of production workers at the Johnstown Molasses Factory declined 6.9 percent in the first quarter of 1977 compared to the same period in 1976.

Sales or Production, or Both, Have Decreased

Production at the Johnstown Molasses Factory declined 14.2 percent in the first quarter of 1977 compared to the corresponding quarter of 1976. Production at the Johnstown Molasses Factory permanently ceased during April 1977.

Increased Imports

Imports of sugar decreased 2 percent between 1972 and 1973, moving from 5.46 million short tons to 5.33 million short tons. In 1974, sugar imports increased to 5.77 million short tons. Imports in 1975 totalled 3.88 million short tons and imports in 1976 increased 20 percent to 4.66 million short tons; the ratio of imports to domestic production increased from 59 percent in 1975 to 66 percent in 1976.

Contributed Importantly

Prior to 1975, imports of sugar were regulated by statute. Since the expiration of the Sugar Act on December 31, 1974, imported sugar has entered the United States in the absence of price restrictions and quota levels. As a result, domestic prices of sugar have been merged with world sugar prices subjecting domestic prices to the competitive forces of an increased supply of sugar in a previously regulated market.

The world sugar supply currently surpasses demand by about 4 million tons annually. Sugar prices have dropped from the sharp increases in 1974 when prices rose to 57.3 cents per pound. Presently the price of raw sugar is under 11.0 cents per pound.

Profitable operation of the domestic sugar beet industry is dependent upon numerous factors, including production costs, yield of the sugar beet harvest, and prices of crops substitutable for sugar beets. However, the single most important determinant of profitable operation is the price of sugar. Depressed sugar prices resulting from increased imports made continued operation of Great Western's Johnstown Molasses Factory economically unfeasible. The company therefore permanently ceased production at that plant in April 1977.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with sugar products produced at the Johnstown Molasses Factory, Johnstown, Colo., a facility of the Great Western Sugar Company, Denver, Colo. contributed importantly to the total or partial separations of the workers at that plant. In accordance with the provisions of the Trade Act of 1974, I make the following certification:

All workers at the Johnstown Molasses Factory, Johnstown, Colo., of Great Western Sugar Company, Denver, Colo., who became totally or partially separated from employment on or after January 1, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 16th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-1791]

GREAT WESTERN SUGAR CO., FORT MORGAN, COLO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1791: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 15, 1977 in response to a worker petition received on February 22, 1977 which was filed by the International Brotherhood of Teamsters, Chauffers, Warehousemen and Helpers on behalf of workers and former workers producing sugar at the Fort Morgan, Colo. plant of the Great Western Sugar Company, Denver, Colo.

The Notice of Investigation was published in the FEDERAL REGISTER on March 25, 1977 (42 FR 16199). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Great Western Sugar Company, the U.S. Department of Commerce, the U.S. International Trade Commission, the U.S. Department of Agriculture, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, the investigation has revealed that criterion (4) has not been met.

Production of sugar from sugar beets is a seasonal activity, commencing with

V 42 166 AUG 26 77 UMI

the sugar beet harvest in late September or early October and continuing until the harvest is processed in January or February. Production is therefore dependent on the yield of the beet harvest.

Great Western contracts with individual beet growers, through various grower associations, to supply its factories with sugar beets. Prior to the 1976 growing season, contract difficulties arose between Great Western and the sugar beet growers. Contract difficulties were related to technical factors concerning extraction of sugar from sugar beets and were totally unrelated to imports of sugar. Contract agreement was reached in the spring of 1976 at the end of the usual planting season. Great Western then contracted with individual growers for sugar beet acreage equal to that contracted in 1975. The 1976 beet harvest was below the 1975 because of normal variations in harvest yield and the abnormally late planting. In the fall of 1976, Great Western accepted all beets contracted in the spring of that year, and processed all beets delivered into sugar.

Similar contract difficulties arose between Great Western and the beet growers in February 1977. Because contracts could not be assured, Great Western temporarily suspended operations at its Fort Morgan plant after the 1976 harvest had been processed.

With the signing of a new contract in March 1977, Great Western reopened the Fort Morgan plant and resumed normal maintenance operations, in anticipation of the 1977 beet harvest.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with sugar produced at the Fort Morgan, Colo. plant of the Great Western Sugar Company, Denver, Colo., did not contribute importantly to the total or partial separations of workers at that plant.

Signed at Washington, D.C., this 16th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-1792]

GREAT WESTERN SUGAR CO. DENVER, COLO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1792: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 15, 1977 in response to a worker petition received on February 22, 1977 which was filed by the International Brotherhood of Teamsters, Chauffers, Warehousemen and Helpers on behalf of workers and former workers at the Denver, Colo. facility of the Great Western Sugar Company, Denver, Colo.

The Notice of Investigation was published in the FEDERAL REGISTER on March 25, 1977 (42 FR 16199). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Great Western Sugar Company, the U.S. Department of Commerce, the U.S. International Trade Commission, the U.S. Department of Agriculture, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, the investigation has revealed that criterion (1) has not been met.

The Denver facility is the administrative headquarters of the Great Western Sugar Company. No production of sugar occurs at the Denver facility. Production of sugar at all Great Western plants is directed by the Operations Department at the Denver facility. No other departments are engaged in activities directly related to production at Great Western plants.

No involuntary separations occurred in the Operations Department of the Denver facility during the 1976–77 production year, and no involuntary separations have occurred in this department thus far in the 1977–78 production year.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that employment at the Denver, Colo. facility of the Great Western Sugar Company, Denver, Colo., has not declined as required for certification under Section 222 of the Trade Act of 1974. The petition is, therefore, denied.

Signed at Washington, D.C., this 16th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[TA-W-1795]

GREAT WESTERN SUGAR CO., STERLING, COLO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1795: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 15, 1977 in response to a worker petition received on February 22, 1977 which was filed by the International Brotherhood of Teamsters, Chauffers, Warehousemen and Helpers on behalf of workers and former workers producing sugar at the Sterling, Colo. plant of the Great Western Sugar Company, Denver, Colo.

The Notice of Investigation was published in the FEDERAL REGISTER on March 25, 1977 (42 FR 16199). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Great Western Sugar Company, the U.S. Department of Commerce, the U.S. International Trade Commission, the U.S. Department of Agriculture, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced b ythe firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

V 42166 AUG 26 77 UMI

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, the investigation has revealed that criterion (4) has not been met.

Production of sugar from sugar beets is a seasonal activity, commencing with the sugar beet harvest in late September or early October and continuing until the harvest is processed in January or February. Production is therefore dependent on the yield of the beet harvest.

Great Western contracts with individual beet growers, through various grower associations, to supply its factories with sugar beets. Prior to the 1976 growing season, contract difficulties arose between Great Western and the sugar beet growers. Contract difficulties were related to technical factors concerning extraction of sugar from sugar beets and were totally unrelated to imports of sugar. Contract agreement was reached in the spring of 1976 at the end of the usual planting season. Great Western then contracted with individual growers for sugar beet acreage equal to that contracted in 1975. The 1976 beet harvest was below the 1975 because of normal variations in harvest yield and the abnormally late planting. In the fall of 1976, Great Western accepted all beets contracted in the spring of that year, and processed all beets delivered into sugar.

Similar contract difficulties arose between Great Western and the beet growers in February 1977. Because contracts could not be assured, Great Western temporarily suspended operations at its Sterling plant after the 1976 harvest had been processed.

With the signing of a new contract in March 1977, Great Western reopened the Sterling plant and resumed normal maintenance operations, in anticipation of the 1977 beet harvest.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with sugar produced at the Sterling, Colo. plant of the Great Western Sugar Company, Denver, Colo., did not contribute importantly to the total or partial separation of workers at that plant.

Signed at Washington, D.C., this 16th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-1796]

GREAT WESTERN SUGAR CO., OVID, COLO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1796: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 15, 1977 in response to a worker petition received on February 22, 1977 which was filed by the International Brotherhood of Teamsters, Chauffers, Warehousemen and Helpers on behalf of workers and former workers producing sugar at the Ovid, Colo. plant of the Great Western Sugar Company, Denver, Colo.

The Notice of Investigation was published in the FEDERAL REGISTER on March 25, 1977 (42 FR 16199). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Great Western Sugar Company, the U.S. Department of Commerce, the U.S. International Trade Commission, the U.S. Department of Agriculture, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, the investigation has revealed that criterion (4) has not been met.

Production of sugar from sugar beets is a seasonal activity, commencing with the sugar beet harvest in late September or early October and continuing until the harvest is processed in January or Ferbuary. Production is therefore dependent on the yield of the beet harvest.

Great Western contracts with individual beet growers, through various grower associations, to supply its factories with sugar beets. Prior to the 1976 growing season, contract difficulties arose between Great Western and the sugar beet growers. Contract difficulties were related to technical factors concerning extraction of sugar from sugar beets and were totally unrelated to imports of sugar. Contract agreement was reached in the spring of 1976 at the end of the usual planting season. Great Western then contracted with individual growers for sugar beet acreage equal to that contracted in 1975. The 1976 beet harvest was below the 1975 because of normal variations in harvest yield and the abnormally late planting. In the fall of 1976, Great Western accepted all beets contracted in the spring of that year, and processed all beets delivered into sugar.

Similar contract difficulties arose between Great Western and the beet growers in February 1977. Because contracts could not be assured, Great Western temporarily suspended operations at its Ovid plant after the 1976 harvest had been processed.

With the signing of a new contract in March 1977, Great Western reopened the Ovid plant and resumed normal maintenance operations, in anticipation of the 1977 beet harvest.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with sugar produced at the Ovid, Colo. plant of the Great Western Sugar Company, Denver, Colo., did not contribute importantly to the total or partial separations of workers at that plant.

Signed at Washington, D.C., this 16th day of August 1977.

[TA-W-1513]

CF&I STEEL CORP., SUBSIDIARY OF CRANE CO., PUEBLO, COLORADO

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1531: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 22, 1976 in response to a worker petition received on December 22, 1976 which was filed by the United Steelworkers of America on behalf of workers and former workers producing steel products at CF&I Steel Corporation, a subsidiary of Crane Co., Pueblo, Colorado.

The Notice of Investigation was published in the FEDERAL REGISTER on January 18, 1977 (42 FR 3370). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from information and publications provided by officials of CF&I Steel Corporation, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met for workers engaged in employment related to the production of one of the following products: carbon steel rolled products; carbon steel wire products; coke and coke by-product chemicals; and carbon steel pipe.

The investigation has further revealed that for workers engaged in employment related to the production of rails and mining products, without regard to whether any of the other criteria have been met, criterion (3) has not been met; that for workers engaged in employment related to the production of cutting edges, although criteria (1) and (2) have been met, criteria (3) and (4) have not been met; and that for workers engaged in employment related to the production of carbon steel wire rods, without regard to whether any of the other criteria have been met, criterion (2) has not been met.

ROLLED PRODUCTS

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The category Rolled Products includes srtuctural shapes, hot rolled carbon steel bars, bar-size light shapes and concrete reinforcing bars. Employees work interchangeably on these products.

Employment related to the production of rolled products declined 42.2 percent in the fourth quarter of 1975 compared to the fourth quarter of 1974, and declined 2.5 percent in 1976 from 1975. Employment declined in the first and fourth quarters of 1976 compared to the like quarter of 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Production of rolled products declined 10.6 percent in the fourth quarter of 1975 and declined 7.1 percent and 38.5 percent in the first and fourth quarters of 1976, respectively, compared to the like quarters of the previous year.

INCREASED IMPORTS

Imports of rolled products declined from 3339.0 thousand short tons in 1972 to 2717.5 thousand short tons in 1973, increased to 2833.0 thousand short tons in 1974, declined to 1537.1 thousand short tons in 1975, then increased to 2092.1 thousand short tons in 1976. The ratio of imports to domestic shipments declined from 20.6 percent in 1972 to 14.2 percent in 1973, increased to 14.8 percent in 1974, decreased to 11.2 percent in 1975, then increased to 15.4 percent in 1976.

CONTRIBUTED IMPORTANTLY

Customers indicated that they have reduced purchases of rolled products from CF&I Steel and have increased their purchases of imports.

WIRE PRODUCTS

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment related to the production of wire products declined 9.1 percent in the fourth quarter of 1975 compared to the fourth quarter of 1974 and declined 2.9 percent in 1976 from 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales of wire products decreased 24.4 percent in the fourth quarter of 1975 and declined 25.6 percent in the first quarter of 1976 compared to the like quarter of the previous years. Sales increased 17.4 percent in 1976 from 1975.

INCREASED IMPORTS

Imports of carbon steel wire products increased from 628.5 thousand tons in 1972 to 894.2 thousand tons in 1973 and to 991.5 thousand tons in 1974. Imports declined to 602.6 thousand tons in 1975, then increased to 695.6 thousand tons in 1976. The ratio of imports to domestic shipments increased from 21.9 percent in 1972 to 28.3 percent in 1973 and to 32.0 percent in 1974. The ratio declined to 28.5 percent in 1975, then increased to 28.9 percent in 1976.

CONTRIBUTED IMPORTANTLY

Customers indicated that they had increased their purchases of imported wire products, either in absolute quantities or relative to purchases from CF&I.

COKE

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment related to the production of coke and coke by-product chemicals declined 6.4 percent in 1976 from 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Production of coke and chemicals declined 1.3 percent in 1976 from 1975.

CONTRIBUTED IMPORTANTLY

CF&I produces coke and chemicals primarily for internal consumption. The production of coke and chemicals is one of the early stages of production in the fully integrated production processes used in the manufacture of all of CF&I's product lines.

STEEL PIPE

SIGNIFICANT TOTAL OR PARTIAL SEPARATION

Employment related to the production of steel pipe decreased 3.6 percent in 1976 from 1975. Employment increased 9.9 percent in the first quarter but decreased in the last three quarters of 1976 compared to the like quarters of 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales of steel pipe declined 20.0 percent in 1976 from 1975.

INCREASED IMPORTS

Imports of carbon steel pipe and tubing declined from 1768.1 thousand short tons in 1972 to 1574.6 thousand short tons in 1973. Imports increased to 1781.5 thousand short tons in 1974, then in 1975 decreased to 1542.5 thousand short tons. In 1976, imports increased to 1820.7 thousand short tons. The ratio of imports to domestic shipments declined from 28.6 percent in 1972 to 20.3 percent in 1973, then increased to 21.5 percent in 1974, to 22.8 percent in 1975, and to 35.8 percent in 1976.

CONTRIBUTED IMPORTANTLY

Customers indicated that they reduced purchases of steel pipe from CF&I while increasing purchases of imports.

RAILS

INCREASED IMPORTS

Imports of steel rails declined from 42.3 thousand tons in 1972 to 42.1 thousand tons in 1973. Imports increased to 53.1 thousand tons in 1974 and to 96.2 thousand tons in 1975. In 1976, imports declined to 71.8 thousand tons. The ratio of imports to domestic shipments was 4.4 percent in 1972 and 1973, increased to 5.4 percent in 1974 and to 7.7 percent in 1975, then declined to 5.4 percent in 1976.

MINING PRODUCTS

INCREASED IMPORTS

Grinding media account for 77 percent of production in this product line. Imports of grinding media increased from 12.2 thousand tons in 1972 to 15.6 thousand tons in 1973 and to 20.6 thousand tons in 1974, then declined to 17.7 thousand tons in 1975 and to 13.2 thousand tons in 1976. The ratio of imports to domestic production rose from 3.9 percent in 1972 to 4.8 percent in 1973, remained unchanged at 4.8 percent in 1974, then declined to 4.5 percent in 1975 and to 3.4 percent in 1976.

WIRE RODS

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales of wire rod increased 50.1 percent in 1976 from 1975.

Production of wire rod increased 53.9 percent in 1976 from 1975.

CUTTING EDGES

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment related to the production of cutting edges declined 21.4 percent in 1976 from 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales of cutting edges declined 25.5 percent in 1976 from 1975.

INCREASED IMPORTS

Imports of cutting edges increased in each year from $511 thousand in 1972 to $2370 thousand in 1975. In 1976, imports declined to $808 thousand. The ratio of imports to domestic production increased in each year from 0.26 percent in 1972 to 0.85 percent in 1975 before declining to 0.34 percent in 1976.

CONTRIBUTED IMPORTANTLY

Customers indicated that they purchased no imported cutting edges.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with carbon steel rolled products, carbon steel wire products and carbon steel pipe produced at the Pueblo, Colorado plant of CF&I Steel Corporation, a subsidiary of Crane Co., contributed importantly to the total or partial separation of workers at that plant. In accordance with the provisions of the Act, I make the following certifications:

All workers engaged in employment related to be production of one of the following products: Carbon steel rolled products; coke and coke by-product chemicals; and all employees engaged in finishing, shipping and warehousing operations at the Pueblo, Colorado plant of CF&I Steel Corporation, a subsidiary of Crane Company, who became totally or partially separated from employment on or after December 3, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

All workers engaged in employment related to the production of carbon steel wire products at the Pueblo, Colorado plant of CF&I Steel Corporation, a subsidiary of Crane Company, who became totally or partially separated from employment on or after December 3, 1975 and before March 31, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

All workers engaged in employment related to the production of carbon steel pipe at the Pueblo, Colorado plant of CF&I Steel Corporation, a subsidiary of Crane Co., who became totally or partially separated from employment on or after April 1, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

I further conclude that imports of rails and mining products have not increased as required for certification under Section 222 of the Trade Act of 1974, that neither sales nor production of carbon steel wire rods has decreased as required for certification under Section 222 of the Trade Act of 1974; and that increases of imports of articles like or directly competitive with cutting edges produced at the Pueblo, Colorado plant of CF&I Steel Corporation, a subsidiary of Crane Co., have not contributed importantly to the total or partial separations of workers in those subdivisions at that plant. Therefore workers engaged in employment related to the production of rails, cutting edges, mining products and carbon steel wire rod at the Pueblo, Colorado plant of CF&I Steel Corporation are denied eligibility to apply for adjustment assistance.

Signed at Washington, D.C., this 17th day of August 1977.

HARRY GRUBERT,
Director, Office of Foreign Economic Research.

[TA-W-1635]

GREAT WESTERN SUGAR CO., BRIGHTON, COLO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1635: investigation regarding certification of eligibility to apply for adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on February 7, 1977 in response to a worker petition received on January 31, 1977 which was filed by the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers on behalf of workers and former workers producing sugar at the Brighton, Colo. plant of the Great Western Sugar Company, Denver, Colo.

The Notices of Investigation were published in the FEDERAL REGISTER on March 4, 1977 (42 FR 12496). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials and publications of Great Western Sugar Company, the U.S. Department of Commerce, the U.S. Department of Agriculture, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility re-

V 42 166 AUG 26 77 7 UMI

quirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average employment of production workers at the Brighton plant declined 31.4 percent in the first quarter of 1977 compared to the same period in 1976.

Permanent layoffs of nonseasonal workers at the Brighton plant began February 1, 1977.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED

Production at the Brighton plant declined 18.0 percent from the 1975/76 campaign to the 1976/77 campaign. Production at the Brighton plant permanently ceased during January 1977.

INCREASED IMPORTS

Imports of sugar decreased 2 percent between 1972 and 1973, moving from 5.46 million short tons to 5.33 million short tons. In 1974, sugar imports increased to 5.77 million short tons. Imports in 1975 totalled 3.88 million short tons and imports in 1976 increased 20 percent to 4.66 million short tons; the ratio of imports to domestic production increased from 59 percent in 1975 to 66 percent in 1976.

CONTRIBUTED IMPORTANTLY

Prior to 1975, imports of sugar were regulated by statute. Since the expiration of the Sugar Act on December 31, 1974, imported sugar has entered the United States in the absence of price restrictions and quota levels. As a result, domestic prices of sugar have been merged with world sugar prices subjecting domestic prices to the competitive forces of an increased supply of sugar in a previously regulated market.

The world sugar supply currently surpasses demand by about 4 million tons annually. Sugar prices have dropped from the sharp increases in 1974 when prices rose to 57.3 cents per pound. Presently the price of raw sugar is under 11.0 cents per pound.

Profitable operation of the domestic sugar beet industry is dependent upon numerous factors, including production costs, yield of the sugar beet harvest, and prices of crop substitutable for sugar beets. However, the single most important determinant of profitable operation is the price of sugar. Depressed sugar prices resulting from increased imports made continued operation of Great Western's Brighton plant economically unfeasible. The company therefore permanently ceased production at the Brighton plant in January 1977, with the end of 1976–77 sugar beet campaign.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with sugar products produced at the Brighton, Colo. plant of the Great Western Sugar Company, Denver, Colo. contributed importantly to the total or partial separations of the workers at that plant. In accordance with the provisions of the Trade Act of 1974, I make the following certification:

All workers of the Brighton, Colo. plant of the Great Western Sugar Company, Denver, Colo., who became totally or partially separated from employment on or after February 1, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washintgon, D.C., this 16th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-1636]

GREAT WESTERN SUGAR CO., LONGMONT, COLO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1636: investigation regarding certification of eligibility to apply for adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on February 7, 1977 in response to a worker petition received on January 31, 1977 which was filed by the International Brotherhood of Teamsters, Chauffers, Warehousemen and Helpers on behalf of workers and former workers producing sugar, at the Longmont, Colo. plant of the Great Western Sugar Company, Denver, Colo.

The Notice of Investigation was published in the FEDERAL REGISTER on March 4, 1977 (42 FR 12496). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials and publications of Great Western Sugar Company, the U.S. Department of Commerce, the U.S. Department of Agriculture, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average employment of production workers at the Longmont plant declined 7.9 percent in the first quarter of 1977 compared to the same period in 1976.

Permanent layoffs of nonseasonal workers at the Longmont plant began February 24, 1977.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED

Production at the Longmont plant declined 6.4 percent from the 1975–76 campaign to the 1976–77 campaign. Production at the Longmont plant permanently ceased during February 1977.

INCREASED IMPORTS

Imports of sugar decreased 2 percent between 1972 and 1973, moving from 5.46 million short tons to 5.33 million short tons. In 1974, sugar imports increased to 5.77 million short tons. Imports in 1975 totalled 3.88 million short tons and imports in 1976 increased 20 percent to 4.66 million short tons; the ratio of imports to domestic production increased from 59 percent in 1975 to 66 percent in 1976.

CONTRIBUTED IMPORTANTLY

Prior to 1975, imports of sugar were regulated by statute. Since the expiration of the Sugar Act on December 31, 1974, imported sugar has entered the United States in the absence of price restrictions and quota levels. As a result, domestic prices of sugar have been merged with world sugar prices subjecting domestic prices to the competitive forces of an increased supply of sugar in a previously regulated market.

The world sugar supply currently surpasses demand by about 4 million tons annually. Sugar prices have dropped from the sharp increases in 1974 when prices rose to 57.3 cents per pound. Presently the price of raw sugar is under 11.0 cents per pound.

Profitable operation of the domestic sugar beet industry is denpendent upon numerous factors, including production costs, yield of the sugar beet harvest, and prices of crops substitutable for sugar beets. However, the single most important determinant of profitable operation is the price of sugar. Depressed sugar prices resulting from increased imports made continued operation of Great Western's Longmont plant economically unfeasible. The company therefore permanently ceased production at the Longmont plant in February 1977, with the end of 1976–77 sugar beet campaign.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with sugar products produced at the Longmont, Colo. plant of the Great Western Sugar Company, Denver, Colo. contributed importantly to the total or partial separations of the workers at that plant. In accordance with the provisions of the Trade Act of 1974, I make the following certification:

All workers at the Longmont, Colo. plant of the Great Western Sugar Company, Denver, Colo., who became totally or partially separated from employment on or after February 24, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 16th day of August 1977.

INVESTIGATIONS REGARDING CERTIFICATIONS OF ELIGIBILITY TO APPLY FOR WORKER ADJUSTMENT ASSISTANCE

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to Section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 6, 1977.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 6, 1977.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 17th day of August 1977.

HAROLD A. BRATT,
Acting Director, Office of Trade Adjustment Assistance.

POSTAL RATE COMMISSION

PRESENTATION AND VISIT TO POSTAL FACILITY

AUGUST 22, 1977.

Notice is hereby given that on August 15, 1977, Chairman DuPont visited the Dallas, Texas, Post Office for the purpose of acquiring general background knowledge of postal delivery operations.

Notice is also given that on August 16, 1977, Chairman DuPont presented a briefing to the executive council of the Dallas Postal Customer Council regarding the Postal Rate Commission and its functions.

A report of the visit will be on file in the Commission's docket room.

DAVID F. HARRIS,
Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 13876; File No. SR-BSPS-77-4]

BRADFORD SECURITIES PROCESSING SERVICES, INC.

Order Approving Rule Change Providing for Establishment of Additional Branch Facilities

AUGUST 19, 1977.

On June 28, 1977 Bradford Securities Processing Services, Inc. ("BSPS"), 80 Pine Street, New York, New York 10005, filed a proposed rule change pursuant to Rule 19b-4 under the Securities Exchange Act of 1934 (the "Act") relating to the establishment of branch facilities in Houston, Texas and Denver, Colorado. As part of its filing, BSPS made representations relating to procedures and safeguards for the handling of securities and funds.

In accordance with Section 19(b) of the Act and Rule 19b-4 thereunder, the rule change was published in the FEDERAL REGISTER (42 F.R. 36571, July 15, 1977) and the public was invited to submit comments until August 5, 1977. Notice of the filing and an invitation for comments also appeared in Securities Exchange Act Release No. 13729, July 8, 1977. No letters of comment were received.

The Commission has reviewed the proposed rule change and finds that it is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered clearing agencies.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the rule change contained in File No. SR-BSPS-77-4 be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 34-13867; SR-CBOE-77-4]

CHICAGO BOARD OPTIONS EXCHANGE, INC.

Order Approving Proposed Rule Change

AUGUST 17, 1977.

On March 3, 1977, the Chicago Board Options Exchange, Inc., LaSalle at Jackson, Chicago, Illinois, filed with the Commission, pursuant to Section 19(b) of the Securities Exchange Act of 1934 (the "Act"), as amended by the Securities Acts Amendments of 1975, and Rule 19b-4 thereunder, copies of a proposed rule change to amend CBOE Rule 6.10(a) which would eliminate the requirement that member firms qualified to conduct a nonmember customer business obtain, on an annual basis, renewal of written authorization to maintain a discretionary account.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 34-13734 (July 15, 1977)) and by publication in the FEDERAL REGISTER (42 FR 36572 (July 15, 1977)).

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges, and in particular, the requirements of Section 6 and the rules and regulations thereunder.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 13869; File No. SR-CBOE-77-6]

CHICAGO BOARD OPTIONS EXCHANGE, INC., BOARD BROKERS ASSOCIATION

Order Denying Stay Approving Rule Change

AUGUST 18, 1977.

On July 11, 1977, the Board Brokers Association (the "Association"), which is composed of board broker members of the Chicago Board Options Exchange, Inc. (the "CBOE"), applied to the Commission for a stay pending judicial review of the Commission's order[1] approving, pursuant to section 19(b)(2) of the Securities Exchange Act of 1934 ("the Act")[2] and Rule 19b-4 thereunder,[3] a rule change filed by the CBOE[4] on March 28, 1977. The rule change, among other things, provides the enabling authority for the award of board broker appointments on the basis of competitive bidding (along with an evaluation of an applicant's qualifications) and for an assessment of exchange fees upon members who utilize board broker services.

Under Section 25(c)(2) of the Act,[5] the Commission may stay an order of rule pending judicial review if it finds that "justice so requires." In view of the arguments presented by the Association for a stay,[6] including its repetition of arguments previously made, the Commission has determined to set forth in detail its reasons for approving the CBOE rule change in the first instance, together with its discussion of the additional arguments presented by the Association in its application for a stay.

In considering whether justice requires a stay of the order approving the CBOE rule change, the Commission notes at the outset that the subject rule change is not self-executing. The rule change approved by the Commission permits the CBOE to plan the further development of its board broker program in an orderly fashion. Before the CBOE may terminate the appointment of any person cur-

V 42166 AUG 26 77 UMI

rently serving as a board broker as part of a program to appoint board brokers on the basis of the subject rule change,[7] the CBOE is required to submit additional proposed rule changes to the Commission. Those proposals must detail the bidding procedure for board broker appointments and the level of fees which the CBOE will assess for services provided by board brokers. The Commission finds that justice does not require that a stay be granted in this instance because (i) the CBOE cannot implement its program with respect to board brokers without further Commission action; [8] (ii) as a result, the Association will have a further opportunity to present data, views, and arguments to the Commission before the CBOE can take any final action affecting the interests of Association members; [9] and (iii) the members of the Association do not need a say to protect their interests and the granting of a stay would likely impede the CBOE's further planning efforts.

The Association submits, in support of its Application, that the board brokers were not given an opportunity for a hearing concerning the subject rule change. The Act, however, does not require the Commission to conduct a hearing before it approves the rule change of a self-regulatory organization.[10] Moreover, the Commission concluded that the proposed rule change did not deprive board brokers of any "vested right" since any such "right," if it exists, is acquired under, and remains subject to, the governing rules of that exchange, as they may be amended from time to time, insofar as those rules and amendments thereto are consistent with the Act and the rules and regulations promulgated thereunder.

In addition to the grounds noted above, the Association states in its Application that:

[T]he system comprehended by the proposed rule changes conflicts in many respects with the requirements of the Act and wholly fails to satisfy any rationally perceived need for change or the achievement of any generally accepted policy objective.[11]

In approving the proposed rule change, however, the Commission reviewed the objections raised by the Association in its initial comments submitted to the Commission on May 13, 1977, and found them unpersuasive. The Commission reiterates here its finding that the challenged CBOE rule changes are consistent with the requirements of the Act and rules and regulations thereunder.

The Association had asserted in its initial comments that the subject rules, since they permit the CBOE to award board broker appointments on the basis of competitive bidding and to assess exchange fees upon those utilizing the services of board brokers, would violate Section 6(e) of the Act by "creat[ing] a simple flow-through of revenues to circumvent the prohibition of fixed member rates." [12]

The CBOE rule change approved by the Commission, however, establishes only a broad framework within which the CBOE may develop a system of fees and board broker compensation. That rule change does not, on its face, establish or require any simple flow-through of revenues at fixed rates. It will instead permit the CBOE to compensate each appointed board broker according to the individual terms of his competitive bid. For that reason, the Commission adheres to its determination that the enabling authority in the CBOE rule change, by itself, is consistent with Section 6(e) and Rule 19b-3. The Commission will review further proposed rule changes filed by the CBOE to determine whether, viewed in conjunction with the rule change approved and the system thereby created, they are consistent with those provisions.

The Association also argued, in its initial submission, that the subject rule change violates Section 6(b)(4) of the Act, which requires that exchange rules "provide for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities." The Commission remains unpersuaded by this argument because it is also premature. Since the rules in question are enabling in nature and do not prescribe any particular level of fees, or any allocation of fees, determinations of reasonableness and equitable allocation may be made only when further submissions are made by the CBOE pursuant to Section 19(b)(3)(A)(ii) of the Act.[13] The Commission may summarily abrogate any such fees, and require further proceedings under Section 19(b) of the Act, if such action appears necessary or appropriate.

In addition, the Association asserted that the CBOE rule changes are inconsistent with Section 6(b)(5) of the Act in that they unfairly discriminate against board brokers by requiring them, alone among all classes of CBOE members, to bid competitively for their appointments. "Unfair discrimination," however, is found where other groups similarly situated are accorded different treatment, without any rational basis.[14] The members of no group other than the board brokers, however, occupy a monopoly position on the CBOE floor.[15] Accordingly, the absence of parallel regulation of other distinct classes of members does not demonstrate any unfair discrimination.

The Association also advanced the argument that the rules in question impose a "burden on competition not necessary or appropriate in furtherance of the purposes of (the Act)," in contravention of Section 6(b)(8). The Commission's rejection of this assertion remains founded on the fact that a board broker's appointment represents, in effect, a monopoly franchise.[16] Consequently, with respect to the 88 classes of options traded solely on the CBOE, out of a total of 101 classes of options traded on that exchange,[17] it would not appear that there are any significant competitive forces at work controlling the amount of brokerage commissions charged by CBOE board brokers. Accordingly, the Commission rejected the Association's assertion that awarding board broker appointments on a basis which takes into account competitive bidding constitutes an unnecessary or in appropriate burden on competition.

Moreover, Section 11A(a)(1)(C)(ii) of the Act[18] calls for fair competition not only among brokers and dealers but also among exchange markets. The Commission believes the subject rule will enable the CBOE to compete more effectively with other exchanges in providing limit order executions of dually traded options. In that connection, other exchanges have had the ability in the past to provide limit order execution in dually traded options at lower prices than those charged on the CBOE.[19] The enabling authority encompassed in the subject rule change provides the CBOE with the flexibility to compete with fees which may be available on the other exchanges for the execution of limit orders and may thus enhance fair competition among securities markets. Primarily for that reason, the Commission also found that the CBOE rule change would tend to further the goal, set forth in Section 6(b)(5) of the Act, of "remov[ing] impediments to and perfect[ing] the mechanism of a free and open market and a national market system." [20]

For the reasons set forth above, upon consideration of the application of the Association, the Commission finds that justice does not require a stay of its approval order pending judicial review.

It is therefore ordered, pursuant to Section 25(c)(2) of the Act, that the application of the Association for stay of the Commission's order approving the rule change of the Chicago Board Options Exchange, Inc., filed with the Commission on March 28, 1977, be, and it hereby is, denied.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc 77-24763 Filed 8-25-77;8:45 am]

---

[7] Of course, the appointment of a person serving as a board broker, prior to the rule change, was subject to termination for various reasons, such as poor performance. See former CBOE Rule 7.3. This authority of the CBOE to terminate a board broker's appointment continues under CBOE Rule 7.3(b) as amended by the subject rule change.

[8] Bidding procedures to be established by the CBOE cannot become effective unless filed with the Commission for consideration under Section 19(b)(2) of the Act, 15 U.S.C. 78s(b)(2), and approved by further order of the Commission under that Section. Cf. Letter from George A. Fitzsimmons to James E. Buck, Secretary of the New York Stock Exchange, Inc. [1976-1977 Transfer Binder] Fed. Sec. L. Rep. (CCH) Para. 80,404 (October 20, 1976).

[9] The Association, in its letter of August 3, 1977, to the Commission, has urged as an additional ground for a stay the proposition that the CBOE would otherwise be subject to "a most painful and disruptive unwinding process" should the Court of Appeals vacate the Commission's order of June 24, 1977. Id. at 2. Since, however, further Commission action is required before the CBOE can take final action to implement its new board broker program, the Commission finds that new ground urged by the Association unpersuasive.

[10] In connection with the initial filing of a proposed rule change under Section 19(b)(1), the Commission is required merely to publish notice and give interested persons an opportunity to submit written data, views, and arguments. Section 19(b)(2) provides that the Commission shall approve a proposed rule change if it makes the findings enumerated in that Section; upon making those findings, the Commission is to grant approval under Section 19(b)(2)(A) without further proceedings. On the other hand, if the Commission does not make such findings, it is required to initiate a proceeding pursuant to Section 19(b)(2)(B) of the Act to determine whether to disapprove a proposed rule change and is required to provide notice of the grounds for disapproval under consideration and opportunity for hearing.

With respect to the CBOE rules challenged by the Association, the Commission was able to make the requisite findings, without initiating such further proceeding, on the basis of the CBOE's filing on Form 19b-4A, 17 CFR 249.19a; the submissions of written data, views, and arguments; and the Commission's own expertise in overseeing the operation of the national securities exchanges.

[11] Application, at 4.

[12] In that connection, the Association refers to an earlier CBOE proposed rule change, under which the CBOE proposed to establish a schedule of fees to be charged by the CBOE to those receiving board broker services. The proposed fees would have corresponded to the fixed commission rate schedule then used by board brokers. Pursuant to Rule 19b-3 under the Act, 17 CFR 240.19b-3, the CBOE was required to eliminate that fixed rate schedule no later than May 1, 1976. Under its earlier proposed rule change, the CBOE proposed to collect brokerage commissions on specific transactions and transmit them to the board broker effecting such transactions, less a charge imposed by the CBOE. In that regard, it appeared to the Commission that the proposed rule change would merely interpose the CBOE as a conduit in the process of collecting and disbursing brokerage commissions fixed at exchange-prescribed rates. The Commission ordered the institution of a proceeding to determine whether to disapprove that proposed rule change based, in part, on the question whether the proposed CBOE rule would violate Section 6(e) of the Act and Rule 19b-3. Securities Exchange Act Release No. 12358 (April 22, 1976), 41 FR 17984 (April 29, 1976). The CBOE withdrew the challenged rule change on May 3, 1976.

[13] We note that such submissions and the additional provisions embodied in rules governing the bidding procedures will have to address, among other things, the contemplated requirement that the compensation to be received by the board brokers will be in lieu of any other revenues or fees to be received by them in return for providing board brokerage services.

[14] In that respect, the standards in determining the existence of "unfair discrimination" appear analagous to those applicable to "equal regulation." See Section 3(a)(36) of the Act. As to the latter, "'[E]qual regulation' is not a meaningful guide to regulatory action unless persons similarly situated in terms of the purpose of the regulation are first identified." Report of the Senate Comm. on Banking, Housing and Urban Affairs to Accompany S. 249, S. Rep. No. 75, 94th Cong., 1st Sess. 16 (1975) [emphasis added].

[15] In addition, the services associated with maintenance of a limit order book need not be performed by a member at all. For example, the Pacific Stock Exchange and the Midwest Stock Exchange use salaried employees ("order book officials") rather than members to handle the limit order books.

[16] To further the orderly and efficient execution of public limit orders, it has been the practice of the CBOE to appoint only one board broker to handle the limit order "book" for a particular class of options. In addition, the CBOE accords priority to limit orders on that book over public orders in the crowd and most proprietary orders of members. CBOE Rule 6.45.

[17] Some classes of options are listed only on the CBOE. Others—"dually traded options"—are listed on more than one exchange. In the case of dually traded options, the competition offered by the other exchange currently may serve to control the pricing of board broker services on the CBOE. It does not appear that the rule change approved by the Commission would impose any burden on that competition which would not be necessary or appropriate in furtherance of the purposes of the Act. See Section 6(b)(8) of the Act.

[18] 15 U.S.C. 78k-1(a)(C)(ii).

[19] On the American Stock Exchange, limit order services are provided by specialists who also function as dealers—that is, trade as principals for their own accounts. Accordingly, these specialists have had the ability and the incentive (the desire for an increased order flow for their dealer activity) to lower significantly—or even to eliminate—charges for executing limit orders in dually traded options. On the Pacific and Midwest Stock Exchanges, limit order services are provided by exchange employees; thus those exchanges can directly control the fees charged for such services.

[20] The Association advanced a number of other theories in their initial submission in contending that the Commission should institute proceedings to determine whether to disapprove the subject rule change. The Commission considered all these arguments, and found them not to be properly grounded in the Act.

[Release No. 34-13865; File No. SR-DTC-77-7]

DEPOSITORY TRUST CO.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on August 1, 1977, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed rule change permits Participants of The Depository Trust Company (DTC) to accept through DTC certain exchange offers and cash tender offers for securities on deposit with DTC. Under the proposed procedures, Participants will be able to take advantage of exchange offers and cash tender offers without withdrawing from DTC certificates evidencing securities subject to such offers.

The proposed rule change is attached as Exhibit 2 to DTC's filing on Form 19b-4A, File No. SR-DTC-77-7.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change are as follows:

The purpose of the proposed rule change is to permit DTC's Participants to take advantage of certain exchange offers and cash tender offers through DTC. An exchange offer is an offer of securities of one issue in return for securities of another issue voluntarily surrendered. A cash tender offer is an offer of cash in return for securities voluntarily surrendered. The proposed service will enable Participants to accept exchange offers or cash tender offers on certain qualifying securities without withdrawing the subject securities from the DTC system. Under its present procedures, DTC must usually make ineligible for depository services a security issue which has been eligible but has become the subject of an exchange offer or cash tender offer.

The proposed rule change relates to DTC's carrying out the purposes of Section 17A of the Securities Exchange Act of 1934 (the Act) by encouraging the immobilization of certificates evidencing securities subject to exchange offers and cash tender offers.

Comments regarding the proposed voluntary offering service were solicited from DTC Participants and Pledgees by articles in numerous DTC Newsletters in 1976 and 1977. Draft procedures for the proposed service, similar to the procedures set forth in Exhibit 2 to DTC's filing, were sent to all Participants and Pledgees in February 1977. Written comments were received from three Participants and are attached as Exhibit 3 to DTC's filing.

V 42166 AUG 26 77 UMI

DTC believes that no burden will be placed on competition by the proposed rule change.

On or before September 30, 1977, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the public reference room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should be submitted on or before September 16, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 16, 1977.

[FR Doc 77-24778 Filed 8-25-77;8:45 am]

[Release No. 9898; 812-4115]

E. I. DU PONT DE NEMOURS AND CO. AND REMINGTON ARMS COMPANY, INC.

Filing of Application for Order Exempting Proposed Transactions

AUGUST 18, 1977.

Notice is hereby given that E. I. du Pont de Nemours and Company ("Du Pont"), 1007 Market Street, Wilmington, Delaware 19898, a Delaware corporation, and Remington Arms Company, Inc. ("Remington"), 939 Barnum Avenue, Bridgeport, Connecticut 06602, herein referred to together with Du Pont as ("Applicants"), a Delaware corporation, have filed an application on April 1, 1977, and an amendment thereto on July 28, 1977, pursuant to Sections 6(c) and 17 (b) of the Investment Company Act of 1940 (the "Act") for an order exempting from the provisions of Section 17(a) of the Act proposed modifications of their policies respecting lending money to, and purchasing residential property from, their employees. Du Pont and Remington are described, in the application, as companies presumed to be controlled by Christiana Securities Company ("Christiana"), registered under the Act as a closed-end, non-diversified, management investment company. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

BACKGROUND

The application states that Applicants have each had a policy of assisting their employees in meeting costs incurred when they are transferred to new locations, and that this assistance may take the form of loans, advances, or purchases of residential property.

According to the application, Applicants, in furtherance of those policies, have in the past sought and received certain exemptive orders of the Commission with respect to loans and advances proposed to be made by them to their employees. In particular, pursuant to orders dated June 24, 1953, February 9, 1959, and April 10, 1970,[1] such loans and advances are subject to the following limitations: (1) No loan shall be made to any director or officer of Du Pont or Remington, respectively, or of any affiliated company; (2) the amount on loan or advance to an individual at any time shall not exceed the lesser of $25,000 or three years' gross salary of the borrowing employee; and (3) such loans and advances in the aggregate outstanding at any one time shall not exceed $250,000 (in the case of Remington), or $3,000,000 (in the case of Du Pont).

An order of the Commission dated May 1, 1959,[2] exempts from the provisions of Section 17(a) of the Act occasional purchases of residential property by Du Pont from its transferred employees, such transactions having been proposed to be negotiated on the basis of then current real estate values. Applicants state that in 1974, Du Pont requested and received a "no-action" position from the Commission staff with respect to a proposal by Du Pont to modify, without amendment to the aforementioned 1959 order, its policy with respect to such transactions to the effect that, inter alia, purchases would be made (1) on a basis which might be deemed to be more frequent than "occasional", and (2) subject to the conditions described in the following paragraph.

When an employee's transfer is announced, Du Pont, while encouraging sales on the open market, will obtain two appraisals of the employee's property from professional appraisers and make a standing offer to purchase the property, subject to specified time limits, at the greater of (1) the average of those two appraisals or (2) the invested value, which is generally defined as documented purchase price plus cost of allowable improvements.

If appraised value exceeds invested value the offer is limited to a maximum of four times the employee's gross annual salary; if invested value exceeds appraised value, the offer is limited to the lesser of four times annual salary or $85,000.

Applicants state further that, on the basis of the aforementioned "no-action" position and advice of its counsel, Remington implemented the identical modification to its employee relocation policy. Remington states that it seeks the assurance of the exemptive order requested herein as a basis for proceeding with such purchases in the future, on the same terms and conditions requested by Du Pont.

According to the application, most purchases of residential property by the Applicants are made at appraised value. The application states that the "invested value" provision is included in the policy to minimize the number of cases where an employee transferring at Applicants' request would suffer a loss on his investment, and that the limitations in the policies are intended to place a reasonable ceiling on the Applicants' commitments with respect to properties with high appraised values, and to protect Applicants from commitments to purchase properties with excessive investment values.

APPLICANTS' PROPOSAL

Applicants assert that various dollar limits described above have become unduly restrictive. They state that the existing $25,000-per-employee loan limit was adopted in 1968, whereas, since January, 1968, the Homeowner's Component of the Consumer Price Index, published by the U.S. Bureau of Labor Statistics, has approximately doubled—from 102.2 in January 1968, to 194.8 in November 1976. Applicants therefore propose, in light of this increase, to revise their per-employee loan limit to $40,000, subject to receipt of an appropriate order from the Commission.

Applicants expect that those proposed higher individual limits for loans will affect the appropriateness of the aggregate limits as loans are made in larger amounts. They therefore believe that it would be appropriate to increase their applicable aggregate loan limitations by at least 100 percent. Applicants accordingly propose to increase Remington's aggregate loan limit from $250,000 to $500,000, which they deem to be adequate in light of the relatively few transfers involved. With respect to Du Pont, however, Applicants assert that there are considerably more employee transfers involved, and that more transferees than originally anticipated are closing on their new homes before closing on their old homes, resulting in higher utilization of short-term equity loans. The application submits that for this reason, in addition to inflationary considerations, it would be appropriate to increase DuPont's aggregate limit by a total of 150%, so that the new limit would be $7,500,000.

Finally, Applicants state that the aforementioned $85,000 limit with respect to the purchase of an employee's residential property was set in 1974; since January 1974, the Homeowner's Component of the Consumer Price Index has increased by approximately 26%—from 154.8 in January, 1974, to 194.8 in November, 1976. Applicants state that, in light of this increase, they have adopted a $100,000 limit for this purpose, subject to receipt of an appropriate order of the Commission.

STATUTORY STANDARDS

The application states that Christiana owns approximately 27.8% of the outstanding common stock of Du Pont which, in turn, owns approximately 69.5 percent of the outstanding common stock of Remington. Applicants conclude that (1) Applicants are presumed to be controlled by Christiana, and (2) Applicants' employees are affiliated persons of an affiliated person of Christiana, for purposes of the Act.

Section 17(a) of the Act provides, in part, that it shall be unlawful for any affiliated person of a registered investment company, or any affiliated person of such a person, acting as principal, (1) knowingly to sell any security or other property to such registered company or to any company controlled by such registered company, or (2) to borrow money or other property from such registered company or from any company controlled by such registered company. Applicants state that the proposed transactions, if made beyond the limits currently permitted, may be prohibited by Section 17(a) of the Act. Applicants therefore request an order, pursuant to Sections 17(b) and 6(c) of the Act, exempting the proposed transactions from the provisions of Sections 17(a).

Section 17(b) of the Act provides that the Commission, upon application, shall exempt a proposed transaction from the provisions of Section 17(a) of the Act if evidence establishes that the terms of the proposed transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching on the part of any person concerned, and that the proposed transaction is consistent with the policy of each registered investment company concerned and with the general purposes of the Act.

Section 6(c) of the Act provides that the Commission may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision of the Act if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicants assert that the terms of the proposed transactions are reasonable and fair and do not involve overreaching on the part of any person concerned. They state that the proposed modification of the current dollar limitations to conform to those described above would have a favorable effect on their relations with employees, and that the modified limitations would operate to ease further the hardship imposed on employees who are required to move at their employer's request.

The application submits that the proposed aggregate limitations on loans and advances are insignificant compared to the size of Applicants' businesses. The application submits that (1) with respect to Du Pont, the proposed limit of $7,500,000 is about 0.6 percent of its consolidated accounts receivable, which were approximately $1,178,800,000 at December 31, 1976, and (2) with respect to Remington, the proposed aggregate limit of $500,000 is approximately 0.7 percent of its average consolidated accounts receivable during 1976 of about $75,000,000. Applicants assert that, for purposes of the foregoing comparison, the use of Remington's average (rather than year-end) consolidated accounts receivable is appropriate, in view of the highly seasonal nature of Remington's business.

Finally, Applicants submit that the proposed transaction is consistent with the policies of Christiana and with the general purposes of the Act.

Notice is further given that any interested person may, not later than September 12, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the addresses stated above. Proof of such service (by affidavit or, in case of an attorney-at-law, by certificate) shall be quest. As provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 9899; 811-2154]

F. G. MUTUAL FUND, INC.

Filing of Application for an Order Declaring That Company Has Ceased To Be an Investment Company

AUGUST 18, 1977.

Notice is hereby given that F. G. Mutual Fund, Inc. ("Applicant"), 4680 Wilshire Boulevard, Los Angeles, California 90010, a California corporation registered as an open-end, non-diversified, management investment company under the Investment Company Act of 1940 ("Act"), filed an application on July 21, 1977, pursuant to Section 8(f) of the Act, for an order declaring that Applicant has ceased to be an investment company. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant represents that at a special meeting of Applicant's shareholders held on December 30, 1976, the sale of substantially all of Applicant's assets to New World Fund, Inc. ("New World") was authorized by a vote of Applicant's shareholders. New World, an open-end, diversified, management investment company registered under the Act, acquired substantially all of the assets of Applicant on December 31, 1976, in exchange for common stock of New World.

Applicant further represents that the shares of New World received by Applicant in connection with the sale of its assets have been distributed pro rata to Applicant's shareholders, and that consequently, Applicant has no assets or shareholders. Applicant states that on or about June 30, 1977 a Certificate of Dissolution of Applicant was filed with the state of California and that the dissolution of Applicant was effective as of that filing.

Applicant finally states that all liabilities and expenses of Applicant incurred in connection with the sale of its assets and subsequent dissolution have been paid or assumed by Farmers New World Management Company, its former investment adviser, and that Applicant's investment advisory contract with Farmers New World Management Company has been cancelled.

Section 8(f) of the Act provides, in part, that whenever the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order and upon the taking effect of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than September 12, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the

[1] See Investment Company Act Release Nos. 1880, 2826 and 6029, respectively.

[2] See Investment Company Act Release No. 2873.

V 42 166 AUG 26 77 7 UMI

rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 9901 (812-4143)]

INVESTORS SYNDICATE OF AMERICA, INC.

Filing of Application for an Order Approving an Amendment to a Depository Agreement Covering Face-Amount Certificates Issued by Applicant

AUGUST 22, 1977.

Notice is hereby given that Investors Syndicate of America, Inc., IDS Tower, Minneapolis, Minnesota 55402 ("Applicant"), a face-amount certificate company registered under the Investment Company Act of 1940 ("Act"), has filed an application on June 6, 1977, and an amendment thereto on August 11, 1977, pursuant to Section 28(c) of the Act, for an order of the Commission approving an amendment of the general depository agreement (the "Agreement") between Applicant and the Marquette National Bank of Minneapolis (the "Bank") so as to require annual rather than semi-annual certification of the financial statements of Applicant by an independent public accountant. All interested persons are referred to the application on file with the Commission for a statement of the representations made therein, which are summarized below.

Section 28(c) provides, among other things, that the Commission shall by rule, regulation, or order in the public interest or for the protection of investors, require a registered face-amount certificate company to deposit and maintain, upon such terms and conditions as the Commission shall prescribe and as are appropriate for the protection of investors, with one or more institutions, having the qualifications required by Section 26(a)(1) of the Act for a trustee of a unit investment trust, all or any part of the investments maintained by such company as certificate reserve requirements under the provisions of Section 28(b) of the Act.

On November 16, 1974, the Commission issued an order (Investment Company Act Release No. 18) approving the Agreement requiring Applicant to deposit and maintain, in accordance with the terms and conditions set forth in the Agreement, with the Bank or with some other trustee or trustees having the qualifications required by paragraph 1 of Section 26(c) of the Act, qualified assets at least equal to the certificate reserve requirements of Section 28 of the Act for certain outstanding certificates. The Agreement further provides that the semi-annual and annual statements regarding the aggregate value of Applicant's assets, required to be filed with the Bank in January and July of each year, be audited and certified by independent accountants.

Subsequently, the Commission has issued orders, contained in Investment Company Act Release Nos. 792, 1895, 3105, 3552, 3751, 4390, 6810, 8551, 8821 and 9188, granting applications for amendments to the Agreement to include coverage of new series of securities proposed to be issued by Applicant.

The amendment to the Agreement, for which an order by the Commission is presently requested, seeks to eliminate the requirement that the semi-annual report, filed with the Bank in July of each year, be audited and certified by independent accountants, in favor of verification under oath of such report by a responsible officer of Applicant. Applicant represents that the annual statement required to be filed with the Bank in January of each year will continue to be certified by an independent accountant. Applicant further agrees to continue to file with the Commission on or before the twentieth days of January, April, July and October of each year, a statement showing the aggregate value of Applicant's assets on deposit with the Bank to meet face-amount certificate liability requirements and the amount of such certificate liability requirements. The value and amount are to be determined as of the last day of the preceding month. Market or fair values are to be shown as well as values determined in accordance with the provisions of the Code of the District of Columbia and the rules, regulations and orders prescribed by the Commission.

In support of the application, Applicant asserts that the Act only requires the annual reports to shareholders and annual reports to the Commission to be audited and certified by independent accountants. Applicant further asserts, with the concurrence of the Bank and its independent, certified accountant, that the annual examination of its assets by an independent certified accountant makes semi-annual audited reports unjustified in terms of time and money.

Notice is further given that any interested person may, not later than September 15, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 20145; 70-6041]

JERSEY CENTRAL POWER & LIGHT CO., ET AL.

Proposed Acquisition of Evidences of Indebtedness From Residential Electric Customers Pursuant to a Residential Insulation and Related Improvements Program

AUGUST 22, 1977.

In the matter of Jersey Central Power & Light Company, Madison Avenue at Punchbowl Road, Morristown, New Jersey 07960, Metropolitan Edison Company, 2800 Pottsville Pike, Reading, Pennsylvania 19603, Pennsylvania Electric Company, 1001 Broad Street, Johnstown, Pennsylvania 15907.

Notice is hereby given that Jersey Central Power & Light Company ("Jersey Central"), Metropolitan Edison Company ("Met-Ed"), and Pennsylvania Electric Company ("Penelec"), each an electric utility subsidiary of General Public Utilities Corporation, a registered holding company, have filed an application and an amendment thereto with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Sections 9(a)(1) and 10 of the Act and Rule 40 promulgated thereunder as applicable to the following proposed transaction. All interested persons are referred to the application, which is summarized below, for a complete statement of the proposed transaction.

Jersey Central, Met-Ed and Penelec request authorization for the acquisition, from time to time, of evidences of indebtedness from their respective residential electric customers arising from such customers' purchases of insulation, attic ventilation fans and automatic night/day thermostats. It is stated that the acquisition of such obligations is designed to facilitate the financing of such energy saving improvements and thereby promote energy conservation.

The program for which authorization is sought is that set out in an order of the Board of Public Utility Commissioners of the State of New Jersey on May 12, 1977, under which order all New Jersey utilities, including Jersey Central, must provide a mechanism for the financing of home insulation and related improvements by their heating customers. Under that program, which covers the financing of insulation, attic ventilation fans and automatic night/day thermostats, a customer would arrange to have the work performed by an eligible contractor, who would be paid by the utility (unless the customer obtained government or private financing). The customer would have 3 years to repay the loan, and interest would be charged at the rate of 1 percent per month on the unpaid balance (unless the customer repaid the loan within 90 days, in which case there would be no interest charge). The financing limit would be $500 for insulation plus the cost of a day/night thermostat and attic fan, if requested. It is contemplated that Met-Ed and Penelec will institute identical programs—a financing limit of $500 for insulation plus the cost of a day/night thermostat and attic fan, if requested, and with interest at the rate of 1 percent per month on the unpaid balance (unless the customer repaid the loan within 90 days)—for their electric heating customers. It is estimated that the programs for each utility will begin in September 1977.

It is stated that these financing programs may be modified, pursuant to utility or regulatory commission initiative, from time to time as experience dictates. No such modification will be implemented prior to the obtaining of Commission approval through a post-effective amendment to this application.

Jersey Central, Met-Ed and Penelec each request authorization to acquire in the aggregate up to $50,000 of their respective customers' obligations and to incur administrative and other related expenses of up to $12,500 respectively, for the one year period commencing on the date this application is granted. Authorization to exceed these limits or to extend the programs beyond the initial one year period will be sought by post-effective amendment. It is stated that the funds required by these programs are expected to arise from normal cash generation and, if necessary, from short-term borrowing.

The fees and expenses to be incurred in connection with the proposed transaction are estimated at $39,500 ($2,000 filing fee plus $37,500 of administrative and other related expenses), exclusive of legal fees, which will be supplied by further amendment. It is stated that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transaction, except to the extent that any particular program is mandated by order of a state or federal commission.

Notice is further given that any interested person may, not later than September 16, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the application, as amended, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application, as amended or as it may be further amended, may be granted as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-24765 Filed 8-25-77;8:45 am]

[Release No. 1378; SR-MSE-77-22]

MIDWEST STOCK EXCHANGE, INC.

Order Approving Proposed Rule Change

AUGUST 19, 1977.

On July 11, 1977, the Midwest Stock Exchange, Incorporated, 120 South LaSalle Street, Chicago, Illinois 60603, filed with the Commission, pursuant to Section 19(b) of the Securities Exchange Act of 1934 (the "Act"), as amended by the Securities Acts" Amendments of 1975, and Rule 19b-4 thereunder, copies of a proposed rule change to allow representatives of the MSE Floor Procedure Committee to authorize deviations from MSE option quotation parameters when it would be impossible or impracticable to convene a meeting of the full Floor Procedure Committee. This filing was amended August 15, 1977.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 13735, (July 11, 1977)) and by publication in the FEDERAL REGISTER (42 FR 36575 (July 15, 1977)).

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered national securities exchanges, and in particular, the requirements of Section 6 and the rules and regulations thereunder.

It is therefore ordered, Pursuant to Section 19(b)(2) of the Act, that the proposed rule change, as amended, filed with the Commission on July 11, 1977, be, and it hereby is, approved.

For the Commission by the Division of Market Regulations, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-24770 Filed 8-25-77;8:45 am]

[Release No. 20141; 70-6044]

MISSISSIPPI POWER CO.

Proposed Agreements With County for Construction of Pollution Control Facilities Financed by Sale of Revenue Bonds Secured by Collateral Trust Bonds; Exception From Competitive Bidding

AUGUST 18, 1977.

Notice is hereby given that Mississippi Power Company ("Mississippi"), 2992 West Beach, Gulfport, Mississippi 39501, a wholly-owned electric utility subsidiary of The Southern Company, a registered holding company, has filed an application-declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating Sections 6(a), 7, 9 and 12(d) of the Act and Rules 44(b)(3) and 50(a)(5) promulgated thereunder as applicable to the proposed transactions. All persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transactions.

Mississippi states that in order to comply with prescribed air and water quality standards of the State of Mississippi it will be necessary to construct certain pollution control facilities. The present filing relates to Mississippi's proposed disposition and acquisition of and financing of pollution control facilities for use in connection with its Plant Daniel ("Plant") in Jackson County, Mississippi ("County"). It is proposed that the County will issue its pollution control revenue bonds ("Revenue Bonds") for the purpose of paying the costs of the construction and equipping of the pollution control facilities at the Plant ("Project").

Mississippi proposes to enter into an Installment Sale Agreement ("Agreement") with the County which will provide for the construction and equipping of the Project by the County and for the issuance by the County of Revenue Bonds in an aggregate principal amount presently estimated not to exceed $19,000,000. It is also proposed that the County will issue a separate issue of its revenue bonds ("Small Issue Bonds") in an aggregate principal amount of $1,000,000 for the purpose of paying the costs of the acquisition and construction of certain other pollution control facilities at the Plant (the "Small Issue Project"). It is stated that the tax exempt status of the Small Issue Bonds

V 42 166 AUG 26 77 UMI

is based upon Section 103(b)(6) of the Internal Revenue Code of 1954 as amended. The proceeds derived from the sale of the Revenue Bonds will be deposited by the County with a Trustee under an indenture to be entered into between the County and the Trustee ("Indenture") pursuant to which the Revenue Bonds are to be issued and secured. Such proceeds will be applied to payment of the cost of construction of the Project. The Agreement will further provide for the sale of the Project to Mississippi, on a semi-annual installment payment basis over a term of years, and for the assignment to the Trustee of the County's interest in, and of the moneys receivable by the County under, the Agreement. The Agreement will provide that the purchase price of the Project payable by Mississippi will be such amount, including interest thereon, as shall be sufficient (together with other moneys held by the Trustee under the Indenture for that purpose) to pay the principal of, premium, if any, and interest on the Revenue Bonds as the same become due and payable. The Agreement wil also obligate Mississippi to pay the fees and charges of the Trustee. The Indenture will provide that the Revenue Bonds will be redeemable (a) at any time on or after 10 years from the date of issuance, in whole or in part, at the option of Mississippi initially with a premium of 3 percent of the principal amount and declining by ½ of 1 percent thereafter and (b) in whole, without premium, at the option of Mississippi under certain other specified conditions. The Revenue Bonds will mature 30 years from the first day of the month in which such bonds are initially issued and will be entitled to the benefit of mandatory redemption sinking funds calculated to retire not less than 25 percent of the aggregate principal amount of the issue prior to maturity.

Mississippi proposes to enter into a separate installment sale agreement (the "Small Issue Agreement") and indenture (the "Small Issue Indenture") with respect to the Small Issue Bonds which will be substantially similar to the Agreement and the Indenture relating to the Revenue Bonds. It is stated that in connection with the Small Issue Bonds, it may be necessary for Federal tax purposes to grant the County a lien on certain property of Mississippi. Said lien shall be created by a deed of trust and shall be subordinate to the lien of the indenture dated as of September 1, 1941, between Mississippi and Morgan Guaranty Trust Company of New York, as Trustee ("Indenture Trustee"), as supplemented and amended ("Mortgage").

Mississippi states that in order to obtain the benefit of a rating for the Revenue Bonds and the Small Issue Bonds equivalent to the rating enjoyed by the first mortgage bonds outstanding under its Mortgage which rating Mississippi has been advised may be thus attained, Mississippi proposes to obtain the authentication of two series of first mortgage bonds ("Collateral Bonds") under the Mortgage, as proposed to be supplemented by two further supplemental indentures ("Supplemental Indentures") to be dated as of the first day of the month in which the Collateral Bonds are to be authenticated and delivered. To secure its obligations under the Agreement and the Small Issue Agreement, Mississippi proposes to deliver to the Trustee, to be held as collateral, the Collateral Bonds in principal amount equal to the principal amount of the Revenue Bonds and Small Issue Bonds, respectively. The Collateral Bonds will bear interest at a rate equal to the interest rate per annum to be borne by the Revenue Bonds and Small Issue Bonds, will mature on the maturity date of such Bonds, and will be nontransferable by the Trustee. The Supplemental Indentures will provide, however, that the obligation of Mississippi to make payment with respect to the Collateral Bonds will be satisfied to the extent that payments are made under the Agreement and the Small Issue Agreement sufficient to meet payments when due in respect of the Revenue Bonds and Small Issue Bonds, respectively. The Supplemental Indentures will provide that, upon acceleration by the Trustee of the principal amount of all outstanding Revenue Bonds or Small Issue Bonds, the Trustee may demand the mandatory redemption of the related Collateral Bonds then held by it as collateral at a redemption price equal to the principal amount thereof plus accrued interest, if any, to the date fixed for redemption. The Supplemental Indentures will also provide that, upon the optional redemption of the Revenue Bonds or Small Issue Bonds, in whole or in part, at any time after they have been outstanding for 10 years, an equal principal amount of the related Collateral Bonds will be redeemed at an initial premium of 3 percent declining by ½ percent every year. Because interest accrues in respect of both series of the Collateral Bonds until satisfied by payments under the Agreement or Small Issue Agreement, "annual interest charges" in respect of the Collateral Bonds will be included in computing the "interest earnings requirement" restricting the amount of first mortgage bonds which may be issued and sold to the public in relation to Mississippi's net earnings. The Collateral Bonds will be issued on the basis of unfunded net property additions.

The Indenture and the Small Issue Indenture will each provide that, upon deposit with the Trustee of funds sufficient to pay or redeem all or any part of the Revenue Bonds or Small Issue Bonds, or upon direction to the Trustee by Mississippi to so apply funds available therefor, or upon delivery of outstanding Revenue Bonds or Small Issue Bonds to the Trustee by or for the account of Mississippi, the Trustee will be obligated to deliver to Mississippi or for the account of Mississippi the related Collateral Bonds then held as collateral in an aggregate principal amount equal to the aggregate principal amount of Revenue Bonds or Small Issue Bonds for the payment or redemption of which such funds have been deposited or applied or which shall have been so delivered.

In order to comply with the appropriate statute of the State of Mississippi, it will be necessary for Mississippi to convey to the County such portions of the Project and Small Issue Project as are now owned by Mississippi ("Existing Facilities") subject to the Mortgage. Under the Agreement and the Small Issue Agreement, Mississippi will receive, out of the proceeds of the Revenue Bonds and Small Issue Bonds, an amount equal to Mississippi's original cost for the Existing Facilities. The Existing Facilities will thereupon become a part of the Project and Small Issue Project which is to be provided by the County and which Mississippi proposes to purchase as provided in the Agreement and Small Issue Agreement.

It is contemplated that the Revenue Bonds and Small Issue Bonds will be sold contemporaneously by the County pursuant to arrangements with one or more underwriters. In accordance with the laws of the State of Mississippi, the interest rate to be borne by the Revenue Bonds and the Small Issue Bonds will be fixed by the County. Mississippi will not be a party to the underwriting arrangements for the Revenue Bonds or the Small Issue Bonds. Bond counsel will issue an opinion that interest on the Revenue Bonds and Small Issue Bonds will be exempt from Federal income taxation. Mississippi has been advised that the annual interest rate on obligations, the interest on which is tax exempt, historically have been and can be expected at the time of issue of the Revenue Bonds and Small Issue Bonds to be 1½ percent to 2½ percent lower than the rates of obligations of like tenor and comparable quality, interest on which is fully subject to Federal income tax.

The application-declaration states that the fees incident to the proposed disposition of the Existing Facilities, the issuance of the Collateral Bonds and the acquisition of the Project and Small Issue Project (as distinguished from and excluding fees, commissions and expenses incident to the sale of the Revenue Bonds and Small Issue Bonds by the County payable out of the proceeds of such sales and in connection with the determination of the tax status of the Revenue Bonds and Small Issue Bonds) will be filed by amendment. It is stated that no state or federal commission, other than this Commission, has jurisdiction over the issuance of the Collateral Bonds. It is further stated that the execution, delivery and performance by Mississippi of the Agreement and Small Issue Agreement, the disposition of the Existing Facilities and acquisition of the Project and Small Issue Project by Mississippi is subject to the jurisdiction of the Mississippi Public Service Commission and that no other state or federal commission, other than this Commission, has jurisdiction in respect thereof. Mississippi states further that the competitive bidding requirements of Rule 50 in respect of the issuance of the Collateral Bonds are inappropriate under the circumstances described herein, inasmuch as the Collateral Bonds are to be issued and pledged solely to secure Mississippi's obligations to the County and no public offering of the Collateral Bonds is to be made.

Notice is further given that any interested person may, not later than September 14, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicant-declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

MONONGAHELA POWER CO., ET AL

Proposed Increase in Amount of Short-Term Notes To Be Issued and Sold to Banks and to Dealers in Commercial Paper: Supplemental Order Authorizing Limited Increase in Sale of Short-Term Notes

AUGUST 19, 1977.

In the matter of Monongahela Power Company, 1310 Fairmont Avenue, Fairmont, West Virginia 26554, the Potomac Edison Company, Downsville Pike, Hagerstown, Maryland 21740, West Penn Power Company, 800 Cabin Hill Drive, Greensburg, Pennsylvania 15601.

Notice is hereby given that Monongahela Power Company ("Monongahela"), the Potomac Edison Company and West Penn Power Company, all of which are electric utility subsidiary companies of Allegheny Power System, Inc., a registered holding company, have filed a post-effective amendment to an application previously filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Section 6(b) of the Act and Rule 50(a)(5) promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the amended application, which is summarized below, for a complete statement of the proposed transaction.

On May 4, 1976 a release (HCAR No. 19510) was issued in this matter giving notice that Monongahela proposed to issue and sell through December 31, 1977, short-term notes to banks and to dealers in commercial paper in a maximum aggregate principal amount of $44,000,000 at any one time outstanding. On June 4, 1976 an order (HCAR No. 19557) was issued authorizing Monongahela to issue the proposed short-term notes but limiting the maximum principal amount of such notes at any one time outstanding to $40,000,000, jurisdiction being reserved to grant Monongahela further relief when applied for, in whole or in part. Jurisdiction was also reserved to grant West Penn Power Company further relief when applied for. As of July 31, 1977, Monongahela had no short term debt outstanding, but the Public Service Commission of West Virginia has ordered Monongahela to refund to its customers approximately $53,000,000 plus interest which was collected between June 1975 and April 1977. As a result, Monongahela estimates that it will be required to issue short term debt of approximately $46,000,000.

Therefore, Monongahela proposes to issue and sell through December 31, 1977, short term notes to banks and to dealers in commercial paper in a maximum aggregate principal amount of $46,000,000 at any one time outstanding. The notes and commercial paper will be issued and renewed from time to time as funds may be required prior to December 31, 1977: *Provided*, That no such notes or commercial paper will mature after April 1, 1978.

Seven designated commercial banks have made available to Monongahela varying lines of credit aggregating $125,000,000, provided that borrowings will at no time exceed the total amount authorized by this Commission. It is stated that the unsecured promissory notes, to be issued to the banks as evidence of such borrowings, will mature not more than 270 days after issuance or renewal, will be prepayable at any time without premium or penalty, and will bear interest at a rate not exceeding the prime rate of each lending bank in effect at the date of the borrowing. It is anticipated that the banks will require compensating balances at levels generally approximating 10 percent of the line of credit plus 10 percent of the amount of notes outstanding; thus, if balances were maintained solely to fulfill compensating balance requirements for borrowings, the effective interest cost to each applicant, assuming a prime rate of 7 percent, would be approximately 8.75 percent.

Monongahela proposes to issue and sell commercial paper, in the form of promissory notes in denominations of not less than $50,000, nor more than $5.000,000, to commercial paper dealers at a discount not in excess of the discount rate per annum prevailing at the time of issuance for commercial paper of comparable quality and of like maturity sold to commercial paper dealers. It is stated that the commercial paper notes will be of varying maturities, with no maturity more than 270 days after the date of issue, and that they will not be prepayable. Monongahela further states that it may issue the commercial paper notes if the interest cost thereof is equal to or less than the effective interest cost at which funds could be borrowed from the seven commercial banks with which it has lines of credit or if it cannot at that time borrow the same amount for the same period of time from such banks. It is expected that the commercial paper dealers will reoffer the commercial paper notes to not more than 200 of their customers, identified and designated in a non-public list prepared in advance by the dealers, at a discount rate of ⅛ of 1 percent per annum less than the discount rate to Monongahela. It is expected that the dealers' customers will hold the commercial paper notes to maturity; but, if any such customers wish to resell prior to maturity, their dealers will repurchase the notes pursuant to a verbal repurchase agreement and will reoffer them to other customers on their non-public lists.

Monongahela requests that the proposed issue and sale of commercial paper notes be excepted from the competitive bidding requirements of Rule 50 pursuant to a finding by this Commission under Rule 50(a)(5).

It is stated that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than September 12, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the filing which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application, as amended or as it may be further amended, may be granted effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the

V 42 166 AUG 26 77 UMI

hearing (if ordered) and any postponements thereof.

Due notice of the filing of a portion of said amended application has been given in the manner prescribed in Rule 23 promulgated under the Act (HCAR No. 19510), and no hearing has been requested of or ordered by the Commission. Upon the basis of the facts in the record, it is hereby found that the applicable standards of the Act and the rules thereunder are satisfied with respect to that portion of the amended application and that no adverse findings are necessary; and that it is appropriate in the public interest and in the interest of investors and consumers that said application, as amended, be granted in part:

It is ordered, Pursuant to the applicable provisions of the Act and the rules thereunder, that the jurisdiction reserved in the order of June 4, 1976, with respect to Monongahela be, and it hereby is, released and that Monongahela be, and it hereby is, authorized effective forthwith to issue and sell short term notes to designated banks and commercial paper to commercial paper dealers, through December 31, 1977, in an aggregate principal amount not to exceed $44,000,000 outstanding at any one time, subject to the terms and conditions prescribed in Rule 24 promulgated under the Act.

It is further ordered, That the jurisdiction reserved in the Order of June 4, 1976 with respect to West Penn Power Company be, and it hereby is, retained.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 34-13871; File No. SR-MSRB-77-9]

MUNICIPAL SECURITIES RULEMAKING BOARD

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on August 17, 1977, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed rule change (designated proposed rule G-11) filed by the Municipal Securities Rulemaking Board (the "Board") establishes certain terms and conditions for sales of new issue municipal securities during the underwriting period. The text of the proposed rule change appears below.

The principal terms and conditions of proposed rule G-11 are as follows:

1. A municipal securities dealer that submits an order to a syndicate or a member of a syndicate for securities held by the syndicate must disclose at the time of submission of the order if the securities are being purchased for its dealer account, for the account of a municipal securities investment portfolio[1] affiliated with such municipal securities dealer (a "related portfolio"), for a municipal securities investment trust sponsored by such municipal securities dealer (an "affiliated investment trust"), or for an accumulation or similar account established in connection with such a trust (an "accumulation account"). This disclosure is designed to permit the syndicate manager to evaluate on an informed basis for allocation purposes all orders submitted to the syndicate, particularly in terms of the buying interest represented by related portfolios, affiliated investment trusts, and other investors in contrast to buying interest represented by dealer trading accounts.

2. The senior syndicate manager must promptly disclose to other syndicate members, upon request made prior to final settlement of the syndicate account, each order for securities held by the syndicate submitted by, or on behalf of, a related portfolio, an affiliated investment trust, or an accumulation account. The required disclosure must include the identity of the related portfolio, affiliated investment trust or accumulation account, and the maturity dates and aggregate face amount of the securities in each maturity which are the subject of the order. This provision is designed to afford all syndicate members the same information as is available to the syndicate manager concerning orders submitted on behalf of affiliated accounts.

3. Confirmations of sales must be made directly to the related portfolio, affiliated investment trust, or accumulation account acquiring securities held by the syndicate. A conforming amendment will be made in proposed rule G-15 on customer confirmations, if proposed rule G-11 is approved by the Commission. This requirement will enable the syndicate to maintain appropriate records of sales to related portfolios, affiliated investment trusts, and accumulation accounts. It would not preclude the designation of sales credit for such orders.

4. Every syndicate must provide for the priority to be accorded to different types of orders for the purchase of securities from the syndicate and, if such priority may be changed, the procedure for making changes. Under proposed rule G-11, this requirement cannot be satisfied solely by a provision permitting a syndicate manager to determine in its discretion the order of priority. However, a syndicate could include a provision permitting the syndicate manager on a case-by-case basis to allocate securities in a manner other than in accordance with the agreed upon order of priority, if the syndicate manager determines in its discretion that it is in the best interests of the syndicate. Provisions regarding the priority of orders and whether the exercise of manager's discretion will be permitted must be determined by the syndicate in accordance with the syndicate's procedures for making such determinations, whether by majority vote or otherwise. These provisions are designed to require the establishment of procedures for the allocation of new issue securities, to be followed by syndicates on a consistent basis.

5. Prior to the first offer of any securities by a syndicate, the senior syndicate manager must communicate to the other members of the syndicate (a) the priority to be accorded to different types of orders, (b) the procedure, if any, by which such priority may be changed, (c) if the senior syndicate manager or managers are to be permitted on a case-by-case basis to allocate securities in a manner other than in accordance with the agreed upon order of priority, the fact that they are to be permitted to do so, and (d) if there is to be an order period, whether orders may be confirmed prior to the end of the order period. An order period is defined in the proposed rule as a period announced by the syndicate during which orders will be solicited for the purchase of securities held in syndicate. Any change in the order of priority must be communicated promptly by the senior syndicate manager to the other members of the syndicate. Syndicate members must promptly communicate the foregoing information to others, including non-member municipal securities dealers and investors, upon request. These requirements are designed to afford all syndicate members and other interested persons timely information concerning the syndicate's allocation procedures and thus to enable prospective purchasers to frame their orders in an informed manner if they wish to obtain a favorable priority. In addition, the syndicate manager's allocation policies will be subject to evaluation in light of the announced order of priority.

6. At or before the final settlement of the syndicate account, the senior syndicate manager must furnish to the other members of the syndicate an itemized statement setting forth the nature and amounts of all expenses incurred on behalf of the syndicate. Although items of expense would be required to be shown in detail, the expense statement could contain an item such as "miscellaneous;"; *Provided,* The amount shown under it is not disproportionately large in relation to the other items of expense shown on the statement and includes only minor items of expense which cannot be easily categorized elsewhere in the statement. This provision is designed to afford syndicate members detailed information concerning the operation of the syndicate account.

[1] The term "municipal securities investment portfolio" is defined in section 3(a)(33) of the Securities Exchange Act of 1934, as amended, to mean • • • all municipal securities held for investment and not for sale as part of a regular business by a municipal securities dealer or by a person, directly or indirectly, controlling, controlled by, or under common control with a municipal securities dealer.

7. Prior to the submission of a bid, in the case of a competitive sale, or prior to the execution of a purchase contract with the issure, in the case of a negotiated sale, a syndicate manager must disclose to syndicate members discretionary fees to be charged by the syndicate manager for clearance costs, and management fees, if any. The Board believes such information is useful to syndicate members in determining whether to participate in a syndicate account.

8. The term "syndicate" as used in proposed rule G-11 is defined to exclude a sole underwriter.

9. The term "related portfolio" as used in proposed rule G-11 is defined to track the statutory definition of "municipal securities investment portfolio" in section 3(a)(33) of the Securities Exchange Act of 1934, as amended (the "Act"). In the Board's view, this includes discretionary accounts, trust accounts, bank investment portfolios and securities firm investment accounts. Managed investment companies, to the extent they are related portfolios, would also be subject to proposed rule G-11.

10. There is no exemption in proposed rule G-11 for short-term issues.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the proposed rule change are as follows:

PURPOSE OF PROPOSED RULE CHANGE

The proposed rule change is intended to address the Congressional directive in section 15B(b)(2)(K) of the Act that the Board adopt a rule or rules either prohibiting municipal securities dealers from selling new issue municipal securities to their related portfolios, or establishing the terms and conditions pursuant to which such sales may be made. Although Congress focused specifically on bank-related portfolios, the Board sees no reason to distinguish for purposes of its proposed rule between such portfolios, on the one hand, and affiliated investment trusts or related portfolios of securities firms, on the other.

Proposed rule G-11 is designed to meet the Board's statutory mandate by increasing the scope of information availalbe to syndicate managers and members, other municipal securities professionals and the investing public, in connection with the distribution and purchase of new issue municipal securities. The Board believes that such information will, among other matters, (a) enable syndicates to make more informed decisions in allocating securities among prospective purchasers because purchases for related portfolios and affiliated investment trusts will be identified as such; (b) enable prospective purchasers to frame their orders to the syndicate in a manner that will enhance their ability to obtain securities since the syndicate's allocation procedures will be known; and (c) render syndicate managers accountable for the allocation of securities in accordance with their announced allocation procedures.

In addition, disclosure of syndicate expenses, as required by paragraph (f) of the proposed rule, will enable syndicate members to analyze the operation of the syndicate account and, with respect to a syndicate manager's clearance and management fees, to make an initial determination whether to participate in the syndicate.

In its Report on the Securities Acts Amendments of 1975, the Senate Committee on Banking, Housing and Urban Affairs (the "Senate Committee") stated that

> [t]he economic power accruing to banks by virtue of their sole as major consumers as well as underwriters of new issue municipals • • • permit[s] banks to be underwriter distributors of new issues of municipal bonds and at the same time and in the same new issue give their own investment portfolio the prerogatives and priorities of public institutional orders. (S. Rep. 94-75, 94th Cong., 1st Sess. at 49)

In its Report, the Senate Committee cited the interpretation of the National Association of Securities Dealers, Inc. (the "NASD") concerning "free-riding and withholding," applicable to the corporate markets, as a possible approach to regulation of the municipal markets. Under the NASD's interpretation, NASD members and persons associated with them are prohibited from acquiring "hot issue" securities during the underwriting period. As the Senate Committee noted, if this policy were applied to the municipal markets, investment portfolions associated with municipal securities dealers would be prohibited from buying municipal securities during the underwriting period. However, the Senate Committee noted the importance of related portfolios as purchasers of new issue municipal securities and stated that prohibiting such purchases "could adversely affect the ability of municipalities to obtain the lowest possible rate of interest on their bonds." (Id.)

The Senate Committee's concern on this point is underscored by the following statement from its Report:

> The Committee expects that the Board will permit municipal securities investment portfolios to continue to purchase new issues of municipal securities like any other public investor. However, the Committee also expects the Board to assure that municipal securities investment portfolios, in their purchase of new issues of municipal securities during the underwriting period, do not have an advantage in comparison with other public investors solely by reason of their affiliation with municipal securities dealers. (Id.)

In formulating proposed rule G-11, the Board issued a series of proposals in the form of exposure drafts, which took various approaches to the regulation of new issue underwriting activity. In the course of the public discussion and comment generated by these proposals and extended deliberations on the Board's part, it has not been demonstrated that related portfolios obtain advantages in acquiring new issue municipal securities solely by reason of their affiliation with municipal securities dealers. Therefore, the Board believes that a case has not been made at the present time for prohibiting purchases of new issue municipal securities by related portfolios, whether such purchases are made from a syndicate or from a related municipal securities dealer, or for mandating a lower priority for related portfolios in the allocation of new issue municipal securities than for other investors. The Board is of the view, however, that buying interest on the part of related portfolios and affiliated investment trusts should be properly identified to the syndicate, rather than being represented as dealer interest, and that a syndicate should establish and disclose rules of priority for the allocation of securities.

The Board also believes that the adoption at this time of a more restrictive regulatory approach than that contained in proposed rule G-11 could have a profoundly adverse impact on municipal issuers. In the Board's view, present syndicate allocation procedures, under which related portfolios often obtain new issue municipal securities in large quantities, result in a lower interest cost to the issuer than might otherwise obtain if securities were not allocated to such investors or were allocated to such investors on the basis of a lower priority, solely by reason of their affiliation with a municipal securities dealer, than that accorded other investors.

The Board intends to consider the appropriateness of adopting additional or modified rules relating to sales of new issue municipal securities in the light of experience gained under the proposed rule, if it is approved by the Commission, and other pertinent factors, if any, that may be brought to bear on the subject in the future.

BASIS UNDER THE ACT FOR PROPOSED RULE CHANGE

The Board adopted proposed rule G-11 pursuant to sections 15B(b)(2)(C) and 15B(b)(2)(K) of the Act. Section 15B(b)(2)(C) provides that the Board's rules must:

> Be designed • • • to promote just and equitable principles of trade • • • to remove impediments to and perfect the mechanism of a free and open market in municipal securities, and, in general, to protect investors and the public interest; and [must] not be designed to permit unfair discrimination between customers • • •.

Section 15B(b)(2)(K) authorizes and directs the Board to adopt rules to:

> • • • establish the terms and conditions under which any municipal securities dealer may sell, or prohibit any municipal securities dealer from selling, any part of a new issue of municipal securities to a municipal securities investment portfolio during the underwriting period.

COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS OR OTHER ON PROPOSED RULE CHANGE

The Board circulated for comment three separate exposure drafts on the general subject of sales of new issue municipal securities during the underwriting period. These exposure drafts were issued on April 20, 1976, September 8 and November 17, 1976 (the second exposure draft was issued in two parts),

V 42166 AUG 26 77 UMI

and March 16, 1977. Each succeeding exposure draft was materially different in certain respects from the prior draft. Accordingly, the analysis of the letters of comment under this item 5 focuses on the letters of comment received by the Board on its March 16, 1977 exposure draft (the "March 16 exposure draft"). Many of the comments made with respect to the prior exposure drafts were also made on the March 16 exposure draft.

The Board received letters of comment on the March 16 exposure draft from the following persons:

Bache Halsey Stuart Inc. ("Bache").
Bosworth Sullivan & Company, Inc. ("Bosworth Sullivan").
Dealer Bank Association (the "DBA").
INA Capital Advisors, Inc. ("INA").
Merrill Lynch, Pierce, Fenner & Smith Inc. ("Merrill Lynch").
National Association of Securities Dealers, Inc. (the "NASD").
John Nuveen & Co. Incorporated ("Nuveen").
Public Securities Association (the "PSA").
Rainier National Bank ("Rainier").
Salomon Brothers.
Director of the Division of Market Regulation of the Securities and Exchange Commission (the "Commission staff").
Securities Industry Association, Public Finance Committee (the "SIA").
Shearson Hayden Stone Inc. ("Shearson").
Standard & Poor's Corporation.
State Farm Mutual Automobile Insurance Company ("State Farm").
Stifel, Nicolaus & Company Incorporated.
Wauterlek & Brown, Inc. ("Wauterlek").
Weeden & Co. Incorporated ("Weeden").
Willkie Farr & Gallagher ("Willkie Farr").

Copies of the above letters of comment are on file at the office of the Securities and Exchange Commission (the "Commission") and the Board.

Several commentators, including the Commission staff, expressed concern that draft rule G–11A included in the March 16 exposure draft was too restrictive, particularly the provisions which would have prohibited sales of syndicate securities held in a dealer's trading account to a related portfolio or an affiliated investment trust. Other commentators took the opposite position, and suggested that the Board impose additional restrictions on sales of new issue municipal securities to such entities. For example, Bache and the NASD indicated their belief that there is a need for rules prescribing a bona fide offering period during which securities acquired during the pre-sale period must be sold at a stated price.

As indicated above, the Board does not believe that a showing has been made that related portfolios enjoy advantages in acquiring new issue municipal securities solely by reason of their affiliation with municipal securities dealers. Because of this, the Board believes that any more restrictive approach to regulation of the new issue municipal securities markets than that contained in proposed rule G–11 is unwarranted and could have an unnecessary and unjustifiable adverse impact on municipal issuers.

Many of the comments on the March 16 exposure draft are moot in view of the changes made in proposed rule G–11. The following discussion therefore focuses only on the proposed rule as filed with the Commission.

Certain commentators stated the "discretionary accounts" and "trust accounts" should not be excluded from the definition of "related portfolios." The Board believes it to be consistent with the purposes of the proposed rule to include these types of accounts.

In the March 16 exposure draft, the Board expressed the view that managed investment companies (as opposed to affiliated investement trusts) are not municipal securities investment portfolios within the meaning of the statutory definition. Under certain circumstances, however, managed investment companies may be related portfolios of municipal securities dealers, e.g. if the managed investment company is managed by an entity under common control with the municipal securities dealer. Proposed rule G–11 would apply in such cases, and the Board believes this application to be appropriate.

In its comment letter, the Commission staff suggested that managed investment companies should be excluded from the coverage of proposed rule G–11 "on the same basis as would be applied in excluding discretionary accounts." As noted above, the Board has determined not to exclude discretionary accounts or trust accounts from the rule. The Board is also of the view that managed investment companies, to the extent that they are related portfolios, should not be excluded from the rule. It should be noted that proposed rule G–11 would not restrict sales of new issue securities to discretionary or trust accounts, or to managed investment companies, but rather requires certain disclosures to be made concerning orders submitted for such investors.

One commentator recommended that draft rules G–11A and G–11B be modified to clarify the responsibilities of a sole underwriter. The Board has decided to exclude a sole underwriter from the coverage of proposed rule G–11, and has therefore defined the term "syndicate" to mean an account formed by "*two* or more persons" (emphasis added). The Board believes that without such exclusion, the requirements of proposed rule G–11 would be inappropriate for a sole underwriter that makes a distribution of the issue.

Several commentators objected to the proposal in draft rule G–11B included in the March 16 exposure draft permitting a syndicate manager to allocate securities on a case-by-case basis in a manner other than in accordance with the agreed upon order of priority, if the syndicate manager determines that it is in the best interests of the syndicate. One commentator recommended that the provision be changed to permit the syndicate manager to exercise such discretion only "in exceptional situations where it would otherwise be impracticable to consult with members of the account." Certain commentators also recommended that the Board require a majority vote of the syndicate members, based on participation, in order for a syndicate's established allocation procedures to be changed.

The Board included the provision in proposed rule G–11 regarding the exercise of manager's discretion in recognition of the fact that in certain syndicates, whether because of the number of participants in the syndicate or otherwise, it may be in the best interests of the syndicate to permit the syndicate manager to exercise such discretion. The ultimate decision on whether such discretion may be exercised by the syndicate manager would rest with the members of the syndicate. The members could restrict such discretion and require that a change in the order of priority be approved by a stated percentage of the syndicate. The Board believes that these decisions should properly be left to the members of each syndicate, and that it is not an appropriate subject for regulation.

One commentator recommended that the Board consider requiring syndicate managers to account to syndicate members regarding expenses. The Board believes this to be an appropriate suggestion and has included a provision in proposed rule G–11 requiring a syndicate manager to furnish to the other syndicate members an itemized statement of expenses. The Board has also included in the proposed rule a requirement that syndicate managers disclose to syndicate members management fees and discretionary fees for clearance costs, if any. Such disclosure would be made prior to the submission of a bid, in the case of a competitive sale, or prior to the execution of a purchase contract, in the case of a negotiated sale.

Another commentator recommended that "any adjustments of price, concession or take-down" be required to be disclosed. In many syndicates any such adjustments must be approved by a majority vote of the syndicate members, based on participation, and such adjustments are disclosed to syndicate members on a regular basis. The Board does not believe, however, that the necessity for mandatory disclosure of this information has been shown.

It was also recommended that a provision be added to draft rule G–11B to require a syndicate manager to disclose to syndicate members, upon request, information showing the actual allocation of securities among syndicate members and customers and the orders which were designated. The Board is of the view that such disclosure is not necessary to ensure compliance with proposed rule G–11. Allocation of securities by the syndicate will be subject to examination by the appropriate regulatory authorities.

One commentator questioned the appropriateness of an exemption for short-term notes. The Board has decided not

to include such an exemption in proposed rule G–11 because in the Board's view the disclosure requirements of the proposed rule appropriately apply to underwritings of short-term notes.

The Board is of the opinion that the proposed rule change will not impose any burden on competition but, to the contrary, will promote competition by increasing the information available in the market place regarding the distribution of new issue municipal securities.

On or before September 30, 1977, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned selfregulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before September 30, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 18, 1977.

RULE G–11. SALES OF NEW ISSUE MUNICIPAL SECURITIES DURING THE UNDERWRITING PERIOD

(a) Definitions. For purposes of this rule, the following terms have the following meanings:

(i) The term "accumulation account" means an account established in connection with a municipal securities investment trust to hold securities pending their deposit in such trust.

(ii) The term "customer" means any person other than a broker, dealer, or municipal securities dealer acting in its capacity as such.

(iii) The term "municipal securities investment trust" means a unit investment trust, as defined in the Investment Company Act of 1940, the portfolio of which consists in whole or in part of municipal securities.

(iv) The term "related portfolio," when used with respect to a municipal securities dealer, means a municipal securities investment portfolio of such municipal securities dealer or of any person directly or indirectly controlling, controlled by or under common control with such municipal securities dealer.

(v) The term "syndicate" means an account formed by two or more persons for the purpose of purchasing, directly or indirectly, all or any part of a new issue of municipal securities from the issuer, and making a distribution thereof.

(vi) The term "underwriting period" means the period commencing with the first submission to a syndicate of an order for the purchase of new issue municipal securities or the purchase of such securities from the issuer, whichever first occurs, and ending at such time as the issuer delivers the securities to the syndicate.

(b) Disclosure of Capacity. Every municipal securities dealer that submits an order to a syndicate or to a member of a syndicate for the purchase of municipal securities held by the syndicate shall disclose at the time of submission of such order if the securities are being purchased for its dealer account, for the account of a related portfolio of such municipal securities dealer, for a municipal securities investment trust sponsored by such municipal securities dealer, or for an accumulation account established in connection with such a municipal securities investment trust. The senior syndicate manager shall promptly disclose to the other members of the syndicate, upon request made prior to final settlement of the syndicate account, each order submitted for such a related portfolio, municipal securities investment trust, or accumulation account, indicating the identity of the related portfolio, municipal securities investment trust, or accumulation account, the aggregate face amount of each maturity and the maturity dates of the securities which are the subject of the order.

(c) Confirmations of Sale. Sales of securities held by a syndicate to a related portfolio, municipal securities investment trust or accumulation account referred to in paragraph (b) above shall be confirmed by the syndicate manager directly to such related portfolio, municipal securities investment trust or accumulation account. Nothing herein contained shall be construed to require that sales of municipal securities to a related portfolio, municipal securities investment trust or accumulation account be made by the syndicate.

(d) Priority of Orders. Every syndicate shall provide for the priority to be accorded to different types of orders for the purchase of securities from the syndicate during the underwriting period and, if such priority may be changed, the procedure for making changes. For purposes of this rule, the requirement to provide for priority shall not be satisfied solely by a provision permitting the syndicate manager or managers to determine in the manager's or managers' discretion the priority to be accorded different types of orders. Notwithstanding the foregoing, a syndicate may include a provision permitting the syndicate manager or managers on a case-by-case basis to allocate securities in a manner other than in accordance with the agreed upon order of priority, if the syndicate manager or managers determine in its or their discretion that it is in the best interests of the syndicate.

(e) Communications Relating to Priority of Orders and Ordered Period. Prior to the first offer of any securities by a syndicate, the senior syndicate manager shall communicate to the other members of the syndicate (i) the priority to be accorded to different types of orders for securities to be distributed by the syndicate, (ii) the procedure, if any, by which such priority may be changed, (iii) if the senior syndicate manager or managers are to be permitted on a case-by-case basis to allocate securities in a manner other than in accordance with the agreed upon order of priority, the fact that they are to be permitted to do so, and (iv) if there is to be an order period, whether orders may be confirmed prior to the end of the order period. For purposes of this provision, the term "order period" shall mean a period of time announced by the syndicate during which orders will be solicited for the purchase of securities held in syndicate. Any change in the provisions governing the priority of orders shall be promptly communicated by the senior syndicate manager to the other members of the syndicate. Syndicate members shall promptly communicate the information described in this paragraph to others, upon request.

(f) Disclosure of Syndicate Expenses. At or before the final settlement of a syndicate account, the senior syndicate manager shall furnish to the other members of the syndicate an itemized statement setting forth the nature and amounts of all actual expenses incurred on behalf of the syndicate. Notwithstanding the foregoing, any such statement may include an item for miscellaneous expenses: *Provided*, That the amount shown under such item is not disproportionately large in relation to other items of expense shown on the statement and includes only minor items of expense which cannot be easily categorized elsewhere in the statement. Discretionary fees for clearance costs and management fees to be imposed by a syndicate manager shall be disclosed to syndicate members prior to the submission of a bid, in the case of a competitive sale, or prior to the execution of a purchase contract with the issuer, in the case of a negotiated sale.

NEW ENGLAND POWER CO. ET AL.

Proposed Guaranty of Payment of Retrospective Insurance Premiums

AUGUST 19, 1977.

In the matter of New England Power Company, 20 Turnpike Road, Westborough, Mass. 01581, The Connecticut Light and Power Company, Selden Street, Berlin, Conn. 06037, The Hart-

V 42166 AUG 26 77 UMI

ford Electric Light Company, 175 Cumberland Avenue, Wethersfield, Conn. 06109, Western Massachusetts Electric Company, 174 Brush Hill Avenue, West Springfield, Mass. 01089.

Notice is hereby given that New England Power Company ("NEPCO"), an electric utility subsidiary of New England Electric System, a registered holding company, and The Connecticut Light and Power Company ("CL&P"), The Hartford Electric Light Company ("HELCO") and Western Massachusetts Electric Company ("WEMCO"), each of the last three named companies being an electric utility subsidiary of Northeast Utilities, a registered holding company, have filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Sections 12(b) and 12(f) of the Act and Rule 45 promulgated thereunder as applicable to the following proposed transaction. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transaction.

The declarants, together with other New England electric utilities, are sponsors and stockholders of four nuclear power generating companies in New England: Yankee Atomic Electric Company ("Yankee Atomic"), Connecticut Yankee Atomic Power Company ("Connecticut Yankee"), Vermont Yankee Nuclear Power Corporation ("Vermont Yankee") and Maine Yankee Atomic Power Company ("Maine Yankee") (collectively the "Yankee Companies"). The declarants and other sponsors have entered into power contracts with each of the Yankee Companies which obligate each sponsor to purchase its entitlement percentage of the output and capacity of the nuclear plant of each Yankee Company at a purchase price equal to the Yankee Company's cost, including depreciation and a return on equity. The declarants' respective percentages of common stock owned of and entitlements in each Yankee Company are as follows:

	Entitlement percentage in—			
	Yankee Atomic	Connecticut Yankee	Vermont Yankee	Maine Yankee
NEPCO	20.0	15.0	20.0	20
CL&P	15.0	25.0	6.0	8
HELCO	9.5	9.4	3.4	4
WMECO	7.0	9.5	2.5	3

The "Indemnification and Limitation of Liability" provisions (the "Price-Anderson Act") of the Atomic Energy Act of 1954 were added by amendment in 1957. The purpose of the Price-Anderson Act was to require certain nuclear licensees, including reactor operators to provide financial protection against public liability in the event of any nuclear incident and, since privately available protection was limited to $60 million of nuclear liability insurance, to provide for additional indemnification by the then Atomic Energy Commission (now Nuclear Regulatory Commission ("NRC")) in an amount up to $500 million. The Price-Anderson Act also established a limitation on the aggregate liability to the public equal to the sum of these two amounts, or $560 million. The NRC charges each licensee an annual fee for providing this indemnification. In the intervening years the amount of insurance available from the private sector has gradually increased to $140 million, and the NRC indemnification has correspondingly decreased because the $560 million limit of liability has remained fixed.

In 1975 the Atomic Energy Act of 1954 was again amended to provide an additional layer of insurance protection from private sources (namely, an industry retrospective rating plan) which would be available to be applied toward satisfaction of public damage claims before resorting to the federally funded indemnification. This additional private sector protection is created by assessments of up to $5 million per operating plant per incident ($10 million maximum per year) and presently, with 61 operating nuclear plants, would amount to $305 million. This significantly reduces the amount of federal indemnity which might be needed, and the NRC indemnification fees are therefore being sharply reduced.

This statutory requirement was implemented by NRC regulations of January 3, 1977, which require each licensee on and after August 1, 1977, to maintain financial protection in an amount equal to the sum of $140,000,000 and the amount available as secondary financial protection (in the form of private liability insurance available under an industry retrospective rating plan providing for deferred premium charges). In July, 1977, the NRC and two groups of insurance underwriters reached agreement on a draft form of Master Policy and Binders, setting forth the provisions of such secondary insurance. The insurance program provides that if after a nuclear incident at any reactor the aggregate damage claims exceed the amount available under the $140 million of primary insurance coverage, then an assessment of up to $5,000,000 in retrospective premiums may be made against each nuclear power plant for each incident (up to a maximum of $10,000,000 per year) to create an additional fund for meeting such damage claims, which fund would have to be exhausted before the federal indemnity were used. The insurance underwriters will administer that additional fund, process all claims, and guarantee up to an aggregate of $30,000,000 in retrospective premiums for licensees defaulting in the payment of their retrospective premiums. The licensees will each pay an annual premium of $6,000 in connection with this guarantee.

Since the Yankee Companies are single-purpose corporations with no significant assets other than their nuclear generating facilities, the insurance companies required that the Binders for each Yankee Company evidence not only the obligation of that Yankee Company to pay its retrospective premium but also the several undertakings of its sponsor companies to pay up to their respective entitlement percentages of that retrospective premium should the Yankee Company default. It is proposed that declarants' guarantees of their respective shares of the Yankee Companies retrospective premiums be authorized.

It is stated that the time constraints of the stautorily imposed August 1, 1977, deadline made it impossible to obtain Commission authorization for these undertakings of those sponsor companies to which the Act applies prior to that date, and that therefore declarants obligations under the Binders have been expressly made subject to obtaining necessary Commission approval.

The fees and expenses to be incurred in connection with the proposed transaction are estimated at $2,000, exclusive of legal fees, which will be filed by amendment. It is stated that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than September 8, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed, or as it may be amended, may be permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20 (a), and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 20146; 70-5734]

NORTHEAST UTILITIES, ET AL.

Post-Effective Amendment Related to Financing of Nuclear Fuel

AUGUST 22, 1977.

In the matter of Northeast Utilities, Hartford, Connecticut, the Connecticut Light and Power Company, The Hartford Electric Light Company, Western Massachusetts Electric Company, Northeast Nuclear Energy Company.

Northeast Utilities ("Northeast"), a registered holding company; The Connecticut Light and Power Company ("CL&P"), The Hartford Electric Light Company ("HELCO"), and Western Massachusetts Electric Company ("WMECO"), public-utility subsidiary companies of Northeast; and Northeast subsidiary company of Northeast formerly known as The Millstone Point Company, have filed with this Commission a further post-effective amendment to the application-declaration in this proceeding pursuant to Sections 9(a), 10, 12, and 13 of the Public Utility Holding Company Act of 1935 ("Act") and Rules 43 and 45 promulgated thereunder regarding the following proposed transactions.

CL&P, HELCO, and WMECO are the owners as tenants-in-common ("Owners") of the nuclear generating units known as Millstone Unit Nos. 1 and 2 located at the Millstone Nuclear Power Station, with 53 percent, 28 percent, and 19 percent ownership interests, respectively. NNEC is acting as the agent of the Owners with respect to the operation of these units pursuant to an Operating Agreement. It receives no fee for this service, and all costs are paid by the Owners. NNEC owns the fuel for the Unit Nos. 1 and 2 reactors. It has issued its own securities to pay for the fuel. The use of the fuel is governed by a Fuel Supply Contract with CL&P, HELCO, and WMECO.

By Orders in this proceeding dated October 21, 1975, January 16, 1976, October 22, 1976, and March 25, 1977 (HCAR Nos. 19218, 19346, 19726, and 19960), the Commission authorized NNEC to engage in certain financing of its nuclear fuel cores and related transactions, including the amending of the Fuel Supply Contract in certain respects. In said orders the Commission reserved jurisdiction over a proposal to increase NNEC's overall rate of return on total capitalization to an amount in excess of 10 percent per annum.

The Northeast system now proposes to amend the Fuel Supply Contract in two respects. First, it is proposed to exclude from NNEC's rate of return computation all costs of debt (both short and long-term) and other senior capital issued to nonaffiliates and to provide instead that the expenses for which the Owners would reimburse NNEC will include all expenses (interest, dividends, commitment fees, etc.) relating to NNEC's short and long-term debt and other senior capital issued to nonaffiliated persons to finance nuclear fuel. Second, the rate of return provision would thus become solely a return on NNEC's total equity capitalization (including common stock, retained earnings, capital contributions, etc., and all evidences of indebtedness issued by NNEC to the Owners, Northeast, or to any other associate company), and such equity return provided to NNEC by the Owners would be revised to be set at a rate equal to the weighted (on an ownership basis) average return on equity granted to the Owners in their most recent retail rate proceedings before the Connecticut and Massachusetts regulatory commissions.

The proposed amendment to the Fuel Supply Contract would be effective as of January 1, 1977. Accordingly, the annual equity return and the overall rate of return on NNEC's capital for the calendar year 1977 under the computation proposed for the Fuel Supply would be 13.095 percent and 11.440 percent, respectively.

As of January 1, 1977, the capitalization of NNEC was as follows:

Total long-term debt	$29,000,000
Equity:	
Common stock	15,000
Paid in capital	13,300,000
Retained earnings	5,018,000
Total equity	18,333,000
Total capitalization	47,333,000

It is stated that no consent or approval of any State commission or any Federal commission, other than this Commission, is required for the transactions proposd, except that the approval or prior authority of the Connecticut Public Utilities Control Authority is being sought in connection with the proposed amendment to the Fuel Supply Contract.

Notice is further given that any interested person may, not later than September 20, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said post-effective amendment to the application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants-declarants at the above-stated address and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as amended or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

OPTIONS CLEARING CORP.

Order Approving Rule Change To Extend Time for Tendering an Exercise Notice on Certain Business Days

AUGUST 18, 1977.

On June 28, 1977, The Options Clearing Corporation ("OCC"), 5950 Sears Tower, Chicago, Illinois 60606, submitted, pursuant to Rule 19b-4 under the Securities Exchange Act of 1934 (the "Act"), a proposed rule change to extend the time for tendering an exercise notice to 3:30 p.m. Central Time (4:30 p.m. Eastern Time) on business days other than the business day prior to the expiration date of the option contract.

Inaccordance with Section 19(b) of the Act and Rule 19b-4 thereunder, the proposed rule change was published in the FEDERAL REGISTER (42 FR 36579, July 15, 1977), and the public was invited to submit comments until August 5, 1977. Notice of the filing and an invitation for comments also appeared in Securities Exchange Act Release No. 13730, July 8, 1977. No letters of comment were received.

The Commission has reviewed the OCC submission and finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered clearing agencies, and in particular, the requirements of Section 17A and the rules and regulations thereunder.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the proposed rule change contained in File No. SR-OCC-77-10 be, and hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on July 28, 1977, the above-mentioned self-regulatory organization filed with the Securities and Ex-

V 42 166 AUG 26 77 UMI

change Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed rule change would permit the deposit of Government securities as margin in approved depositories, a broader class of institutions than approved banks.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the proposed rule change is as follows:

The purpose of the proposed amendment to Rule 604 is to enlarge the class of institutions in which Government securities may be deposited for margin purposes. The term "approved depository" defined in Article I, Section 1 (aaa) of OCC's By-Laws includes an approved trust company as well as an approved bank and the proposed rule change would thus permit Government securities held as margin to be deposited in securities depositories organized as trust companies.

The proposed rule change contributes to the protection of investors and the public interest by enabling Clearing Members to deposit Government securities for margin purposes in a wider variety of institutions.

Comments were not and are not intended to be solicited with respect to the proposed rule change.

OCC does not believe that the proposed rule change would impose any burden on competition.

On or before September 30, 1977, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before September 16, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 16, 1977.

[FR Doc.77-24777 Filed 8-25-77;8:45 am]

[Release No. 13870; File No. 7-4933]

PACIFIC STOCK EXCHANGE, INC.

Order Directing an Additional Comment Period Regarding Application for Unlisted Trading Privileges in Common Stocks of Pacific Resources, Inc.

AUGUST 18, 1977.

On March 23, 1977, the Pacific Stock Exchange, Inc. ("PSE") filed, pursuant to Section 12(f)(1)(C) of the Securities Exchange Act of 1934 (the "Act"), an application for unlisted trading privileges in the common stock of Pacific Resources, Inc. ("PRI").[1] The National Association of Securities Dealers ("NASD") filed a written submission, dated April 22, 1977, in which it requested a hearing on the PSE application. Submissions in opposition to the application were also received from PRI and potential over-the-counter ("OTC") market-makers in the stock. We considered the application and these submissions and on June 22, 1977 issued an order directing a hearing on whether the PSE application should be granted.[2]

In response to the Order Directing a Hearing, submissions addressing the issues set forth in the order were filed by PRI, PSE and the NASD.[3] In its submission and a letter dated August 10, 1977, the NASD has requested that we allow an additional comment period so that it might have the opportunity to respond in rebuttal to certain representations contained in the PSE filing.[4] We have also received a letter dated August 12, 1977 by which the PSE objects to the NASD requests.[5]

We believe that an additional comment period may be useful in providing a more complete record to review in considering the PSE application and that such additional comment period may be provided without jeopardizing the time frame which we anticipated in the order granting the delisting of PRI common stock. When persons have expressed a willingness to provide additional factual or policy arguments concerning matters being considered by the Commission, we have generally taken a liberal stance in allowing such information to be included in the record. This policy is particularly appropriate here since numerous novel and complex issues are presented by the PSE application. We believe that the information which the NASD has requested to file would be pertinent to the issues raised by the Order Directing a Hearing and may thereby assist us in our deliberations.

Further, in fairness to the other commentators and to facilitate action on the PSE application within the anticipated 120-day time period, we are limiting the additional comment period to the receipt of information in response to the submissions of the initial three commentators and providing that the additional comment period will terminate on September 2, 1977.[6]

Accordingly, as set forth above, we hereby order that interested persons may file submissions in response to submissions received pursuant to the Order Directing a Hearing issued on June 22, 1977. Persons desiring to make written submissions should file six (6) copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. All submissions should refer to the file number referenced in the caption above and should be submitted on or before September 2, 1977.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-24762 Filed 8-25-77;8:45 am]

[Release No. 34-13858; File No. SR-PHLX 77-10]

PHILADELPHIA STOCK EXCHANGE, INC.

Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on July 29, 1977, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

PHILADELPHIA STOCK EXCHANGE'S STATEMENT OF TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The Philadelphia Stock Exchange ("PHLX") proposes to decrease the subsequent option fee from $7,500 to $5,000 effective July 18, 1977 through August 18, 1977, then increase the subsequent option fee to $33,000 from August 19, 1977 and thereafter.

STATEMENT OF BASIS AND PURPOSE

PHLX has stated that "[t]he purpose of the proposed rule change is to promote the free trading in the secondary market of memberships with options privileges."

In a notice to its members (Circular No. 17-16), the Exchange states that "[t]he availability of the $7,500 fee combined with the current market for memberships has effected a ceiling of $7,500 in the secondary market for option trading privileges. Present holders of options trading privileges who are desirous of removing the ceiling requested the Board, through the Committee on Options, to take action to eliminate the $7,500 ceiling."

The proposed rule change relates to the fair administration of the Exchange.

The proposed rule change was initiated at the request of the Committee on Options acting at the suggestion of members who held memberships with option privileges.

The Exchange believes that the proposed rule change does not impose any burden on competition.
